Professor Raffael Kalisch
Neuroimaging Center (NIC)
Johannes Gutenberg University Mainz

Professor Raffael Kalisch is from the Neuroimaging Center (NIC) at Johannes Gutenberg University Mainz. He is the Coordinator of DynaMORE (Dynamic Modelling of Resilience), an international research project funded by the European Horizon 2020 programme. He is also the Founding Member of Deutsches Resilienz Zentrum Mainz (DRZ) in 2015; and Professor for Human Neuroimaging (WZ) and Director of Neuroimaging Centre since 2012.

Professor Kalisch is interested in neuro-cognitive mechanisms contributing to resilience to the effects of trauma, stress, adversity. Knowledge of these protective mechanisms will show new ways to improve the prevention and therapy of stress-related mental dysfunction and disorders like PTSD, anxiety or depression. His focus is on safety learning mechanisms e.g. fear extinction and on cognitive emotion regulation processes e.g. reappraisal.
