

School Talk: My River, My Community

With the theme of “My River, My Community”, this school talk introduced the multiple functions and values of local rivers to students through presentation, documentary screening and quizzes. Based on the geographical location of the school, Dr Cho-nam Ng (Project Co-investigator of JC-WISE) used rivers in the Yuen Long District as examples, i.e. Shan Pui River and Kam Tin River, to let students learn more about rivers in their communities. In the documentary titled “Connect, Disconnect, Reconnect”, the multiple functions and values of rivers in Hong Kong were highlighted. Besides, the impacts of channelisation and new directions of river management were discussed.
