

## **Mental Health and Psychosocial Wellbeing of Conflict-Induced Displaced Persons in Hong Kong**

Non-refoulement claimants in Hong Kong are resilient people that face several challenges to their holistic health and wellbeing. Community dialogue around health and mental health determinants is urgent and necessary. The symposium offers a space for sharing health determinants from community members. Perspectives will be provided by members of the non-refoulement claimant community, academics, local service providers and an international speaker. Research findings, current initiatives, the linkages to the legal and protection systems will be shared alongside audience discussion. We hope to enable dialogue that will result in holistic health advocacy for the non-refoulement community.
