

Objective

Community art is an interactive experience to connect people, share ideas and develop a rapport with the community with the help of local NGOs. We are creating projects to facilitate the engagement process, so that people can spend time learning, exploring and having fun through art. We will place learning at the heart of the project and will trail new approaches and innovate the engagement process with our partners in the community. As a result, we aim to enrich the well-being of the residents and play our part in building a cohesive community and civil society.
