

JC-WISE "My River, My Community" Scheme Workshop and Guided Field Trip to Sheung Yue River Catchment

Meandering through extensive farmland, Sheung Yue River is an important water source for irrigation in Hong Kong. This programme comprising **workshop, field trip** and **farming activities**, is innovatively designed to equip participants with in-depth knowledge of Hong Kong's rivers as well as Sheung Yue River for leading public to appreciate the multiple values of our rivers. A comprehensive database and drone videos of Sheung Yue River will be presented at the workshop to highlight multiple features of rivers. The field trip begins at natural streams and farmland in the upper course of Sheung Yue River where river water has been diverted for irrigation. Through farming activities at Long Valley Wetland, participants will learn about the crucial role of rivers in agriculture and ecological conservation.
