**REGULATIONS FOR THE DEGREE OF
BACHELOR OF SOCIAL SCIENCES
(BSocSc)**

(See also General Regulations and Regulations for First Degree Curricula)

Definitions

SS1⁽¹⁾ In these Regulations, and in the Syllabuses for the degree of BSocSc, unless the context otherwise requires -

‘Core departments’ means the Departments of Politics and Public Administration, Psychology, Social Work and Social Administration, and Sociology;

‘Non-core departments’ means departments, centres, schools and programmes, other than core departments, teaching in the Faculty of Social Sciences;

‘Department’ means any one of the core and non-core departments;

‘Course’ means a course of instruction which normally carries 6 credits or in some cases 3 credits or multiples of 3, leading to one examination paper as defined in the syllabus;

‘Paper’ means one or more of the following tests: a theoretical examination paper, a practical examination paper, an assessment of field practice, a thesis, and a dissertation, or other assignments as prescribed in the syllabus of the course leading to it;

‘Credits’ means the weight assigned to each course relative to the total study load. The number of credits is indicative of the contact hours and/or study time associated with the course on a weekly basis;

‘Pre-requisite’ means a course which candidates must have completed as specified to the satisfaction of the Head of Department before being permitted to take the course in question.

Admission to the degree

SS2 To be eligible for admission to the degree of Bachelor of Social Sciences candidates shall

- (a) comply with the General Regulations;
 - (b) comply with the Regulations for First Degree Curricula; and
 - (c) complete the curriculum in accordance with the regulations that follow.
-

Length of study

SS3 The curriculum shall normally extend over three academic years consisting of six semesters of full-time study, excluding the summer semesters. Candidates shall not in any case be permitted to complete the curriculum in more than four academic years, which being the maximum period of registration.

Completion of the curriculum

SS4 To complete the curriculum, candidates shall:

- (a) satisfy the requirements prescribed in UG3 of the Regulations for First Degree Curricula⁽²⁾;
- (b) enrol in not less than 180 and not more than 216 credits of courses, unless otherwise required or permitted under the Regulations;

⁽¹⁾ This regulation should be read in conjunction with UG1 of the Regulations for First Degree Curricula.

⁽²⁾ The specific requirements applicable to candidates of this degree curriculum are spelt out in the syllabuses.

- (c) follow the required number of compulsory and elective courses as prescribed in the syllabuses of the equivalent of normally 60 credits for each year of study. For each semester, candidates shall select not less than 24 and not more than 36 credits of courses except for the last semester of study;
 - (d) take a maximum of 84 credits of junior level courses and the rest being senior level courses as prescribed in the syllabuses over the entire period of studies;
 - (e) take not less than 48 and not more than 78 credits of senior level courses from a single core department except where otherwise stated in the syllabuses.
-

Selection of courses

SS5 Candidates who wish to change their selection of courses at the beginning of each semester may do so up to 2 weeks after the commencement of the semester. Requests for changes beyond the 2-week deadline will not be permitted, except for medical or other reasons accepted by the Faculty Board, and candidates' withdrawal from any course without permission will be given a failing grade.

Assessment and grades

SS6 Candidates shall be assessed for each of the courses which they have registered. The assessment may take one or a combination of forms as prescribed in the syllabuses and shall normally include the candidates' coursework during the semester. Only those satisfactorily completed courses will earn credits.

SS7 Candidates' performance in a course shall be assessed with the grading system as prescribed in UG5 of the Regulations for First Degree Curricula.

Failure in examination

SS8 Candidates who fail in any course may, as directed by the Board of Examiners, be permitted to present themselves for re-assessment with or without repeating the failed course. The timing and the form(s) of re-assessment shall be decided by the Board of Examiners. Candidates shall not be allowed to repeat a course for which they have achieved a passed grade for upgrading purposes, nor shall they be permitted to repeat a course more than once. The failed grade will be recorded in the official transcripts. The new grade obtained after re-assessment of the same failed course will also be recorded and will replace the previous F grade in the calculation of the weighted grade point averages. As failed courses shall not be credited towards a degree, failed compulsory courses must be re-assessed.

Absence from examination

SS9 Candidates who are unable because of their illness to be present for any written examinations may apply for permission to present themselves for a supplementary examination to be held before the beginning of the first semester of the following academic year. Any such application shall be made on the form prescribed within two weeks of the first day of absence from any examination. Candidates who fail to satisfy the examiners in one or more papers in such a supplementary examination shall be considered under the provisions made in these Regulations for failure at the first attempt at the examination, except that a further supplementary examination shall not be permitted.

Performance assessment

SS10 At the end of each semester, candidates' performance shall be assessed for the purposes of

determining

- (a) their eligibility for progression to an award of the degree;
- (b) their eligibility for the award; or
- (c) whether they be required to be discontinued from the programme.

Progression of studies

SS11 Candidates shall be permitted to progress if they have:

- (a) not exceeded the maximum period of registration; and
- (b) accumulated not less than 30 credits and attained a GPA of 1.00 or above over the first and second semesters; or
- (c) accumulated not less than 30 credits and attained a GPA of 1.50 or above over the third and fourth semesters; or
- (d) accumulated not less than 30 credits and attained a GPA of 1.50 or above over the fifth and sixth semesters; or
- (e) attained a semester GPA of 1.50 or above at the end of each subsequent semester.

Those who have not been able to fulfill the requirements above shall be recommended for discontinuation from the programme under General Regulation G12.

Award of the degree

SS12 To be eligible for the award of the degree of BSocSc, candidates shall have:

- (a) achieved a weighted GPA of 1.00 or above;
- (b) successfully accumulated a minimum of 180 credits; and
- (c) satisfied the requirements in UG3 of the Regulations for First Degree Curricula.

Degree classification

SS13 A list of candidates who have successfully completed all the degree requirements shall be published in five divisions: First Class Honours, Second Class Honours Division One, Second Class Honours Division Two, Third Class Honours, Pass. The classification of honours shall be determined by the Board of the Faculty at its full discretion by taking the overall performance of candidates and other relevant factors into consideration.

SYLLABUSES FOR THE DEGREE OF BACHELOR OF SOCIAL SCIENCES

For candidates admitted in or before the academic year 2003-2004

GENERAL FEATURES

1. Streams

Two streams of study, each leading to the award of the BSocSc degree, are available for pursuance. They are: the general stream and the statistics stream. Candidates seeking admission to the BSocSc curriculum will indicate their choices of streams for consideration, in priority order. Offers of admission to the BSocSc curriculum should specify the stream to which the offer is related. Once admitted to a stream, candidates are not allowed to transfer to another except with the approval of the Faculty Admissions Committee.

2. Curriculum requirements

Regulations SS1 to 5 specify the requirements with which candidates have to comply for completion of the BSocSc degree programme. Further details of the requirements are given in the syllabuses.

The programme which normally extends over three academic years of six semesters of full-time study provides candidates with the flexibility of completing their studies within a maximum period of four academic years. Candidates shall enrol in not less than 180 credits of courses for the curriculum. They shall select not less than 24 and not more than 36 credits of courses for each semester. The normal semester load is 30 credits.

A. Junior-level courses

Candidates should take all the junior-level courses listed below which include the successful completion of the three language studies courses and the broadening courses as prescribed in Regulation UG3 “Requirements for Graduation” of the Regulations for First Degree Curricula. For the fulfillment of Regulation UG3, candidates shall also obtain a pass in an Information Technology proficiency test, or successfully complete a 3-credit course in Information Technology. Candidates may take additional courses and the maximum number of credits of junior-level courses to be taken is 84.

- a) Language studies courses:
- | | |
|--|-------------|
| ECEN1901. Academic English for social sciences | (3 credits) |
| ECEN2902. English for professional communication for social sciences | (3 credits) |
| CSSC1001. Practical Chinese language course for social sciences students | (3 credits) |
- b) Broadening courses:
- | | |
|---|---------------|
| Science and technology studies | (3 credits) |
| Culture and value studies or any inter-faculty electives course outside the BSocSc syllabus | (3-6 credits) |
| at least one and at most two Broadening courses offered by core departments and School of Economics and Finance | (3-6 credits) |
- c) Core and non-core introductory courses:
- i) five 6-credit courses, one from each of the following core departments:
- | | |
|---------------------------------------|--------------|
| Politics and Public Administration | |
| Psychology | |
| Social Work and Social Administration | |
| Sociology | |
| Statistics and Actuarial Science | (30 credits) |
- ii) one 6-credit course from the School of Economics and Finance (6 credits)
- iii) one 6-credit course from a non core department (6 credits)
- iv) one 6-credit course from either a core or a non core department other than c(ii) (6 credits)
-

B. Senior-level courses

- a) It is mandatory that candidates should pursue a 'major' or a 'double major' in the case of the general stream.

- i) A 'major' is defined as taking not less than 48 and not more than 78 credits of courses from a single core department listed below:

General Stream

Politics and Public Administration

Psychology

Social Work and Social Administration (only Social Administration will be shown on the transcript)

Sociology

Statistics Stream

Statistics and Actuarial Science

- ii) a 'double major' is defined as taking not less than 48 credits of courses from each of the two departments or programmes concerned, with the total combined credits from the two departments or programmes concerned not exceeding 108 credits. Candidates may 'double major' from any two of the departments or programmes specified below:

General Stream

Any two departments listed in a)i) above; or one of the departments listed in a) i) above in combination with any one of the following:

Core Disciplinary Second Major

Statistics and Actuarial Science

Core Multi-disciplinary Second Majors

Criminal Justice

Global Studies

Media and Cultural Studies

Public and Social Administration

Non Core Second Majors

American Studies

Economics and Finance

History

Linguistics and Philosophy

Philosophy

Statistics Stream

Statistics and Actuarial Science in combination with any one of the following:

Core Disciplinary Second Majors

Politics and Public Administration

Psychology

Social Work and Social Administration (only Social Administration will be shown on the transcript)

Sociology

Core Multi-disciplinary Second Majors

Criminal Justice

Global Studies

Media and Cultural Studies

Public and Social Administration

Non Core Second Majors

American Studies

Economics and Finance
 History
 Linguistics and Philosophy
 Philosophy

b) Minor (optional)

After selecting the appropriate courses to satisfy the 'major' requirement, the remaining courses may be selected from other core or non-core departments/programmes in the Faculty according to candidates' interests. A 'minor' is defined as taking not less than 24 credits unless otherwise specified in the following single core/non-core department/programme approved by the Faculty. Candidates may take at most 30 credits of senior-level courses from non-core departments with the exception of the Programme in American Studies, the School of Economics and Finance, and the Departments of History, Law, and Philosophy. Candidates shall only minor in either Journalism and Media Studies or Media and Cultural Studies.

Core Departments

Disciplinary Minors

Politics and Public Administration
 Psychology
 Social Administration
 Sociology
 Statistics and Actuarial Science

Multi-disciplinary Minors

Applied Child Development
 Criminal Justice
 Family and Child Studies
 Global Studies
 Human Resources Management
 International Business
 Media and Cultural Studies
 Public and Social Administration

Non Core Departments

Disciplinary Minors

American Studies
 Business
 Chinese
 Comparative Literature
 Computer Science and Information Systems
 Economics and Finance
 English
 European Studies
 Fine Arts
 Geography
 History
 Japanese Studies
 Journalism and Media Studies
 Language
 Linguistics
 Music
 Philosophy

Interdisciplinary Minors

Histories and Cultures of the Asia-Pacific Region

Contemporary China and Hong Kong

The West in Asia

Critical Thinking, Reading, and Writing

The Culture of Business in the Modern World

Technology in the Humanities

Globalism: Cultures, Spaces, Languages

Women and Gender

Self-expression, Communication, and the Human Subject

Note:

a) For junior-level courses listed above, all of the courses should be taken in the first or second semester of study with the exception of the following:

Courses to be taken in the third or fourth semester of study are:

Professional communication for social sciences

Culture and value studies or any inter-faculty elective course

Science and technology studies

at most one 6-credit core or non-core junior-level course

at most one 3-credit broadening course (not applicable to those candidates who have already taken 6 credits in broadening course(s) in the first or second semester of study)

Candidates should ensure that they have taken the relevant junior-level course(s) for the subject in which they intend to major. All junior-level courses should be completed before the fourth semester.

For candidates in the statistics stream, they must take Mathematics and are advised to select Computer Science and Information Systems under categories A c) iii) and iv).

b) For senior-level courses at B) a) and b) above,

Candidates may take at most 6 credits of senior-level courses in the first or second semester of study, while the remaining should be taken in the third and subsequent semesters of study.

For 'Multi-disciplinary majors', selection is subject to the compliance with prescribed requirements and acceptance by the Heads of Departments/staff concerned.

c) Candidates may take at most 12 3-credit courses for the curriculum, while the remaining should be 6-credit or more courses.

3. Course registration

Course registration will take place before the commencement of each semester.

Candidates are advised to consult relevant teachers or Heads of Departments on the suitable combinations of courses and to adhere closely to the normal study pattern. Less suitable combinations of courses may not be permitted because of timetabling difficulties. Courses listed in the syllabuses may not necessarily be offered every year; and depending on the exigencies of staffing, additional courses may be offered.

Candidates may change their course selection during the two-week add/drop period which is scheduled at the beginning of each semester. Requests for changes beyond the 2-week deadline will not be permitted, except for medical or other reasons acceptable by the Faculty Board. Candidates' withdrawal from any course without permission will be given a failed grade. In course registration, candidates should pay special attention to the pre-requisite and co-requisite requirements of courses as specified in the syllabuses. A prerequisite is a course which candidates must have completed in accordance with the conditions stipulated by the Head of Department before being permitted to take a course in question. A co-requisite is

a course which candidates must take at the same time as the course in question.

4. Coursework and examination ratio

Each 6-credit course leads to one written examination paper which will be two hours in length, or three hours in the case of a 12-credit course, unless otherwise specified. The final grading of each course will be determined by performance in the examination and an assessment of coursework in the ratio of 60:40, unless otherwise specified.

The examinations and assessments of courses carrying weightings other than 6 and 12 credits are detailed in the syllabuses.

For candidates admitted in or after the academic year 2004-2005

GENERAL FEATURES

1. Curriculum requirements

Regulations SS1 to 5 specify the requirements with which candidates have to comply for completion of the BSocSc degree programme. Further details of the requirements are given in the syllabuses.

The programme which normally extends over three academic years of six semesters of full-time study provides candidates with the flexibility of completing their studies within a maximum period of four academic years. Candidates shall enrol in not less than 180 and not more than 216 credits of courses for the curriculum. They shall select not less than 24 and not more than 36 credits of courses for each semester. The normal semester load is 30 credits.

A. Junior level courses

Candidates are required to take all the junior level courses listed below which include the successful completion of the three language studies courses and the broadening courses as prescribed in Regulation UG3 "Requirements for Graduation" of the Regulations for First Degree Curricula. For the fulfillment of Regulation UG3, candidates shall also obtain a pass in an Information Technology proficiency test, or successfully complete a 3-credit course in Information Technology. Candidates may take additional courses and the maximum number of credits of junior level courses to be taken is 84.

For candidates admitted in the academic year 2004-2005

- a) Language studies courses:
 - ECEN1901. Academic English for social sciences (3 credits)
 - ECEN2902. English for professional communication for social sciences (3 credits)
 - CSSC1001. Practical Chinese language course for social sciences students (3 credits)

- b) Broadening courses:
 - Science and technology studies (3 credits)
 - Culture and value studies or any elective course offered outside the core departments of the Faculty of Social Sciences (3-6 credits)

- c) Core and non-core introductory courses:
- i) four 6-credit courses, one from each of the following core departments:
 - Politics and Public Administration
 - Psychology
 - Social Work and Social Administration
 - Sociology (24 credits)
 - ii) one 6-credit course from the Department of Statistics and Actuarial Science (6 credits)
 - iii) one 6-credit course from the School of Economics and Finance (6 credits)
 - iv) one 6-credit course from a non core department (6 credits)
 - v) remaining credits of courses should be taken from other junior level courses as stipulated in the syllabus of BSocSc (12 credits)

For candidates admitted in or after the academic year 2005-2006

- a) Language studies courses:
- [ECEN1901](#). Academic English for social sciences (3 credits)
 - [ECEN2902](#). English for professional communication for social sciences (3 credits)
 - [CSSC1001](#). Practical Chinese language course for social sciences students (3 credits)
- b) Broadening courses:
- Science and technology studies (3 credits)
 - Culture and value studies or any elective course offered outside the core departments of the Faculty of Social Sciences (3-6 credits)
- c) Core and non-core introductory courses:
- i) four 6-credit courses, one from each of the following core departments:
 - Politics and Public Administration
 - Psychology
 - Social Work and Social Administration
 - Sociology (24 credits)
 - ii) [FOSS1002](#). Appreciating social research (6 credits)
 - iii) [FOSS1003](#). Masters in social thought (6 credits)
 - iv) one 6-credit course from a non core department (6 credits)
 - v) remaining credits of courses should be taken from other junior level courses as stipulated in the syllabus of BSocSc (12 credits)

B. Senior level courses

- a) It is mandatory that candidates should pursue a 'major' or a 'double major' in the case of the general stream.

- i) A 'major' is defined as taking not less than 48 credits (Candidates who major in psychology should register not less than 54 credits) and not more than 78 credits of courses from a single core department listed below:

Politics and Public Administration
 Psychology
 Social Work and Social Administration
 Sociology

- ii) a 'double major' is defined as taking not less than 48 credits of courses (Candidates who major in Psychology or Japanese Studies should register not less than 54 credits) from each of the two departments or programmes concerned, with the total combined credits from the two departments or programmes concerned not exceeding 108 credits (For the case of Psychology and Japanese Studies major, the number of credits should not exceeding 114 credits). Candidates may 'double major' from any two of the departments or programmes specified below:

Any two departments listed in a)i) above; or one of the departments listed in a)i) above in combination with any one of the following:

Core Multi-disciplinary Second Majors

Criminal Justice
 Global Studies
 Media and Cultural Studies
 Public and Social Administration

Non Core Second Majors

b) Minor (optional)

After selecting the appropriate courses to satisfy the 'major' requirement, the remaining courses may be selected from other core or non-core departments/programmes in the Faculty according to candidates' interests. A 'minor' is defined as taking not less than 24 credits unless otherwise specified in the following single core/non-core department/programme approved by the Faculty. Candidates shall only minor in either Journalism and Media Studies or Media and Cultural Studies.

Core Departments

Disciplinary Minors

Politics and Public Administration

Psychology

Social Work and Social Administration

Sociology

Multi-disciplinary Minors

Applied Child Development

Criminal Justice

Family and Child Studies

Global Studies

Human Resources Management

International Business

Media and Cultural Studies

Public and Social Administration

Non Core Departments

Disciplinary Minors

Actuarial Studies

American Studies

Astronomy

Biochemistry

Biology

Biotechnology

Business

Chemistry

Chinese (*For candidates admitted in or before the academic year 2004-2005*)

Chinese Language and Literature (*For candidates admitted in or after the academic year 2005-2006*)

Chinese History (*For candidates admitted in or after the academic year 2005-2006*)

Chinese Studies (*For candidates admitted in or after the academic year 2005-2006*)

Comparative Literature

Computer Science

Earth Sciences

Ecology & Biodiversity

Economics

Environmental Protection

European Studies

Exercise Science (*For candidates admitted in or after the academic year 2005-2006*)

Finance

Food & Nutritional Science
 Fine Arts
 General Science
 Geography
 History
 Japanese Studies (Japanese Language/Japanese Culture)
 Journalism and Media Studies
 Language (Arabic/French/German/Italian/Portuguese/Spanish/Swedish/Thai)
 Legal Studies
 Linguistics
 Mathematics
 Music
 Philosophy
 Physics
 Risk Management
 Statistics
 Translation (*For candidates admitted in or after the academic year 2005-2006*)

Interdisciplinary Minors

Contemporary China and Hong Kong
 Critical Thinking, Reading, and Writing
 Globalism: Cultures, Spaces, Languages
 Histories and Cultures of the Asia-Pacific Region
 Self-expression, Communication, and the Human Subject
 Technology in the Humanities
 The Culture of Business in the Modern World
 The West in Asia
 Women and Gender

Note:

- a) Candidates should complete the following courses in or before the fourth semester:
 - Practical Chinese language course for social sciences (in the second semester)
 - Academic English for social sciences students (in the first semester)
 - English for professional communication for social sciences (in the fourth semester)
 - Culture and value studies or any elective course offered outside the core departments of the Faculty of Social Sciences
 - Science and technology studies
 - Foundations to information technology or Information technology proficiency test
- b) Candidates should ensure that they have taken the relevant junior level course(s) for the subject in which they intend to major.
- c) For 'Multi-disciplinary majors', selection is subject to the compliance with prescribed requirements and acceptance by the Heads of Departments/staff concerned.
- d) Candidates may take at most 12 3-credit courses for the curriculum, while the remaining should be 6-credit or more courses.
- e) For the course descriptions, please refer to the BA, BBA, BBA(Acc&Fin), BBA(IBGM), BBA(IS), BBA(Law), BEcon, BEcon&Fin, BFin, BJ and BSc syllabuses.

2. Course registration

Course registration will take place before the commencement of each semester.

Candidates are advised to consult relevant teachers or Heads of Departments on the suitable combinations of courses and to adhere closely to the normal study pattern. Less suitable combinations of courses may not be permitted because of timetabling difficulties. Courses listed in the syllabuses may not necessarily be offered every year; and depending on the exigencies of staffing, additional courses may be offered.

Candidates may change their course selection during the two-week add/drop period which is scheduled at the beginning of each semester. Requests for changes beyond the 2-week deadline will not be permitted, except for medical or other reasons acceptable by the Faculty Board. Candidates withdrawal from any course without permission will be given a failed grade. In course registration, candidates should pay special attention to the pre-requisite and co-requisite requirements of courses as specified in the syllabuses. A prerequisite is a course which candidates must have completed in accordance with the conditions stipulated by the Head of Department before being permitted to take a course in question. A co-requisite is a course which candidates must take at the same time as the course in question.

3. Coursework and examination ratio

Each 6-credit course leads to one written examination paper which will be two hours in length, or three hours in the case of a 12-credit course, unless otherwise specified. The final grading of each course will be determined by performance in the examination and an assessment of coursework in the ratio of 60:40, unless otherwise specified.

The examinations and assessments of courses carrying weightings other than 6 and 12 credits are detailed in the syllabuses.

CORE DISCIPLINARY AND MULTI-DISCIPLINARY MAJORS AND MINORS OFFERED BY THE FACULTY OF SOCIAL SCIENCES

1. Politics and Public Administration

I. Candidates who wish to major/double major in Politics and Public Administration (PPA) must successfully complete

a) the following compulsory courses:

- in semester I or II: [POLI1003](#) Making sense of politics (6 credits) (pre-requisite for majors)
- in semester III to IV: [POLI0062](#) Political analysis (6 credits) plus

one of –

- [POLI0005](#). Capitalism and social justice (6 credits)
- [POLI0010](#). Democracy and its critics (6 credits)
- [POLI0015](#). Ethics and public affairs (6 credits)
- [POLI0067](#). Liberalism and its limits (6 credits)

b) the following major options are available for choice:

i) standard PPA major:

- fulfill requirement in a), and
- take at least 36 credits of senior level Politics and Public Administration courses

ii) PPA major with a specialist stream:

- fulfill requirement in a), and
- take 24 credits of senior level Politics and Public Administration courses in a chosen specialist stream, and

- take another 12 credits of senior level PPA courses

iii) Public and Social Administration (details please refer to “Multi-disciplinary Majors within the General Stream”)

c) the specialist streams of PPA are:

- i) Comparative Politics
- ii) International Politics
- iii) Political Theory
- iv) Public Administration

(Courses affiliated to individual specialist streams are listed in the department’s handbook)

II. (a) Candidates admitted in or before the academic year 2004-2005 who wish to minor in Politics and Public Administration must successfully complete at least 24 credits of senior level courses in this department as specified in the syllabus.

(b) Candidates admitted in or after the academic year 2005-2006 who wish to minor in Politics and Public Administration must successfully complete the pre-requisite course [POLI1003](#) and at least 24 credits of senior level courses in this department as specified in the syllabus.

III. All PPA Courses are listed as below:

Junior Level

*[POLI1002](#). Fundamentals of public administration (6 credits)

[POLI1003](#). Making sense of politics (6 credits)

(* **this course is regarded as an elective course and not counted towards Major/Minor requirement**)

Senior Level

- [POLI0001](#). A special topic in political science (6 credits)
- [POLI0002](#). A special topic in political theory (6 credits)
- [POLI0003](#). Approaches to foreign policy analysis (6 credits)
- [POLI0004](#). Bureaucracy and the public (6 credits)
- [POLI0005](#). Capitalism and social justice (6 credits)
- [POLI0006](#). China and Hong Kong: the politics of transition (6 credits)
- [POLI0009](#). Comparative politics (6 credits)
- [POLI0010](#). Democracy and its critics (6 credits)
- [POLI0012](#). East Asian political economy (6 credits)
- [POLI0013](#). Elections and representative democracy (6 credits)
- [POLI0015](#). Ethics and public affairs (6 credits)
- [POLI0016](#). Gender and development (6 credits)
- [POLI0017](#). Government and business (6 credits)
- [POLI0018](#). The Japanese way of politics (6 credits)
- [POLI0019](#). Hong Kong and the world (6 credits)
- [POLI0020](#). Hong Kong politics (6 credits)
- [POLI0021](#). Understanding global issues (6 credits)
- [POLI0022](#). Governing China (6 credits)
- [POLI0023](#). Issues in contemporary Chinese politics (6 credits)
- [POLI0024](#). Issues in public administration (6 credits)
- [POLI0025](#). Managerial skills in public organizations (6 credits)
- [POLI0027](#). Public policy-making: theories and application (6 credits)
- [POLI0031](#). Politics of economic reform in China (6 credits)
- [POLI0033](#). Problems of the Third World (6 credits)
- [POLI0034](#). Public administration in China (6 credits)
- [POLI0035](#). Public administration in Hong Kong (6 credits)
- [POLI0037](#). Managing people in public organizations (6 credits)

POLI0038.	Public policy and democracy (6 credits)
POLI0039.	Public policy analysis (6 credits)
POLI0040.	Public sector management (6 credits)
POLI0041.	Research methods for politics and public administration (6 credits)
POLI0044.	American democracy (6 credits)
POLI0045.	The political economy of the European Union (6 credits)
POLI0046.	Thesis in politics or public administration (12 credits)
POLI0047.	United States foreign policy (6 credits)
POLI0050.	Women and politics (6 credits)
POLI0051.	Issues in Chinese political philosophy (6 credits)
POLI0052.	International relations of East Asia (6 credits)
POLI0058.	Managing the global economy (6 credits)
POLI0059.	China and the world (6 credits)
POLI0060.	Public financial management (6 credits)
POLI0061.	Hong Kong and South China: the political economy of regional development and cooperation (6 credits)
POLI0062.	Political analysis (6 credits)
POLI0063.	Performance and accountability in the public sector (6 credits)
POLI0064.	Governance and law (6 credits)
POLI0065.	Public organization and management (6 credits)
POLI0066.	Public administration and the public (6 credits)
POLI0067.	Liberalism and its limits (6 credits)
POLI0069.	Public policy, politics and social change (6 credits)
FOSS0003.	Human Security in the global context (6 credits)

Students who choose Politics and Public Administration as first major are not allowed to choose Public and Social Administration as their second major.

2. Psychology

I. Candidates who wish to major/double major in Psychology must successfully complete:

For candidates admitted in or after the academic year 2006-2007

a) Junior level courses:

either

i) **PSYC1001.** Introduction to psychology (6 credits); and
PSYC1004. Introduction to quantitative methods in psychology (6 credits)

or

ii) **PSYC1002.** How the mind works: explorations in basic thinking processes (6 credits); and
PSYC1003. Psychology and life: personality and social influence (6 credits); and
PSYC1004. Introduction to quantitative methods in psychology (6 credits)

Students who have taken **PSYC1001** are not allowed to take either **PSYC1002** or **PSYC1003** and vice versa.

b) Senior level courses:

At least 54 credits of senior level courses in the Department of Psychology including the following:

i) **Compulsory** course:

PSYC0060. Research and quantitative methods in psychology (taken in 2nd year)

and

Courses taken in 2nd or 3rd year:

- ii) 2 courses from the **First Stream**:
 PSYC0007. Cognitive psychology (6 credits)
 PSYC0022. Biological psychology (6 credits)
 PSYC0051. Perception (6 credits)
- and
- iii) 3 courses from the **Second Stream**:
 PSYC0009. Life-span developmental psychology (6 credits)
 PSYC0010. History and issues in psychology (6 credits)
 PSYC0019. Psychology of personality (6 credits)
 PSYC0020. Fundamentals of social psychology (6 credits)
 PSYC0062. Introduction to psychopathology (6 credits)
- and
- iv) 1 advanced lab course from the **Third Stream**:
 PSYC0008. Advanced cognitive Psychology (6 credits)
 PSYC0052. Advanced social psychology (6 credits)
 PSYC0053. Advanced research in I/O psychology (6 credits)
 PSYC0054. Human neuropsychology (6 credits)
 PSYC0061. Advanced issues in perception (6 credits)

For candidates admitted in or after the academic year 2003-2004; and before 2006-2007

- a) either
 PSYC1001. Introduction to psychology (6 credits)
 or
 both PSYC1002. How the mind works: explorations in basic thinking processes (6 credits) and
 PSYC1003. Psychology and life: personality and social influence (6 credits)

Students who have taken PSYC1001 are not allowed to take either PSYC1002 or PSYC1003 and vice versa.

- b) at least 48 credits (candidates admitted in or after the academic year 2004-2005 should register at least 54 credits) of senior level courses in the Department of Psychology including the following:

2 **compulsory** courses:

Course taken in 2nd year:

PSYC0001. Research methods in psychology (6 credits); and

Course taken in 3rd year:

either

PSYC3001. Thesis in psychology (6 credits) or

PSYC3002. Advanced research methods in psychology (6 credits)

(For candidates admitted in the academic year 2005-2006)

Note 1: Students have to take one of the following advanced lab courses as a co-requisite for PSYC3001 in the 2nd year or 3rd year.

Note 2: The 3rd year compulsory course requirement can also be fulfilled by one of these advanced lab courses, subject to approval by Department Head.

PSYC0008. Advanced cognitive Psychology (6 credits)

PSYC0052. Advanced social psychology (6 credits)

PSYC0053. Advanced research in I/O psychology (6 credits)

PSYC0054. Human neuropsychology (6 credits)

PSYC0061. Advanced issues in perception (6 credits)

2 courses from the **First Stream** (taken in 2nd or 3rd year):

- PSYC0007. Cognitive psychology (6 credits)
- PSYC0022. Biological psychology (6 credits)
- PSYC0051. Perception (6 credits)
- PSYC0054. Human neuropsychology (6 credits)

and 3 courses from the **Second Stream** (taken in 2nd or 3rd year):

- PSYC0009. Life-span developmental psychology (6 credits)
- PSYC0010. History and issues in psychology (6 credits)
- PSYC0019. Psychology of personality (6 credits)
- PSYC0020. Fundamentals of social psychology (6 credits)
- PSYC0062. Introduction to psychopathology (6 credits) (formerly PSYC0034)

II. Candidates who wish to minor in Psychology must successfully complete at least 24 credits of senior level courses in this department as specified in the syllabus.

III. The selection of courses and special topics in psychology available in a particular year is subject to the approval of the Head of the Department. In course registration, students should pay special attention to the prerequisite of courses as specified in the syllabuses. In exceptional cases these may be waived.

IV. All Psychology courses are listed as below:

Junior Level

- PSYC1001. Introduction to psychology (6 credits)
- PSYC1002. How the mind works: explorations in basic thinking processes (6 credits)
- PSYC1003. Psychology and life: personality and social influence (6 credits)
- PSYC1004. Introduction to quantitative methods in psychology (6 credits)

Senior Level

- PSYC0001. Research methods in psychology (6 credits) [For candidates admitted in or before the academic year 2005-06]
- PSYC0002. Psychological testing and measurement (6 credits)
- PSYC0005. Introduction to counselling and therapeutic psychology (6 credits)
- PSYC0007. Cognitive psychology (6 credits)
- PSYC0008. Advanced cognitive psychology (6 credits)
- PSYC0009. Life-span developmental psychology (6 credits)
- PSYC0010. History and issues in psychology (6 credits)
- PSYC0016. The psychology of stress and health (6 credits)
- PSYC0017. Motivation and achievement (6 credits)
- PSYC0019. Psychology of personality (6 credits)
- PSYC0020. Fundamentals of social psychology (6 credits)
- PSYC0022. Biological psychology (6 credits)
- PSYC0023. Psychology of human communication (6 credits)
- PSYC0029. Cognitive development (6 credits)
- PSYC0032. Engineering psychology (6 credits)
- PSYC0033. Industrial psychology (6 credits)
- PSYC0035. Introduction to educational psychology (6 credits)
- PSYC0036. Special topics in psychology (6 credits)
- PSYC0038. Psychology of language and bilingualism (6 credits)
- PSYC0040. Cross-cultural psychology (6 credits)
- PSYC0041. Consumer psychology (6 credits)
- PSYC0044. Organizational psychology (6 credits)
- PSYC0050. Knowing and acting in everyday life (6 credits)
- PSYC0051. Perception (6 credits)
- PSYC0052. Advanced social psychology (6 credits)
- PSYC0053. Advanced research in industrial/organizational psychology (6 credits)

- PSYC0054. Human neuropsychology (6 credits)
 PSYC0055. Research internship in psychology I (3 credits)
 PSYC0056. Research internship in psychology II (3 credits)
 PSYC0057*. Internship in applied child development (6 credits)
 PSYC0058. Cultural psychology (6 credits)
 PSYC0059. Current issues in applied developmental psychology (6 credits)
 PSYC0060. Research and quantitative methods in psychology (6 credits)
 PSYC0061. Advanced issues in perception (6 credits)
 PSYC0062. Introduction to psychopathology (6 credits)
 PSYC3001. Thesis in psychology (6 credits)
 PSYC3002. Advanced research methods in psychology (6 credits) [For candidates admitted in or before the academic year 2005-06]
 PSYC3006. Independent study in psychology (6 credits) [For candidates admitted in or after the academic year 2006-07]
- (* this course is only available for students minor in the Applied Child Development)
-

3. Social Work and Social Administration

[SOCH0056.](#) Criminal justice: policy and practice (6 credits)
[SOCH0060.](#) Fraud, corruption and computer crime (6 credits)

- SOCI0061. Life styles and religious practices (6 credits)
- SOCI0062. Media development and cultural change in contemporary China (6 credits)
- SOCI0063. Multicultural societies and modern identities (6 credits)
- SOCI0064. Globalization and the information society: myths, facts and emerging patterns (6 credits)
- SOCI0065. Understanding media studies (6 credits)
- SOCI0066. The Asian economic miracles and beyond (6 credits)
- SOCI0067. Crime and the media (6 credits)
- SOCI0068. Religious movements: peace, nationalism and terrorism (6 credits)
- SOCI0069. Perspectives on crime and deviance (6 credits)
- SOCI0070. Chinese identities and global networks (6 credits)
- SOCI0071. Criminology (6 credits)
- SOCI0072. Policy, governance and training in cultural tourism (6 credits)
Special topic in Sociology

IV. Senior level multi-disciplinary courses:

The following multi-disciplinary courses can also be counted as Sociology courses for students intending to major or minor in Sociology.

- FOSS0001. Media, culture and communication in contemporary China (6 credits)
- FOSS0005. Globalization and crime (6 credits)
- FOSS0006. Drug control in comparative perspective (6 credits)
- FOSS0011. Researching media and culture (6 credits)
- FOSS0014. Cultural studies and modern societies (6 credits)
- FOSS0015. Sexing culture and identity (6 credits)

Students who choose Sociology as first major are not allowed to choose Criminal Justice as their second major.

The following programmes are offered as second majors to BSocSc students. BSocSc students must declare the first major in one of the four core departments in the Faculty of Social Sciences.

5. Criminal Justice (Second Major)

I. Objectives

Crime and its control are among some of the oldest problems facing society. In comparison, criminal justice programme is a relatively recent development, though it is now a commonly accepted part of the university curriculum elsewhere. Criminal justice studies combines a concern for current problems and practices associated with crime control with an understanding of law and social sciences as they are related to criminal justice issues. Candidates will study topics such as criminology, the sociology of law, corrections, social policy, and social administration. The programme seeks to promote an understanding of not only 'how' the criminal justice system operates, but 'why' it should or should not continue to operate in the way it does, and is aimed for students who wish to assume a professional position in the criminal justice system and any one else having a general interest in crime and its control.

II. Pre-enrolment requirement

Candidates who wish to major in this programme must have taken or have successfully completed one of the following junior level courses:

- SOWK1001. Introduction to social administration (6 credits)
- SOWK1003. Introduction to social welfare (6 credits)
- SOCI1001. Introduction to sociology (6 credits)
- SOCI1002. Discovering society (6 credits)

Acceptance into the programme is conditional upon satisfactory completion of these courses in particular and subject to places available. Candidates who intend to select optional courses in Law during third and fourth semesters are encouraged to attend [LLAW1008. The legal system (6 credits)] in their first or second semester, in the Faculty of Law.

III. Programme structure

Candidates who wish to major in this programme must successfully complete 48 credits of senior level courses from the following list.

- a) Compulsory courses
[SOCI0071](#). Criminology (6 credits)
- b) Department of Sociology and Faculty
 A minimum of 24 credits of senior level courses from the following list:
[SOCI0005](#). Criminal behaviour (6 credits)
[SOCI0011](#). Gender and crime (6 credits)
[SOCI0033](#). Research project (6 credits)
[SOCI0038](#). Social control (6 credits)
[SOCI0041](#). Social problems (6 credits)
[SOCI0046](#). Sociology of law (6 credits)
[SOCI0047](#). Sociology of punishment (6 credits)
[SOCI0054](#). Triads and organized crime (6 credits)
[SOCI0056](#). Criminal justice: policy and practice (6 credits)
[SOCI0060](#). Fraud, corruption and computer crime (6 credits)
[SOCI0067](#). Crime and the media (6 credits)
[SOCI0069](#). Perspectives on crime and deviance (6 credits)
[FOSS0005](#). Globalization and crime (6 credits)
[FOSS0006](#). Drug control in comparative perspective (6 credits)
 Special topic in sociology (6 credits) (The topic covered in this course should be related to crime and criminal justice.)

Candidates who choose [SOCI0033](#) Research project (6 credits) will be required to complete a small research project dealing with some aspects of criminal justice.

- c) Other Departments
 A minimum of 12 credits of senior level courses from the following list:

School of Economics and Finance

[ECON0405](#). The economics of law (6 credits)

Social Work and Social Administration

[SOWK0028](#). Selected topics in social work practice (6 credits)

[SOWK0030](#). Law and social administration (6 credits)

[SOWK0033](#). Working with youth at risk and juvenile offenders (6 credits)

[SOWK0034](#). Youth crime and juvenile justice issues (6 credits)

Department of Law

[LLAW2003](#). Criminal law I (6 credits)

[LLAW2004](#). Criminal law II (6 credits)

[LLAW3001](#). Introduction to legal theory (6 credits)

[LLAW3022](#). Human rights in Hong Kong (6 credits)

[LLAW3047](#). Hong Kong Basic Law (6 credits)

[LLAW3057](#). International criminal law (6 credits)

[LLAW3062](#). Human rights in China (6 credits)

- LLAW3090. Legal aspects of white collar crime (6 credits)
 LLAW3101. Cybercrime (6 credits)

Students who choose Sociology as first major are not allowed to choose Criminal Justice as their second major.

6. Public and Social Administration (Second Major)

I. Objectives

The programme is jointly co-ordinated by the Department of Politics and Public Administration and the Department of Social Work and Social Administration. It provides a structured and coherent course of study in the related fields of public and social administration. It seeks to provide the community with a pool of graduates with specialized knowledge in public administration and social administration to cope with the growing challenges of public sector work and developments in social welfare services.

II. Pre-enrolment requirement

Candidates must have successfully completed the following junior level courses (6 credits each):

- a) POLI1002. Fundamentals of public administration (6 credits)
or
POLI1003. Making sense of politics (6 credits)
- b) SOWK1001. Introduction to social administration (6 credits)
or
SOWK1003. Introduction to social welfare (6 credits)
- c) STAT1301. Probability and Statistics I (6 credits)
or
STAT0301. Elementary statistical methods (6 credits)

III. Programme structure

The programme comprises eight compulsory courses as follows:

a) Department of Politics and Public Administration

Any four courses from the following list:

- POLI0024. Issues in public administration (6 credits)
- POLI0025. Managerial skills in public organizations (6 credits)
- POLI0027. Public policy-making: theories and application (6 credits)
- POLI0034. Public administration in China (6 credits)
- POLI0035. Public administration in Hong Kong (6 credits)
- POLI0037. Managing people in public organizations (6 credits)
- POLI0038. Public policy and democracy (6 credits)
- POLI0039. Public policy analysis (6 credits)
- POLI0040. Public sector management (6 credits)
- POLI0060. Public financial management (6 credits)
- POLI0063. Performance and accountability in the public sector (6 credits)
- POLI0065. Public organization and management (6 credits)
- POLI0066. Public administration and the public (6 credits)

b) Department of Social Work and Social Administration

All courses from the following list:

- SOWK0023. Social policy issues in Hong Kong (6 credits)
- SOWK0084. Theoretical foundations in social policy and planning (6 credits)
- SOWK0085. Social service research I – methodology (6 credits)

SOWK0086. Social service research II –analysis and utilization (6 credits)

In the interest of deepening understanding the subject matters taught in this programme, however, students are encouraged to select other senior level electives from the Department of Politics and Public Administration and the Department of Social Work and Social Administration. (For the electives on offer in particular years, please refer to the handbooks of the departments)

From the Department of Politics and Public Administration, students would in particular benefit from taking **POLI0062** Political analysis and one of the following courses:

POLI0005. Capitalism and social justice (6 credits)

POLI0010. Democracy and its critics (6 credits)

POLI0015. Ethics and public affairs (6 credits)

POLI0067. Liberalism and its limits (6 credits)

From the Department of Social Work and Social Administration:

SOWK0012. Social welfare in China (6 credits)

SOWK0014. Health administration (6 credits)

SOWK0030. Law and social administration (6 credits)

SOWK0034. Youth crime and juvenile justice issues (6 credits)

SOWK0050. Government and politics of social services in Hong Kong (6 credits)

SOWK0051. Information and communication technology in human services (6 credits)

SOWK0053. Evaluation of social services (6 credits)

SOWK0055. Management in human service organizations (6 credits)

Students who choose Politics and Public Administration as first major are not allowed to choose Public and Social Administration as their second major.

7. Global Studies (Second Major/Minor)

I. Objectives

The saying, "Think global, act local" has become part of our everyday vocabulary. Whether one is drinking a Coca-Cola, standing at an airport security check-point installed after "9/11", or simply contemplating global warming, it is impossible to ignore the impact of our unprecedented levels of global interdependence. How are we to comprehend the ways in which globalization affects our political, economic, social and personal lives? This multi-disciplinary programme of study is designed to help students better understand the multi-dimensional interconnectedness between individuals, societies, and countries that characterizes today's world. It represents a collaboration of core departments in the faculty and is intended to provide students with the foundation for examining the impact of globalization on the world around us from a variety of theoretical perspectives. As this programme of study pays particular attention to issues of Asia and social change in the global context, it is highly relevant for students considering careers in the public and private sectors that require a regional or international focus.

II. Programme Structure

A) Pre-requisite requirement:

Candidates admitted in or after the academic year 2005-2006 who major or minor in this programme should take one of the following junior-level courses (6 credits):

FOSS1002. Appreciating social research (6 credits)

OR

FOSS1003. Masters in social thought (6 credits)

B) Core Courses (12 credits)

Candidates who major or minor in this programme should take at least two courses (6 credits each) from the following lists in which one must be a FOSS course. Once the core requirements are filled, other courses from these lists may be taken to fulfill the elective requirement.:

Course code Course title

For the first course, students must take one of these two courses:

FOSS0013. Understanding global issues (6 credits) **or**
 SOCI0064. Globalization and information society (6 credits)

For the second course, students can choose one of the four following courses.

FOSS0003. Human security in the global context (6 credits)
 FOSS0004. Gender and the global economy (6 credits)
 SOCI0070. Chinese identities and global networks (6 credits)
 URBP0001. Cities and globalization (6 credits)

C) Elective Courses (major: 30 credits; minor: 12 credits)

Candidates who **major** in this programme should take at least 5 elective courses (6 credits each) from the course list below and no more than 2 from any single department. Candidates who **minor** in this programme should take at least 2 elective courses from the course list below and only 1 from any single department. The following courses are grouped by subject areas.

(i) Globalization and Economic Development

POLI0005. Capitalism and social justice (6 credits)
 POLI0017. Government and business (6 credits)
 POLI0058. Managing the global economy (6 credits)
 PSYC0033. Industrial psychology (6 credits)
 PSYC0041. Consumer psychology (6 credits)
 SOCI0002. Class, wealth and poverty (6 credits)
 SOCI0009. Economic development and social change (6 credits)
 SOCI0066. The Asian economic miracles and beyond (6 credits)
 BUSI0022. International marketing (6 credits)
 BUSI0026. Employment and labor relations (6 credits)
 BUSI0044. International business (6 credits)
 ECON0501. Economic development (6 credits)
 ECON0503. Urban economics (6 credits)
 ECON0601. Economic development of China (6 credits)
 ECON0602. Foreign trade and investment in China (6 credits)
 FINA0501. Asian financial institutions (6 credits)
 GEOG2030. Global development (6 credits)
 HIST2027. The foundations of international trade and finance in the modern world (6 credits)
 JAPN2030. Japanese business, culture and communication (6 credits)

(ii) Globalization and Asian Politics and Policies

FOSS0005. Globalization and crime (6 credits)
 FOSS0006. Drug control in comparative perspective (6 credits)
 POLI0010. Democracy and its critics (6 credits)
 POLI0019. Hong Kong and the world (6 credits)

- POLI0022. Governing China (6 credits)
- POLI0033. Problems of the Third World (6 credits)
- POLI0052. International relations of East Asia (6 credits)
- POLI0059. China and the world (6 credits)
- POLI0061. Hong Kong and South China: the political economy of regional development and cooperation (6 credits)
- SOWK0029. Comparative social administration (6 credits)
- SOWK0062. Special topics in policy study (6 credits)
- HIST2039. War and peace: conflicts and conflict resolutions since 1945 (6 credits)
- HIST2009. Modern Japan since 1912 (6 credits)
- JAPN2011. Anthropology of Japan (6 credits)
- JAPN2014. China and Japan (6 credits)
- LLAW3062. Human rights in China (6 credits)
- LLAW3091. Ethnicity, human rights, & democracy (6 credits)

(iii) Globalization and Asian Cultures and Societies

- PSYC0020. Fundamentals of social psychology (6 credits)
- SOCI0003. Contemporary Chinese society (6 credits)
- SOCI0055. A cultural study of tourism and tourists (6 credits)
- SOCI0061. Lifestyles and religious practices (6 credits)
- SOWK0012. Social welfare in China (6 credits)
- SOWK0057. Aging and society (6 credits)
- BSTC0002. Life and Buddhism (6 credits)
- CLIT2045. Colonialism/ postcolonialism (6 credits)
- CLIT2050. Globalization and culture (6 credits)
- ENGL2045. Travel writing.(6 credits)
- ENGL2066. Orientalism and linguistics (6 credits)
- FINE2029. Modernity and its discontents (6 credits)
- FINE2030. Towards the global (6 credits)
- FINE2033. Cross-cultural interaction in the 19th century (6 credits)
- HIST2064. Sweat and abacus: overseas Chinese in Southeast Asia (6 credits)
- GEOG2013. Sustainable development (6 credits)
- GEOG2056. Tourism and the shrinking world (6 credits)
- GEOG2088. China: environment and sustainable development (6 credits)
- GEOG2089. The Pearl River Delta: development and interaction with Hong Kong (6 credits)
- JAPN2035. Women in Japan and Hong Kong (6 credits)
- LING2011. Language and literacy in the information age (6 credits)

D) Research project / Internship (6 credits) (For major only)

It is compulsory for all final year candidates who major in this programme to undertake either a year-long independent research project or an internship programme. It is designed to offer major students a chance to apply their theoretical training to a real world issue.

FOSS3003. Research project in global studies (6 credits)

OR

FOSS3005. Internship in global studies (6 credits)

8. Media and Cultural Studies (Second Major/Minor)

I. Objectives:

The media are central to our experience and identities in today's modern world. We find ourselves increasingly saturated by messages and ideas from television, radio, print media, advertisement, cinema and the internet. The media not only shape our education, politics, art and entertainment, constituting our worldviews, identities and fantasies, they also help to connect and divide communities locally, nationally and globally. Their influences are further complicated by the rise of new information technology and the globalization of outlook and resources, posing us new demands and challenges. To what extent will those changes result in a multiplicity of lifestyles and identities? Are we getting more homogenized and westernized? Questions of this kind are under considerable discussion in the social sciences as it becomes clear that culture, life-styles as well as class, gender and ethnic identities are the grounds on which economic, social and political forces of the new era work themselves out. In this programme, the connections between individuals, their communities, and the world, mediated by culture and the media, are now being examined in relation to global versus local, modern versus tradition, diaspora versus nationalism, and culture versus market.

This multidisciplinary programme of study represents the collaboration of the core departments in the Faculty and other departments in the University and is intended to provide students with the foundation for examining the role of media and culture in today's society from a variety of perspectives. It is principally concerned with developing informed and critical understanding and responses to the media and culture and considering the relationships between the two. It enables students to engage with issues concerning the relationship between culture and identity, forms of representation, and the role of media in shaping the ways we live in class discussion and project presentation. It also equips students with useful tools and analytical skills to researching media and culture.

II. Programme Structure

A) Pre-requisite requirement

Candidates admitted in or after the academic year 2005-2006 who major or minor in this programme should take one of the following junior-level courses (6 credits):

FOSS1002. Appreciating social research (6 credits)

OR

FOSS1003. Masters in social thought (6 credits)

B) Core Courses (12 credits)

Candidates who major or minor in this programme should take at least two core courses (6 credits each) from the following list in which one must be a FOSS course. They may take more than two courses from the list and the rest will be counted as elective course(s) for major/minor requirements.

Course Code	Course title
FOSS0001.	Media, culture, and communication in contemporary China (6 credits)
FOSS0011.	Researching media and culture (6 credits)
FOSS0014.	Cultural studies and modern societies (6 credits)
FOSS0015.	Sexing culture and identity (6 credits)
PSYC0058.	Cultural psychology (6 credits)
SOCI0065.	Understanding media studies (6 credits)

C) Elective Courses (major: 30 credits; minor: 12 credits)

Candidates who major in this programme should take at least 5 elective courses (6 credits each) from the courses listed for the programme and no more than 2 from any single department. Those who minor in this programme should take at least 2 elective courses listed and only one from any single department. To facilitate students to make their choices, courses are grouped together under different themes:

(i) Culture and Identity

Course Code Course title

- PSYC0020. Fundamentals of social psychology (6 credits)
 PSYC0050. Knowing and acting in everyday life (6 credits)
 SOCI0008. Culture and society (6 credits)
 SOCI0012. Gender and society (6 credits)
 SOCI0015. Hong Kong popular culture (6 credits)
 SOCI0019. Life styles and modern culture (6 credits)
 SOCI0055. A cultural study of tourisms and tourists (6 credits)
 SOCI0064. Globalization and information Society: myths, facts and emerging patterns (6 credits)
 SOCI0072. Policy, governance and training in cultural tourism (6 credits)
 AMER2014. A dream in the heart: Varieties of Asian American culture
 CLIT2050. Globalization and culture
 CLIT2052. Chinese urban culture (6 credits)
 CLIT2069. The making of modern masculinities (6 credits)
 CLIT2076. Fashioning femininities (6 credits)
 ENGL2095. The East: Asia in English writing (6 credits)
 ENGL2099. Language, identity, and Asian Americans (6 credits)
 EUST2010. European identity (6 credits)
 FINE2031. The rise of modern architecture in Western culture (6 credits)
 FINE2033. Cross-cultural interaction in the 19th Century (6 credits)
 GEOG2057. Leisure and recreation in modern society (6 credits)
 HIST2046. The modern European city: Urban living and open spaces (6 credits)
 HIST2048. The history of young people in modern Europe (6 credits)
 HIST2062. From Empire to EU: culture, politics and society in twentieth century Britain (6 credits)
 JAPN2011. Anthropology of Japan (6 credits)
 JAPN2018. Popular culture and artistic activity in Japan (6 credits)
 JAPN2035. Women in Japan and Hong Kong (6 credits)

(ii) Media and Communication

- PSYC0023. Psychology of human communication (6 credits)
 PSYC0041. Consumer psychology (6 credits)
 SOCI0006. Critical issues in media studies (6 credits)
 SOCI0067. Crime and the media (6 credits)
 AMER2022. What's on TV? Television and American culture (6 credits)
 CLIT2007. Film culture I (6 credits)
 CLIT2008. Film culture II (6 credits)
 CLIT2074. Film and ideology in post-Mao China (6 credits)
 JAPN2029. Japanese popular music and Hong Kong society (6 credits)
 JAPN2031. The media and Japan (6 credits)
 JMISC0008. Multi-media production (6 credits)
 JMISC0019. Media law and ethics (6 credits)
 JMISC0025. Journalism traditions (6 credits)
 JMISC0027. The press, politics and government (6 credits)
 JMISC0034. Covering China (6 credits)
 LING2044. Language and culture (6 credits)
 MUSI2016. Music of contemporary Hong Kong (6 credits)
 MUSI2019. Music in society (3 credits)
 MUSI2044. Film music (6 credits)
 PHIL2610. Philosophy of language (6 credits)

D) Research project/Internship (6 credits) (For major only)

It is compulsory for all final year candidates who major in this programme to undertake either a year-long independent research project or an internship programme. It is designed to offer major students a chance to

apply their theoretical training to a real world issue.

[FOSS3004](#). Research project in media and cultural studies (6 credits)

OR

[FOSS3006](#). Internship in media and cultural studies (6 credits)

CORE DISCIPLINARY AND MULTI-DISCIPLINARY MINORS OFFERED BY THE FACULTY OF SOCIAL SCIENCES

Please note that one course cannot be taken to fulfill both the requirements for a major and a minor.

1. Journalism and Media Studies

Candidates who wish to minor in Journalism and Media Studies must successfully complete at least 24 credits of senior level courses from the following course list. As a pre-requisite, candidates must pass [JMSC0101](#). 'Principles of journalism and the news media'.

[JMSC0002](#). News reporting and writing workshop (6 credits)

[JMSC0007](#). New media workshop (6 credits)

[JMSC0008](#). Multimedia production (6 credits)

[JMSC0017](#). Feature writing (6 credits)

[JMSC0018](#). Chinese news writing (6 credits)

[JMSC0019](#). Media law and ethics (6 credits)

[JMSC0025](#). Journalism traditions (6 credits)

[JMSC0026](#). Independent study (6 credits)

[JMSC0027](#). The press, politics and government (6 credits)

[JMSC0033](#). Literary journalism (6 credits)

[JMSC0034](#). Covering China (6 credits)

[JMSC0037](#). Advanced Chinese news writing (6 credits)

[JMSC0038](#). Visual journalism (6 credits)

[JMSC0042](#). International news (6 credits)

[JMSC0043](#). Reporting public health issues (6 credits)

[JMSC0044](#). Special topics in journalism I (6 credits)

[JMSC0045](#). Special topics in journalism II (6 credits)

[JMSC0046](#). Introduction to television (6 credits)

[JMSC0051](#). Television news writing (6 credits)

[JMSC0052](#). Television news production (6 credits)

[JMSC0053](#). Radio news production (6 credits)

[JMSC0054](#). Public affairs reporting (6 credits)

[JMSC0055](#). Specialised reporting (6 credits)

[JMSC0056](#). Business and financial reporting (6 credits)

[JMSC0057](#). Magazine writing (6 credits)

[JMSC0058](#). Impact of new media on society (6 credits)

[JMSC0059](#). Covering the environment (6 credits)

2. Applied Child Development (Faculty of Education and Department of Psychology)

This minor offers a coherent academic programme focusing on the knowledge, attitudes and skills central to improving the well-being of children and their families. Specifically, the minor will (i) help you acquire scientifically-based knowledge about early childhood development and education; and (ii) enable you to apply theories, research methods, and research findings to practical concerns.

[PSYC0009](#). Life-span developmental psychology (6 credits)

- EDUC8001. Understanding and guiding the development of young children (6 credits)
 EDUC8002. Planning, managing and assessing services for young children (6 credits)
 PSYC0057. Internship in applied child development (6 credits)
-

3. Criminal Justice

Candidates who minor in this programme are required to take 4 courses (24 credits) from the following list and which one or more must be from outside the Department of Sociology:

- a) Compulsory course
 SOCI0071. Criminology (6 credits)
- b) Elective courses (A maximum of 12 credits of courses to be chosen from the following list):
 Department of Sociology and Faculty
 SOCI0005. Criminal behaviour (6 credits)
 SOCI0011. Gender and crime (6 credits)
 SOCI0038. Social control (6 credits)
 SOCI0041. Social problems (6 credits)
 SOCI0046. Sociology of law (6 credits)
 SOCI0047. Sociology of punishment (6 credits)
 SOCI0054. Triads and organized crime (6 credits)
 SOCI0056. Criminal justice: policy and practice (6 credits)
 SOCI0060. Fraud, corruption and computer crime (6 credits)
 SOCI0067. Crime and the media (6 credits)
 SOCI0069. Perspectives on crime and deviance (6 credits)
 FOSS0005. Globalization and crime (6 credits)
 FOSS0006. Drug control in comparative perspective (6 credits)
 Special topic in sociology (6 credits) (The topic covered in this course should be related to crime and criminal justice.)

(A maximum of 12 credits of courses to be chosen from the following list):

- ECON0405. The economics of law (6 credits)
 SOWK0028. Selected topics in social work practice (6 credits)
 SOWK0030. Law and social administration (6 credits)
 SOWK0033. Working with youth at risk and juvenile offenders (6 credits)
 SOWK0034. Youth crime and juvenile justice issues (6 credits)
 LLAW2003. Criminal law I (6 credits)
 LLAW2004. Criminal law II (6 credits)
 LLAW3001. Introduction to legal theory (6 credits)
 LLAW3022. Human rights in Hong Kong (6 credits)
 LLAW3047. Hong Kong Basic Law (6 credits)
 LLAW3057. International criminal law (6 credits)
 LLAW3062. Human rights in China (6 credits)
 LLAW3090. Legal aspects of white collar crime (6 credits)
 LLAW3101. Cybercrime (6 credits)
-

Candidates who minor in programmes of Family and Child Studies, Human Resources Management and International Business:

- (a) *are required to take not less than four 6-credit courses in the courses listed under the programme;*
 (b) *are required to take courses from at least two departments; and*
 (c) *shall not take more than two courses from any single department.*

4. **Family and Child Studies** (Department of Social Work and Social Administration)

The programme aims to develop students' understanding of the development of children and young people from a psycho-social perspective. One emphasis is placed on how cultural factors, especially of the indigenous Chinese culture, influence their growth socially, cognitively and psychologically. With reference to these understandings, another focus of the programme is to teach students methods to work with children and young people with different problems and backgrounds. It is expected that after taking the programme, students will be equipped to work with children and young people in different settings more effectively.

PSYC0009.	Life-span development psychology (6 credits)
PSYC0035.	Introduction to educational psychology (6 credits)
SOCI0021.	Marriage and the family (6 credits)
SOCI0053.	Youth and youth culture (6 credits)
SOWK0002.	Working with children and families (6 credits)
SOWK0007.	Working with families (6 credits)
SOWK0033.	Working with youth at risk and juvenile offenders (6 credits)
SOWK0065.	Understanding and working with young people (6 credits)
SOWK0075.	Violence in intimate relationships (6 credits)
SOWK0089.	Family and society - a policy perspective (6 credits)

5. **Human Resources Management** (Department of Psychology)

Since the early 1980s, Hong Kong has witnessed a shift from manufacturing to a service industry in its economic structure. There is also a rapid pace of automatization and computerization in all sectors of our economy. These two major changes have resulted in the pressing needs for retraining, revised job design, better organization communication, better management of human resources, and engineering psychology. A recent survey reveals that there are 12 jobs available to every university student trained in the area of human resources management. This figure speaks to the huge demand for human resources professionals. This minor programme is designed to serve the above needs of the society.

ECON0103.	Economics of human resources (6 credits)
POLI0025.	Managerial skills in public organizations (6 credits)
POLI0037.	Managing people in public organizations (6 credits)
POLI0065.	Public organization and management (6 credits)
PSYC0002.	Psychological testing and measurement (6 credits)
PSYC0005.	Introduction to counseling and therapeutic psychology (6 credits)
PSYC0020.	Fundamentals of social psychology (6 credits)
PSYC0032.	Engineering psychology (6 credits)
PSYC0033.	Industrial psychology (6 credits)
PSYC0044.	Organizational psychology (6 credits)
PSYC0053.	Advanced research in industrial/organizational psychology (6 credits)
SOWK0058.	Managing people in human services (6 credits)
SOWK0068.	Social skills training for human service personnel (6 credits)

6. **International Business** (School of Economics and Finance)

For business, the future is global. For business executives, a solid understanding of international business is of utmost importance in this increasingly global business environment. The complexity of a business transaction between two countries, for example, between Hong Kong and China, or between China and the United States, arises from the differences in accounting, banking, culture, currency, finance, governmental regulations, information systems, insurance, law, management, marketing, political systems,

taxation, and transportation. It is impossible for one to understand contemporary events and market trends without a sound background in international business. It is essential, therefore, that our students possess an understanding of the operation of global financial systems and business.

The field of International Business is designed to meet the needs of students who look forward to specialized careers in corporate finance, financial counseling, investment management, or banking. Topics relevant to local and China economy are incorporated throughout all the courses.

As a field of study, International Business is broader in focus than international trade. It draws upon contributions from the traditional business disciplines of finance, banking, management, management information systems, and marketing. It also draws from anthropology, culture, economics, geography, history, languages, law, politics, psychology, and sociology. Although it is offered as a standalone concentration, it is highly recommended as a secondary concentration to any other students outside the Faculty of Social Sciences.

- ECON0301. Theory of international trade (6 credits)
- ECON0302. International finance (6 credits)
- FINA0103. International banking (6 credits)
- FINA0105. International financial management (6 credits)
- POLI0017. Government and business (6 credits)
- POLI0058. Managing the global economy (6 credits)
- SOCI0014. Globalization, work and industry
- SOCI0066. The Asian economic miracles and beyond (6 credits)
- STAT2306 (old course STAT0106). Business logistics (6 credits)
- STAT2314 (old course STAT0403). Business forecasting (6 credits)

7. Public and Social Administration

The programme is jointly co-ordinated by the Department of Politics and Public Administration and the Department of Social Work and Social Administration and provides for a structured and coherent course of study in the related fields of public and social administration. It seeks to provide the community with a pool of graduates with specialized knowledge in public administration and social administration to cope with the growing challenges of public sector work and developments in social welfare services.

Department of Politics and Public Administration (12 credits):

- POLI 0024. Issues in public administration (6 credits)
- POLI 0025. Managerial skills in public organizations (6 credits)
- POLI 0027. Public policy-making: theories and application (6 credits)
- POLI 0034. Public administration in China (6 credits)
- POLI 0035. Public administration in Hong Kong (6 credits)
- POLI 0037. Managing people in public organizations (6 credits)
- POLI 0038. Public policy and democracy (6 credits)
- POLI 0039. Public policy analysis (6 credits)
- POLI 0040. Public sector management (6 credits)
- POLI 0060. Public financial management (6 credits)
- POLI 0063. Performance and accountability in the public sector (6 credits)
- POLI 0065. Public organization and management (6 credits)
- POLI 0066. Public administration and the public (6 credits)

Department of Social Work and Social Administration (12 credits):

- SOWK0012. Social welfare in China (6 credits)
- SOWK0014. Health administration (6 credits)
- SOWK0023. Social policy issues in Hong Kong (6 credits)
- SOWK0030. Law and social administration (6 credits)
- SOWK0034. Youth crime and juvenile justice issues (6 credits)
- SOWK0050. Government and politics of social services in Hong Kong (6 credits)
- SOWK0051. Information and communication technology in human services (6 credits)

SOWK0053.	Evaluation of social services (6 credits)
SOWK0055.	Management in human service organizations (6 credits)
SOWK0084.	Theoretical foundations in social policy and planning (6 credits)
SOWK0085.	Social service research I methodology (6 credits)
SOWK0086.	Social service research II analysis and utilization (6 credits)

SECOND MAJORS AND MINORS OFFERED BY THE FACULTY OF ARTS

Second Majors

1. American Studies

The Programme in American Studies provides an interdisciplinary approach to the study of American culture and civilization. Students must gain admittance to the programme by taking TWO or more of the first-year courses to qualify for a second major. These courses include: [AMER1009](#) “Consuming culture: decoding American symbols”, [AMER1011](#) “Born in the USA: U.S. youth cultures”, [AMER1015](#) “Wall Street: Issues in American business” [AMER1017](#) “Movieland: America on Hollywood’s big screen, and [AMER1018](#) “The American Hardboiled: From crime fiction to social document”. Enrolments may be limited in these courses.

In order to ensure reasonable coverage and interdisciplinary understanding, students who intend to pursue a major in American Studies must, in their second and third years, take a minimum of eight 6-credit courses (or the equivalent) from the list below. Only in exceptional cases may a waiver be granted for a core course.

4 American Studies Core Courses (24 credits)

AMER2030.	Foundations of American studies, Part I (6-credit course in second year)
AMER2031.	Foundations of American studies, Part II (6-credit course in second year)
AMER3004.	Senior seminar in American studies: Part I (6-credit course in third year)
AMER3005.	Senior seminar in American studies: Part II (6-credit course in third year)

4 Courses from the following list of American Studies and departmental offering (24 credits)

American Studies

AMER2002.	The road in American culture (6 credits)
AMER2014.	A dream in the heart: varieties of Asian American culture (6 credits)
AMER2015.	The American city (6 credits)
AMER2018.	Show me the money: doing business with Americans (6 credits)
AMER2021.	On the road again: Field trip in American Studies (6 credits)
AMER2022.	What's on TV? Television and American culture (6 credits)
AMER2029.	Current perspectives on the U.S. (6 credits)
AMER2033.	Asia on America’s screen (6 credits)
AMER2035.	Addicted to war? The US at home and abroad (6 credits)
AMER2036.	Issues in contemporary immigration to American cities (6 credits)
AMER2037.	Institutions in American life: home, education, work and play (6 credits)
AMER3006.	Dissertation (12 credits)

English

ENGL2040.	Asian American literature (6 credits)
ENGL2055.	American gothic: Haunted homes (6 credits)
ENGL2059.	American drama and American film (6 credits)
ENGL2089.	Making Americans: Literature as ritual and renewal (6 credits)

ENGL2090.	The moving production of America: reading recent films (6 credits)
ENGL2091.	Comedy and Asian American drama (6 credits)
ENGL2104.	Language in the USA (6 credits)
ENGL2105.	Contemporary North American novelists (6 credits)

Fine Arts

FINE2020.	American art (6 credits)
FINE2031.	The rise of modern architecture in western culture (6 credits)

Geography

GEOG2085.	North America (6 credits)
-----------	---------------------------

History

HIST2015.	The United States before 1900 (6 credits)
HIST2016.	The United States in the twentieth century (6 credits)
HIST2031.	History through film (6 credits)
HIST2032.	Case studies in women's history: Hong Kong and the U.S. (6 credits)
HIST2053.	The Cold War (6 credits)
HIST2069.	The history of American popular culture (6 credits)
HIST2080.	Classroom across the Pacific: American History and Anthropology (6 credits)

Music

MUSI2015.	Popular music: from Cantopop to techno (6 credits)
MUSI2031.	American music (6 credits)

Politics and Public Administration

POLI0021.	Understanding global issues (6 credits)
POLI0044.	American democracy (6 credits)
POLI0047.	United States foreign policy (6 credits)

Not all of the above electives may be offered in a given year.

2. Chinese

The mission of the Department of Chinese is to promote the understanding of Chinese language, literature and history; to further the ability of the students in the use of the Chinese language; and to advance the study of the development of the Chinese culture and its place in the modern world.

The degree courses in the Department of Chinese are normally taught in Chinese. Course design is based on the assumption that the students have attained facility in the use of the Chinese language before entering the University, and that they have also acquired sufficient mastery of the English language to enable them to use freely references and relevant works published in English. Provision may be made from time to time for elective courses on various aspects of the Chinese civilization.

The Department offers four majors and four minors in the second and third years. The four majors are as follows:

- (i) **Chinese Language and Literature:** Group A.
- (ii) **Chinese History:** Group B.
- (iii) **Translation:** Group C (please refer to Group C for other requirements).
- (iv) **Chinese Studies:** Groups A and B.

Students are required to take not less than a total of 48 credits of second and third year courses in the specified group(s), and to meet other specified requirements, if any. For the Chinese History major,

students may take one or more of the following: [HIST2003](#), [HIST2004](#) and [HIST2018](#) to fulfil the credit requirements. Students who intend to major in Chinese Language and Literature or in Translation are required to take the following first year courses as prerequisites unless the Head of Department approves otherwise:

- (i) **Chinese Language and Literature majors:** [CHIN1101](#). A survey of the Chinese language and a total of not less than 6 credits of other first year courses in Group A.
- (ii) **Translation majors:** [CHIN1311](#). Introduction to translation and [CHIN1312](#). Language studies for translation I.

There are no first-year prerequisites for the majors in Chinese History and Chinese Studies.

Not all the courses listed below will be offered every year. Students should refer to the departmental undergraduate handbook, published yearly and usually in the summer, for the courses on offer in the next academic year.

All Chinese courses available to BSocSc students are listed as below:

GROUP A: CHINESE LANGUAGE AND LITERATURE

Junior level courses (First year courses)

- [CHIN1101](#). A survey of the Chinese language (6 credits)
- [CHIN1102](#). An introduction to standard works in classical Chinese literature (6 credits)
- [CHIN1103](#). An introduction to standard works in modern Chinese literature (6 credits)
- [CHIN1105](#). History of Chinese literature: a general survey (3 credits)
- [CHIN1106](#). Poetry and the couplet: the writing and appreciation (3 credits)
- [CHIN1108](#). Contrastive phonology of Putonghua and Cantonese (3 credits)
- [CHIN1109](#). An Introduction to Chinese women's literature (3 Credits)
- [CHIN1110](#). Creative writing I (6 credits)
- [CHIN1111](#). Creative writing II (6 credits)

Senior level courses (Second and Third year courses)

- [CHIN2121](#). Prose up to the nineteenth century (6 credits)
- [CHIN2122](#). Prose: selected writers (6 credits)
- [CHIN2123](#). *Shi* poetry up to the nineteenth century (6 credits)
- [CHIN2124](#). *Shi* poetry: selected writers (6 credits)
- [CHIN2125](#). *Ci* poetry up to the nineteenth century (6 credits)
- [CHIN2126](#). *Ci* poetry: selected writers (6 credits)
- [CHIN2127](#). Classical Chinese fiction (6 credits)
- [CHIN2128](#). *Xiqu* of the Yuan and Ming periods (6 credits)
- [CHIN2129](#). Modern Chinese literature (1917-1949) I (6 credits)
- [CHIN2130](#). Modern Chinese literature (1917-1949) II (6 credits)
- [CHIN2131](#). Contemporary Chinese literature (since 1949) I (6 credits)
- [CHIN2132](#). Contemporary Chinese literature (since 1949) II (6 credits)
- [CHIN2133](#). Contemporary Chinese literature (since 1949) III (6 credits)
- [CHIN2134](#). Prescribed texts for detailed study I (6 credits)
- [CHIN2135](#). Prescribed texts for detailed study II (6 credits)
- [CHIN2136](#). Classical Chinese literary criticism (6 credits)
- [CHIN2138](#). Chinese etymology (6 credits)
- [CHIN2139](#). Chinese Phonology (6 credits)
- [CHIN2140](#). Modern Chinese language I (6 credits)
- [CHIN2143](#). Modern Chinese language II (6 credits)
- [CHIN2144](#). Functional Chinese (6 credits)

GROUP B: CHINESE HISTORY*Junior level courses (First year courses)*

- CHIN1201. Topical studies of Chinese history (6 credits)
 CHIN1202. An introduction to the study of Chinese history (6 credits)
 CHIN1203. Chinese history of the twentieth century (3 credits)
 CHIN1204. Chinese culture in the twentieth century (3 credits)
 CHIN1205. Chinese history: a general survey (3 credits)
 CHIN1206. An introduction to Chinese thought (3 credits)
 CHIN1207. Traditional Chinese culture (3 credits)

Senior level courses (Second and Third year courses)

- CHIN2221. History of the Qin and Han Periods (6 credits)
 CHIN2222. History of the Wei, Jin and the Northern-and-Southern Periods (6 credits)
 CHIN2223. History of the Sui and Tang Periods (6 credits)
 CHIN2224. History of the Song and Yuan Periods (6 credits)
 CHIN2225. History of the Ming Period (6 credits)
 CHIN2226. History of the Qing Period (6 credits)
 CHIN2231. Religious Daoism and popular religions in China (3 credits)
 CHIN2233. History of the Chinese legal system (6 credits)
 CHIN2234. History of Chinese political institutions (6 credits)
 CHIN2235. Sources and methodology (6 credits)
 CHIN2241. History of Chinese civilization (6 credits)
 CHIN2243. History of Chinese science and civilization (6 credits)
 CHIN2244. History of *Guanxue* and *Sixue* (3 credits)
 CHIN2245. History of Chinese examination system (3 credits)
 CHIN2246. Historical writings: texts and styles (6 credits)
 CHIN2247. Local histories (*fangzhi*) and genealogical records (*zupu*) (6 credits)
 CHIN2251. Chinese philosophy I: Confucianism (6 credits)
 CHIN2252. Chinese philosophy II: Daoism (6 credits)
 CHIN2253. Chinese philosophy III: Buddhism (6 credits)
 CHIN2254. Christianity and Chinese culture (3 credits)
 CHIN2255. Chinese intellectual history (Part I) (6 credits)
 CHIN2256. Chinese intellectual history (Part II) (6 credits)
 CHIN2257. The development of Confucianism in late imperial China (3 credits)
 CHIN2258. The mentality of literati in Ming-Qing transition (3 credits)
 CHIN2259. Historical writing and historiography in traditional China (6 credits)
 CHIN2261. Buddha and Bodhisattva worship in Chinese Buddhism (3 credits)

GROUP C: TRANSLATION*Junior level courses (First year courses)*

- CHIN1311. Introduction to translation (6 credits)
 CHIN1312. Language studies for translation I (6 credits)

Senior level courses (Second and Third year courses)

All courses listed below, if not otherwise specified, may be taken in either the second or the third year. Students opting for the Major are however required to take all the courses in List 1 in the years indicated, unless the Head of Department approves otherwise,

Second Year: CHIN2311, 2312, 2313, 2314, 2315, 2316 (totalling 21 credits)

Third Year: CHIN2317, 2318, 2319, 2320 (totalling 18 credits),

and their remaining courses from List 2 in either the Second or the Third Year to make up at least 48 credits in two years.

Some of the courses require CHIN2335 or CHIN2336 as a prerequisite. In exceptional cases, these

requirements may be waived by the Head of the Department.

List 1

Courses in List 1 are offered to Translation majors only. Non-majors who wish to take any of the courses should first apply for permission from the Head of Department.

- CHIN2311. Translation criticism I (English-Chinese) (3 credits)
- CHIN2312. Translation criticism II (Chinese-English) (3 credits)
- CHIN2313. Language studies for translation II (6 credits)
- CHIN2314. Translation in practice I (English-Chinese) (3 credits)
- CHIN2315. Translation in practice II (Chinese-English) (3 credits)
- CHIN2316. Translation theory (3 credits)
- CHIN2317. Translation criticism III (English-Chinese) (3 credits)
- CHIN2318. Translation criticism IV (Chinese-English) (3 credits)
- CHIN2319. Language studies for translation III: comparative stylistics (6 credits)
- CHIN2320. Long translation (6 credits)

List 2

- CHIN2331. Choice of words in translation (6 credits)
- CHIN2332. Translation in Hong Kong society (3 credits)
- CHIN2333. Culture and translation (6 credits)
- CHIN2334. Power of speech in written translation (3 credits)
- CHIN2335. Introduction to interpretation (3 credits)
- CHIN2336. Interpretation workshop I (3 credits)
- CHIN2337. Journalistic translation (3 credits)
- CHIN2338. Translation of promotional material (3 credits)
- CHIN2339. Translation for administration and business (3 credits)
- CHIN2340. Film translation workshop (6 credits)
- CHIN2341. Translating writings on art (3 credits)
- CHIN2342. Interpretation workshop II (6 credits)

GROUP D: DISSERTATION

(The following course will not be counted towards any major or minor requirement.)

Senior level course (Third year course)

- CHIN3401. Dissertation (12 credits)

ASSESSMENT

Coursework assessment will be based on performance in tutorials and seminars, and on the strength of essays and such other exercises as can be assessed continually.

Each course will be examined by a written paper of not more than 2-hour duration except those courses which are assessed by 100% coursework.

3. Comparative Literature

If we do not study other cultures, we cannot even understand our own. In the Department, we study literature from a broad range of international and interdisciplinary perspectives, and in relation to other forms of cultural expression.

The department offers courses in literary, theoretical and cultural studies using cross-cultural materials and interdisciplinary approaches. Some of the main areas covered include Visual Cultures and Film Studies, Literature and Theory, Feminism and Gender Studies, Postcolonial/Hong Kong/China Studies, and New Media and Global Studies.

Our courses study a wide range of texts in terms of both form and content. Students learn to read culture in

the broadest sense – analyzing literary texts, films, fashion magazines, cyber texts, advertisements, comics, popular music, and other relevant cultural productions and practices.

Such an approach provides a focus for significant interdisciplinary study in the Humanities and a training in thinking about the nature of the relationship between culture and society. The direction of interest is indicated in the description of each course.

Texts are studied in English, though texts in Chinese are used in Cross-Cultural studies and Hong Kong/Chinese cultural studies.

Courses are open to students who have fulfilled the University's entrance requirements, though priority will usually be given to students with a Grade C or above in the Use of English examination, or who otherwise show special aptitude.

In order to major in Comparative Literature first year students must normally take at least two of the 6-credit first year courses offered by the Department. In the second and third years, students must select not less than eight 6-credit courses or equivalent from among those offered by the Department. There are no particular requirements in terms of core courses and course combinations.

All courses offered in the Department will be examined by 100% continuous assessment. Course organisers will provide details of assessment at the beginning of their course. **All specific course descriptions will be provided in the departmental handbook and can be downloaded from our website: www.hku.hk/complit/courses.htm.**

All Comparative Literature course are listed as below:

Junior Level (first year courses)

- CLIT1001. Introduction to comparative literary and cultural studies I: Film studies (6 credits)
- CLIT1002. Introduction to comparative literary and cultural studies II: Gender studies (6 credits)
- CLIT1003. Introduction to comparative literary and cultural studies III: Digital culture (6 credits)
- CLIT1004. Introduction to comparative literary and cultural studies IV: Colonial and postcolonial culture – Hong Kong and beyond (6 credits)
- CLIT1005. Introduction to comparative literary and cultural studies V: Disney and global capital (6 credits)
- CLIT1006. Introduction to comparative literary and cultural studies VI: Cultural studies (6 credits)
- CLIT1008. Ways of Reading: film, literature, and culture (6 credits)
- CLIT1009. Questioning difference: gender, postcolonialism and culture (6 credits)

Senior Level (second and third year courses)

- CLIT2001. Comparative studies in narratives (6 credits)
- CLIT2003. Modern European drama (6 credits)
- CLIT2005. Literary and cultural theory (6 credits)
- CLIT2007. Film culture I (6 credits)
- CLIT2008. Film culture II (6 credits)
- CLIT2014. Feminist cultural studies (6 credits)
- CLIT2016. The body in culture (6 credits)
- CLIT2017. A new introduction to modernism (6 credits)
- CLIT2018. Critiques of modernity (6 credits)
- CLIT2021. Reading the nineteenth-century: revolution, romanticism and realism (6 credits)
- CLIT2022. Reading the nineteenth-century: reaction and modernity (6 credits)
- CLIT2023. Heterologies: the discourse of the other (6 credits)
- CLIT2024. Reading comedy: Dante and Boccaccio (6 credits)
- CLIT2025. Visual cultures (6 credits)

- CLIT2026. Digital culture and new media technologies I (6 credits)
 CLIT2027. Digital culture and new media technologies II (6 credits)
 CLIT2028. The city as cultural text (6 credits)
 CLIT2031. Fashion theory (6 credits)
 CLIT2034. Advanced film theory (6 credits)
 CLIT2035. Writing madness (6 credits)
 CLIT2037. Gender and sexuality in contemporary Chinese literature and film (6 credits)
 CLIT2042. Reading confessing (6 credits)
 CLIT2045. Colonialism/postcolonialism (6 credits)
 CLIT2050. Globalization and culture (6 credits)
 CLIT2051. Jane Austen and popular culture (6 credits)
 CLIT2052. Chinese urban culture (6 credits)
 CLIT2057. Carnival versus tragedy: Reading renaissance culture (6 credits)
 CLIT2058. Histories of sexuality (6 credits)
 CLIT2060. Fiction and film in contemporary Chinese societies (6 credits)
 CLIT2061. Narratives of the past in contemporary culture (6 credits)
 CLIT2064. Hong Kong culture: Popular culture (6 credits)
 CLIT2065. Hong Kong culture: Representations of identity in literature and film (6 credits)
 CLIT2066. Postmodernism (6 credits)
 CLIT2067. Re-placing Shakespeare (6 credits)
 CLIT2069. The making of modern masculinities (6 credits)
 CLIT2070. Heidegger and everydayness (6 credits)
 CLIT2072. Deconstruction (6 credits)
 CLIT2073. Deleuze on cinema (6 credits)
 CLIT2074. Film and ideology in post-Mao China (6 credits)
 CLIT2075. Reading modern poetry (6 credits)
 CLIT2076. Fashioning Femininities (6 credits)
 CLIT2078. Childhood, feminine roles and cultural myths (6 credits)
 CLIT2079. Traumatic events (6 credits)
 CLIT2080. Walter Benjamin as writer and cultural critic (6 credits)
 CLIT2081. Becoming post-human: animal bodies and virtual bodies (6 credits)
 CLIT2082. Literature and “queer” theory (6 credits)
 CLIT2083. Film art, language and culture (6 credits)
 CLIT2084. “New” cinemas across national boundaries (6 credits)
 HIST2082. Europe and its others (6 credits)
 HIST2083. Gender, sexuality and empire (6 credits)
 HIST2084. Sexing the spirit: The history of the modern feminist challenge to Christianity (6 credits)
 HIST2085. The History of Modern Sexual Identity and Discourse (6 credits)

4. Fine Arts

The Department of Fine Arts teaches the history and theory of art. European, American, Chinese and Japanese artistic traditions are all examined in depth, and the broader international context of art making is also considered. An introduction to museum studies is also offered. Students may major in Fine Arts, or take a disciplinary minor, but will also discover many fruitful combinations between Fine Arts courses and those of other Arts and Social Science disciplines.

Students wishing to major in Fine Arts must normally pass **FINE1001** or **FINE1004** or **FINE1006** or **FINE1008** in their first year and must choose not less than 48 credits from among those courses offered by

the Department in the second and third years. Of these 48 credits, at least 6 credits must be in Western art and at least 6 credits must be in Asian art. As part of the 48 credits total, every major must also take at least one of the following third year seminar courses: **FINE3006**, **FINE3008** or **FINE3009**. With the permission of the Head of Department, FINE3007 may also be counted as meeting this requirement.

There are no other specific requirements as to core courses or course combinations for majors, but prospective students are asked to note that individual second and third year courses in the Fine Arts Department may require **FINE1001** or **FINE1004** or **FINE1006** or **FINE1008** as a prerequisite. Other prerequisites for second- and third-year courses are listed in the course descriptions. In exceptional cases, these requirements may be waived. All major and other course selections are subject to the approval of the Head of Department.

The form of assessment (i.e. percentage weighting of coursework and/or examination) for each course is specified in the course descriptions. Coursework assessment will be based on the student's performance in tutorials, seminars, written work and other practical work as specified by the course instructor.

All Fine Arts courses available to BSocSc Students are listed as below:

Junior level courses (First Year Courses)

- FINE1001. Introduction to western art history (6 credits)
- FINE1004. Introduction to Chinese art history (6 credits)
- FINE1006. Art and Society (6 credits)
- FINE1007. Introduction to photography theory and practice (6 credits)
- FINE1008. Introduction to Asian art history (6 credits)

Senior level courses (Second and Third years courses)

The following courses are open to both second and third year students. Prerequisites, if required, are stated in the course descriptions. If staffing arrangements permit, the following courses will be offered:

- FINE2003. Early Chinese painting (Warring States to Southern Song) (6 credits)
- FINE2004. Later Chinese painting (Yuan to Qing) (6 credits)
- FINE2005. Twentieth century Chinese art (6 credits)
- FINE2006. A history of Chinese calligraphy and seals (6 credits)
- FINE2007. Connoisseurship (6 credits)
- FINE2008. The poetics of Japanese narrative painting (6 credits)
- FINE2009. Genji's dream: the courtly arts of Heian Japan (6 credits)
- FINE2011. Japanese art: the interactive dimension (6 credits)
- FINE2012. Italian Renaissance art (6 credits)
- FINE2013. Northern Renaissance art (6 credits)
- FINE2020. American art (6 credits)
- FINE2025. The art of the Baroque (6 credits)
- FINE2026. The age of revolution: Art in Europe, 1750-1840 (6 credits)
- FINE2027. The formation of modernity: Art in Europe, 1840-1890 (6 credits)
- FINE2028. Vision in crisis (6 credits)
- FINE2029. Modernity and its discontents (6 credits)
- FINE2030. Towards the global (6 credits)
- FINE2031. The rise of modern architecture in Western culture (6 credits)
- FINE2032. Art and the portrayal of women (6 credits)
- FINE2033. Cross-cultural interaction in the 19th century (6 credits)
- FINE2034. Hong Kong art workshop (6 credits)
- FINE2035. Photography and the nineteenth century (6 credits)
- FINE2036. Photography in the twentieth century (6 credits)
- FINE2039. Ink Painting Muromachi Japan (6 credits)
- FINE2041. Japanese art: an introduction (6 credits)
- FINE2042. Chinese Material Culture I: Neolithic to Tang (6 credits)

- FINE2043. Chinese Material Culture II: Song to Qing (6 credits)
 FINE2044. The whys of where: visual geographies of China and Japan (6 credits)
 FINE2045. Colour and Culture (6 credits)
 FINE2046. Art and the Human Body (6 credits)
 FINE2047. Arts of India (6 credits)
 FINE2048. Arts of Japan (6 credits)
 FINE2050. Interpretations of Chinese landscape painting (6 credits)
 FINE2051. Art, politics, and society in modern China (6 credits)

Third year courses

The following courses are open only to third year students and will be taught in a seminar format except for FINE3007.

- FINE3003. Museum studies workshop (6 credits)
 FINE3004. Museum studies internship (6 credits)
 FINE3006. Art history methodology workshop (6 credits)
 FINE3007. Independent research project (6 credits)
 FINE3008. Perspectives in Asian art (6 credits)
 FINE3009. Perspectives in Western art (6 credits)

5. Geography

Candidates intending to declare a major in Geography shall take a minimum total of 48 credit units of second and third year courses from the Geography syllabus, i.e. 24 credits in each of their second- and third-years of studies. Moreover, they must take the **‘required’** methodological course “**GEOG3028 Overseas field trip**”.

As a pre-requisite to become major in Geography, candidates must pass two 6-credit first-year (Junior Level) Geography courses in their first year of study. Only the following second and third year (Senior Level) courses could be counted towards a major in Geography:

All Geography courses, which are available to BSocSc students, are listed as below:

Junior Level courses (First year courses)

- GEOG1002. Hong Kong: land, people and resources (6 credits)
 GEOG1003. Contemporary global environmental issues (6 credits)
 GEOG1005. Map use, reading, and interpretation (6 credits)
 GEOG1006. Natural resources and conservation (6 credits)
 GEOG1011. Introduction to human geography (6 credits)
 GEOG1012. Economic and social development in an urbanizing world (6 credits)

Senior Level courses (Second and Third courses)

- GEOG2001. Economic geography (6 credits)
 GEOG2002. China: development issues (6 credits)
 GEOG2003. Japan, Korea and Southeast Asia (6 credits)
 GEOG2012. Survey and statistical techniques in geography (6 credits)
 GEOG2013. Sustainable development (6 credits)
 GEOG2014. Countryside recreation and management (6 credits)
 GEOG2018. Transport geography (6 credits)
 GEOG2020. Geography of wine (6 credits)
 GEOG2030. Global development (6 credits)
 GEOG2045. Retail location (6 credits)
 GEOG2050. Modern environmentalism: society-environment relations (6 credits)
 GEOG2054. Urban planning in practice in Hong Kong (6 credits)

- GEOG2056. Tourism and the shrinking world (6 credits)
- GEOG2057. Leisure and recreation in modern society (6 credits)
- GEOG2059. Geography of information technology (6 credits)
- GEOG2060. An introduction to archaeology (6 credits)
- GEOG2061. Cultural heritage management and tourism (6 credits)
- GEOG2062. China: the land and the people (6 credits)
- GEOG2078. Urban geography I: growth, function and pattern of cities (6 credits)
- GEOG2079. Urban geography II: city structure and urban land use models (6 credits)
- GEOG2080. Regional geography of Europe (6 credits)
- GEOG2081. Sustainable urban transport (6 credits)
- GEOG2091. Principles and practice of ecotourism (6 credits)
- GEOG2093. Visitor management in parks, heritage sites, and recreation areas (6 credits)
- GEOG3028. Overseas field trip (6 credits)
- GEOG3035. Advanced urban survey (6 credits)

The following Geography courses are regarded as elective courses and shall not be counted towards a major in Geography:

- GEOG2019. Environmental GIS (6 credits)
- GEOG2021. Physical environment of China (6 credits)
- GEOG2051. Port and airport development (6 credits)
- GEOG2065. Urban planning: principles and practices (6 credits)
- GEOG2072. Environmental management: impact assessment (6 credits)
- GEOG2082. Economic development in rural China (6 credits)
- GEOG2083. Sustainable cities: theory and praxis (6 credits)
- GEOG2085. North America (6 credits)
- GEOG2086. China's tourism resources and management (6 credits)
- GEOG2087. GIS in transport planning and management (6 credits)
- GEOG2088. China: environment and sustainable development (6 credits)
- GEOG2089. The Pearl River Delta: development and interaction with Hong Kong (6 credits)
- GEOG2090. Introduction to geographic information systems (6 credits)

6. History

First-year students may enroll in any of the following courses. Students intending to declare a major in History in the Second Year must enroll in **HIST1013. Doing History** and one other six-credit course. **HIST1003. Information technology for historical studies** is highly recommended for students intending to declare a major in History. A-Level examination result in History is **not** a prerequisite for any first-year course

- HIST1003.** Information technology for historical studies (3 credits) (must be taken concurrently with another History course)
- HIST1008.** The world at war (6 credits)
- HIST1010.** An introduction to European history and civilization (6 credits)
- HIST1012.** From imperial to colonial: nineteenth century Hong Kong (6 credits)
- HIST1013.** Doing history (3 credits) [must be taken concurrently with another 6-credit History course]
- HIST1014.** The early modern world (6 credits)
- HIST1015.** Foundations of modern China: dimensions of Qing history (6 credits)
- HIST1016.** The modern world (6 credits)
- HIST1017.** Modern Hong Kong (6 credits)

The History Department offers a major in History, but some of its courses are also included as part of the various interdisciplinary major and minor programmes. The major in History is open to all students in the

Faculty of Arts and the Faculty of Social Sciences. Students enrolling in a History major are also able to declare a double major in one of the major programmes offered by the Faculty of Social Sciences.

To declare a major in History a student must first complete [HIST1013](#). Doing history (3 credits) and one other six-credit first-year History course listed above. A major in History consists of 48 credit units selected from among the courses listed in the following Syllabus. Of these, at least 12 credit units must be in Asian history (China, Hong Kong or Japan) and at least 12 credits must be in Western History (America and Europe). This requirement may be met by taking either Survey or Seminar courses. The courses taken must also include at least 12 credit units of Seminar Courses, but students are encouraged to take more than the minimum number of Seminar Courses. Students declaring a major in History normally take 24 credit units in the second year and 24 credit units in the third year, but there is a great deal of flexibility in balancing credits between the two years of study.

History majors are encouraged to enroll in [HIST2065](#). Workshop in historical research and [HIST3015](#). Theory and practice of history, but these are not requirements for the major. Any student who is interested in pursuing postgraduate studies in History is also encouraged to take these two courses and either [HIST3017](#). Dissertation elective (12 credits) or [HIST3023](#) History research project (6 credits).

All History courses are available to BSocSc students are as listed as below:

Junior Level

- [*HIST1003](#). Information technology for historical studies (3 credits)
 - [HIST1008](#). The world at war (6 credits)
 - [HIST1010](#). An introduction to European history and civilisation (6 credits)
 - [HIST1012](#). From imperial to colonial: nineteenth century Hong Kong (6 credits)
 - [HIST1013](#). Doing history (3 credits)
 - [HIST1014](#). The early modern world (6 credits)
 - [HIST1015](#). Foundations of modern China: dimensions of Qing history (6 credits)
 - [HIST1016](#). The modern world (6 credits)
 - [HIST1017](#). Modern Hong Kong (6 credits)
- (* this course is regarded as an elective course and not counted towards Major/Minor requirement)

Senior Level

I. Survey courses

- [CHIN2225](#). History of the Ming period (6 credits)
- [CHIN2226](#). History of the Qing period (6 credits)
- [HIST2003](#). Twentieth-century China, part I: from revolution to revolution, 1900-1949 (6 credits)
- [HIST2004](#). Twentieth-century China, part II: from revolution to modernization, 1949 to present (6 credits)
- [HIST2005](#). History of Hong Kong, part I (6 credits)
- [HIST2006](#). History of Hong Kong, part II (6 credits)
- [HIST2008](#). Meiji Japan, 1868-1912 (6 credits)
- [HIST2009](#). Modern Japan since 1912 (6 credits)
- [HIST2011](#). Nineteenth-century Europe, part I: 1780-1850 (6 credits)
- [HIST2012](#). Nineteenth century Europe, part II: 1850-1914 (6 credits)
- [HIST2013](#). Twentieth-century Europe, part I: the European Civil War, 1914-1945 (6 credits)
- [HIST2014](#). Twentieth-century Europe, part II: Europe divided and undivided, 1945-1991 (6 credits)
- [HIST2015](#). The United States before 1900 (6 credits)
- [HIST2016](#). The United States in the twentieth century (6 credits)
- [HIST2018](#). The foreign relations of China since 1949 (6 credits)
- [HIST2021](#). Nineteenth century Russia, 1800-1905 (6 credits)
- [HIST2024](#). A century of business in Hong Kong, 1842-1949 (6 credits)
- [HIST2025](#). British Hong Kong and China 1895-1945 (6 credits)
- [HIST2026](#). Interpreting Japanese history through movies (6 credits)

- HIST2027. The foundations of international trade and finance in the modern world (6 credits)
 HIST2031. History through film (6 credits)
 HIST2034. An introduction to the history of education in Hong Kong (6 credits)
 HIST2035. The Bauhinia and the Lotus: Culture and history of the two SARS (6 credits)
 HIST2037. Germany between the two World Wars: the rise and fall of Adolf Hitler (6 credits)
 HIST2038. Germany, 1871-1990: From unification to reunification (6 credits)
 HIST2039. War and peace: Conflicts and conflict resolutions since 1945 (6 credits)
 HIST2040. Life in Tokugawa Japan, 1603-1868 (6 credits)
 HIST2042. The history of sport (6 credits)
 HIST2046. The modern European city: Urban living and open spaces (6 credits)
 HIST2062. From empire to EU: culture, politics and society in twentieth century Britain (6 credits)
 HIST2063. Europe and modernity: cultures and identities, 1890-1940 (6 credits)
 HIST2064. Sweat and abacus: Overseas Chinese in Southeast Asia (6 credits)
 HIST2065. Workshop in historical research (6 credits)
 HIST2066. Narcotic culture: A history of drugs (6 credits)
 HIST2067. Sex, gender and modernity in China (6 credits)
 HIST2068. The intellectual history of twentieth-century China (6 credits)
 HIST2069. The history of American popular culture (6 credits)
 HIST2070. Stories of self: History through autobiography (6 credits)
 HIST2071. Joseph Stalin: His life, policies and historical assessment (6 credits)
 HIST2072. A history of modern European warfare (6 credits)
 HIST2073. Prussia in the age of absolutism and reform, 1648-1815 (6 credits)
 HIST2076. Germany and the Cold War (6 credits)
 HIST2077. Eating History: food culture from the 19th century to the present (6 credits)
 HIST2078. Renaissance Europe 1453-1648 (6 credits)
 HIST2079. Early Modern Europe 1648-1789 (6 credits)
 HIST2085. The history of modern sexual identity and discourse (6 credits)
 HIST2086. Bismarck: The Iron Chancellor (6 credits)
 HIST2087. The Vietnam Wars (6 credits)
 HIST2088. From communism to capitalism: Eastern Europe and the Soviet Union after 1980 (6 credits)
 HIST2091. The British Empire (6 credits)

II. Seminar courses

- CHIN2235. Sources and methodology (6 credits)
 GEOG2060. An Introduction to archaeology (6 credits)
 HIST2032. Case studies in women's history: Hong Kong and the U.S. (6 credits)
 HIST2048. The history of young people in modern Europe (6 credits)
 HIST2052. Social issues in Hong Kong history (6 credits)
 HIST2053. The Cold War (6 credits)
 HIST2074. Historical studies using computers (6 credits)
 HIST2075. Directed reading (6 credits)
 HIST2080. Classroom across the Pacific: American history and anthropology (6 credits)
 HIST2081. Gender and history: Beauty, fashion and sex (6 credits)
 HIST2082. Europe and its other (6 credits)
 HIST2083. Gender, sexuality and empire (6 credits)
 HIST2084. Sexing the spirit: The history of the modern feminist challenge to Christianity (6 credits)
 HIST2089. History's closet: Clothing in context (6 credits)
 HIST2090. The Great Famine (1959-61) (6 credits)

Semester V/VI

- HIST3015. The theory and practice of history (6 credits)
 HIST3017. Dissertation elective (12 credits)
 HIST3022. History by numbers: quantitative methods in History (6 credits)
 HIST3023. History research project (6 credits)

7. Japanese Studies

1. The **Japanese Studies Programme (Major)** consists of 3 components:
 - (i) *Japanese language* training in the Department of Japanese Studies;
 - (ii) *Japanese language-intensive* courses in various disciplines taught in the Department of Japanese Studies;
 - (iii) Japan-related *interdisciplinary content* courses in various disciplines which are open to any student who satisfies the prerequisites.
2. A major in Japanese Studies consists of 54 credits in the **Japanese Studies programme** to be taken in the Second and Third years.

Students undertaking the major must have taken the first year courses **JAPN1088 Japanese language I (Part 1) (9 credits)**, **JAPN1099 Japanese language I (Part 2) (9 credits)** and **JAPN1011 Introduction to Japanese studies (6 credits)**.

To major in Japanese Studies, students must take **JAPN2088 Japanese language II (Part 1) (6 credits)** and **JAPN2099 Japanese language II (Part 2) (6 credits)**, and **JAPN3088 Japanese language III (Part 1) (6 credits)** and **JAPN3099 Japanese language III (Part 2) (6 credits)** (as in List A below) in their second and third years respectively. In addition, they must complete at least one *Japanese Language-Intensive Course* (6 credits) (to be selected from list B) in each of the second and third years, and must also complete three *Interdisciplinary Content Courses* (6 credits each) (to be selected from List C) during the two-year period that comprises their second and third years (completing at least one in each of their second and third years).

There is no departmental prerequisite for admission to **JAPN1088 Japanese language I (Part 1)** and **JAPN1099 Japanese language I (Part 2)**. The language courses offered by the Department are designed for students who have no prior knowledge of Japanese, and who progress normally from one level to the next. Therefore, students may not *normally* enrol for **JAPN2088 Japanese language II (Part 1)** and **JAPN2099 Japanese language II (Part 2)** or **JAPN3088 Japanese language III (Part 1)** and **JAPN3099 Japanese language III (Part 2)** without having satisfactorily completed the previous level. However, students with prior qualifications in the Japanese language who wish to apply for a waiver should sit for a qualifying examination. Second and third year students should contact the Departmental general office for the qualification examination date and time before 31 July 2006 [Same conditions also apply to **JAPN1066 Japanese language I(a) (Part 1)** and **JAPN1077 Japanese language I(a) (Part 2)**, **JAPN2066 Japanese language II(a) (Part 1)** and **JAPN2077 Japanese language II(a) (Part 2)**, and **JAPN3066 Japanese language III(a) (Part 1)** and **JAPN3077 Japanese language III(a) (Part 2)**]. A C- grade in the **JAPN1099 Japanese language I (Part 2)** is the minimum requirement for enrolment in **JAPN2088 Japanese language II (Part 1)**. Students who obtain D+ or lower in the **JAPN1099 Japanese language I (Part 2)** will be required to take a further examination and/or interview and must obtain a pass mark (50%) in order to be admitted to **JAPN2088 Japanese language II (Part 1)**.

All Japanese Studies courses available to BSocSc students are listed as below:

Junior Level

JAPN1066.	Japanese language I(a) (Part 1) (3 credits)
JAPN1077.	Japanese language I(a) (Part 2) (3 credits)
JAPN1009.	Introduction to Japanese linguistics (6 credits)
JAPN1011.	Introduction to Japanese studies (6 credits)
JAPN1088.	Japanese language I (Part 1) (9 credits)
JAPN1099.	Japanese language I (Part 2) (9 credits)

*Senior Level***List A. Japanese Language Courses***Second Year*

JAPN2088. Japanese language II (Part 1) (6 credits)

JAPN2099. Japanese language II (Part 2) (6 credits)

Second and Third Years

JAPN2066. Japanese language II(a) (Part 1) (3 credits)

JAPN2077. Japanese language II(a) (Part 2) (3 credits)

Third Year

JAPN3066. Japanese language III(a) (Part 1) (3 credits)

JAPN3077. Japanese language III(a) (Part 2) (3 credits)

JAPN3088. Japanese language III (Part 1) (6 credits)

JAPN3099. Japanese language III (Part 2) (6 credits)

List B. Language-Intensive Courses*Second Year*

JAPN2002. Japan in Japanese (6 credits)

JAPN2007. Modern Japanese short stories (6 credits)

JAPN2009. Translation I (Chinese/Japanese, Japanese/Chinese) (6 credits)

JAPN2032. The changing image of Hong Kong in Japanese writings (6 credits)

JAPN2036. Japanese text analysis (3 credits)

JAPN2037. Interpretation I (Putonghua and Cantonese – Japanese) (6 credits)

JAPN2038. Interpretation II (Putonghua and Cantonese – Japanese) (6 credits)

Second and Third Years

JAPN2026. Japanese language III extended (6 credits)

Third Year

JAPN2008. Translation I (Japanese into English) (6 credits)

JAPN3003. Selected readings in Japanese studies (6 credits)

JAPN3005. Media Japanese (6 credits)

JAPN3007. Translation II - Japanese – English (6 credits)

JAPN3010. Translation II (Chinese/Japanese, Japanese/Chinese) (6 credits)

JAPN3011. Japanese in popular culture (6 credits)

JAPN3015. Business Japanese I (3 credits)

JAPN3016. Business Japanese II (6 credits)

JAPN3020. Advanced translation, Japanese to Chinese (6 credits)

List C. Interdisciplinary Content Courses*Second and Third Years*

JAPN2003. Introduction to Japanese literature (6 credits)

JAPN2010. Japanese business: an anthropological introduction (6 credits)

JAPN2011. Anthropology of Japan (6 credits)

JAPN2014. China and Japan (6 credits)

JAPN2015. Japanese enterprise groupings (6 credits)

JAPN2016. Comparative linguistics: Cantonese and Japanese I
Comparative phonology (6 credits)

JAPN2018. Popular culture and artistic activity in Japan (6 credits)

JAPN2019. Communication and society (6 credits)

- JAPN2024. Comparative linguistics: Cantonese and Japanese III
Syntactic features and pedagogical implications (6 credits)
- JAPN2027. Comparative linguistics: Cantonese and Japanese II
Phonological transfer and pedagogy in foreign language acquisition (6 credits)
- JAPN2029. Japanese popular music and Hong Kong society (6 credits)
- JAPN2030. Japanese business, culture and communication (6 credits)
- JAPN2031. The media and Japan (6 credits)
- JAPN2034. Education in contemporary Japanese society (6 credits)
- JAPN2035. Women in Japan and Hong Kong (6 credits)

Third Year

- JAPN3004. Contemporary Japanese fiction (6 credits)
- JAPN3006. Extended essay in Japanese studies (9 credits)
- JAPN3008. Contemporary Japanese popular music (6 credits)
- JAPN3009. Japanese film (6 credits)
- JAPN3014. Project in Japanese business (6 credits)

The following *interdisciplinary content* courses are available in other Departments (although not all may be offered each year).

Second and Third Years

Department of Fine Arts

- FINE2008. The poetics of Japanese narrative painting (6 credits)
- FINE2009. Genji's dream: the courtly arts of Heian Japan (6 credits)
- FINE2011. Japanese art: the interactive dimension (6 credits)
- FINE2039. Ink painting Muromachi Japan (6 credits)
- FINE2041. Japanese art: an introduction (6 credits)

Department of History

- HIST2008. Meiji Japan, 1868-1912 (6 credits)
- HIST2009. Modern Japan since 1912 (6 credits)
- HIST2040. Life in Tokugawa Japan, 1603-1868 (6 credits)

Department of Sociology

- SOCI0017. Japanese economic institutions (6 credits)
- SOCI0018. Japanese society (6 credits)

8. Language Centre

Major in French

Students enrolled in French courses in their first year may choose to major in French in their second and third years. The objective of the programme is to bring participants to a high level of proficiency in the language as well as to provide them with a sound knowledge of French society and culture.

In order to declare a major in French, applicants must initially complete two foundation courses in their first year ([LANG1001 French I.1](#) and [LANG1002 French I.2](#), first and second semesters, 18 credits in all) and achieve grade C- minimum in these courses. In addition, applicants will normally be required to take part in an intensive course offered by the Centre at the end of the second semester (usually in June).

In their second and third years of study, students pursuing a major in French must take a total of 48 credits of French courses which should normally be distributed as follows: in the Second Year, 24 credits from

courses at Level 200, of which 12 credits must be from the core language course, i.e., *French language II.1*; in the Third Year, 24 credits from courses at Level 300, of which 12 credits must be from the core language course, i.e., *French language III.1*. (See list of French courses). In addition, students will normally be required to take part in an intensive course offered by the Centre at the end of the fourth semester (usually in June). Alternatively, students will be strongly encouraged to participate in a linguistic stay in France during the summer.

List of French Courses

Junior level courses (First year courses)

- LANG1001. French I.1 (6 credits/first semester)
- LANG1002. French I.2 (12 credits/second semester)
- LANG1035. France today: an overview (3 credits)

Senior level courses (Second year courses)

- LANG2001. French language – II.1 (12 credits/whole year)
- LANG2035. Introduction to French/Chinese translation – Part I (3 credits/first semester)
- LANG2036. Introduction to French/English translation – Part I (3 credits/first semester)
- LANG2037. Introduction to French/Chinese translation – Part II (3 credits/second semester)
- LANG2038. Introduction to French/English translation – Part II (3 credits/second semester)
- LANG2043. French language and culture I (3 credits/first semester)
- LANG2044. French language and culture II (3 credits/second semester)
- LANG2045. French speech and sounds – Part I (3 credits/first semester)
- LANG2046. French speech and sounds – Part II (3 credits/second semester)
- LANG2047. French reading course (3 credits)
- LANG2048. French songs and lyrics (3 credits)

Senior level course (Third year courses)

- LANG3001. French language – III.1 (12 credits/whole year)
- LANG3003. French/English translation: practical skills (3 credits/first semester)
- LANG3004. French/Chinese translation: practical skills (3 credits/second semester)
- LANG3005. French and business (3 credits/second semester)
- LANG3022. French eastern narratives (3 credits)
- LANG3033. French media and advertising (3 credits)
- LANG3034. French essay writing (3 credits)
- LANG3036. French society and cinema (3 credits)
- LANG3038. French in France (3 credits)
- LANG3053. French literature: the 19th century (3 credits/first semester)
- LANG3054. French literature: the 20th century (3 credits/second semester)

Major in German

The Major in German provides students with a comprehensive knowledge of both spoken and written German. In addition to the acquisition of these linguistic skills students will be introduced to a wide range of aspects of contemporary German society and culture through the study of numerous multimedia materials and documents in the target language that will be included in courses in area studies, translation and literature in the Second and Third Year.

All German Major Students are encouraged to attend an intensive summer language course (German in Germany) of 4 weeks duration at a university in Germany during the summer between their 2nd and 3rd year and successful completion of such a course at the appropriate level will count as 3 credits towards their major requirements. Longer stays of one to two semesters are also encouraged and can be arranged through the German Section.

Programme Requirements

First Year

In the First Year students will have to successfully complete a total of 18 credits in German language by enrolling in the courses [LANG1003](#) German I.1 (6 credits/1st Semester) and [LANG1004](#) German I.2 (12 credits/2nd Semester).

Second Year

In the Second Year students will have to complete a total of 24 credits of courses taught in German:

- a) [LANG2004](#) German II.1 (12 credits/whole year)
- b) a total of 12 credits from the following courses:
 - [LANG2039](#) Translation exercise I (3 credits/1st semester)
 - [LANG2041](#) Representations of contemporary German society in the media (3 credits/1st semester)
 - [LANG2040](#) Translation exercise II (3 credits/2nd semester)
 - [LANG2042](#) Producing German texts I (3 credits/2nd semester)
 - [LANG2056](#) Understanding Germany and the Germans (3 credits/2nd semester).

During the summer between Second and Third Years students are strongly encouraged to attend one of the summer language courses offered by universities in Germany. Successful completion of such a four weeks' course at late beginners/early intermediate level (based on the terminology used in Germany) can be counted as 3 credits towards the requirements for the German Major.

Third Year

In the final year students will have to complete a total of 24 credits from the following courses taught in German:

- a) [LANG3007](#) German III.1 (12 credits/whole year)
- b) 3 credits from
 - either [LANG3048](#) Fairytale princes, nature lovers and revolutionaries – The German Romantics (3 credits/2nd semester)
 - or [LANG3010](#) German projects (3 credits/2nd semester)
- c) a total of 9 credits from the following courses:
 - [LANG3008](#) Reading course (3 credits/1st semester)
 - [LANG3039](#) German in Germany (3 credits/taught during the summer between Year II & III)
 - [LANG3045](#) Translation exercise III (3 credits/1st semester)
 - [LANG3046](#) Translation exercise IV (3 credits/2nd semester).
 - [LANG3047](#) Producing German texts II (3 credits/1st semester)

Major in Spanish

Students enrolled in Spanish courses in their first year may choose to major in Spanish in their second and third years. The objective of the programme is to bring participants to a high level of proficiency in the language as well as to provide them with a sound knowledge of Spanish society and culture.

In order to declare a major in Spanish, applicants must initially complete two foundation courses in their first year ([LANG1038](#) Spanish language I.1 and [LANG1039](#) Spanish language I.2, first and second semesters, 18 credits in all). In addition, applicants will normally be required to take part in an intensive course offered at the end of the second semester (usually in June).

In their second and third years of study, students pursuing a major in Spanish must take a total of 48 credits of Spanish courses which should normally be distributed as follows: in the Second Year, 24 credits from courses at level 200, of which 12 must be from the core language course, i.e. Spanish II; in the Third Year, 24 credits from courses at level 300, of which 12 must be from the core language course, i.e. Spanish III (see the list of courses below). In addition, students will normally be required to take part in an intensive course offered at the end of the fourth semester (usually in June). Alternatively, students will be strongly encouraged to participate in a linguistic stay in Spain (or a Hispanic country) during the summer.

List of Spanish Courses

Junior level courses (First Year courses)

- [LANG1038](#). Spanish language I.1 (6 credits/first semester)
[LANG1039](#). Spanish language I.2 (12 credits/second semester)

Senior level course

(Second year courses)

- [LANG2011](#). Spanish II (12 credits/whole year)
[LANG2055](#). Spanish for business I (3 credits)

(Second/Third years courses)

- [LANG0003](#). Introduction to Spanish culture (3 credits/first semester)
[LANG0005](#). Hispanic film and literature (3 credits/second semester)

(Third Year courses)

- [LANG3013](#). Spanish III (12 credits/whole year)
[LANG3042](#). Spanish in Spain (3 credits)
[LANG3055](#). Spanish for business II (3 credits)

9. Linguistics

In the Department of Linguistics, students can investigate a variety of different languages and through such investigations, come to a better understanding of the shared structure and broad variation of the world's languages.

The undergraduate programme in Linguistics permits students to combine in a single field a variety of Arts and Social Science subjects and to develop their analytic skills in depth. Students are encouraged to explore with members of staff the many relationships of linguistics with other fields in order to discover the programme that best suits their individual goals and interests.

The Department offers the following majors and joint programmes:

- Major in Linguistics
- Major in Human Language Technology
- Programme in Linguistics and Philosophy

I. Major in Linguistics

Students majoring in Linguistics must take [LING1001](#) Introduction to linguistics, and [LING1003](#) Language, thought, and culture in their first year.

They must also take

- [LING2004](#). Phonetics: describing sounds and
[LING2050](#). Grammatical description (normally in their second year) and
[LING3003](#). Linguistics field trip (in their third year)

In addition, they must take a minimum of 30 credits in their second and third year of study from the following list of courses:

- LING2001. Computational linguistics (6 credits)
 - LING2002. Conversation analysis (6 credits)
 - LING2003. Semantics: meaning and grammar (6 credits)
 - LING2009. Languages of the world (6 credits)
 - LING2010. Language and dialect (6 credits)
 - LING2011. Language and literacy in the information age (6 credits)
 - LING2012. Experimental phonetics (6 credits)
 - LING2013. Language typology: the study of linguistic diversity (6 credits)
 - LING2018. Lexical-functional grammar (6 credits)
 - LING2022. Pragmatics (6 credits)
 - LING2023. Discourse analysis (6 credits)
 - LING2024. Lexicology and lexicography (6 credits)
 - LING2025. Corpus linguistics (6 credits)
 - LING2027. Phonology: An introduction to the study of sound systems (6 credits)
 - LING2030. Morphological theory (6 credits)
 - LING2031. Phonological theory (6 credits)
 - LING2032. Syntactic theory (6 credits)
 - LING2033. Contrastive grammar of English and Chinese (6 credits)
 - LING2034. Psycholinguistics (6 credits)
 - LING2036. Child language (6 credits)
 - LING2037. Bilingualism (6 credits)
 - LING2038. Historical linguistics (6 credits)
 - LING2039. Language variation and change (6 credits)
 - LING2040. Languages in contact (6 credits)
 - LING2041. Language and information technology (6 credits)
 - LING2042. Educational linguistics (6 credits)
 - LING2043. Language and animal communication (6 credits)
 - LING2044. Language and culture (6 credits)
 - LING2045. Writing systems (6 credits)
 - LING2046. British linguistics (6 credits)
 - LING2047. Optimality theory (6 credits)
 - LING2048. Language and cognition (6 credits)
 - LING2051. French syntax and universal grammar (6 credits)
 - LING2052. Swahili structure and universal grammar (6 credits)
 - LING2053. Language and the brain (6 credits)
 - LING3002. Extended essay (6 credits)

II. Major in Human Language Technology (HLT)

Human Language Technology is a relatively new discipline that investigates two main issues. On the one hand it explores the theoretical and practical issues surrounding the ability to get technology, especially modern information communications technology (ICT), to interact with humans using natural language capabilities. On the other hand, it is a discipline that investigates how technologies, especially ICTs, can serve as useful adjuncts to humans in language understanding, including analysis, processing, storage and retrieval. This investigation could lead to practical applications, including the design of online learning environments for language learning and multilingual retrieval for automatic translation.

The following are some of the objectives of the proposed programme: (1) to give students a perspective of how technology relates to human language processing; (2) to understand how information communications technology has been applied to different aspects of Linguistics and human language processing and to what effect; (3) to critically evaluate the role of technology in human language processing; and (4) to examine the range of opportunities available to different professionals regarding the application of technology in human language processing.

Students majoring in HLT must take [LING1001](#). Introduction to linguistics, and preferably also [LING1002](#). Language.com:Language in the contemporary world or [LING1003](#) Language, thought, and culture in their first year. They must also take [LING2004](#). Phonetics: describing sounds and [LING2050](#). Grammatical description normally in their second year and [LING3003](#). Linguistics field trip in their third year. In addition, they must take a minimum of 30 credits in their second and third year of study from the following list of courses:

Second Year:

[LING2011](#). Language and literacy in the information age (6 credits)

[LING2004](#). Phonetics: describing sounds (6 credits) and/or

[LING2012](#). Experimental phonetics (6 credits)

[LING2027](#). Phonology: An introduction to the study of sound systems (6 credits) and/or

[LING2031](#). Phonological theory (6 credits)

[LING2030](#). Morphological theory (6 credits) and/or

[LING2050](#). Grammatical description (6 credits)

[LING2032](#). Syntactic theory (6 credits) and/or

[LING2050](#). Grammatical description (6 credits)

[LING2003](#). Semantics: meaning and grammar (6 credits)

Third Year:

[LING2001](#). Computational linguistics (6 credits)

[LING2018](#). Lexical-functional grammar (6 credits)

[LING2024](#). Lexicology and lexicography (6 credits)

[LING2041](#). Language and information technology (6 credits)

[LING3003](#). Linguistics field trip (6 credits)

Students may seek permission to replace an HLT course with another relevant course in the department should there be staffing or timetabling problems. Students in the third year can take second year courses, if necessary.

III. Linguistics and Philosophy

A second major shall consist of 48 credits second and third year courses in Linguistics and Philosophy Syllabus. As a prerequisite, candidates must pass [LING1001](#) Introduction to linguistics and one Philosophy first year course as specified below.

First year:

(a) Linguistics: [LING1001](#). Introduction to linguistics (6 credits)

(b) Philosophy: [PHIL1001](#). Knowledge of the world: an introduction to philosophy (6 credits)

or

[PHIL1002](#). The human mind: an introduction to philosophy (6 credits)

or

[PHIL1003](#). Ethics and society: an introduction to philosophy (6 credits)

or

[PHIL1004](#). Chinese and western thought: an introduction to philosophy (6 credits)

Second and third years (eight courses):

(c) Department of Linguistics:

- LING2003. Semantics: meaning and grammar (6 credits)
- LING2027. Phonology: an introduction to the study of sound systems (6 credits)
- LING2032. Syntactic theory (6 credits)
- LING2050. Grammatical description (6 credits)

(d) Department of Philosophy:

- PHIL2610. Philosophy of language (6 credits)

and any three of:

- PHIL2060. Wittgenstein (6 credits)
- PHIL2075. The semantics/pragmatics distinction (6 credits)
- PHIL2120. Topics in Analytic Philosophy (6 credits)
- PHIL2220. The mind (6 credits)
- PHIL2230. Philosophy and cognitive science (6 credits)
- PHIL2310. Theories of morality
- PHIL2350. Philosophy of law
- PHIL2380. Philosophy and literature (6 credits)
- PHIL2420. Chinese philosophy: metaphysics (6 credits)
- PHIL2460. Philosophical Chinese (6 credits)
- PHIL2510. Logic (6 credits)
- PHIL2511. Paradoxes (6 credits)
- PHIL2520. Philosophy of logic (6 credits)

It should be noted that not all courses are offered in both departments every year. Choices are subject to approval by the head of the department.

10. Music

The Department of Music offers courses designed to meet the needs of students working towards a degree either as a music major or specialist, or as a major in another area. Our courses have been designed with the following aims in mind:

- To deepen students' understanding of the functions, concepts, structures and values of music and its role in society.
- To broaden students' knowledge of the diverse musical cultures of the world and their histories, styles and ideas.
- To train students to think critically about music and to equip them with the verbal skills which will enable them to articulate their thinking.
- To promote creative activity in the composition and performance of music as a mode of discourse that uniquely complements other modes of discourse in the humanities.
- To provide a comprehensive education that integrates the activities of scholarship, composition, and performance, connecting them to the larger world of learning in the humanities, the sciences and commerce.

The courses cover a wide range of topics and approaches, including the role of the world's music in society, the study of historical and contemporary perspectives, the application of technology in music, and composition and performance. Cross-cultural and cross-disciplinary interests are particularly encouraged. Some courses do not require previous training in music, and students may be admitted to any course with the approval of the Head of Department.

First year music specialists and intending majors must take:

- MUSI1004. Introduction to musics of the world (6 credits)
- MUSI1005. Introduction to music in Western culture (6 credits)
- MUSI1014. Aural skills (3 credits)*
- MUSI1019. Fundamentals of tonal music I (3 credits)
- MUSI1020. Fundamentals of tonal music II (6 credits)

All Level 100 courses except MUSI1018 are also open to students who are not music specialists or intending majors. Students who do not intend to major in Music may still choose to take MUSI1018 with the approval of the Head of Department.

Second and third year music majors and specialists must take:

- MUSI2004. University gamelan 1 (3 credits)*
- MUSI2007. Western music history 1 (6 credits)
- MUSI2008. Western music history 2 (6 credits)
- MUSI2052. Advanced tonal chromaticism and analysis (6 credits)

and at least THREE of the following five courses. All five courses will be available over a two-year period. Please check with the Music Department for details:

- MUSI2006. Analysis of orally transmitted musics (6 credits)
- MUSI2010. Music of China (6 credits)
- MUSI2015. Popular music: from Cantopop to techno (6 credits)
- MUSI2029. Chinese music history (6 credits)
- MUSI2055. Chinese opera (6 credits)

The following courses are elective. All music majors and specialists must take at least nine elective credits from Level 200 or 300 courses. Students are free to choose from any category.

Thinking in Music

- MUSI2009. Topics in Asian music history (6 credits)
- MUSI2016. Music of contemporary Hong Kong (6 credits)
- MUSI2031. American music (6 credits)
- MUSI2033. Music and culture in Bali: an overseas fieldtrip (6 credits)
- MUSI2035. Love, sex, and death in music of the ancient and modern world (6 credits)
- MUSI2037. Directed study 1 (6 credits)*
- MUSI2044. Film music (6 credits)
- MUSI2048. Music, language, and meaning (6 credits)
- MUSI2056. Defining the arts scene in Hong Kong (6 credits)
- MUSI3016. Directed study 2 (6 credits)*

Technology and Composition

- MUSI2013. Computer and electronic music (6 credits)
- MUSI2026. Fundamentals of music composition (6 credits)
- MUSI2027. Composing for the concert world (6 credits)
- MUSI2030. Composing for the commercial world (6 credits)
- MUSI2036. Audio digital signal processing (6 credits)

* Year course.

- MUSI2042. Contrapuntal techniques (6 credits)
- MUSI2043. Orchestration (6 credits)
- MUSI2053. Post-Tonal techniques and advanced analysis (6 credits)

Practical Applications

- MUSI2028. The business of music (6 credits)
- MUSI2032. Orchestral studies and techniques 2 (3 credits)*
- MUSI2041. University choir 2 (3 credits)*
- MUSI2046. Performance workshop 2 (3 credits)*
- MUSI2047. Advanced music performance 2 (6 credits)*
- MUSI2051. Rhythms of life: music and culture in West Africa (3 credits)
- MUSI3008. University gamelan 2 (3 credits)*
- MUSI3012. Orchestral studies and techniques 3 (3 credits)*
- MUSI3017. University choir 3 (3 credits)*
- MUSI3018. Performance workshop 3 (3 credits)*
- MUSI3019. Advanced music performance 3 (6 credits)*

Courses for Non-Music Majors

Second and third year students who are not music majors or specialists may choose from the following courses:

- MUSI2004. University gamelan 1 (3 credits)*
- MUSI2010. Music of China (6 credits)
- MUSI2013. Computer and electronic music (6 credits)
- MUSI2015. Popular music: from Cantopop to techno (6 credits)
- MUSI2016. Music of contemporary Hong Kong (6 credits)
- MUSI2018. Understanding music (3 credits)
- MUSI2019. Music in society (3 credits)
- MUSI2028. The business of music (6 credits)
- MUSI2029. Chinese music history (6 credits)
- MUSI2031. American music (6 credits)
- MUSI2032. Orchestral studies and techniques 2 (3 credits)*
- MUSI2033. Music and culture in Bali: an overseas fieldtrip (6 credits)
- MUSI2035. Love, sex, and death in music of the ancient and modern world (6 credits)
- MUSI2036. Audio digital signal processing (6 credits)
- MUSI2041. University choir 2 (3 credits)*
- MUSI2042. Contrapuntal techniques (6 credits)
- MUSI2043. Orchestration (6 credits)
- MUSI2044. Film music (6 credits)
- MUSI2046. Performance workshop 2 (3 credits)*
- MUSI2048. Music, language, and meaning (6 credits)
- MUSI2049. Music and power (3 credits)
- MUSI2050. Representation of the supernatural in music (3 credits)
- MUSI2051. Rhythms of life: music and culture in West Africa (3 credits)
- MUSI2052. Advanced tonal chromaticism and analysis (6 credits)
- MUSI2053. Post-Tonal techniques and advanced analysis (6 credits)
- MUSI2054. The piano (3 credits)
- MUSI2055. Chinese opera (6 credits)
- MUSI2056. Defining the arts scene in Hong Kong (6 credits)
- MUSI3008. University gamelan 2 (3 credits)*
- MUSI3012. Orchestral studies and techniques 3 (3 credits)*

- [MUSI3017](#). University choir 3 (3 credits)*
[MUSI3018](#). Performance workshop 3 (3 credits)*

All of the above may also count as Inter-Faculty Broadening Courses, if allowed by the student's home faculty or department. Non-music majors may also choose any course or combination of courses not listed above with the approval of the Head of Department.

11. Philosophy

Candidates wishing to have a second major in Philosophy should normally have taken at least one first level course, except where otherwise indicated. Apart from [PHIL3810](#). Senior seminar and [PHIL3910](#). Senior thesis, they are all second or third year courses.

Most of these courses consist of 18 lectures in one semester, together with tutorials. The final grade of courses offered by the Department will be determined by coursework assessment only. Details of tutorial and other arrangements are published each year in the department's booklet, Choices in Philosophy.

All these courses but two are listed under four groups:

- Knowledge and reality
- Mind and language
- Moral and political philosophy
- History of philosophy

Of the second and third level courses listed, twelve to sixteen will normally be offered each year. This means that not every course will be available in any two-year period. Some courses, however, are likely to be offered every year, and some we prefer to give at least once every two years to make sure that every student has an opportunity to take them.

Students who major in philosophy must take at least eight courses in philosophy, and are recommended to take at least one course from each of these categories. Third year majors are recommended to take the Senior seminar in their final year, especially if they are considering further study in philosophy, provided that their second year grades reach a good level.

All Philosophy courses available to BSocSc students are listed as below:

Junior Level

- [PHIL1001](#). Knowledge of the world: an introduction to philosophy (6 credits)
- [PHIL1002](#). The human mind: an introduction to philosophy (6 credits)
- [PHIL1003](#). Ethics and society: an introduction to philosophy (6 credits)
- [PHIL1004](#). Chinese and Western thought: an introduction to philosophy (6 credits)
- [PHIL1005](#). Critical thinking and logic (6 credits)
- [PHIL1006](#). Elementary logic (3 credits)

Senior Level

Group I: Knowledge and Reality

- [PHIL2110](#). Knowledge (6 credits)
- [PHIL2120](#). Topics in analytic philosophy (6 credits)
- [PHIL2130](#). Philosophy of the sciences (6 credits)
- [PHIL2140](#). Philosophy of social science (6 credits)
- [PHIL2150](#). Philosophy and biology (6 credits)
- [PHIL2210](#). Metaphysics (6 credits)
- [PHIL2420](#). Chinese philosophy: metaphysics (6 credits)

Group II: Mind and Language

- [PHIL2070](#). Pragmatism (6 credits)

- PHIL2075. The semantics/pragmatics distinction (6 credits)
- PHIL2220. The mind (6 credits)
- PHIL2230. Philosophy and cognitive science (6 credits)
- PHIL2460. Philosophical Chinese (6 credits)
- PHIL2510. Logic (6 credits)
- PHIL2511. Paradoxes (6 credits)
- PHIL2520. Philosophy of logic (6 credits)
- PHIL2610. Philosophy of language (6 credits)

Group III: Moral and Political Philosophy

- PHIL2080. Marxist philosophy (6 credits)
- PHIL2310. Theories of morality (6 credits)
- PHIL2320. Happiness (6 credits)
- PHIL2340. Moral problems (6 credits)
- PHIL2345. Social contract theories (6 credits)
- PHIL2350. Philosophy of law (6 credits)
- PHIL2355. Theories of justice (6 credits)
- PHIL2360. Political philosophy (6 credits)
- PHIL2362. Liberal democracy (6 credits)
- PHIL2365. Philosophical problems of modernity (6 credits)
- PHIL2369. Philosophy of nature (6 credits)
- PHIL2375. Philosophy of art (6 credits)
- PHIL2380. Philosophy and literature (6 credits)
- PHIL2390. Philosophy of religion (6 credits)
- PHIL2430. Chinese philosophy: ethics (6 credits)
- PHIL2480. Confucianism and the modern world (6 credits)

Group IV: History of Philosophy

- PHIL2001. The beginnings of philosophy (6 credits)
- PHIL2002. Early modern philosophy (6 credits)
- PHIL2010. Plato (6 credits)
- PHIL2011. Aristotle (6 credits)
- PHIL2020. Descartes (6 credits)
- PHIL2025. Hume (6 credits)
- PHIL2027. Rousseau (6 credits)
- PHIL2030. Kant's critical philosophy (6 credits)
- PHIL2035. Philosophy of the Enlightenment (6 credits)
- PHIL2040. Nietzsche (6 credits)
- PHIL2060. Wittgenstein (6 credits)
- PHIL2077. Habermas (6 credits)
- PHIL2085. Contemporary European philosophy (6 credits)
- PHIL2090. Foucault (6 credits)
- PHIL2440. Confucius (6 credits)
- PHIL2442. Mencius (6 credits)
- PHIL2450. Zhuangzi (6 credits)

Courses of unspecified category

- PHIL3810. Senior seminar (6 credits)
 - PHIL3910. Senior thesis (12 credits)
-

Minors

1. American Studies

Students must gain admittance to the programme by taking ONE or more of the first-year courses to qualify for a minor. These courses include:

- AMER1009. Consuming culture: decoding American symbols (6 credits)
- AMER1011. Born in the USA': U.S. youth cultures (6 credits)
- AMER1015. Wall Street: Issues in American business (6 credits)
- AMER1017. Movieland: America on Hollywood's big screen (6 credits)
- AMER1018. The American Hardboiled: From crime fiction to social document (6 credits)

Students may take American Studies as a minor by completing 24 credits of second-and third-year courses. Of these courses, students must take:

2 American Studies Core Courses (12 credits) drawn from the following:

- AMER2030. Foundations of American studies, Part I (6-credit course in second year)
- AMER2031. Foundations of American studies, Part II (6-credit course in second year)
- AMER3004. Senior seminar in American studies: Part I (6-credit course in third year)
- AMER3005. Senior seminar in American studies: Part II (6-credit course in third year)

The remaining 2 courses (12 credits) may be drawn from the following:

- AMER2002. The road in American culture (6 credits)
- AMER2014. A dream in the heart: varieties of Asian American culture (6 credits)
- AMER2015. The American city (6 credits)
- AMER2018. Show me the money: doing business with Americans (6 credits)
- AMER2021. On the road again: Field trip in American Studies (6 credits)
- AMER2022. What's on TV? Television and American culture (6 credits)
- AMER2029. Current perspectives on the U.S. (6 credits)
- AMER2033. Asia on America's screen (6 credits)
- AMER2035. Addicted to war? The US at home and abroad (6 credits)
- AMER2036. Issues in Contemporary Immigration to American Cities (6 credits)
- AMER2037. Institutions in American life: home, education, work and play (6 credits)
- AMER3006. Dissertation (12 credits)

2. Chinese

The Department offers four minors in the second and third years, as follows:

- (i) Chinese Language and Literature: Group A;
- (ii) Chinese History: Group B;
- (iii) Translation: limited to List 2 of Group C;
- (iv) Chinese Studies: Groups A and B.

Students are required to take not less than 24 credits of second and third year courses in the specified group(s). There are no first-year prerequisites for the minors. Candidates please refer to Chinese Major for the course list.

3. Comparative Literature

A minor shall consist of 24 credit units of second and third year courses from the Comparative Literature syllabus. No prerequisites are required in the First Year. Candidates please refer to Comparative Literature Major for course list.

4. European Studies

A minor shall consist of 24 credit units of second and third year courses from the European Studies syllabus. As a pre-requisite, candidates must pass [EUST1010](#). Foundations of European Studies (6 credits). The following two courses are compulsory for the minor: [EUST2010](#). European identity (6 credits) and [EUST3010](#). European political and economic institutions and processes (6 credits). The following two courses are optional but highly recommended: [EUST2030](#). The modern imagination in Europe (6 credits) and [BUSI0090](#). The European business environment (6 credits). Courses taken to fulfill the requirements of the candidate's major may not be counted towards a minor in European Studies. Candidates please refer to the following course list for other optional courses:

Junior Level

[EUST1010](#). Foundations of European Studies (6 credits)

Senior Level

Core courses for the European Studies minor:

[EUST2010](#). European identity (6 credits)

[EUST3010](#). European political and economic institutions and processes (6 credits)

Optional courses for the European Studies minor:

School of Business

[BUSI0090](#). The European Business Environment (6 credits)

Comparative Literature

[CLIT2003](#). Modern European drama: drama and the modern subject (6 credits)

[CLIT2021](#). Reading the nineteenth-century: revolution, romanticism and realism (6 credits)

[CLIT2022](#). Reading the nineteenth-century: reaction and modernity (6 credits)

[CLIT2024](#). Reading comedy: Dante and Boccaccio (6 credits)

[CLIT2045](#). Colonialism/postcolonialism (6 credits)

[CLIT2057](#). Carnival versus tragedy: Reading renaissance culture (6 credits)

[CLIT2058](#). Histories of sexuality: Freud and Foucault (6 credits)

[CLIT2067](#). Re-placing Shakespeare (6 credits)

Economics and Finance

[ECON0107](#). History of economic thought (6 credits)

[ECON0301](#). Theory of international trade (6 credits)

[ECON0302](#). International finance (6 credits)

[ECON0406](#). The economy and the state (6 credits)

[FINA0105](#). International financial management (6 credits)

English

[ENGL2003](#). The history of English (6 credits)

[ENGL2010](#). English novel I (6 credits)

[ENGL2011](#). English novel II (6 credits)

[ENGL2012](#). Contemporary literary theory (6 credits)

[ENGL2033](#). English novel III (6 credits)

[ENGL2045](#). Travel writing (6 credits)

[ENGL2076](#). Romanticism (6 credits)

- ENGL2078. The novel today (6 credits)
 ENGL2079. Shakespeare (6 credits)
 ENGL2080. Women, feminism and writing II (6 credits)
 ENGL2082. Modern literary criticism (6 credits)
 ENGL2084. Modernism and short fiction (6 credits)
 ENGL2095. The East: Asia in English writing (6 credits)
 ENGL2101. Culture and Society (6 credits)

European Studies

- EUST2030. The modern imagination in Europe (6 credits)
 EUST3003. European Studies dissertation (12 credits)
 EUST3004. European Studies research project (6 credits)

Fine Arts

- FINE2012. Italian renaissance art (6 credits)
 FINE2013. Northern renaissance art (6 credits)
 FINE2026. The age of revolution: Art in Europe, 1750-1840 (6 credits)
 FINE2027. The formation of modernity: Art in Europe, 1840-1890 (6 credits)
 FINE2028. Vision in crisis (6 credits)
 FINE2029. Modernity and its discontents (6 credits)
 FINE2032. Art and the portrayal of women (6 credits)
 FINE2033. Cross-cultural interaction in the 19th century (6 credits)
 FINE2035. Photography and the nineteenth century (6 credits)
 FINE2036. Photography in the twentieth century (6 credits)

Geography

- GEOG2080. Regional geography of Europe (6 credits)

History

- HIST2011. Nineteenth-century Europe, Part I: 1780-1850 (6 credits)
 HIST2012. Nineteenth-century Europe, Part II: 1850-1914 (6 credits)
 HIST2013. Twentieth-century Europe, Part I: the European Civil War, 1914-1945 (6 credits)
 HIST2014. Twentieth-century Europe, Part II: Europe divided and undivided, 1945-1991 (6 credits)
 HIST2021. Nineteenth-century Russia, 1800-1905 (6 credits)
 HIST2027. The foundation of international trade and finance in the modern world (6 credits)
 HIST2037. Germany between the two World Wars: the rise and fall of Adolf Hitler (6 credits)
 HIST2038. Germany, 1871-1990: From unification to reunification (6 credits)
 HIST2042. The history of sport (6 credits)
 HIST2046. The modern European city: Urban living and open spaces (6 credits)
 HIST2048. The history of young people in modern Europe (6 credits)
 HIST2062. From empire to EU: Culture, politics and society in twentieth century Britain (6 credits)
 HIST2063. Europe and modernity: cultures and identities, 1890-1940 (6 credits)
 HIST2072. A history of modern European warfare (6 credits)
 HIST2073. Prussia in the age of absolutism and reform, 1648-1815 (6 credits)
 HIST2076. Germany and the Cold War (6 credits)
 HIST2078. Renaissance Europe 1453-1648 (6 credits)
 HIST2079. Early modern Europe 1648-1739 (6 credits)

Language Centre

- LANG0001. Introduction to Italian life and culture (3 credits)
 LANG0002. Introducing Germany and the Germans (3 credits)
 LANG0003. Introduction to Spanish culture (3 credits)
 LANG0005. Hispanic film and literature (3 credits)

LANG0006.	Italian classical roots in European civilization (3 credits)
LANG0007.	From Viking to Volvo: an introduction to contemporary Sweden (3 credits)
LANG1035.	France today: an overview (3 credits)
LANG2031.	Italian reading course (3 credits)
LANG2032.	Italian and business (3 credits)
LANG2041.	Representations of contemporary German society in the media (3 credits)
LANG2043.	French language and culture I (3 credits)
LANG2044.	French language and culture II (3 credits)
LANG2047.	French reading course (3 credits)
LANG2048.	French songs and lyrics (3 credits)
LANG2050.	Profile of Italian literature I (3 credits)
LANG2051.	Profile of Italian literature (contemporary Italian literature) - Part II (3 credits)
LANG2055.	Spanish for business I (3 credits)

LANG3053.	French Literature: the 19 th century (3 credits)
LANG3054.	French Literature: the 20 th century (3 credits)
LANG3055.	Spanish for business II (3 credits)

Music

MUSI2007.	Western music history 1 (6 credits)
MUSI2008.	Western music history 2 (6 credits)
MUSI2035.	Love, sex and death in music of the ancient and modern world (6 credits)

Philosophy

PHIL2002.	Early modern philosophy (6 credits)
PHIL2010.	Plato (6 credits)
PHIL2011.	Aristotle (6 credits)
PHIL2020.	Descartes (6 credits)
PHIL2025.	Hume (6 credits)
PHIL2030.	Kant's critical philosophy (6 credits)
PHIL2035.	Philosophy of the enlightenment (6 credits)
PHIL2040.	Nietzsche (6 credits)
PHIL2060.	Wittgenstein (6 credits)
PHIL2077.	Habermas (6 credits)
PHIL2080.	Marxist philosophy (6 credits)
PHIL2085.	Contemporary European philosophy (6 credits)
PHIL2090.	Foucault (6 credits)
PHIL2210.	Metaphysics (6 credits)
PHIL2320.	Happiness
PHIL2360.	Political philosophy (6 credits)
PHIL2380.	Philosophy and literature (6 credits)

Politics and Public Administration

POLI0004.	Bureaucracy and the public (6 credits)
POLI0005.	Capitalism and social justice (6 credits)
POLI0009.	Comparative politics (6 credits)
POLI0010.	Democracy and its critics (6 credits)
POLI0021.	Understanding global issues (6 credits)

- [POLI0045](#). The political economy of the European union (6 credits)
[POLI0067](#). Liberalism and its limits (6 credits)

Sociology

- [SOCIO001](#). A history of social theory (6 credits)
[SOCIO024](#). Modern social theory (6 credits)
[SOCIO043](#). Sociology of contemporary culture (6 credits)

5. Fine Arts

A disciplinary minor in Fine Arts shall consist of 24 credit units of Second and Third Year courses from the Fine Arts syllabus taken in the third to sixth semesters. As a pre-requisite, students must normally pass [FINE1001](#) or [FINE1004](#) or [FINE1006](#) or [FINE1008](#) in their first year. Students are asked to note that certain Second and Third year courses have specific prerequisites. Otherwise, all Second and Third year Fine Arts courses may be taken to fulfill the minor requirement.

The form of assessment (i.e. percentage weighting of coursework and/or examination) for each course is specified in the course descriptions. Coursework assessment will be based on the student's performance in tutorials, seminars, written work and other practical work as specified by the course instructor. Candidates please refer to Fine Arts Major for the course list.

6. Geography

A minor shall consist of 24 credit units of second and third year courses from the Geography syllabus. As a pre-requisite, candidates must pass any 6-credit first-year Geography course. Candidates please refer to Geography Major for the course list.

7. History

A minor in History shall consist of 24 credit units of second and third-year courses from the History Syllabus. As a prerequisite, 6 credit units in a first-year course or courses are required. Prospective minors are recommended to take [HIST1013](#). Doing history and [HIST1003](#). Information technology for historical studies as a minimum.

8. Japanese Studies

a) Minor in Japanese Language

A minor in Japanese Language shall consist of 24 credit units of [JAPN2088](#) Japanese Language II (Part 1) (6 credits) and [JAPN2099](#) Japanese Language II (Part 2) (6 credits), and [JAPN3088](#) Japanese Language III (Part 1) (6 credits) and [JAPN3099](#) Japanese Language III (Part 2) (6 credits) courses from the Department of Japanese Studies syllabus. As a pre-requisite, candidates must pass 18 credits of First Year courses in the first and second semesters. The pre-requisite courses are [JAPN1088](#) Japanese Language I (Part 1) (9 credits) and [JAPN1099](#) Japanese Language I (Part 2) (9 credits).

b) Minor in Japanese Culture

A minor in Japanese Culture shall consist of 24 credit units of second and third-year interdisciplinary-content courses from the Japanese Studies syllabus. As a pre-requisite, candidates must pass [JAPN1011](#) Introduction to Japanese Studies (6 credits). The following courses may not be counted towards a minor in Japanese culture: core language courses and language intensive courses.

Candidates please refer to Japanese Studies Major for the course list.

9. Language

A minor in a language shall consist of 24 credits of the second (12 credits) and third (12 credits) year courses in one of the languages listed below:

Arabic, French, German, Italian, Portuguese, Spanish, Swedish and Thai.

The recommended courses for a language minor: (All these courses have pre-requisites.)

Arabic:	LANG2052 . Arabic II (second year, 12 credits) LANG3049 . Arabic III (third year, 12 credits)
French:	LANG2001 . French language II.1 (second year, 12 credits) LANG3001 . French language III.1 (third year, 12 credits)
German:	LANG2004 . German II.1 (second year, 12 credits) LANG3007 . German III.1 (third year, 12 credits)
Italian:	LANG2010 . Italian II (second year, 12 credits) LANG3012 . Italian III (third year, 12 credits)
Portuguese:	LANG2024 . Portuguese II (second year, 12 credits) LANG3026 . Portuguese III (third year, 12 credits)
Spanish:	LANG2011 . Spanish II (second year, 12 credits) LANG3013 . Spanish III (third year, 12 credits)
Swedish:	LANG2023 . Swedish II (second year, 12 credits) LANG3025 . Swedish III (third year, 12 credits)
Thai:	LANG2022 . Thai II (second year, 12 credits) LANG3024 . Thai III (third year, 12 credits)

Junior Level courses

The following courses will be offered to all BSocSc students as pre-requisites to senior level courses or as elective courses.

LANG1001 .	French I.1 (6 credits – 1 st semester)
LANG1002 .	French I.2 (12 credits – 2 nd semester)
LANG1003 .	German I.1 (6 credits – 1 st semester)
LANG1004 .	German I.2 (12 credits – 2 nd semester)
LANG1007 .	Italian I.1 (6 credits – 1 st semester)
LANG1008 .	Italian I.2 (6 credits – 2 nd semester)
LANG1021 .	Thai for beginners - Part I (6 credits – 1 st semester)
LANG1022 .	Thai for beginners - Part II (6 credits – 2 nd semester)
LANG1023 .	Swedish for beginners - Part I (6 credits – 1 st semester)
LANG1024 .	Swedish for beginners - Part II (6 credits – 2 nd semester)
LANG1025 .	Portuguese for beginners - Part I (6 credits – 1 st semester)
LANG1026 .	Portuguese for beginners - Part II (6 credits – 2 nd semester)
LANG1035 .	France today: An overview (3 credits)
LANG1036 .	Arabic for beginners - Part I (6 credits – 1 st semester)
LANG1037 .	Arabic for beginners - Part II (6 credits – 2 nd semester)
LANG1038 .	Spanish language I.1 (6 credits – 1 st semester)
LANG1039 .	Spanish language I.2 (12 credits – 2 nd semester)

Senior level courses

The following courses will only be offered to candidates who minor in European Studies or Interdisciplinary minors from Faculty of Arts.

- LANG0001. Introduction to Italian life and culture (3 credits – 2nd Semester)
- LANG0002. Introducing Germany and the Germans (3 credits – 1st semester)
- LANG0003. Introduction to Spanish culture (3 credits – 1st semester)
- LANG0005. Hispanic film and literature (3 credits – 2nd semester)
- LANG0006. Italian classical roots of European civilization (3 credits – 1st semester)
- LANG0007. From Viking to Volvo: an introduction to Sweden (3 credits – 2nd semester)
- LANG2031. Italian reading course (3 credits)
- LANG2032. Italian and business (3 credits)
- LANG2041. Representations of contemporary German society in the Media (3 credits – 1st semester)
- LANG2043. French Language and Culture I (3 credits – 1st semester)
- LANG2044. French Language and Culture II (3 credits – 2nd semester)
- LANG2047. French reading course (3 credits – 2nd semester)
- LANG2048. French songs and lyrics (3 credits – 2nd semester)
- LANG2050. A Profile of Italian Literature I (3 credits – 1st semester)
- LANG2051. A Profile of Italian Literature (Contemporary Italian Literature) II (3 credits – 2nd semester)
- LANG2055. Spanish for business I (3 credits)
- LANG2056. Understanding Germany and the Germans (3 credits)
- LANG3008. Reading Course (3 credits – 1st semester)
- LANG3010. German Project (3 credits – 2nd semester)
- LANG3022. French eastern narratives (3 credits – 2nd semester)
- LANG3033. French media and advertising (3 credits – 2nd semester)
- LANG3036. French society and cinema (3 credits – 1st semester)
- LANG3048. Fairytale Princes, Nature Lovers and Revolutionaries – The German Romantics (3 credits – 2nd semester)
- LANG3053. French literature: the 19th century (3 credits)
- LANG3054. French literature: the 20th century (3 credits)
- LANG3055. Spanish for business II (3 credits)

The following courses will be treated as elective courses and will not be counted towards any major or minor requirement.

- LANG3040. Italian in Italy (3 credits)
- LANG3041. Portuguese in Portugal (3 credits)
- LANG3043. Swedish in Sweden (3 credits)
- LANG3044. Thai in Thailand (3 credits)

10. Linguistics

A minor shall consist of 24 credit units of second and third year courses from the Linguistics syllabus. As a pre-requisite, candidates must pass the first-year course [LING1001](#). Introduction to Linguistics. Candidates please refer to Linguistics Major for the course list.

11. Music

A minor in Music shall consist of 24 credit units of Level 200 and 300 courses from the music syllabus taken in the third to sixth semesters, with no more than 6 credit units taken in performance courses

(MUSI2004, MUSI2032, MUSI2041, MUSI2046, MUSI2047, MUSI2051, MUSI3008, MUSI3012, MUSI3017, MUSI3018 and MUSI3019). As a pre-requisite, students must pass the following Level 100 courses in the first or second semester: MUSI1004 Introduction to Musics of the World, and MUSI1005 Introduction to Music in Western Culture.

All Music courses are available to BSocSc students are listed as below:

Junior Level

MUSI1001.	The language of music (3 credits)
MUSI1004.	Introduction to musics of the world (6 credits)
MUSI1005.	Introduction to music in Western culture (6 credits)
MUSI1006.	Music technology (3 credits)
MUSI1011.	Orchestral studies and techniques 1 (3 credits)
MUSI1014.	Aural skills (3 credits)
MUSI1016.	University choir 1 (3 credits)
MUSI1017.	Performance workshop 1 (3 credits)
MUSI1018.	Advanced music performance 1 (6 credits)
MUSI1019.	Fundamentals of tonal music I (3 credits)
MUSI1020.	Fundamentals of tonal music II (6 credits)

Senior Level

Semester III/IV

MUSI2004.	University gamelan 1 (3 credits)
MUSI2032.	Orchestral studies and techniques 2 (3 credits)
MUSI2037.	Directed study 1 (6 credits)
MUSI2041.	University choir 2 (3 credits)
MUSI2046.	Performance workshop 2 (3 credits)
MUSI2047.	Advanced music performance 2 (6 credits)
MUSI2051.	Rhythms of life: music and culture in West Africa (3 credits)

Semesters III to VI

MUSI2006.	Analysis of orally transmitted musics (6 credits)
MUSI2007.	Western music history 1 (6 credits)
MUSI2008.	Western music history 2 (6 credits)
MUSI2009.	Topics in Asian music history (6 credits)
MUSI2010.	Music of China (6 credits)
MUSI2013.	Computer and electronic music (6 credits)
MUSI2015.	Popular music: from Cantopop to techno (6 credits)
MUSI2016.	Music of contemporary Hong Kong (6 credits)
MUSI2018.	Understanding music (3 credits)
MUSI2019.	Music in society (3 credits)
MUSI2026.	Fundamentals of music composition (6 credits)
MUSI2027.	Composing for the concert world (6 credits)
MUSI2028.	The business of music (6 credits)
MUSI2029.	Chinese music history (6 credits)
MUSI2030.	Composing for the commercial world (6 credits)
MUSI2031.	American music (6 credits)
MUSI2033.	Music and culture in Bali: an overseas fieldtrip (6 credits)
MUSI2035.	Love, sex and death in music of the ancient and modern world (6 credits)
MUSI2036.	Audio digital signal processing (6 credits)
MUSI2042.	Contrapuntal techniques (6 credits)
MUSI2043.	Orchestration (6 credits)
MUSI2044.	Film Music (6 credits)
MUSI2048.	Music, language, and meaning (6 credits)
MUSI2049.	Music and power (3 credits)

- MUSI2050. Representation of the supernatural in music (3 credits)
 MUSI2052. Advanced tonal chromaticism and analysis (6 credits)
 MUSI2053. Post-Tonal techniques and advanced analysis (6 credits)
 MUSI2054. The piano (3 credits)
 MUSI2055. Chinese opera (6 credits)
 MUSI2056. Defining the arts scene in Hong Kong (6 credits)

Semester V/VI

- MUSI3008. University gamelan 2 (3 credits)
 MUSI3012. Orchestral studies and techniques 3 (3 credits)
 MUSI3016. Directed study 2 (6 credits)
 MUSI3017. University choir 3 (3 credits)
 MUSI3018. Performance workshop 3 (3 credits)
 MUSI3019. Advanced music performance 3 (6 credits)

12. Philosophy

A minor shall consist of 24 credits of second and third-year courses in Philosophy. No pre-requisites are required in the First Year. Courses taken to fulfill the requirement of candidates' major may not be counted towards a minor in Philosophy. Candidates please refer to Philosophy Major for the course list.

Interdisciplinary Minors

Candidates in the second year of the studies may select courses from the lists specified in the syllabuses but shall not be permitted to take more than 12 credits from one department/programme to satisfy the requirements of one minor. The same course shall not be taken to fulfil the requirements for a major and a minor, or for two minors.

Courses may have prerequisites; please refer to the syllabus of the relevant department/programme for the prerequisite(s).

1. Contemporary China and Hong Kong

This minor gives students with a general interest in China and Hong Kong a better understanding of physical, cultural and human environments of the two societies within the larger global and regional settings. The courses offered examine a range of contemporary development issues and future challenges faced by China and Hong Kong in an increasingly globalized world.

- CHIN2131. Contemporary Chinese literature (since 1949) I (6 credits)
 CHIN2132. Contemporary Chinese literature (since 1949) II (6 credits)
 CHIN2133. Contemporary Chinese literature (since 1949) III (6 credits)
 CLIT2064. Hong Kong culture: popular culture (6 credits)
 CLIT2074. Film and ideology in post-Mao China (6 credits)
 ENGL2075. The idea of China (6 credits)
 ENGL2097. Imagining Hong Kong (6 credits)
 FINE2005. Twentieth century Chinese art (6 credits)
 FINE2034. Hong Kong art workshop (6 credits)
 FINE2036. Photography in the twentieth century (6 credits)
 GEOG2054. Urban planning in practice in Hong Kong (6 credits)
 GEOG2062. China: the land and the people (6 credits)
 HIST2004. Twentieth-century China, Part II: from revolution to modernization, 1949 to present (6 credits)

HIST2052.	Social issues in Hong Kong history (6 credits)
HIST2068.	The intellectual history of twentieth-century China (6 credits)
LING2010.	Language and dialect (6 credits)
LING2033.	Contrastive grammar of English and Chinese (6 credits)
MUSI2010.	Music of China (6 credits)
MUSI2016.	Music of contemporary Hong Kong (6 credits)
MUSI2056.	Defining the arts scene in Hong Kong (6 credits)

2. Critical Thinking, Reading, and Writing

'Critical thinking, reading and writing' refers to a set of skills for examining, evaluating and expressing ideas. These skills include knowing how to collect and present evidence, apply standards of logic and probability, compare opinions, decide what is relevant or irrelevant, and draw reasonable conclusions. This minor programme includes a selection of courses from different subject disciplines that either discuss these critical skills in detail or demonstrate them in action.

CHIN2140.	Modern Chinese language I (6 credits)
CHIN2143.	Modern Chinese language II (6 credits)
CLIT2005.	Literary and cultural theory (6 credits)
CLIT2066.	Postmodernism (6 credits)
ENGL2007.	Literary linguistics (6 credits)
ENGL2058.	Narrative prose: A linguistic investigation (6 credits)
FINE3006.	Art history methodology workshop (6 credits)
HIST3015.	The theory and practice of history (6 credits)
JAPN2034.	Education in contemporary Japanese society (6 credits)
LING2011.	Language and literacy in the information age (6 credits)
PHIL2110.	Knowledge (6 credits)
PHIL2130.	Philosophy of the sciences (6 credits)

3. Globalism: Cultures, Spaces, Languages

The term 'Globalism' suggests an organized phenomenon that could be studied through a coherent set of theoretical frameworks. The courses in this 'Minor' explore and challenge this understanding of 'Globalism'. They show how a global dynamic runs with varying intensities in visual and literary representations, in different times and places, and how the impact on each other of the 'global' and the 'local' can have very diverse effects on and meanings for different cultures and societies.

AMER2014.	A dream in the heart: varieties of Asian American culture (6 credits)
AMER2018.	Show me the money: doing business with Americans (6 credits)
AMER2022.	What's on TV? Television and American culture (6 credits)
CHIN2333.	Culture and translation (3 credits)
CHIN2340.	Film translation workshop (3 credits)

 HIST2066. Narcotic culture: A history of drugs (6 credits)
 JAPN2014. China and Japan (6 credits)
 LING2010. Language and dialect (6 credits)
 MUSI2009. Topics in Asian music history (6 credits)
 MUSI2010. Music of China (6 credits)
 MUSI2029. Chinese music history (6 credits)
 MUSI2033. Music and culture in Bali: an overseas fieldtrip (6 credits)
 MUSI2054. The piano (3 credits)
 MUSI2055. Chinese opera (6 credits)
 MUSI2056. Defining the arts scene in Hong Kong (6 credits)
 PHIL2430. Chinese philosophy: Ethics (6 credits)

PHIL2450. Zhuangzi (6 credits)

5. Self-expression, Communication, and the Human Subject

What is a self? Do different cultures have different selves? What does the self 'express' when we engage in creative thought and how are cultural forms used and changed. Are we limited by those cultural forms? In this minor, you will explore answers to these and related questions by investigating creative expression in various arts and cultural forms.

- AMER2022. What's on TV? Television and American culture (6 credits)
 - CHIN2144. Functional Chinese (6 credits)
 - CHIN2333. Culture and translation (3 credits)
 - CLIT2003. Modern European drama: drama and the modern subject (6 credits)
 - CLIT2065. Hong Kong culture: representations of identity in literature and film (6 credits)
 - ENGL2089. Making Americans: Literature as ritual and renewal (6 credits)
 - ENGL2090. The moving production of America: Reading recent films (6 credits)
 - FINE2008. The poetics of Japanese narrative painting (6 credits)
 - FINE2029. Modernity and its discontents (6 credits)
 - HIST2031. History through film (6 credits)
 - HIST2042. The history of sport (6 credits)
 - HIST2070. Stories of self: history through autobiography (6 credits)
 - JAPN3044. Japanese language II(b) (Part 1) (3 credits)
 - JAPN3055. Japanese language II(b) (Part 2) (3 credits)
 - JAPN3066. Japanese language III(a) (Part 1) (3 credits)
 - JAPN3077. Japanese language III(a) (Part 2) (3 credits)
 - LANG0005. Hispanic film and literature (3 credits)

LING2036.	Child language (6 credits)
MUSI2035.	Love, sex and death in music of the ancient and modern world (6 credits)
PHIL2011.	Aristotle (6 credits)
PHIL2035.	Philosophy of the enlightenment (6 credits)

SECOND MAJORS AND MINORS OFFERED BY THE FACULTY OF BUSINESS AND ECONOMICS

Economics and Finance (Second Major)

For candidates admitted in or before the academic year 2004-2005

Candidates who wish to double major in Economics and Finance must successfully complete:

- a) Pre-requisite requirement:
 - ECON1001. Introduction to economics I (6 credits)
- b) 12 credits of compulsory courses (in the third and fourth semester)
 - i) Either
 - ECON2102 Macroeconomic theory (6 credits)
 - or
 - ECON2114 Macroeconomic analysis (6 credits)
 - ii) Either

- ECON2101 Microeconomic theory (6 credits)
 or
 ECON2113 Microeconomic analysis (6 credits)

c) 36 credits of senior level courses in this school.

Economics and Finance courses are listed as below:

Junior Level

- ECON0003. Great Economists of our time (3 credits)
 ECON1001. Introduction to economics I (6 credits)
 ECON1002. Introduction to economics II (6 credits)
 ECON1003. Analysis of economic data (6 credits)
 FINA1002. Introduction to finance (6 credits)
 BUSI0016. Introduction to finance (6 credits)

Senior Level

Semester III/IV

- ECON2101. Microeconomic theory (6 credits)
 ECON2102. Macroeconomic theory (6 credits)
 ECON2113. Microeconomic analysis (6 credits)
 ECON2114. Macroeconomic analysis (6 credits)

Semesters III to VI

- ECON0103. Economics of human resources (6 credits)
 ECON0104. Public finance (6 credits)
 ECON0106. Games and decisions (6 credits)
 ECON0107. History of economic thought (6 credits)
 ECON0109. Topics in macroeconomics (6 credits)
 ECON0204. The economics of finance (6 credits)
 ECON0205. Theories of investment (6 credits)
 ECON0206. Capital theory (6 credits)
 ECON0207. Monetary economics (6 credits)
 ECON0208. Economics of banking (6 credits)
 ECON0209. Finance and development (6 credits)
 ECON0210. Investment, technology, and economic growth (6 credits)
 ECON0301. Theory of international trade (6 credits)
 ECON0302. International finance (6 credits)
 ECON0401. Comparative economic systems (6 credits)
 ECON0402. Industrial organization (6 credits)
 ECON0403. The economics of property rights (6 credits)
 ECON0405. The economics of law (6 credits)
 ECON0406. The economy and the state (6 credits)
 ECON0501. Economic development (6 credits)
 ECON0503. Urban economics (6 credits)
 ECON0504. Transportation economics (6 credits)
 ECON0601. Economic development of China (6 credits)
 ECON0602. Foreign trade and investment in China (6 credits)
 ECON0603. The economic system of Hong Kong (6 credits)
 ECON0605. Economic history of China (6 credits)
 ECON0606. Current economic affairs (6 credits)
 ECON0701. Introductory econometrics (6 credits)
 ECON0702. Mathematical methods in economics (6 credits)
 ECON0703. Mathematical economics (6 credits)
 ECON0706. Uncertainty and information (6 credits)

ECON0707.	Economic forecasting (6 credits)
ECON3108.	Selected topics in price theory (6 credits)
ECON3505.	Project evaluation (6 credits)
FINA0102.	Financial markets and institutions (6 credits) or ___
BUSI0017.	Financial markets and institutions (6 credits)
FINA0103.	International banking (6 credits)
FINA0104.	Management of commercial banks (6 credits)
FINA0105.	International financial management (6 credits)
FINA0106.	Insurance: theory and practice (6 credits)
FINA0301.	Derivative securities (6 credits) or__
BUSI0069.	Derivative securities (6 credits)
FINA0302.	Corporate finance or Theories of corporate finance (6 credits)
FINA0303.	Case studies in corporate finance (6 credits)
FINA0401.	Empirical finance (6 credits)
FINA0402.	Mathematical finance (6 credits)
FINA0403.	Financial engineering (6 credits)
FINA0404.	Financial modeling with EXCEL (6 credits)
FINA0405.	Interest rate models (6 credits)
FINA0501.	Asian financial institutions (6 credits)
FINA0804.	Fixed income securities (6 credits) or__
BUSI0056.	Fixed income securities (6 credits)
FINA0805.	Real estate finance (6 credits)
FINA1001.	Financial statement analysis (6 credits)
FINA2802.	Investments or Investments and portfolio analysis (6 credits)
FINA3806.	Risk management (6 credits)
FINA3807.	Special topics in finance (6 credits)

Semester V/VI

ECON3801.	Reading course (6 credits)
ECON3802.	Dissertation (12 credits)
FINA3601.	Reading course (6 credits)
FINA3602.	Dissertation (12 credits)

For candidates admitted in or after the academic year 2005-2006

1. Economics (Second major)

Candidates who wish to double major in Economics must successfully complete:

a) Pre-requisite requirement (in the first and second semester):

ECON1001.	Introduction to economics I (6 credits)
ECON1002.	Introduction to economics II (6 credits)

(ECON1002 Introduction to economics II can be taken in the first year or the second year.)

b) 12 credits of compulsory courses (in the third and fourth semester)

- i) Either
 - ECON2102 Macroeconomic theory (6 credits)
 - or
 - ECON2114 Macroeconomic analysis (6 credits)
- iii) Either
 - ECON2101 Microeconomic theory (6 credits)
 - or
 - ECON2113 Microeconomic analysis (6 credits)

(ECON2101 Microeconomic theory/ECON2113 Microeconomic analysis and ECON2102 Macroeconomic theory/ECON2114 Macroeconomic analysis should be taken in the second year except with special permission from the Director of School of Economics and Finance.)

- c) 36 credits of senior level courses from the following list:

Junior Level

ECON0003.	Great Economists of our time (3 credits)
ECON1001.	Introduction to economics I (6 credits)
ECON1002.	Introduction to economics II (6 credits)
ECON1003.	Analysis of economic data (6 credits)
FINA1002.	Introduction to finance (6 credits)
BUSI0016.	Introduction to finance (6 credits)

2. Finance (Second major)

For candidates admitted in the academic year 2005-2006.

Candidates who wish to double major in Finance must successfully complete:

a) Pre-requisite requirement (in the first and second semester):

- ECON1001. Introduction to economics I (6 credits)
 either
 FINA1002. Introduction to finance (6 credits)
 or
 BUSI0016. Introduction to finance (6 credits)

(FINA1002 Introduction to finance/BUSI0016 Introduction to finance can be taken in the first year or the second year. Students are advised to take introductory courses in accounting, statistics and mathematics.)

b) 18 credits of compulsory courses

- i) Either
 ECON2101 Microeconomic theory (6 credits)
 or
 ECON2113 Microeconomic analysis (6 credits)
 ii) FINA0302. Theories of corporate finance (6 credits)
 iii) FINA2802. Investments and portfolio analysis (6 credits)

(ECON2101 Microeconomic theory/ECON2113 Microeconomic analysis should be taken in the second year except with special permission from the Director of School of Economics and Finance.)

c) 30 credits of senior level courses from the senior level list.

For candidates admitted in or after the academic year 2006-2007

Candidates who wish to double major in Finance must successfully complete:

a) Pre-requisite requirement (in the first and second semester):

- BUSI1002. Introduction to accounting (6 credits)
 ECON1001. Introduction to economics I (6 credits)
 FINA1003. Corporate finance (6 credits)

(It is advisable to take BUSI1002 Introduction to accounting in the first year first semester and FINA1003 Corporate finance in the second semester. Students are advised to take introductory courses in statistics and mathematics.)

- b) 18 credits of compulsory courses
- i) Either
 - [ECON2101.](#) Microeconomic theory (6 credits)
 - or
 - [ECON2113.](#) Microeconomic analysis (6 credits)
 - ii) [FINA0301.](#) Deivative securities (6 credits)
 - iii) [FINA2802.](#) Investments and portfolio analysis (6 credits)

([ECON2101](#) Microeconomic theory/[ECON2113](#) Microeconomic analysis should be taken in the second year except with special permission from the Director of School of Economics and Finance.)

- c) 30 credits of senior level courses from the senior level list:

Minors

1. Business

A minor shall consist of 24 credits of senior level courses from the following courses. As a pre-requisite, candidates must pass [BUSI1002](#) Introduction to accounting and either [BUSI1004](#) Marketing or [BUSI1007](#) Principles of management.

Business courses are listed as below:

Junior Level

BUSI0016.	Introduction to finance (6 credits)
BUSI1002.	Introduction to accounting (6 credits)
BUSI1003.	Introduction to management information systems (6 credits)
BUSI1004.	Marketing (6 credits)
BUSI1006.	Principles and practices of modern business (3 credits)
BUSI1007.	Principles of management (6 credits)

Senior Level

BUSI1001.	Business law (6 credits)
BUSI1005.	Organizational behaviour (6 credits)
BUSI0001.	Accounting systems and financial reporting in China (6 credits)
BUSI0002.	Accounting theory (6 credits)
BUSI0003.	Advanced financial accounting (6 credits)
BUSI0004.	Advertising management (6 credits)
BUSI0006.	Auditing (6 credits)
BUSI0010.	Company law (6 credits)
FINA0302.	Theories of corporate finance (6 credits)*
BUSI0012.	Comparative and international management (6 credits)
BUSI0013.	Current business affairs (3 credits)
BUSI0015.	Entrepreneurship, creativity and innovation (6 credits)

FINA0102.	Financial markets and institutions (6 credits)
BUSI0018.	Hong Kong taxation (6 credits)
BUSI0019.	Intermediate accounting I (6 credits)
BUSI0020.	Intermediate accounting II (6 credits)
BUSI0021.	International accounting (6 credits)
BUSI0022.	International marketing (6 credits)
BUSI0023.	Operations and quality management (6 credits)

FINA3601.	Reading course (6 credits)

* only open to student admitted to first year of study in 2004-2005 and 2005-2006.

MINORS OFFERED BY THE FACULTY OF ENGINEERING

Department of Computer Science

The Department of Computer Science has a long tradition of offering IT courses to students of other departments. To declare a “Minor in Computer Science”, students are required to pass 2 core courses and at least 4 elective courses in computer science. All these courses are of 6 credit-units. They will be taught in a single semester with 3 hours of lectures per week. Assessment of each course will be based on a three-hour written examination and in-course assessment in a ratio as indicated below.

Students are also welcome to take any of the following list of courses as broadening courses.

Core Courses (Junior level):

- CSIS1117. Computer programming I (6 credits)
- CSIS1119. Introduction to data structures and algorithms (6 credits) [for intake of 2005 or before]
- CSIS1122. Computer programming II [for intake of 2006 and after]

Elective Courses (Senior level):

- CSIS1119. Introduction to data structures and algorithms [for intake of 2006 and after]
- CSIS0250. Design and analysis of algorithms (6 credits)
- CSIS0270. Artificial intelligence (6 credits)
- CSIS0271. Computer graphics (6 credits)
- CSIS0278. Introduction to database management systems (6 credits)
- CSIS0293. Introduction to theory of computation
- CSIS0297. Introduction to software engineering (6 credits)
- CSIS0311. Legal aspects of computing (6 credits)
- CSIS0315. Multimedia computing and applications (6 credits)
- CSIS0317. Computer vision (6 credits)
- CSIS0320. Electronic commerce technology (6 credits)
- CSIS0322. Internet and the World Wide Web (6 credits)
- CSIS0396. Object-oriented programming and Java (6 credits)
- CSIS0521. Concepts and tools for software development (6 credits)

MINOR OFFERED BY THE FACULTY OF LAW

Legal Studies

This Minor aims to provide social sciences students an opportunity to have some exposure to legal issues in an area which may interest them and/or are related to their undergraduate degree.

Candidates who wish to minor in Legal Studies are required to have obtained a minimum of grade B in Use of English in HKALE or equivalent and must successfully complete 36 credits in the Years II and III of studies from the following lists:

a) Compulsory courses (18 credits) – Year II

[LLAW1001.](#) and [LLAW1002.](#) Law of contract I and Law of contract II (12 credits)

And either

[LLAW1005.](#) Law of tort I (6 credits)

Or

[LLAW1008.](#) The legal system (6 credits)

b) Optional courses (18 credits) – Year III

[LLAW1005.](#) and [LLAW1006.](#) Law of tort I *(6 credits) / Law of tort II (6 credits)

[LLAW1008.](#) The legal system * (6 credits)

[LLAW1009.](#) Law and society (6 credits)

[LLAW2001.](#) Constitutional law (6 credits)

[LLAW2003.](#) and [LLAW2004.](#) Criminal law I & II (12 credits)

[LLAW2009.](#) Introduction to Chinese law (6 credits)

[LLAW3001.](#) Introduction to legal theory (6 credits)

[LLAW3007.](#) Alternative dispute resolution (6 credits)

[LLAW3010.](#) Law of business associations (6 credits)

[LLAW3034.](#) Labour law (6 credits)

[LLAW3040.](#) Medico-Legal issues (6 credits)

[LLAW3043.](#) Principles of family law (6 credits)

[LLAW3044.](#) Public international law (6 credits)

[LLAW3046.](#) Child and the law (6 credits)

[LLAW3062.](#) Human rights in China (6 credits)

[LLAW3080.](#) Governance and law (6 credits)

[LLAW3069.](#) Regulation of financial markets (6 credits)

[LLAW3093.](#) Administrative law (6 credits)

* Unless already taken as a compulsory requirement

All the courses listed above are regarded as senior level courses.

The recommended normal study plan is that the students would have to satisfy the compulsory requirement (18 credits) in the second year of their studies, and then select 3 courses (18 credits) from the optional courses to take in their final year. It is not recommended that students take law courses in their first year.

Since there is the possibility of timetable clashes, students who are unable to take all 18 credits of the compulsory requirement in the second year of studies should at least take 12 credits in that year. Students may take a maximum of 24 credits of law courses in the second year of studies. Students moving from the second year to the third year may not proceed to the optional courses unless they pass at least 12 credits of the compulsory requirement in the second year of studies (with supplementary exams if necessary).

MAJORS AND MINORS OFFERED BY THE FACULTY OF SCIENCE

The Faculty of Science offers the following majors and minors to students in the Faculty of Social Sciences starting from the academic year 2004-05:

Majors: *Biochemistry, Biology, Biotechnology, Chemistry, Earth Sciences, Ecology and Biodiversity, Environmental Protection, Food and Nutritional Science, Material Science, Mathematics, Physics, Risk Management and Statistics*

Minors: *Actuarial Studies, Astronomy, Biochemistry, Biology, Biotechnology, Chemistry, Earth Sciences, Ecology & Biodiversity, Environmental Protection, Food and Nutritional Science, General Science, Mathematics, Physics, Risk Management and Statistics*

Majors

1. Major in Biochemistry

Biochemistry, strengthened with molecular biology, is a field with enormous applications to our daily lives. It also is a discipline of sublime fascination. Our understanding of the biochemical bases of various life processes has greatly improved human welfare, particularly the medical and nutritional aspects. Further advances in this rapidly expanding field of knowledge, including building and establishing new conceptual frameworks, development of novel methodologies and techniques, should pave way to even more spectacular insights into nature and lead to a better control of our destiny.

The Major in Biochemistry offered by the Department of Biochemistry is designed to provide students with both basic and advanced knowledge in modern biochemistry and molecular biology. Our goal is to develop and equip students with enough critical thinking and analytical skills so that they can embark on a career in biochemical sciences.

Minimum Entry Requirement : AL Chemistry or equivalent

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Minor in Biochemistry

Required courses (72 credits)

	Credits
1. Introductory level courses (24 credits)	
BIOC1001 Basic Biochemistry	6
BIOC1003 Introduction to Molecular Genetics	6
CHEM1206 General and Analytical Chemistry ¹	OR
CHEM1301 Basic Inorganic Chemistry ²	6
Plus one of the following courses:	
CHEM1401 Fundamentals of Organic Chemistry ³	6
CHEM1406 Basic Organic Chemistry ³	6
2. Advanced level courses (48 credits)	
BIOC2601 Metabolism	6
BIOC2603 Principles of Molecular Genetics	6
BIOC2604 Essential Techniques in Biochemistry and Molecular Biology	6

BIOC3610	Advanced Biochemistry I	6
BIOC3611	Advanced Biochemistry II	6
BIOC3613	Molecular Biology of the Gene	6
BIOC3615	Advanced Techniques in Biochemistry & Molecular Biology	6
BIOL2301	Protein Structure and Function	6

Note: ¹ For students admitted in 2006 or after.
² For students admitted in 2005 or before.
³ CHEM1401 and CHEM1406 are mutually exclusive.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

2. Major in Biology

Biology has developed into a broad and diverse field of study. This Major explores many aspects of the biological sciences, thereby providing a good general background in biology relevant for a wide range of job options. In their third year, students will be able to select from a range of interesting courses to suit their own interests.

Minimum Entry Requirement : AL Biology or equivalent
Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)
Impermissible Combination : Major in Biotechnology;
 Ecology & Biodiversity;
 Environmental Protection;
 Food & Nutritional Science
 Minor in Biology

Required courses (72 credits)

	Credits	
1. Introductory level courses (24 credits)		
At least 24 credits of the following courses:		
BIOL1106	Genetics	3
BIOL1107	Introduction to Developmental Biology & Reproduction	3
BIOL1119	Introductory Microbiology	6
BIOL1121	Animal Form and Functions	3
BIOL1122	Functional Biology	6
ECOL0020	Ecology of Hong Kong	3
ECOL0040	Ecology and Evolution	3
ECOL0041	Evolutionary Diversity	6
ECOL0042	Ecology Field Course	3
2. Advanced level courses (48 credits)		
BIOL2303	Introduction to Molecular Biology	6
ECOL2004	Environmental Microbiology ¹ OR ECOL2022 Biodiversity ²	6
Plus at least one of the following courses:		
BIOL2112	Plant Physiology	6

BIOL2215

Animal Physiology

6

Plus at least 30 credits of advanced level courses (BIOL2000, BIOL3000, ECOL2000 or ECOL3000 level) of which 12 credits at BIOL2000 or ECOL2000 level and 12 credits at BIOL3000 or ECOL3000 level, subject to prerequisite requirements.

Note: ¹ For students admitted in 2006 or after.

² For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

3. Major in Biotechnology

As the 21st Century opens, advances in biotechnology are accelerating at a remarkable pace. There are many exciting discoveries that have improved modern society, in terms of health, nature and economic development. This Major will first equip you with a solid background in molecular biology, microbiology, biochemistry and cell biology. Based on your interests, you will then further acquire knowledge in the specialized fields of medicine, diagnostics, agriculture, aquaculture, etc, from the advanced courses. Employment opportunities in various sectors of industry and Government, including R&D, manufacturing, sales, and customer service, are available to our students.

Minimum Entry Requirement : AL Biology or equivalent

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Major in Biology;
Food & Nutritional Science
Minor in Biotechnology

Required courses (72 credits)

Credits

1. Introductory level courses (24 credits)

At least 24 credits of the following courses:

BIOC1001	Basic Biochemistry OR BIOL1125	Introduction to Biochemistry	6
BIOL0128	Biological Techniques, Instrumentation and Data Processing		6
BIOL1106	Genetics		3
BIOL1107	Introduction to Developmental Biology & Reproduction		3
BIOL1119	Introductory Microbiology		6
BIOL1122	Functional Biology		6

2. Advanced level courses (48 credits)

BIOL2115	Cell Biology & Cell Technology		6
BIOL2301	Protein Structure and Function		6
BIOL2303	Introduction to Molecular Biology		6
BIOL3315	Animal Biotechnology		6
BIOL3316	Plant Biotechnology		6
BIOL3317	Microbial Biotechnology		6

Plus at least 12 credits of the following courses:

BIOL2004	Bioexploitation of Filamentous Fungi	3
BIOL2111	Molecular Microbiology	6
BIOL2114	Plant Biochemistry and Molecular Biology	6
BIOL2116	Genetics I	6
BIOL2202	General Parasitology ¹	6
BIOL2203	Reproduction & Reproductive Biotechnology	6
BIOL2205	Basic Immunology	6
BIOL2207	Endocrinology	6
BIOL2209	Developmental Biology	6
BIOL2215	Animal Physiology	6
BIOL2217	General Parasitology ²	3
BIOL2302	Fermentation Technology	6
BIOL2515	Food Microbiology	6
BIOL3212	Applied Immunology	6
BIOL3213	Advanced Techniques and Instrumentation in Animal Biology	6
BIOL3214	General Virology	6
BIOL3307	Biotechnology Industry	6
BIOL3522	Nutrigenomics	3

Note: ¹ For students admitted in 2004, BIOL2202 will not be offered from 2006-07.

² For students admitted in 2005 or after.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

4. Major in Chemistry

The dictionary defines chemistry as “the scientific study of the structure of substances, how they react when combined or in contact with one another, and how they behave under different conditions”. How chemists actually do this to investigate the properties and reactions of matter vary widely and are constantly undergoing change as new methods are discovered, new equipment is invented, and new techniques are developed. Chemistry is a central science, which interacts with many other disciplines. The aim of this Major is to provide students with a solid training in the basic areas of chemistry such as physical, inorganic, organic, applied and analytical chemistry. Through a variety of training, the Major can equip students with skills and experience in both theoretical and experimental investigations that are very important for their future career goals in the hi-tech and knowledge-based economy.

Minimum Entry Requirement : AL Chemistry or equivalent

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Minor in Chemistry

Required courses (72 credits)

		Credits
1.	Introductory level courses (24 credits)	
CHEM1206	General and Analytical Chemistry	6
CHEM1301	Basic Inorganic Chemistry	6
CHEM1406	Basic Organic Chemistry	6
CHEM1506	Basic Physical Chemistry	6
2.	Advanced level courses (48 credits)	

CHEM2202	Chemical Instrumentation	6
CHEM2302	Intermediate Inorganic Chemistry	9
CHEM2402	Intermediate Organic Chemistry	9
CHEM2503	Intermediate Physical Chemistry	9
CHEM2507	Principles and Applications of Spectroscopic Techniques	6

Plus at least 9 credits of advanced level Chemistry courses (CHEM2000 or CHEM3000 level) of which 6 credits must be at CHEM3000 level, subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

5. Major in Earth Sciences

In Earth Sciences, we study the nature and evolution of our planet. Geoscientists use their knowledge to increase our understanding of Earth processes and resources to improve the quality of human life. The Earth Science Major offers students an opportunity to learn about local and regional geological and environmental problems. The primary objective is to give students a robust training in the basics of Earth sciences as well as technical skills in certain specialized areas. Both theoretical and applied subjects such as mineralogy (the study of minerals), petrology (the study of rocks), geophysics, geochemistry, surficial processes, sedimentology, earth history, structural geology, fieldwork, regional geology, earth resources, environmental geology, hydrogeology and engineering geology are offered.

Minimum Entry Requirement : Nil

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Minor in Earth Sciences

Required courses (72 credits)

		Credits
1.	Introductory level courses (24 credits)	
EASC0101	Maps, Mapping and Field Geology	6
EASC0105	Earth Through Time	6
EASC0116	Introduction to Physical Geology	6
EASC1106	Introduction to Petrology	6

2. Advanced level courses (48 credits)

Any 48 credits of advanced level Earth Sciences courses (EASC2000 or EASC3000 level), subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

6. Major in Ecology & Biodiversity

Understanding biological diversity, the relationships between animals and their environments, and how humans interact with both is critical for conserving the social and economic benefits yielded by the natural world, without irreversibly destroying or degrading it. This Major introduces biodiversity at all levels, genes, species and ecosystems, provides a strong academic background for studying and researching in these topics. It also fosters an appreciation for the richness of local and regional biodiversity. There are

many opportunities, both within Hong Kong and internationally, for graduates in this field.

Minimum Entry Requirement	: AL Biology or equivalent
Minimum Credit Requirement	: 72 credits (24 credits introductory level & 48 credits advanced level courses)
Impermissible Combination	: Major in Biology; Environmental Protection Minor in Ecology & Biodiversity; Environmental Protection

Required courses (72 credits)

1. Introductory level courses (24 credits) **Credits**

ECOL0020	Ecology of Hong Kong	3
ECOL0040	Ecology and Evolution	3
ECOL0041	Evolutionary Diversity	6
ECOL0042	Ecology Field Course	3

Plus at least 9 credits of the following courses:

BIOL1119	Introductory Microbiology	6
CHEM1001	Chemical Principles for Earth and Life Sciences	6
EASC0105	Earth through Time	6
ECOL0036	Origins of Life and Astrobiology	3

2. Advanced level courses (48 credits)

ECOL2006	Biometrics	6
ECOL2007	Molecular Ecology	6
ECOL2013	Systematics & Phylogenetics	6
ECOL2014	Conservation Biology ¹ OR ECOL2022 Biodiversity ²	6

Plus 24 credits from one of the following options:

Either Ecology option:

ECOL2004	Environmental Microbiology	6
ECOL2023	Freshwater Ecology	6
ECOL2028	Coastal Ecology	6
ECOL2032	Terrestrial Ecology	6

Or Marine Biology option:

ECOL2005	Fish Biology	6
ECOL2011	Biological Oceanography	6
ECOL2028	Coastal Ecology	6
ECOL3018	Fisheries and Mariculture	6

Or Microbiology option:

BIOL2004	Bioexploitation of Filamentous Fungi	3
BIOL2111	Molecular Microbiology	6
BIOL2515	Food Microbiology	6
ECOL2004	Environmental Microbiology	6
ECOL2015	Fungal Diversity	3
ECOL2016	Environmental Toxicology	6

ECOL3027	Environmental Impact Assessment	6
ECOL3034	Environmental Monitoring and Remediation Techniques	6

Note: ¹ For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

8. Major in Food & Nutritional Science

This is a challenging area of interdisciplinary study. The science of food and nutrition aims at improving the quality of life through the understanding of interactions among food, environment and the human body. This Major will appeal to those who have a genuine interest in the food system and/or nutrition. Beginning with a handful of core courses, you will be able to mix and match advanced courses that suit your personal interest, be it food product development and analysis, metabolism and body function or nutrient-gene interaction. In the era where food safety, and diet and health take up news headlines this Major has been extremely popular.

Minimum Entry Requirement	: AL / AS Biology and AL / AS Chemistry or equivalent
Minimum Credit Requirement	: 75 credits (27 credits introductory level & 48 credits advanced level courses)
Impermissible Combination	: Major in Biology; Biotechnology Minor in Food & Nutritional Science

Required courses (75 credits)

	Credits
1. Introductory level courses (27 credits)	
BIOC1001 Basic Biochemistry OR BIOL1125 Introduction to Biochemistry	6
BIOL0002 Introduction to Food and Nutritional Science	3
BIOL1122 Functional Biology	6
BIOL1123 Food Chemistry	3
BIOL1513 Food Science Laboratory	3
BIOL1514 Nutrition and Metabolism	6
2. Advanced level courses (48 credits)	
BIOL2501 Food Processing and Preservation	6
BIOL2505 Food Safety and Quality Management	6
BIOL2515 Food Microbiology	6
BIOL2517 Food Analysis	3
BIOL2518 Laboratory in Nutritional Science	3
BIOL2519 Essential Nutrients & Functional Foods	6
BIOL3526 Advanced Laboratory in Nutritional Science	3

Plus at least 15 credits of the following courses:

BIOL2004	Bioexploitation of Filamentous Fungi	3
BIOL2202	General Parasitology ¹	6
BIOL2205	Basic Immunology	6
BIOL2215	Animal Physiology	6
BIOL2217	General Parasitology ²	3
BIOL2302	Fermentation Technology	6
BIOL2503	Grain Production & Utilization	6
BIOL2507	Meat and Dairy Science	6
BIOL2520	Food Toxicology	3
BIOL2521	Food Engineering	3
BIOL3516	Nutrition and Brain Function	3
BIOL3522	Nutrigenomics	3
BIOL3523	Principles of Chinese Medicated Diet	3
BIOL3524	Diet and Disease	3
BIOL3525	Food Product Development	3

Note: ¹ For students admitted in 2004, BIOL2202 will not be offered from 2006-07.

² For students admitted in 2005 or after.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

9. Major in Materials Science

In the past few decades, we have witnessed a rapid development in technology that has had a major impact on the way we live. For example, synthetic fabrics have revolutionized the clothing industry, and the on-board computers that helped guide the Apollo 11 mission to the moon were less powerful than the personal computers that sit on the desks in every office and in many homes today. All these changes were due to the fact that new materials were developed, which was the collective effort of scientists from many different areas. Materials science is an interdisciplinary subject that involves studies of the chemical and physical properties of materials. In this Major, students will be required to take basic courses in chemistry and physics. The chemistry of materials synthesis (e.g. organic and inorganic materials) and their physical properties (mechanical, electrical, and optical properties) will be introduced. In the second and third years, advanced courses will focus on polymeric materials, nanomaterials, semiconducting materials, and their characterization techniques. In addition, students are required to take advanced physics and chemistry courses as electives. The Major is designed for students who are interested in materials sciences and technology for postgraduate studies.

Minimum Entry Requirement : 1. AL Chemistry; and
 2. AL / AS Physics or AL Engineering Science; and
 3. HKCEE Additional Mathematics or AS Mathematics and Statistics or
 AL Pure Mathematics;
 or equivalent

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Nil

Required courses (72 credits)

		Credits
1. Introductory level courses (24 credits)		
CHEM1206	General and Analytical Chemistry	6
PHYS1314	Modern Physics	6
<u>Plus</u> at least one of the following courses:		
CHEM1301	Basic Inorganic Chemistry	6
CHEM1406	Basic Organic Chemistry	6
<u>Plus</u> at least one of the following courses:		
PHYS1111	Introduction to Mechanics	6
PHYS1112	Electricity and Magnetism	6
2. Advanced level courses (48 credits)		
CHEM2109	Introduction to Materials Chemistry	6
CHEM2507	Principles and Application of Spectroscopic Techniques	6
CHEM3110	Advanced Materials	6
PHYS2225	Solid State Devices	6
PHYS2229	Thin Film Physics	6
PHYS2235	Physics of Nanomaterials	6
<u>Plus</u> at least one of the following courses:		
PHYS2221	Introductory Solid State Physics	6
PHYS2323	Introductory Quantum Mechanics	6
<u>Plus</u> at least 6 credits of advanced level Chemistry courses (CHEM2000 or CHEM3000 level), subject to prerequisite requirements.		

Note: For students having major/major, or major/minor combinations of Materials Science / Chemistry, or Materials Science / Physics, a set of replacement courses from the Departments of Chemistry and Physics will be made available so that there will be no overlap with the core courses in this major.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

10. Major in Mathematics

Mathematics has been referred to as "our invisible culture". Most people agree mathematics finds applications ranging from traditional ones in the physical sciences and engineering to more recent ones in the life sciences, economics, finance and management. Yet, many are dazzled by achievements mathematics helps to bring about that they forget about mathematics itself! A Major in Mathematics provides a solid comprehensive undergraduate education in the subject and will nurture quantitative reasoning, logical and analytical thinking, meticulous care to work, ability to conceptualize, problem-solving skill and innovative imagination.

Minimum Entry Requirement	: AL Pure Mathematics or equivalent
Minimum Credit Requirement	: 78 credits (30 credits introductory level & 48 credits advanced level courses)
Impermissible Combination	: Minor in Mathematics

Required courses (78 credits)

	Credits
1. Introductory level courses (30 credits)	
MATH1001 Fundamental Concepts of Mathematics ¹ OR MATH1800 Elements of Discrete Mathematics ²	6
MATH1101 Linear Algebra I	6
MATH1102 Linear Algebra II	6
MATH1201 Calculus I	6
MATH1202 Calculus II	6
2. Advanced level courses (48 credits)	
MATH2301 Algebra I	6
MATH2401 Analysis I	6

Plus at least 36 credits of advanced level Mathematics courses (MATH2000 or MATH3000 level), subject to prerequisite requirements.

Note: ¹ For students admitted in 2006 or after.

² For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

11. Major in Physics

The Major in Physics is intended for students who would like to acquire a well-rounded foundation on the subject. It covers a wide range of basic courses in theoretical and experimental physics to prepare students for future careers which require a professional knowledge in physics, such as the semiconductor industry, education, and research. A large selection of elective courses is provided for students to pursue a wide range of topics from the small scale of nanomaterials to the large scale of astrophysics.

Minimum Entry Requirement	: 1. AL / AS Physics or AL Engineering Science; and 2. HKCEE Additional Mathematics or AS Mathematics and Statistics or AL Pure Mathematics; or equivalent
Minimum Credit Requirement	: 78 credits (30 credits introductory level & 48 credits advanced level courses)
Impermissible Combination	: Minor in Physics

Required courses (78 credits)

	Credits
1. Introductory level courses (30 credits)	
PHYS1111 Introduction to Mechanics	6
PHYS1112 Electricity and Magnetism	6
PHYS1113 Heat, Light and Waves	6

PHYS1314	Modern Physics	6
----------	----------------	---

Plus at least one of the following courses:

PHYS1411	Introductory Experimental Physics	6
PHYS1412	Electronics	6

2. Advanced level courses (48 credits)

PHYS2321	Introductory Electromagnetism	6
PHYS2322	Statistical Mechanics and Thermodynamics	6
PHYS2323	Introductory Quantum Mechanics	6
PHYS2324	Classical Mechanics	6

Plus at least 24 credits of advanced level Physics courses (PHYS2000 or PHYS3000 level) of which 12 credits must be at PHYS3000 level, subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

12. Major in Risk Management

The Major in Risk Management enables students to gain an intellectual understanding of both financial and investment risks. Exposure to various statistical techniques for risk modelling is provided, with specific applications to financial and insurance problems. Career opportunities are available in financial institutions and large corporations including banks and consulting firms.

Minimum Entry Requirement : AL Pure Mathematics or AS Mathematics and Statistics or equivalent
Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)
Impermissible Combination : Major in Statistics
 Minor in Risk Management;
 Statistics

Required courses (72 credits)

		Credits
1. Introductory level courses (24 credits)		
STAT1301	Probability and Statistics I	6
STAT1302	Probability and Statistics II	6
STAT1303	Data Management	6
Plus at least one of the following courses:		
MATH0802	Basic Mathematics II	6
MATH1803	Basic Mathematics III	6
STAT1304	The Analysis of Sample Surveys ¹	6
STAT1305	Introduction to Demography ¹	6
2. Advanced level courses (48 credits)		
STAT2301	Linear Statistical Analysis	6
STAT2309	The Statistics of Investment Risk	6

STAT2310	Risk Management and Insurance	6
STAT3301	Time-series Analysis	6

Plus at least four of the following courses:

STAT2303	Probability Modelling	6
STAT2315	Practical Mathematics for Investment	6
STAT2806	Financial Economics	6
STAT3305	Financial Data Analysis	6
STAT3308	Financial Engineering	6
STAT3812	Stochastic Calculus with Financial Applications	6

Note: ¹ Only for students majoring in Mathematics.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

13. Major in Statistics

For candidates in BSocSc (Statistics Stream) admitted in the academic year 2003-2004

Senior level courses in Statistics build upon junior level courses. Students in the Statistics Stream must choose to major in at least one of the two themes including Risk Management, and Statistics. Full details of the themes are listed below.

Risk Management Theme

STAT0100. Statistical methods

STAT0102. Linear statistical analysis

STAT3301/STAT3101. Time-series analysis

STAT2303/STAT0103. Probability modelling

STAT2315/STAT0113. Practical mathematics for investment and pensions

STAT2309/STAT0109. The statistics of investment risk

STAT3308/STAT3110. Financial engineering

STAT2310/STAT0117. Risk management and insurance

Statistics Theme

(i) 3 compulsory courses:

STAT0100. Statistical methods

STAT0102. Linear statistical analysis

STAT3301/STAT3101. Time-series analysis

(ii) At least 5 senior level courses selected from Lists A and B, among which at least 2 must be from List B:

List A

STAT1304/STAT0104. The analysis of sample surveys

STAT2305/STAT0105. Quality control and management

STAT2306/STAT0106. Business logistics

STAT2307/STAT0107. Statistics in clinical medicine and bio-medical research

STAT2315/STAT0113. Practical mathematics for investment and pensions

STAT2312/STAT0114. Data mining

STAT2309/STAT0109. The statistics of investment risk

STAT3810/STAT0802. Risk theory

STAT2805/STAT0805.	Credibility theory and loss distributions
STAT2801.	Life contingencies
STAT2304.	Design & analysis of experiments
or STAT3104.	Planning of experiments
STAT2310/STAT0117.	Risk management and insurance

List B

STAT2303/STAT0103.	Probability modelling
STAT3304/STAT0111.	Computer-oriented statistical modelling
STAT3812/STAT0115.	Stochastic calculus with financial applications
STAT3811/STAT0803.	Survival analysis
STAT3302/STAT3102.	Multivariate data analysis
STAT3306/STAT3106.	Selected topics in statistics
STAT3307/STAT3108.	Project in statistics
STAT2313/STAT0116.	Marketing engineering
STAT3308/STAT3110.	Financial engineering

Students in the “Risk Management” theme or “Statistics” theme have the option to minor in “Actuarial Studies” by taking at least 4 of the following courses, in addition to those courses selected for the purpose of completing their major theme:

STAT3812/STAT0115.	Stochastic calculus with financial applications
STAT3810/STAT0802.	Risk theory
STAT3811/STAT0803.	Survival analysis
STAT2805/STAT0805.	Credibility theory and loss distributions
STAT2801.	Life Contingencies

or any other courses approved by the Department of Statistics and Actuarial Science

For candidates in BSocSc admitted in or after the academic year 2004-2005

The Major in Statistics equips students with powerful mathematical, analytic and computational skills, which are in great demand in many practical areas. It establishes for students a strong background in statistical concepts, and aims to provide a broad and solid training in applied statistical methodologies. Career opportunities are available in business, finance, industry, computing, marketing, communications, environmental protection, health organizations, as well as in scientific and academic research.

Minimum Entry Requirement	: AL Pure Mathematics or AS Mathematics and Statistics or equivalent
Minimum Credit Requirement	: 72 credits (24 credits introductory level & 48 credits advanced level courses)
Impermissible Combination	: Major in Risk Management Minor in Risk Management; Statistics

Required courses (72 credits)

1. Introductory level courses (24 credits)

		Credits
STAT1301	Probability and Statistics I	6
STAT1302	Probability and Statistics II	6

Plus at least one of the following courses:

STAT1303	Data Management	6
STAT1304	The Analysis of Sample Surveys	6
STAT1305	Introduction to Demography	6

Plus at least one of the following courses (for students not majoring in Mathematics):

MATH0802	Basic Mathematics II	6
MATH1803	Basic Mathematics III	6

2. Advanced level courses (48 credits)

STAT2301	Linear Statistical Analysis	6
STAT3301	Time-series Analysis	6
STAT3302	Multivariate Data Analysis	6
STAT3304	Computer-aided Statistical Modelling	6

Plus at least 24 credits from Lists A and B, among which at least 12 credits from List A:

List A:

STAT2302	Statistical Inference	6
STAT2303	Probability Modelling	6
STAT2308	Statistical Genetics	6
STAT2312	Data Mining	6
STAT2313	Marketing Engineering	6
STAT3305	Financial Data Analysis	6
STAT3306	Selected Topics in Statistics	6
STAT3307	Project in Statistics	6
STAT3308	Financial Engineering	6
STAT3811	Survival Analysis	6
STAT3812	Stochastic Calculus with Financial Applications	6

List B:

STAT2304	Design and Analysis of Experiments	6
STAT2305	Quality Control and Management	6
STAT2306	Business Logistics	6
STAT2307	Statistics in Clinical Medicine & Bio-medical Research	6
STAT2309	The Statistics of Investment Risk	6
STAT2310	Risk Management and Insurance	6
STAT2315	Practical Mathematics for Investment	6
STAT2801	Life Contingencies	6
STAT2805	Credibility Theory and Loss Distributions	6
STAT2806	Financial Economics	6
STAT3810	Risk Theory	6

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

Minors

1. Minor in Actuarial Studies

Mathematics, Physics, Statistics, Economics, Finance, and other Science majors who are taking a lot of mathematics and had very strong Advanced Level Pure Mathematics grades are suitable for choosing this Minor.

Minimum Entry Requirement : AL Pure Mathematics or AS Mathematics and Statistics or equivalent
Minimum Credit Requirement : 36-42 credits (12-18 credits introductory level & 24 credits advanced)

level courses)
Impermissible Combination : Nil

Required courses (36 or 42 credits)

1. Introductory level courses (12 or 18 credits) **Credits**

For students majoring in Risk Management or Statistics (12 credits)

STAT1305	Introduction to Demography	6
STAT1802	Financial Mathematics	6
STAT2303	Probability Modelling	6
STAT2306	Business Logistics	6

For students minoring in Risk Management or Statistics (12 credits)

STAT1302	Probability and Statistics II	6
STAT1801	Probability and Statistics: Foundations of Actuarial Science	6
STAT1802	Financial Mathematics	6
STAT2303	Probability Modelling	6

For students not belonging to the above two categories (18 credits)

STAT1301	Probability and Statistics I	6
STAT1302	Probability and Statistics II	6
STAT1801	Probability and Statistics: Foundations of Actuarial Science	6
STAT1802	Financial Mathematics	6
STAT2303	Probability Modelling	6

2. Advanced level courses (24 credits)

At least 24 credits of the following courses:

STAT2801	Life Contingencies	6
STAT2805	Credibility Theory and Loss Distributions	6
STAT2806	Financial Economics	6
STAT2807	Corporate Finance for Actuarial Science	6
STAT3810	Risk Theory	6
STAT3811	Survival Analysis	6
STAT3812	Stochastic Calculus with Financial Applications	6

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

2. Minor in Astronomy

Have you ever enjoyed a beautiful starry night and wondered it came to be like that? The Minor in Astronomy is intended for students who would like to acquire some appreciation of the beauties of the universe. Students are offered the opportunity to receive training in both the theoretical and practical aspect of astronomy.

- Minimum Entry Requirement** : 1. AL / AS Physics or AL Engineering Science; and
2. HKCEE Additional Mathematics or AS Mathematics and Statistics or AL Pure Mathematics; or equivalent
- Minimum Credit Requirement** : 36 credits (12 credits introductory level & 24 credits advanced level courses)
- Impermissible Combination** : Nil¹

* Refer to the Physics Department website <http://www.physics.hku.hk> for suggested curriculum.

Required courses (36 credits)

		Credits
1. Introductory level courses (12 credits)		
PHYS0001	Nature of the Universe I: Introduction to Observational Astronomy and the Solar System	3
PHYS0002	Nature of the Universe II: Stars, Galaxies and Cosmology for Beginners	3

Plus at least 6 credits of introductory level Physics course (PHYS0000 or PHYS1000 level)²

2. Advanced level courses (24 credits)

At least 24 credits of advanced level Physics courses (PHYS2000 or PHYS3000) level, out of which at least 12 credits are from the following courses:

PHYS2021	The Physical Universe	6
PHYS2022	Observational Astronomy	6
PHYS2023	Stellar Physics	6
PHYS2024	Introduction to Cosmology	6
PHYS3031	Astrophysics	6
PHYS3033	General Relativity	6
PHYS3034	Cosmology	6

Note: ¹ For students having major/minor combination of Physics / Astronomy, or Material Science / Astronomy, any single introductory or advanced level Physics course can be used to satisfy a major or minor requirement only once.

² Students are strongly advised to take at least one of the following courses: [PHYS1111](#), [PHYS1112](#), and [PHYS1314](#) to allow for maximum flexibility in selection for advanced level Physics courses.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

3. Minor in Biochemistry

Biochemistry, strengthened with molecular biology, is a field with enormous applications to our daily lives. It also is a discipline of sublime fascination. Our understanding of the biochemical bases of various life processes has greatly improved human welfare, particularly the medical and nutritional aspects. Further advances in this rapidly expanding field of knowledge, including building and establishing new conceptual frameworks, development of novel methodologies and techniques, should pave way to even more spectacular insights into nature and lead to a better control of our destiny.

The Minor in Biochemistry offered by the Department of Biochemistry is designed to provide students with both basic and advanced knowledge in modern biochemistry and molecular biology. Our goal is to

develop and equip students with enough critical thinking and analytical skills so that they can embark on a career in biochemical sciences.

Minimum Entry Requirement : AS Biology or AS Chemistry or equivalent

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Biochemistry

Required courses (36 credits)

		Credits
1. Introductory level courses (12 credits)		
BIOC1001	Basic Biochemistry	6
BIOC1003	Introduction to Molecular Genetics	6
2. Advanced level courses (24 credits)		
BIOL2301	Protein Structure and Function	6

Plus at least 6 credits of BIOC2000 level courses and at least 12 credits of BIOC3000 level courses, subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

4. Minor in Biology

What is biology and why is it important? This Minor provides students with a foundation in the biological sciences. Students are offered a broad range of options that should suit all interests, from genetics to microbiology, ecology to morphology and biodiversity to physiology. This is a good choice for a non-scientist who wants to know what biology is all about, as well as for non-biological scientists to explore the living side of science.

Minimum Entry Requirement : AL Biology or equivalent

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Biology

Required courses (36 credits)

		Credits
1. Introductory level courses (12 credits)		
At least 12 credits of the following courses:		
BIOL1106	Genetics	3
BIOL1107	Introduction to Developmental Biology & Reproduction	3
BIOL1119	Introductory Microbiology	6
BIOL1121	Animal Form and Functions	3
BIOL1122	Functional Biology OR BIOL0126 Fundamentals of Biology	6
ECOL0020	Ecology of Hong Kong	3
ECOL0040	Ecology and Evolution	3
ECOL0041	Evolutionary Diversity	6

ECOL0042	Ecology Field Course	3
----------	----------------------	---

2. Advanced level courses (24 credits)

At least 12 credits of the following courses:

BIOL2112	Plant Physiology	OR	BIOL2215	Animal Physiology	6
BIOL2115	Cell Biology & Cell Technology				6
BIOL2303	Introduction to Molecular Biology				6
ECOL2004	Environmental Microbiology ¹	OR	ECOL2022	Biodiversity ²	6

Plus at least 12 credits of advanced level courses (BIOL2000, BIOL3000, ECOL2000 or ECOL3000 level) of which 6 credits at BIOL3000 or ECOL3000 level, subject to prerequisite requirements.

Note: ¹ For students admitted in 2006 or after.

² For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

5. Minor in Biotechnology

Technology leads our future. Biotechnology is relevant to many business sectors and our daily life. Students who are interested in the developments of biological sciences are highly recommended to take this Minor. You will learn the scientific principles underlying current biotechnological advances and will become literate in biotechnology business and advancements.

Minimum Entry Requirement : AL Biology or equivalent

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Biotechnology

Required courses (36 credits)

					Credits
1. Introductory level courses (12 credits)					
BIOL1122	Functional Biology				6
Plus at least 6 credits of the following courses:					
BIOC1001	Basic Biochemistry	OR	BIOL1125	Introduction to Biochemistry	6
BIOL0128	Biological Techniques, Instrumentation and Data Processing				6
BIOL1106	Genetics				3
BIOL1107	Introduction to Developmental Biology & Reproduction				3
BIOL1119	Introductory Microbiology				6
2. Advanced level courses (24 credits)					
BIOL2303	Introduction to Molecular Biology				6

Plus at least 6 credits of the following courses:

BIOL3315	Animal Biotechnology	6
BIOL3316	Plant Biotechnology	6
BIOL3317	Microbial Biotechnology	6

Plus at least 12 credits of the following courses:

BIOL2004	Bioexploitation of Filamentous Fungi	3
BIOL2111	Molecular Microbiology	6
BIOL2115	Cell Biology & Cell Technology	6
BIOL2205	Basic Immunology	6
BIOL2209	Developmental Biology	6
BIOL2301	Protein Structure and Function	6
BIOL2302	Fermentation Technology	6
BIOL2515	Food Microbiology	6
BIOL3213	Advanced Techniques and Instrumentation in Animal Biology	6
BIOL3214	General Virology	6
BIOL3307	Biotechnology Industry	6
BIOL3522	Nutrigenomics	3

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

6. Minor in Chemistry

Why study Chemistry? Chemistry is both interesting and important. It is involved in almost everything you do. Chemistry occupies a central role in the natural sciences, it overlaps with other fields, and provides a fruitful source for important discoveries. For example, new discoveries in material sciences such as nanoscale materials cannot be realized without chemists. Astronomers now use results from chemical laboratories to search for new compounds in distant galaxies. Geologists analyse the structures of minerals and transformations between different forms of matter in the Earth's crust by using chemical principles of bonding and thermodynamics. Biologists try to understand the life process by chemical language in the field like molecular biology and chemical genetics. Therefore, the Chemistry Department offers this Minor for those students who need a knowledge of chemistry for their major subjects or those who have an interest in studying chemistry at a higher level. Students are required to take introductory courses in general and analytical chemistry and one other chemistry course from selected areas. The advanced courses emphasize instrumental analysis and spectroscopic techniques. In addition, students may also choose specialized courses in different areas of chemistry such as organic, synthetic, materials, medicinal, environmental, or industrial chemistry as their electives in the second and third years. The Minor is essential to students who major in science-related subjects such as the biological, medical, material and environmental sciences.

Minimum Entry Requirement : AL Chemistry or equivalent

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Chemistry

Required courses (36 credits)

1. Introductory level courses (12 credits)

		Credits
CHEM1206	General and Analytical Chemistry	6

Plus at least one of the following courses:

CHEM1001	Chemical Principles for Earth and Life Sciences	6
CHEM1301	Basic Inorganic Chemistry	6
CHEM1401	Fundamentals of Organic Chemistry ¹	6
CHEM1406	Basic Organic Chemistry ¹	6
CHEM1506	Basic Physical Chemistry	6

2. Advanced level courses (24 credits)

Any 24 credits of advanced level Chemistry courses (CHEM2000 or CHEM3000 level), subject to prerequisite requirements.

Note: ¹ CHEM1401 and CHEM1406 are mutually exclusive.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

7. Minor in Earth Sciences

To provide interested students an introduction to the different aspects of the discipline which may or may not be relevant to their major field of interest. Courses in physical geology and Earth history are offered in the first year followed by more advanced courses in the second and third year. A wide range of Earth Science courses are offered. A Minor in Earth Sciences is particularly suitable for students majoring in biochemistry, botany, chemistry, computing, ecology, economics, geography, mathematics, statistics, physics and zoology.

Minimum Entry Requirement : Nil

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Earth Sciences

Required courses (36 credits)

		Credits
1. Introductory level courses (12 credits)		
EASC0116	Introduction to Physical Geology	6

Plus at least one of the following courses:

EASC0001	Earth's Past and Future	6
EASC0105	Earth Through Time	6

2. Advanced level courses (24 credits)

Any 24 credits of advanced level Earth Sciences courses (EASC2000 or EASC3000 level), subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

8. Minor in Ecology & Biodiversity

Southeast Asia is extremely diverse in plants and animals, and Hong Kong has, for its size, a remarkable biodiversity. This Minor is an ideal introduction to the natural world, the species and ecosystems it comprises and the biological rules it follows. Students will first learn about general ecological principles and the local flora and fauna of the region. They will then be able to build upon this basic knowledge by selecting from among a wide range of courses that offer learning opportunities through practical and field work, traditional and virtual teaching, in more specialized areas of ecology and biodiversity.

Minimum Entry Requirement : Nil

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Ecology & Biodiversity;
Environmental Protection
Minor in Environmental Protection

Required courses (36 credits)

	Credits
1. Introductory level courses (12 credits)	
ECOL0020 Ecology of Hong Kong	3
ECOL0040 Ecology and Evolution	3
ECOL0041 Evolutionary Diversity	6

The following is also recommended:

ECOL0042 Ecology Field Course	3
-------------------------------	---

2. Advanced level courses (24 credits)

Plus at least 24 credits of the following courses:

ECOL2004 Environmental Microbiology	6
ECOL2005 Fish Biology	6
ECOL2007 Molecular Ecology	6
ECOL2011 Biological Oceanography	6
ECOL2013 Systematics & Phylogenetics	6
ECOL2014 Conservation Biology	6
ECOL2015 Fungal Diversity	3
ECOL2022 Biodiversity ¹	6
ECOL2023 Freshwater Ecology	6
ECOL2024 Plant Structure and Evolution	3
ECOL2029 How Humans Evolved	6
ECOL2032 Terrestrial Ecology	6
ECOL3033 Biogeography	3

Note: ¹ For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

9. Minor in Environmental Protection

Managing and conserving the environment is increasingly recognized as an important and necessary challenge for modern Society. Preserving biological diversity, whether species, genes, populations or ecosystems, requires an understanding of a range of exciting new areas in the life sciences. This Minor will provide students with an appreciation of the depth and breadth of this important developing field. The lectures are enhanced by valuable laboratory and practical experience that should be applicable to a wide range of careers, and contribute to a better understanding of the world we live in.

- Minimum Entry Requirement** : AL Biology or equivalent
Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)
Impermissible Combination : Major in Ecology & Biodiversity;
 Environmental Protection
 Minor in Ecology & Biodiversity

Required courses (36 credits)

		Credits
1. Introductory level courses (12 credits)		
ECOL0020	Ecology of Hong Kong	3
ECOL0040	Ecology and Evolution	3
ECOL0041	Evolutionary Diversity	6
The following is also recommended:		
ECOL0042	Ecology Field Course	3
2. Advanced level courses (24 credits)		
ECOL3027	Environmental Impact Assessment	6
ECOL3034	Environmental Monitoring and Remediation Techniques	6
Plus at least 12 credits of the following courses:		
ECOL2004	Environmental Microbiology	6
ECOL2006	Biometrics	6
ECOL2014	Conservation Biology	6
ECOL2016	Environmental Toxicology	6
ECOL2032	Terrestrial Ecology ¹ OR ECOL2022 Biodiversity ²	6

Note: ¹ For students admitted in 2006 or after.

² For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

10. Minor in Food & Nutritional Science

This Minor is ideal for those who simply want to learn more about diet as part of their quest to promote personal health or for those who see knowledge in food and nutrition as complementary to their major

study, be it biotechnology, chemistry, business or social science.

- Minimum Entry Requirement** : AL / AS Biology* and AL / AS Chemistry or equivalent
Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)
Impermissible Combination : Major in Food & Nutritional Science

* Students without AL / AS Biology must take *BIOL0126 Fundamentals of Biology* as a qualifying course.

Required courses (36 credits)

		Credits
1. Introductory level courses (12 credits)		
BIOL0002	Introduction to Food and Nutritional Science	3
BIOL1123	Food Chemistry	3
BIOL1514	Nutrition and Metabolism	6
2. Advanced level courses (24 credits)		
At least 24 credits of the following courses:		
BIOL2004	Bioexploitation of Filamentous Fungi	3
BIOL2215	Animal Physiology	6
BIOL2302	Fermentation Technology	6
BIOL2501	Food Processing and Preservation	6
BIOL2503	Grain Production & Utilization	6
BIOL2505	Food Safety and Quality Management	6
BIOL2507	Meat and Dairy Science	6
BIOL2515	Food Microbiology	6
BIOL2517	Food Analysis	3
BIOL2519	Essential Nutrients & Functional Foods	6
BIOL2520	Food Toxicology	3
BIOL2521	Food Engineering	3
BIOL3516	Nutrition and Brain Function	3
BIOL3522	Nutrigenomics	3
BIOL3523	Principles of Chinese medicated Diet	3
BIOL3524	Diet and Disease	3
BIOL3525	Food Product Development	3

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

11. Minor in General Science

Science is an indispensable component of this modern world, with a significant impact to our daily lives. Be it the interaction between animals and their natural environment, the food in our daily diet, the synthesis of new materials (nanomaterials, polymeric and semiconducting materials), the mystery of the human gene, or the application of mathematics to solve problems. This Minor is suitable for non-Science students who are interested in exploring science and learning how scientists study the real world. The scientific knowledge, quantitative reasoning, logical and analytical thinking and sense of numeracy will be useful in various fields of finance, business, social sciences, arts and education. Students have the

flexibility to gather courses in any area of interest.

Minimum Entry Requirement : Nil

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Nil (This Minor is only offered to non-Faculty of Science students.)

Required courses (36 credits)

Credits

1. Introductory level courses (12 credits)

At least 12 credits of any introductory level Science courses (level 0 & 1), subject to prerequisite requirements.

2. Advanced level courses (24 credits)

At least 24 credits of any advanced level Science courses (level 2 & 3), subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

12. Minor in Mathematics

Mathematics has been referred to as "our invisible culture". Most people agree mathematics finds applications ranging from traditional ones in the physical sciences and engineering to more recent ones in the life sciences, economics, finance and management. Yet, many are dazzled by achievements mathematics helps to bring about that they forget about mathematics itself! A Minor in Mathematics provides an initiation into the subject and will nurture quantitative reasoning, logical and analytical thinking, meticulous care to work, ability to conceptualize, problem-solving skill and innovative imagination.

Minimum Entry Requirement : HKCEE Mathematics or AL Pure Mathematics or AS Mathematics and Statistics or equivalent

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Mathematics

Required courses (36 credits)

Credits

1. Introductory level courses (12 credits)

Either

MATH0801	Basic Mathematics I	6
MATH0802	Basic Mathematics II	6

Or

MATH1803	Basic Mathematics III	6
----------	-----------------------	---

Plus at least 6 credits of Mathematics course

Or

MATH1811	Mathematics I	6
MATH1812	Mathematics II	6

Or

MATH1813	Mathematical Methods for Actuarial Science	6
----------	--	---

Plus at least 6 credits of Mathematics course

Or

MATH1201	Calculus I ¹	6
MATH1202	Calculus II ¹	6

2. Advanced level courses (24 credits)

Any 24 credits of advanced level Mathematics courses (MATH2000 or MATH3000 level), subject to prerequisite requirements.

Note: ¹ Students selecting this option are strongly advised to take also [MATH1101](#) and [MATH1102](#).

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

13. Minor in Physics

The Minor in Physics is intended for students who would like to acquire a taste of the subject. The curriculum is designed with the flexibility for students with and without HKAL Physics/Pure Mathematics background. A large selection of elective courses is provided for students to pursue a wide range of topics from the small scale of nanomaterials to the large scale of astrophysics.

Minimum Entry Requirement : 1. AL / AS Physics or AL Engineering Science; and
2. HKCEE Additional Mathematics or AS Mathematics and Statistics or AL Pure Mathematics;
or equivalent

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Physics

* Refer to the Physics Department website <http://www.physics.hku.hk> for suggested curriculum.

Required courses (36 credits)

	Credits
1. Introductory level courses (12 credits)	
PHYS1314 Modern Physics	6

Plus at least 6 credits of introductory level Physics course (PHYS0000 or PHYS1000 level)¹

2. Advanced level courses (24 credits)

Any 24 credits of advanced level Physics courses (PHYS2000 or PHYS3000 level), subject to prerequisite requirements.

Note: ¹ Students are strongly advised to take at least one of the following courses: [PHYS1111](#), [PHYS1112](#) and [PHYS1113](#) to allow for maximum flexibility in course selection for advanced level Physics courses.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

14. Minor in Risk Management

The Minor in Risk Management enables students to gain exposure to financial and investment risks, and to various statistical techniques for modeling them. Specific attention is given to applications in financial and insurance problems.

Minimum Entry Requirement : Nil

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Risk Management;
Statistics
Minor in Statistics

Required courses (36 credits)

	Credits
1. Introductory level courses (12 credits)	
STAT1301 Probability and Statistics I	6

STAT1303 Data Management	6
Or	
One of the advanced level courses listed below	6
2. Advanced level courses (24 credits)	
At least 24 credits of the following courses:	
STAT2309 The Statistics of Investment Risk	6
STAT2310 Risk Management and Insurance	6

STAT2311	Computer-aided Data Analysis	6
STAT2312	Data Mining	6
STAT2314	Business Forecasting	6
STAT2315	Practical Mathematics for Investment	6
STAT2806	Financial Economics	6
STAT3301	Time-series Analysis	6
STAT3305	Financial Data Analysis	6
STAT3308	Financial Engineering	6
STAT3812	Stochastic Calculus with Financial Applications	6

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

15. Minor in Statistics

The Minor in Statistics introduces to students important statistical concepts and provides them with exposure to applied statistical methodologies. A broad spectrum of courses is available for selection, covering topics which find applications in areas like business, finance, risk management, survey research, insurance, industry, medicine or computing.

Minimum Entry Requirement : Nil

Minimum Credit Requirement : 36 credits (12 credits introductory level & 24 credits advanced level courses)

Impermissible Combination : Major in Risk Management;
Statistics
Minor in Risk Management

Required courses (36 credits)

Credits

1. Introductory level courses (12 credits)

One of the following courses:

STAT0301	Elementary Statistical Methods	6
STAT1301	Probability and Statistics I	6
STAT1306	Introductory Statistics	6

Plus at least one of the following courses:

STAT1302	Probability and Statistics II	6
STAT1303	Data Management	6
STAT1304	The Analysis of Sample Surveys	6

2. Advanced level courses (24 credits)

At least 24 credits of the following courses:

STAT2301	Linear Statistical Analysis	6
STAT2302	Statistical Inference	6
STAT2303	Probability Modelling	6
STAT2304	Design and Analysis of Experiments	6
STAT2305	Quality Control and Management	6

STAT2306	Business Logistics	6
STAT2307	Statistics in Clinical Medicine & Bio-medical Research	6
STAT2308	Statistical Genetics	6
STAT2309	The Statistics of Investment Risk	6
STAT2310	Risk Management and Insurance	6
STAT2311	Computer-aided Data Analysis	6

STAT2314	Business Forecasting	6
STAT2315	Practical Mathematics for Investment	6
STAT2806	Financial Economics	6
STAT3301	Time-series Analysis	6
STAT3302	Multivariate Data Analysis	6
STAT3304	Computer-aided Statistical Modelling	6
STAT3305	Financial Data Analysis	6
STAT3306	Selected Topics in Statistics	6
STAT3308	Financial Engineering	6
STAT3811	Survival Analysis	6
STAT3812	Stochastic Calculus with Financial Applications	6

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

SECOND MAJOR AND MINOR OFFERED BY THE INSTITUTE OF HUMAN PERFORMANCE

Second Major in Exercise Science

The Major in Exercise Science is a multi-disciplinary programme of education, synthesising the biophysical, psycho-social and health aspects of exercise. It is for students who are interested in the scientific study of human movement, with a particular focus on the recognition, evaluation, rehabilitation and prevention of acute and chronic illnesses related to inactivity.

Programme Structure

Candidates who wish to major in Exercise Science must successfully complete the following courses:

- A. Junior level compulsory courses (24 credits)
 - PBSL1111 Kinetic anatomy (6 credits)
 - PBSL1114 Physiology for human movement (6 credits)
 - PBSL1120 Foundations of exercise science (6 credits)
 - PBSL1121 Physical activity and health (6 credits)

- B. Senior level courses (at least 48 credits of courses from the list below)
 - PBSL2229 Exercise physiology (6 credits)
 - PBSL2233 Biomechanics (6 credits)
 - PBSL2234 Fundamentals of motor control and learning (6 credits)
 - PBSL2235 Measurement and promotion of physical activity (6 credits)
 - PBSL2236 Sport and exercise psychology (6 credits)
 - PBSL2200 Summer internship (0 credits)
 - PBSL3334 Advanced exercise physiology (6 credits)
 - PBSL3335 Advances in skill learning (6 credits)

- PBSL3336 Exercise prescription and training (6 credits)
 - PBSL3337 Physical activity and disability (6 credits)
 - PBSL3338 Physical activity and diseases of inactivity (6 credits)
 - PBSL3339 Public health promotion of physical activity (6 credits)
 - PBSL3340 Special topic in exercise sciences (6 credits)
 - PBSL3998 Dissertation (12 credits)
-

Minor in Exercise Science

The Minor in Exercise Science provides an introduction to the discipline of exercise science and its application to health. It is for students who are curious about the scientific study of human movement and its various applications.

Candidates who wish to minor in Exercise Science must successfully complete the following courses:

- B. Junior level compulsory courses (12 credits)
 - PBSL1120 Foundations of exercise science (6 credits)
 - PBSL1121 Physical activity and health (6 credits)

 - B. Senior level courses (at least 24 credits of courses from the list below)
 - PBSL2229 Exercise physiology (6 credits)
 - PBSL2233 Biomechanics (6 credits)
 - PBSL2234 Fundamentals of motor control and learning (6 credits)
 - PBSL2235 Measurement and promotion of physical activity (6 credits)
 - PBSL2236 Sport and exercise psychology (6 credits)
 - PBSL3334 Advanced exercise physiology (6 credits)
 - PBSL3335 Advances in skill learning (6 credits)
 - PBSL3336 Exercise prescription and training (6 credits)
 - PBSL3337 Physical activity and disability (6 credits)
 - PBSL3338 Physical activity and diseases of inactivity (6 credits)
 - PBSL3339 Public health promotion of physical activity (6 credits)
 - PBSL3340 Special topic in exercise sciences (6 credits)
-

Elective Courses

1. Centre of Buddhist Studies

No major or minor in Buddhist Studies will be offered to social sciences students but candidates may select the following courses as elective courses:

Senior Level

- BSTC0001. Making sense of Ch'an (Zen) (6 credits)
- BSTC0002. Life and Buddhism (6 credits)
- BSTC0003. Buddhism and contemporary moral problems (6 credits)
- BSTC0004. The art of living (6 credits)

2. English

No major or minor in English will be offered to social sciences students but candidates may select the following courses as elective courses:

Junior Level

- ENGL1009. Introduction to English studies (6 credits)

Senior Level

Semesters III to VI

- ENGL2002. Language in society (6 credits)
 ENGL2003. The history of English (6 credits)
 ENGL2004. English syntax (6 credits)
 ENGL2007. Literary linguistics (6 credits)
 ENGL2010. English novel I (6 credits)
 ENGL2011. English novel II (6 credits)
 ENGL2012. Contemporary literary theory (6 credits)
 ENGL2022. Women, feminism and writing I (6 credits)
 ENGL2027. Text and discourse in contemporary English (6 credits)
 ENGL2030. World Englishes (6 credits)
 ENGL2031. The semantics and pragmatics of English (6 credits)
 ENGL2033. English novel III (6 credits)
 ENGL2035. Reading poetry (6 credits)
 ENGL2037. Science fiction (6 credits)
 ENGL2039. Language and gender (6 credits)
 ENGL2040. Asian American literature (6 credits)
 ENGL2045. Travel writing (6 credits)
 ENGL2046. English words (6 credits)
 ENGL2047. English discourse structures and strategies (6 credits)
 ENGL2048. Language and jargon (6 credits)
 ENGL2049. The history of English: sociolinguistic perspectives (6 credits)
 ENGL2050. English corpus linguistics (6 credits)
 ENGL2054. Race, language and identity (6 credits)
 ENGL2055. American gothic: Haunted homes (6 credits)
 ENGL2057. Text and image (6 credits)
 ENGL2058. Narrative prose: a linguistic investigation (6 credits)
 ENGL2059. American drama and American film (6 credits)
 ENGL2062. The history of Western linguistics (6 credits)
 ENGL2065. Meaning and metaphor (6 credits)
 ENGL2066. Orientalism and linguistics (6 credits)
 ENGL2069. Form and meaning (6 credits)
 ENGL2074. Postcolonial readings (6 credits)
 ENGL2075. The idea of China (6 credits)
 ENGL2076. Romanticism (6 credits)
 ENGL2078. The novel today (6 credits)
 ENGL2079. Shakespeare (6 credits)
 ENGL2080. Women, feminism and writing II (6 credits)
 ENGL2082. Modern literary criticism (6 credits)
 ENGL2084. Modernism and short fiction (6 credits)
 ENGL2087. Persuasion (6 credits)
 ENGL2089. Making Americans: Literature as ritual and renewal (6 credits)
 ENGL2090. The moving production of America: reading recent films (6 credits)
 ENGL2091. Comedy and Asian American drama (6 credits)
 ENGL2092. Postcolonial English (6 credits)
 ENGL2093. Literary islands: English poetry and prose from the South Pacific and the Caribbean (6 credits)
 ENGL2094. Cultural approaches to second language varieties of English (6 credits)
 ENGL2095. The East: Asia in English writing (6 credits)
 ENGL2096. Creative Writing (12 credits)
 ENGL2097. Imagining Hong Kong (6 credits)
 ENGL2098. Call and response: Southeast Asian literature written in English (6 credits)
 ENGL2099. Language, identity, and Asian Americans (6 credits)

- ENGL2100. Language and social interaction (6 credits)
- ENGL2101. Culture and society (6 credits)
- ENGL2102. Theories of beauty (6 credits)
- ENGL2103. Language and new media (6 credits)
- ENGL2104. Language in the USA (6 credits)
- ENGL2105. Contemporary North American novelists (6 credits)
- ENGL2106. Childhood, reading and literature in the nineteenth century (6 credits)
- ENGL2107. Literature, culture and gender at the *Fin de Siècle* (6 credits)
- ENGL2108. Shakespeare's language (6 credits)
- ENGL2109. Writing diaspora (6 credits)
- ENGL2110. Writing back (6 credits)
- ENGL2111. Seeing Australia (6 credits)

Semester V/VI

- ENGL3032. Advanced Topics in English Studies (12 credits)
 - ENGL3033. Research seminar in English studies (6 credits)
 - ENGL3034. Research seminar in English literary studies (6 credits)
 - ENGL3035. Research seminar in literary theory (6 credits)
 - ENGL3036. Research seminar in English linguistics (6 credits)
 - ENGL3037. Research seminar in language & society (6 credits)
-

FACULTY OF ARTS

American Studies Programme

First Year

AMER1009. Consuming culture: decoding American symbols (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Images of America (as revealed in Hollywood films, television, advertisements, music and music videos, news media and consumer products) shape our vision of US culture. In a course specifically designed with Hong Kong students in mind, we will study and decode cultural products mediated to us by the increasingly global American media. We will approach national culture, including popular culture, as an extension and creation of national myths and propaganda and explore why American people are so attached to certain symbols, and what these symbols mean for the United States as a whole. In the course of our discussions we may touch on the symbolism and reality of the American Dream and the myth of “rags to riches,” the notion of success, materialism and consumerist culture, as well as on the national and international symbols that for many define the image of America. We may also consider distinctions between high and low/popular cultures and see how class, gender and race affect notions of culture generally and how they shape the particular themes of US culture under discussion.

Assessment: 100% coursework.

AMER1011. Born in the USA: U.S. youth cultures (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Baby boomers, Beats, Hippies, Yuppies and Gen(eration) Xers are labels assigned to various generations of American youth. This first-year survey course explores the connection between historical change and adolescence/early adulthood in the United States during the second half of the 20th century. Throughout the term we will consider youth culture through the interdisciplinary mix of history, politics, literature, and popular culture. From these diverse perspectives, we will discover how young people in America are defined and how they attempt to define themselves by their subcultures, fashion, leisure, music, use of the internet, slang, education, and other expressions of identity. While teaching about American youth cultures, the course will offer students a chance to reflect on their own experiences as adolescents/young adults and focus on improving critical thinking, speaking and writing skills.

Assessment: 100% coursework.

AMER1015. Wall Street: Issues in American business (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course will draw on selected issues in American business in order to teach us about the essential characteristics of US society, including its character, values, as well as written (e.g. legal) and unwritten codes of behaviour. Every day, decisions are made on Wall Street which affect how business is conducted in America, Asia, and everywhere else around the globe. How did one address become so influential in, and such an icon of, American business? This course seeks to examine the Wall Street phenomenon, as well as its culture, influence and impact on specific components of American business. Issues under discussion may involve the nature of American business, its place in the national life (“the business of America is business,” affirmed President Coolidge), its code of ethics and failures to live by that code. Case studies will be drawn from the famous and infamous examples of American entrepreneurial spirit as they made headlines up to, and including, the 21st century. Furthermore, issues such as the rise of the Internet and the information age will be examined to explore the reverse — how they shape Wall Street and the way business is conducted in America.

Assessment: 100% coursework.

AMER1017. Movieland: America on Hollywood's big screen (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Hollywood is known to spin dreams, visions and illusions but, caught in the big-screen experience, viewers often forget that these dreams and illusions are spun within particular social and cultural contexts. Films are woven into national myths, myths are woven into the society that builds them, and society is woven into the people that create and recreate America everyday as they live, work and go to the movies. This course will look at many of the biggest, most famous and most representative Hollywood blockbusters—films and their movie-star icons—that in many ways define American culture. Students will be introduced to various genres that have become synonymous with Hollywood, among them the action thriller, classic and revisionist western, MGM musical, film *noir* and police story, science fiction, romantic comedy, Disney animation, and others. The experience of these films and their contexts will broaden our knowledge of American cultural values and help us critique these values, so that the reality of American life is explored alongside its ideals. The course will also aim to enhance critical and creative thinking as well as speaking and writing skills.

Assessment: 100% coursework

AMER1018. From crime fiction to social document: Introduction to 20th century American literature (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Humphrey Bogart, Robert Mitchum, James Caan, Jack Nicholson, Robert Eliot Gould... all these Hollywood actors played him: the tired gumshoe, the hired dick, the hardboiled detective, the gun for hire, the private eye. If you've seen them in action and liked what you saw, now is your chance to study the original novels on which the films were based. In this course we will read and analyze some of the classic novels of the genre which at various points has been labelled hardboiled fiction, tough guy fiction, or even *noir*, and what they tell us about life in America in the 20th century. We will begin with a socio-economic look at the several decades in American history crucial to the development of modern crime, crime-fighting forces and crime fiction, laying the foundations for a better understanding of the novels and films in the course and the social issues they touch on. Building on these opening lectures, we will trace the rise of the hardboiled story from pulp fictions of the 1920s and the emergence of the classic hero (the private eye) and heroine (the femme fatale), to the contemporary examples of the genre, including the police procedural and the legal/lawyer procedural. We will try to identify what is specific and recurrent about American crime fiction in terms of its structure and themes, and try to understand its portrayal of America then and now.

Assessment: 100% coursework

Second Year/Third Year**AMER2002. The road in American culture (6 credits)**

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The popular hit song, "Hit the road, Jack," is as much a part of American culture and slang as Jack Kerouac's bestselling account of his life on the American highway, *On the Road*. For better or worse, North Americans have always been on the road, pushing westward towards California, Oregon and British Columbia, moving around the country in pursuit of the American Dream, or just driving along Route 66 to escape the mundane suburban life. This restlessness and the ease with which large segments of the population move and resettle characterizes many aspects of US and Canadian life, turning the road into one of the most powerful symbols in North American literature and culture. Through the analysis of various media forms, which may include film, fiction, music, material culture and architecture, this course

will consider the road in America as reality and icon, extending it to the recent emergence of the Internet and the “information highway.”

Assessment: 100% coursework.

AMER2014. A dream in the heart: varieties of Asian American culture (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Like so many other immigrants to the United States, Asians – Chinese, Japanese, Filipinos, Vietnamese, Koreans, etc. – were also drawn by the dream of Golden Mountain. Yet once in America, they would confront not only promise and possibility but the dream’s betrayal: hostility, rejection, and exclusion. This course will explore the varieties of Asian American cultures that emerge out of the painful, disruptive struggles between expectation and reality faced by these immigrants and their children, and the representation of their experiences in the arts, media, politics and popular culture. Asian Americans are frequently stereotyped as model minorities for striving after the American dream of education, wealth, and political representation. We will examine and challenge this “model minority” idea in American life and politics, especially as it relates to inter-minority conflict and cooperation, as individual American minority groups attempt to achieve their own version of American success.

Assessment: 100% coursework.

AMER2015. The American city (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

In 1800 only 6% of Americans lived in cities; in 2000 this number was more than 80%. As a center of growth, power, and cultural diversity, the American city has always occupied a crucial place in America’s vision of itself as a new nation. “A cruel city, but a lovely one, a savage city, yet it had such tenderness”—this quote from Thomas Wolfe’s *A Vision of the City* is representative of the varied cultural representations of the American urban environment as a place where fortunes and lives are made or lost. Through an examination of literature, art, architecture, photography, film and music, this course will take a closer look at some of the greatest as well as the “baddest” American metropolises, looking for a way to understand the people who live, commute, work, create, govern, commit crime and conduct business in them.

Assessment: 100% coursework.

AMER2018. Show me the money: doing business with Americans (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is designed to familiarize students with business practice in the United States and in American corporations operating in Hong Kong, laying foundations for a better understanding of the individuals and institutions driving the economy. Weekly sessions will include lectures and, whenever possible, discussions with members of the American business community in the Asia-Pacific region. Topics may include: U.S. business history and economic cycles, American entrepreneurs, the ethics and etiquette of U.S. corporate culture, government/business relationships, gender and business, glass ceilings and opportunities for advancement, and business and technological change.

Assessment: 100% coursework.

AMER2021. On the road again: Field trip in American Studies (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Concentrating on North American points of interest from cities to landscape to cultural sites—this course will explore the variety and complexity of American life. Throughout the semester students will conduct

group research and deliver presentations on the cities and locations to be visited in the summer, which will typically vary in the years the course is offered. In 2004, for example, the field trip will stretch from Los Angeles and the “Star Walk” of Hollywood, to San Francisco and its world-famous Chinatown, to the metropolitan Seattle which both Bruce Lee and Bill Gates called home, to the Calgary stampede which every year enacts the cowboy rituals of the Wild West.

Assessment: 100% coursework

AMER2022. What’s on TV? Television and American culture (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Television has been a powerful force in US history and culture. American TV shows and programming styles have been exported globally, and are modified to suit diverse cultural settings, including Hong Kong. The United States exerts significant global influence, in part because of its success in marketing itself, both domestically and abroad, through media and entertainment. While many contest the content or perspective of American media, few are exempt from its impact. This course offers students a chance to consider the impact of television inside and outside of the US and explore how the American media-machine reaches into every facet of the nation’s life as well as into the lives of people around the world. Topics to be discussed in the course may include the history of television, strategies for critical viewing, war and TV, educational television, television’s domination of politics, youth culture and TV, the technology behind television programming, and finally TV programming in Hong Kong.

Assessment: 100% coursework.

AMER2029. Current perspectives on the U.S. (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Students in this course will be discussing current and past events as reported in newspapers, magazines, television, literature, films and on the internet. The course will focus on domestic issues facing Americans at home as well as on political, economic, and cultural links between the United States and other nations. Pedagogy will be student-centered and require students to participate regularly in (and at times lead) discussions. Typical topics may include the analysis of the American political system and the presidency, the relationship between business and politics, the role of sports in American life, the fallout from September 11, the rise of rap and hip-hop, manufacturing media, regionalism, stand-up comedy and social satire, and the US university system. These and other issues will form the basis of the course taught, on occasion, with the help of representatives of various disciplines across the spectrum of the arts, humanities and social sciences.

Assessment: 100% coursework.

AMER2030. Foundations of American Studies: Part I (6 credits)

(This course is normally open only to second-year students and is also offered to non-BA students for inter-Faculty broadening purposes.)

This course and its companion, Foundations in American Studies: Part 2 (offered in the second semester), are requisite for all Majors in the American Studies Programme. Building on the introductory material from the first year, the course provides a mosaic of perspectives on the United States between 1600 and 1900 through an intensive series of lectures and discussions. Following an overview of and a general introduction to the United States, a number of invited experts will trace the development of American society from pre-Columbian times to the beginning of the 20th century. The lectures will range over a diverse but complementary array of viewpoints, and may include geography, history, sociology, business, education, art, music, theatre, language and literature. This unique approach will allow students to sample and compare multidisciplinary perspectives on such foundational issues in US history as the settlement, expansion, the War of Independence, *laissez faire* capitalism, slavery, the Civil War, and the country’s

rising economic, political and military domination. The lectures will be enriched with discussions, film clips, music, and prints from this period in American life.

Assessment: 100% coursework

AMER2031. Foundations of American Studies: Part II (6 credits)

(This course is normally open only to second-year students and is also offered to non-BA students for inter-Faculty broadening purposes.)

This course and its companion, Foundations in American Studies: Part 1 (offered in the first semester), are requisite for all Majors in the American Studies Programme. In this course we will focus exclusively on the 20th and 21st centuries and on the internal problems and international conflicts that shape the face of America today. Among the topics for study and discussion may be the flood of immigration at the turn of the 20th century, the gangster-friendly Jazz Age, the Great Depression, World War II, the worldwide Cold War and the conformist '50s, the psychedelic flower-power '60s, and the post-Vietnam decades in which the US increasingly lost touch with its ideals. Through lectures and class debates we will attempt to compare our popular knowledge of America with the sometimes different historical reality behind it. From documentary sources and literary nonfiction, through film, novels, comic books and rap music, we will lay foundations for a better understanding of the country which for better or worse continues to make the world headlines today.

Assessment: 100% coursework

AMER2033. Asia on America's screen (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

"The Orient" has always held a dual attraction of romance and danger outside Asia, and this tradition has since been reinforced by Hollywood. The allure of wealth, trade and exoticism that brought millions of Americans across the Pacific provided rich material for movie drama. This combination of geographical attraction and cultural appeal was further reinforced during the wars the United States fought in Asia. War, violence and romance fill America's movie screens, pulling in vast crowds and in the process shaping and mis-shaping America's view of Asia. Asking what is Asia and how far it extends, this course will explore cinematic representations of the continent and its people as constructed by Hollywood during more than a century of selling romantic myths to a public that often has no first-hand experience of Asian culture and no firm grasp of its history.

Assessment: 100% coursework

AMER2035. Addicted to war? The US at home and abroad (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The Vietnam War was the first war in the age of the television and the first war that America lost. The emotions aroused by the loss of American lives and the images of violence and brutality made TV and Hollywood important actors in the war for hearts and minds. This course will examine the multiple wars, police actions, military invasions, armed "liberations," coups d'états, political assassinations, "regime changes," and other euphemisms for military aggression and intervention on an international scale. Among other issues discussed may be international weapons trade, the Cold War, the two World Wars, international peace keeping, "wars" on drugs and/or terrorism, and the state of civil liberties in the US. In the process we will also examine the role of movies, television and journalistic reportage in shaping public opinion and thus indirectly the American perception and misperception of the rest of the world.

Assessment: 100% coursework

AMER2036. Issues in contemporary immigration to American cities (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is an introduction and overview to the contemporary immigration in American society. Although we begin with a cursory historical overview, the bulk of the course focuses on the period following the 1965 Immigration and Nationality Act, in which the race-based quota system that had been in place since 1924 was eliminated.

Assessment: 100% coursework

AMER2037. Institutions in American life: home, education, work and play (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Institutions structure the lives of all Americans. While institutions can be thought of in terms of discreet organizations—Harvard University, the New York Stock Exchange, National Basketball Association, the Metropolitan Museum of Art—or even the buildings in which these organizations are housed, in the broader sense, institutions are the forms into which social activity is organized. Among the most fundamental institutions of this latter type are the family, school, business, and leisure. Each of them is associated with values, beliefs and practices which, taken together, help to constitute American culture. The course will examine these and other types of institutions in order to understand the origins of the values, beliefs and practices which they embody. We will also study how these values, beliefs and practices may have been influenced by such factors as ethnicity, race, class, religion, and geographic region, and how the institutions and the ideas they embody have persisted or changed over time. In the process, we will seek to identify common themes, and to consider how certain tensions—for example between individualism and community, democracy and excellence, service and profit—have shaped each of these institutions, and through them, American society. Finally, we will consider the extension of these institutions, and their values and practices, beyond the United States, asking how American ideas about home, school, work and play have impacted and interacted with other cultures, including Asian.

Assessment: 100% coursework

Third Year

AMER3004. Senior seminar in American Studies: Part I (6 credits)

(This course is also open to non-majors subject to the approval of the Programme Co-ordinator.)

This course is required of all Majors in the American Studies Programme and is designed to cap students' university careers with a rigorous, interdisciplinary and theme-based program of study. The specific area of study may vary from year to year depending on students' background, interests and the expertise of the instructor. Students will deepen their research and writing skills, conduct discussion sessions, participate in intensive group work, get involved in a mentoring program and continue to hone the critical thinking skills nurtured during their education in American Studies. The seminar will seek ways to prepare students to make the transition from the university setting to a variety of employment settings.

Assessment: 100% coursework

AMER3005. Senior seminar in American Studies: Part II (6 credits)

(This course is also open to non-majors subject to the approval of the Programme Co-ordinator.)

This course is required of all Majors in the American Studies Programme and is designed to cap students' university careers with a rigorous, interdisciplinary and theme-based program of study. The specific area of study may vary from year to year depending on students' background, interests and the expertise of the instructor. Students will deepen their research and writing skills, conduct discussion sessions, participate in intensive group work, get involved in a mentoring program and continue to hone the critical thinking skills nurtured during their education in American Studies. The seminar will seek ways to prepare

students to make the transition from the university setting to a variety of employment settings.
 Assessment: 100% coursework

AMER3006. Dissertation (12 credits)

This is a directed reading course aimed at top students in American Studies who would like to pursue an individualized program of research under the supervision of a mentor, typically (though not necessarily) an American Studies Programme instructor or an American Studies Board member. The student is responsible for approaching the instructor in advance and obtaining consent for supervision. The coursework will normally consist of designing the project around a topic relevant to the Programme, compiling a bibliography, research and reading, and finally writing the dissertation. A project proposal consisting of a thesis statement, preliminary outline of research (typically 3-5 pages), timetable for completion, and working bibliography will be filed with the Programme Coordinator no later than November 30. The full dissertation (approximately 40-80 pages) shall be completed and presented for examination by April 30 of the academic year in which the course is taken.

Assessment: 100% coursework

Other courses, offered from time to time by the component departments and approved by the Board of Studies in American Studies in conjunction with the department concerned, may be used to fulfil programme requirements. Students who wish to count courses towards the requirements of the American Studies major that are not listed in this syllabus need to seek special Faculty Board approval.

Department of Chinese

Group A: Chinese Language and Literature

First Year Courses

CHIN1101. A survey of the Chinese language (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

An introduction to the various aspects of the Chinese language: etymology, phonology, lexicology and grammar, with special reference to the cultural context and its developments in the twentieth century.

Assessment: 40% coursework, 60% examination.

CHIN1102. An introduction to standard works in classical Chinese literature (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A fundamental study of standard works and selected writings in the classical Chinese literature.

Assessment: 40% coursework, 60% examination.

CHIN1103. An introduction to standard works in modern Chinese literature (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A fundamental study of standard works and selected writings in the modern and contemporary Chinese literature.

Assessment: 40% coursework, 60% examination.

CHIN1105. History of Chinese literature: a general survey (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims at a study of the general characteristics and the development of Chinese literature from the pre-Qin period to the nineteenth century. This course is suitable for students without A-level Chinese literature attainments.

Assessment: 100% coursework.

CHIN1106. Poetry and the couplet: the writing and appreciation (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to enhance students' ability to appreciate and to write *shi* and *ci* poems as well as couplets.

Assessment: 100% coursework.

CHIN1108. Contrastive phonology of Putonghua and Cantonese (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to help students gain knowledge of the phonological differences and correspondences between Putonghua and Cantonese and thus improve students' language abilities in spoken Chinese.

Assessment: 100% coursework.

CHIN1109. An Introduction to Chinese women's literature (3 Credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of Chinese women's literature in its various forms and styles conducted through an examination of specimens taken from the most representative as well as best known writers. Students taking this course are expected to gain a sound knowledge of the development and characteristics of Chinese women's literature from the Han period to contemporary China.

Assessment: 100% coursework.

CHIN1110. Creative writing I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to foster interest in the great works of modern Chinese literature and to help students develop and sharpen their writing skills. It examines how writers and readers interact with literary works in general and considers how meanings and effects are generated in prose and fiction in particular.

Assessment: 100% coursework.

CHIN1111. Creative writing II (6 credits)

(This course is also offered to non-BA Students for inter-Faculty broadening purposes.)

A continuation of CHIN1110, this course aims to foster interest in the great works of modern Chinese literature and to help students develop and sharpen their writing skills. It examines how writers and readers interact with literary works in general and considers how meanings and effects are generated in modern poems and free verse in particular.

Assessment: 100% coursework.

Second and Third Year Courses

CHIN2121. Prose up to the nineteenth century (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of Chinese prose in its various forms and styles conducted through an examination of specimens taken from the most representative as well as best known authors. Students taking this course are expected to gain a sound knowledge of the development and characteristics of Chinese prose from the pre-Qin period to the end of the Qing period.

Assessment: 40% coursework, 60% examination.

CHIN2122. Prose: selected writers (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A detailed study of the prose of one or two of the following: Han Yu, Liu Zongyuan, Ouyang Xiu, Wang Anshi and Su Shi. Students taking this course are expected to demonstrate a sound knowledge of the prose works covered and a general ability to describe and analyse prose styles.

Assessment: 40% coursework, 60% examination.

CHIN2123. Shi poetry up to the nineteenth century (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of Chinese *shi* poetry in its various forms and styles conducted through an examination of specimens taken from the most representative as well as best known authors. Students taking this course are expected to gain a sound knowledge of the development and characteristics of Chinese *shi* poetry from earliest times to the nineteenth century.

Assessment: 40% coursework, 60% examination.

CHIN2124. Shi poetry: selected writers (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A detailed study of the *shi* poetry of one or two of the following: Cao Zhi, Tao Qian, Xie Lingyun, Wang Wei, Li Bai, Du Fu, Han Yu, Li Shangyin, Su Shi, and Huang Tingjian. Students taking this course are expected to show in the examination a sound knowledge of the *shi* poetry covered and a general ability to describe and analyse poetic styles.

Assessment: 40% coursework, 60% examination.

CHIN2125. Ci poetry up to the nineteenth century (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A general survey of the *ci* poetry from its beginning in the Tang period to the Qing period, with special emphasis on the Song period, which is considered the golden age in the history of this literary genre. Students taking this course are expected to gain a sound knowledge of the development of the *ci* poetry from the eighth century to the nineteenth century. Its various forms and styles are examined through specimens taken from the most representative as well as best known authors.

Assessment: 40% coursework, 60% examination.

CHIN2126. Ci poetry: selected writers (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A detailed study of the *ci* poetry of one or two of the following: Su Shi, Zhou Bangyan, Xin Qiji and Jiang Kui - the Four Great Masters of the *ci* poetry of the Song period. The course will consider the individual achievements and influences of the poets; their contemporaries will also be discussed.

Assessment: 40% coursework, 60% examination.

CHIN2127. Classical Chinese fiction (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of classical Chinese fiction through an examination of specimens taken from the most representative compositions. Students taking this course are expected to gain a sound knowledge of the development and characteristics of classical Chinese fiction from the Tang to the Qing period.

Assessment: 40% coursework, 60% examination.

CHIN2128. *Xiqu* of the Yuan and Ming periods (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of *xiqu* of the Yuan and Ming periods through an examination of specimens taken from the most representative compositions. Students taking this course are expected to gain a sound knowledge of the development and characteristics of *xiqu* of the Yuan and Ming periods.

Assessment: 40% coursework, 60% examination.

CHIN2129. Modern Chinese literature (1917-1949) I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of the trends of literary thought in China from 1917 to 1949 and how they affected modern Chinese poetry, essays and novels.

Assessment: 100% coursework.

CHIN2130. Modern Chinese literature (1917-1949) II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of modern Chinese fiction from 1917 to 1949. Attention will be centered on selected works of representative authors.

Assessment: 40% coursework, 60% examination.

CHIN2131. Contemporary Chinese literature (since 1949) I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of the trends of literary thought in the Mainland since 1949 and how they have affected poetry, essays and novels.

Assessment: 100% coursework.

CHIN2132. Contemporary Chinese literature (since 1949) II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of Chinese fiction in the Mainland since 1949. Attention will be centered on selected works of representative authors.

Assessment: 40% coursework, 60% examination.

CHIN2133. Contemporary Chinese literature (since 1949) III (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of Chinese literature in Taiwan since 1949.

Assessment: 100% coursework.

CHIN2134. Prescribed texts for detailed study I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A close study of one or more of the following, engaging various techniques of scholarship and criticism:

(i) Shijing

(ii) Chuci

(iii) Zhaoming wenxuan

Assessment: 40% coursework, 60% examination.

CHIN2135. Prescribed texts for detailed study II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A close study of one or both of the following, engaging various techniques of scholarship and criticism:

(i) Zuo zhuan

(ii) Zhuangzi

Assessment: 40% coursework, 60% examination.

CHIN2136. Classical Chinese literary criticism (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course includes a general survey of classical Chinese literary criticism with special reference to the *Wenxin diaolong*.

Assessment: 40% coursework, 60% examination.

CHIN2138. Chinese etymology (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of the essential features of the Chinese characters, principles underlying their construction, and the process of evolution behind them.

Assessment: 40% coursework, 60% examination.

CHIN2139. Chinese Phonology (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course includes an introduction to general phonetics, a survey of the history of Chinese phonology, and an introduction to 'rhyme books' and 'rhyme tables'.

Assessment: 40% coursework, 60% examination.

CHIN2140. Modern Chinese language I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of the structure, the general characteristics and the development of the modern Chinese language; two or more of the following topics will be covered:

- (i) Phonology
- (ii) Lexicology and semantics
- (iii) Philology

Assessment: 40% coursework, 60% examination.

CHIN2143. Modern Chinese language II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of the structure, the general characteristics and the development of the modern Chinese language; two or more of the following topics will be covered:

- (i) Grammar
- (ii) Rhetoric
- (iii) Logic

Assessment: 40% coursework, 60% examination.

CHIN2144. Functional Chinese (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A study of the general characteristics and the development of Functional Chinese with special reference to the use of language in Hong Kong. Students taking this course are expected to acquire sufficient language skills for general communication purposes.

Assessment: 100% coursework.

GROUP B: CHINESE HISTORY

First Year Courses

CHIN1201. Topical studies of Chinese history (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines some of the major topics in Chinese political, social, economic and institutional history.

Assessment: 50% coursework, 50% examination.

CHIN1202. An introduction to the study of Chinese history (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A foundation course in the development of Chinese history and historiography.

Assessment: 50% coursework, 50% examination.

CHIN1203. Chinese history of the twentieth century (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A brief survey of the transformation and reformation of China since 1900.

Assessment: 100% coursework.

CHIN1204. Chinese culture in the twentieth century (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

An introduction to the major cultural changes since 1900.

Assessment: 100% coursework.

CHIN1205. Chinese history: a general survey (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

An introduction to the Chinese political, social, and economic history from the early times to the present century. The course is especially suitable for students from non-Arts backgrounds.

Assessment: 100% coursework.

CHIN1206. An introduction to Chinese thought (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A broad overview of the teachings of Confucianism, Daoism and Buddhism, with a view to introducing students to the foundations of Chinese thought. This course is suitable for both students with or without Arts backgrounds.

Assessment: 100% coursework.

CHIN1207. Traditional Chinese culture (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

An introduction to the general characteristics of traditional Chinese culture. The course is especially suitable for students from non-Arts backgrounds.

Assessment: 100% coursework.

Second Year and Third Year Courses**CHIN2221. History of the Qin and Han Periods (6 credits)**

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic histories of China from the third century B.C. to the third century.

Assessment: 50% coursework, 50% examination.

CHIN2222. History of the Wei, Jin and the Northern-and-Southern Periods (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic histories of China from the third century to the sixth century.

Assessment: 100% coursework.

CHIN2223. History of the Sui and Tang Periods (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic histories of China from the sixth century to the tenth century.

Assessment: 50% coursework, 50% examination.

CHIN2224. History of the Song and Yuan Periods (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic histories of China from the tenth century to the fourteenth century.

Assessment: 50% coursework, 50% examination.

CHIN2225. History of the Ming Period (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic history of China from the fourteenth century to the seventeenth century.

Assessment: 50% coursework, 50 % examination.

CHIN2226. History of the Qing Period (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic history of China from the seventeenth century to the twentieth century.

Assessment: 100% coursework.

CHIN2231. Religious Daoism and popular religions in China (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The course gives an overview of the development of religious Daoism and Chinese popular religions.

Assessment: 100% coursework.

CHIN2233. History of the Chinese legal system (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines the main features and development of the Chinese legal system from the early times to the present.

Assessment: 100% coursework.

CHIN2234. History of Chinese political institutions (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines the main features and the development of Chinese political institutions from the early times to the present.

Assessment: 100% coursework.

CHIN2235. Sources and methodology (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course intends to provide a thorough training in research methodology related to the study of Chinese history. The ideas of noted ancient and contemporary Chinese historians will be drawn on. Particular emphasis is placed on the use of reference works and information search through internet.

Assessment: 100% coursework.

CHIN2241. History of Chinese civilization (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with Chinese civilization in general including ethnic cultures and problems in pre-twentieth century China.

Assessment: 100% coursework.

CHIN2243. History of Chinese science and civilization (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to give an in-depth investigation of Chinese scientific thought and culture from the pre-Qin period to the early twentieth century.

Assessment: 100% coursework.

CHIN2244. History of *Guanxue* and *Sixue* (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines the development of educational theories and institutions in China.

Assessment: 100% coursework.

CHIN2245. History of Chinese examination system (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines the theories and means of selecting men of talent, as well as the development of the examination system in China.

Assessment: 100% coursework.

CHIN2246. Historical writings: texts and styles (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A close study of one or more of the following:

- (i) *Shiji*.
- (ii) *Hanshu*.
- (iii) *Hou Hanshu*.
- (iv) *Sanguozhi*.

Assessment: 100% coursework.

CHIN2247. Local histories (*fangzhi*) and genealogical records (*zupu*) (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines the general characteristics and the compilation problems of local histories (*fangzhi*) and genealogical records (*zupu*) in pre-twentieth century China.

Assessment: 100% coursework.

CHIN2251. Chinese philosophy I: Confucianism (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course deals with the major philosophical texts and ideas of the Confucian tradition.
 Assessment: 100% coursework.

CHIN2252. Chinese philosophy II: Daoism (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course deals with the major philosophical texts and ideas of the Daoist tradition.
 Assessment: 100% coursework.

CHIN2253. Chinese philosophy III: Buddhism (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course examines the main streams of Indian Buddhist thought and their development in China.
 Assessment: 100% coursework.

CHIN2254. Christianity and Chinese culture (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course deals with the history of Christianity in China.
 Assessment: 100% coursework.

CHIN2255. Chinese intellectual history (Part I) (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course deals with the main intellectual trends in China from the Qin-Han to the Sui-Tang period.
 Assessment: 100% coursework.

CHIN2256. Chinese intellectual history (Part II) (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course deals with the main intellectual trends in China from the Song period to the Qing period.
 Assessment: 100% coursework.

CHIN2257. The development of Confucianism in late imperial China (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course deals with the development of Confucianism in China from late fourteenth century to early twentieth century.
 Assessment: 100% coursework.

CHIN2258. The mentality of literati in Ming-Qing transition (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)
 This course examines the milieu of the cataclysmic change of Heaven's Mandate in mid-seventeenth-century China and literati's feelings and responses to the change.
 Assessment: 100% coursework.

CHIN2259. Historical writing and historiography in traditional China (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course explores some important issues of historical writing and historiography in traditional China with reference to the development of historical writing, the organization of historiography institutes, and the influence of emperors on historiography.

Assessment: 100% coursework.

CHIN2261. Buddha and Bodhisattva worship in Chinese Buddhism (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes)

The worship of buddhas and bodhisattvas is a central feature of Mahayana Buddhism, and a pivotal factor in the formation and development of Chinese Buddhism. The course examines the origin of the practice, its transformation in China, and its impact on Chinese religious thought and life. The course aims at providing students with comprehensive knowledge and understanding of a Buddhist practice which has dominated Chinese religious life and shaped the popular image of the Buddhist religion.

Assessment: 100% coursework.

GROUP C: TRANSLATION

First Year Courses

CHIN1311. Introduction to translation (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This is an introduction to the theoretical and technical issues of translation, with guided practice in translating material of common occurrence.

Assessment: 50% coursework, 50% examination.

CHIN1312. Language studies for translation I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This introductory course considers the distinctive characteristics of Chinese and English and aims at highlighting the mechanics of translation as a process of linguistic transfer. Emphasis will be placed on developing in the students a sensitivity towards the particular manners of behaviour of the two languages being reviewed.

Assessment: 50% coursework, 50% examination.

Second and Third Year Courses

All courses listed below, if not otherwise specified, may be taken in either the second or the third year. Students opting for the Major are however required to take all the courses in List 1 in the years indicated, unless the Head of Department approves otherwise,

Second Year: CHIN2311, 2312, 2313, 2314, 2315, 2316 (totalling 21 credits)

Third Year: CHIN2317, 2318, 2319, 2320 (totalling 18 credits),

and their remaining courses from List 2 in either the Second or the Third Year to make up at least 48 credits in two years.

Some of the courses require CHIN2335 or CHIN2336 as a prerequisite. In exceptional cases, these

requirements may be waived by the Head of the Department.

List 1

Courses in List 1 are offered to Translation majors only. Non-majors who wish to take any of the courses should first apply for permission from the Head of Department.

CHIN2311. Translation criticism I (English-Chinese) (3 credits)

In this course, texts in different literary genres (poetry, the essay, the novel, drama) will be selected from English and American literature and discussed alongside their Chinese translations. Students will be trained to develop a critical approach in evaluating the translator's competence and the merits of the selected translations.

Assessment: 50% coursework, 50% examination.

CHIN2312. Translation criticism II (Chinese-English) (3 credits)

Selected literary translations in English will be analyzed in terms of the specific problems encountered in the process of translating. In some cases, different translations of the same original text will be examined concurrently.

Assessment: 50% coursework, 50% examination.

CHIN2313. Language studies for translation II (6 credits)

This course considers the differences in grammar, semantics and pragmatics between Chinese and English, paying special attention to problems of translating in these areas.

Assessment: 50% coursework, 50% examination.

CHIN2314. Translation in practice I (English-Chinese) (3 credits)

This course provides practical training in English-Chinese translation. Materials selected include both the literary and the non-literary. The weekly lectures will be accompanied by written exercises and tutorials.

Assessment: 50% coursework, 50% examination.

CHIN2315. Translation in practice II (Chinese-English) (3 credits)

This course contains a critical element as well as a number of exercises in translation from Chinese into English. Texts of different stylistic types will be analysed, and the use of translation strategies for rendering such texts will be explored.

Assessment: 50% coursework, 50% examination.

CHIN2316. Translation theory (3 credits)

This course introduces leading theories in translation studies. Through studying on-going debates in the field, students will acquire a theoretical and methodological knowledge indispensable to the procedure and evaluation of translation.

Assessment: 100% coursework.

CHIN2317. Translation criticism III (English-Chinese) (3 credits)

This is a sequel to Translation Criticism I. In this course, texts in different literary genres (poetry, the essay, the novel, drama) will be selected from English and American literature and discussed alongside their Chinese translations. Students will be trained to develop a critical approach in evaluating the translator's competence and the merits of the selected translations.

Assessment: 50% coursework, 50% examination.

CHIN2318. Translation criticism IV (Chinese-English) (3 credits)

This is a sequel to Translation Criticism II. Selected literary translations in English will be analyzed in terms of the specific problems encountered in the process of translating. In some cases, different translations of the same original text will be examined concurrently.

Assessment: 50% coursework, 50% examination.

CHIN2319. Language studies for translation III: comparative stylistics (6 credits)

This course investigates the resources that lead to effective writing and serviceable translation. The objective is two-fold: to identify the variety of figures of speech such as metaphor, personification, parallelism and hyperbole commonly used in novels, prose, poetry and lyrics; and to consider the effects of these literary devices on the translation between English and Chinese.

Assessment: 50% coursework, 50% examination.

CHIN2320. Long translation (6 credits)

The Long Translation project is an important part of the Translation degree. Its commencement is as early as the summer vacation between Years Two and Three when students are expected to find and decide on the texts for their translation. Close study of the chosen texts on the part of the students should occur in the vacation. From the beginning of the Third Year to about the end of March of the graduation year, the actual translation will be done by the student under the supervision of a teacher, in each case assigned by the teachers of Translation. The length of the translation should be about twenty pages; the nature of the writing, as literary or practical as the individual student prefers.

Assessment: 100% coursework.

List 2**CHIN2331. Choice of words in translation (6 credits)**

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This is a course specially planned for students who aspire to carve out for themselves a career in administration, publishing, advertising and journalism. Assuming no specific prior knowledge of linguistics, this course takes a new semantic approach to the analysis of different types of word meaning in a text. It addresses some key issues of a functional grammar pertaining to translation studies in Hong Kong.

Assessment: 100% coursework.

CHIN2332. Translation in Hong Kong society (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The basic aim of this course is to provide students who intend to become professional translators in Hong Kong with an overall view of translation as a communicative activity. The translators' work demands specialised knowledge of the ways translation functions in specific social contexts. The principal concern of this course is the practical information about the various circumstances in which translation serves its purpose as a communicative activity, either in the Government or in the private sector. This course will be assessed on the basis of a written seminar paper presented orally and participation in discussion.

Assessment: 100% coursework.

CHIN2333. Culture and translation (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course focuses on the cross-cultural dimension of translation. It examines the most complex cultural barriers faced by the translator – such as differences in the expression of emotions (for instance - love, anger, fear), codes of behaviour (for instance intimacy, privacy, politeness), values and world views, notions of gender, aesthetic taste, humour and forms of symbolism and metaphor. These issues arising from translation practice will be discussed in light of current theories on culture and translation from multiple disciplines.

Assessment: 100% coursework.

CHIN2334. Power of speech in written translation (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This is a course designed to teach both Translation and non-Translation students specific communication skills required for social interaction in a cosmopolitan city such as Hong Kong. 'Good communication behaviour' exhibited in bilingual texts is studied within the general framework of an Interpersonal Rhetoric model.

Assessment: 100% coursework.

CHIN2335. Introduction to interpretation (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The aim of this course is to introduce to students the different forms of interpreting, i.e., sight translation, consecutive interpreting, and simultaneous interpreting, and to familiarise them with the basic skills and techniques essential for interpreting. Training will be focused on sight translation and consecutive interpreting between English and Chinese.

Assessment: 100% coursework.

CHIN2336. Interpretation workshop I (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This is a continuation of Introduction to Interpretation. Students will be trained in sight translation and consecutive interpreting between English and Chinese on general and more specialised topics. Apart from

training in note-taking skills, students will also be introduced to different environments for interpretation and the professional ethics of the interpreter.

Prerequisite: CHIN2335. Introduction to interpretation

Assessment: 100% coursework.

CHIN2337. Journalistic translation (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The primary focus of this course is the linguistic features and stylistic conventions of press material. Texts of various types from the mass media will be examined, and their generic characteristics identified. Students will familiarize themselves in this course with the basic techniques of news reporting and the skills needed to render press material from one language into another.

Assessment: 100% coursework.

CHIN2338. Translation of promotional material (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Promotional material usually has a unique appeal that lies in the skilful manipulation of rhetorical devices. In this course their linguistic and stylistic characteristics will be studied, with emphasis on how best to translate the original into Chinese or English. Students will be provided with opportunities to examine the creative use of language and to improve their ability through training and regular practice to deal with different kinds of writing for advertizing products and services.

Assessment: 100% coursework.

CHIN2339. Translation for administration and business (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the role of translation in Hong Kong's public administration procedures, and how it is used by Hong Kong and Chinese business concerns in conducting international business. Students will practise translating papers related to negotiation, administration and the law arising from such contexts, and explore suitable translation techniques in the process.

Assessment: 100% coursework.

CHIN2340. Film translation workshop (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Film-making today is becoming increasingly international, rendering translation almost indispensable to the industry. Translating films for dubbing and subtitling requires special skills distinct from those outside the field. This course concentrates on such skills, emphasizing audio-visual awareness and cinematic elements such as drama, dialogue, vernacular, and pacing. Critical theories on media and on cultural production and consumption will be introduced. Students learn through group projects, the hands-on translation of feature films, and critiques of film translation.

Assessment: 100% coursework.

CHIN2341. Translating writings on art (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In this course students will have the opportunity to practise translating from Chinese to English and vice-versa within the field of art history, art appreciation and art criticism. Writings on Chinese and western art, such as those published by museums and art galleries, will be used as study texts, and translation skills and strategies will be discussed to enable students to build up bilingual vocabulary and linguistic expressions for describing Chinese and western works of art in specific historical, social, cultural and aesthetic contexts.

Assessment: 100% coursework.

CHIN2342. Interpretation workshop II (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This is a continuation of Interpretation Workshop I. It aims at providing students with training in consecutive interpreting on specialised topics ranging from political speeches and addresses at meetings on a variety of topics to court proceedings. This course will also provide training in the essential skills and techniques for simultaneous interpreting, including shadowing, rephrasing, memory retention, abstraction and the cultivation of split attention.

Prerequisite: CHIN2336. Interpretation Workshop I

Assessment: 100% coursework.

GROUP D: DISSERTATION

Third Year Course

CHIN3401. Dissertation (12 credits)

A dissertation will be written on a subject approved by the supervisor and the Department. This course is only open to students majoring in the Department of Chinese.

Assessment: 100% coursework.

ASSESSMENT

Coursework assessment will be based on performance in tutorials and seminars, and on the strength of essays and such other exercises as can be assessed continually.

Each course will be examined by a written paper of not more than 2-hour duration except those courses which are assessed by 100% coursework.

Department of Comparative Literature

First-year Courses

CLIT1001. Introduction to comparative literary and cultural studies I: Film studies (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

The course will introduce students to the techniques and practice of film through the study of a historically and culturally varied range of cinematic productions. Both international and local cinema will be studied.

The aim of the course is to enable students to read the language of film.

CLIT1002. Introduction to comparative literary and cultural studies II: Gender studies (6 credits)

Feminism, gender and sexuality, masculinity and femininity – indeed, even what we mean by ‘men’ and ‘women’ – are all areas of contemporary debate and always topical. This course introduces you to the subject of Comparative Literature by introducing the issues, which will remain important throughout your three years of study. We will look at what is meant by ‘gender’ through critical readings of some crucial texts, and we will support examination of these texts by reference to some critical theories.

CLIT1003. Introduction to comparative literary and cultural studies III: Digital culture (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

Information technology nowadays has become such an encompassing cultural phenomenon that no one, not even the avowed technophobe, can ignore it. For a university student, competency in computer technology does not guarantee that she/he can comprehend the theoretical implications of the new technology. Against this backdrop, the present course aims at providing students with an up-to-date overview of the technology-imbued society that we live in. Although the course is based upon literary and cultural approaches, it is also designed to be beneficial to students majoring in other disciplines. Advanced knowledge of computer technology is not a prerequisite for this course. Instead, students can take advantage of the workshop sessions to learn or refine skills in web surfing, web-related research, and the design of simple web-sites.

This course meets the University's IT requirement.

CLIT1004. Introduction to comparative literary and cultural studies IV: Colonial and postcolonial culture – Hong Kong and beyond (6 credits)

The course explores the importance of the cultural representations of colonizer and colonized in forming the way we imagine the world today. Through film, fiction and other texts, students will study colonial practices, and the responses of the colonized. Hong Kong, China and Chinese people will form an integral part of the course.

CLIT1005. Introduction to comparative literary and cultural studies V: Disney and global capital (6 credits)

Disney is the name of an American business, and a world-wide phenomenon which is now coming to Hong Kong. Disney's animated feature films, starting with *Snow White and the Seven Dwarfs* (1937) and *Pinocchio* (1940) and *Fantasia* (1940) through to *The Lion King* (1994), *Pocahontas* (1995) and *Mulan* (1998) have dominated cinema through their spectacle and visual pleasure as well as through the songs and the soundtrack. The trend in the latest Disney films has been to deal with subjects from outside America - Africa, China, or America's Amerindian population. Disney theme-parks, whether in Los Angeles or Florida, or Paris or Tokyo (and now Hong Kong) raise the question of how much Disney has been responsible for globalization, and for making globalization the same as Americanization.

In this course, we will look at Disney films and cartoon characters as examples of American ideology and of the presentation of the American way of life; we will analyse how the pleasure that they give works; we will look at Walt Disney as the originator of a business corporation and at the politics of global capitalism; we will ask how to read a Disney film, and examine what globalization means in the context of different Disney theme-parks.

CLIT1006. Introduction to comparative literary and cultural studies VI: Cultural studies (6 credits)

This course introduces students to some of the fundamental issues which are raised when we ask what “culture” is and how it forms us and creates our ways of thinking, talking and creating. To study a text or a film, a painting, or a piece of music, is not just to attend to the individual work, but to think about its context, and what permits its existence in that culture. To begin to read a text may mean to read a culture. There are three emphases in this course. The first thinks about the relation of culture to ideology. How do the narratives that we read, the films we see, present us with an unconscious ideology? And why is the study of culture as ideology so important? The second is the plurality of different cultural voices that we are surrounded by: “high” and “low,” “elitist” and “popular.” Is it useful to distinguish these? How can “cultural studies” read both types of cultural products adequately? The third emphasis is on how different cultural forms or expressions contest and perhaps subvert official cultures, and ideological positions.

CLIT1008. Ways of Reading: film, literature, and culture (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

The course aims to teach students how to critically approach different forms of texts: short stories, poems, films, photographs, fashion statements, architecture, the city and urban spaces, and to show that there are a variety of ways to do these, and a number of techniques that can be learned. The course takes on Nietzsche’s assumption that ‘slow reading’ is important, that so is ‘close reading’, and critical reading, and what psychoanalysis calls ‘reading otherwise’. As Roland Barthes says, ‘those who fail to re-read are doomed to read the same text every where’. To learn strategies for becoming a good critical reader, and to learn the many ways in which texts may be read: that is what the course aims to inculcate.

CLIT1009. Questioning difference: gender, postcolonialism and culture (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

Through film and literature, this course introduces theoretical approaches to 3 main clusters of issues that cultures with colonial experiences need to deal with. Firstly, we will analyze cultural representations and issues of identity politics, such as the orientalist imagination and the nationalist imagination of culture, history and gender, as well as challenges to such imaginaries. We will also learn how to analyze the traumatic experience of racial and sexual discrimination under conditions of colonialism, slavery, exile and poverty, and the possibilities of survival and resistance. Texts from cultures that have undergone multiple colonial experiences will allow students to think also the issue of inter-racial relations not just between the West and the rest, but also among peoples of colour.

Second or Third Year

CLIT2001. Comparative studies in narratives (6 credits)

“The narratives of the world are numberless” – so Roland Barthes begins a crucial essay which argues that we can study different narratives and find underlying assumptions at work in them. These assumptions tie different stories back to culture and ideology and to history. This course will look at a variety of different narratives, novels, short stories and films both to discover what is of value in them, and how they may be best analyzed.

CLIT2003. Modern European drama (6 credits)

Questions about identity and “the self” are most urgently raised during periods of social, political and intellectual crises. This course studies in some depth the work of selected seminal European playwrights in relation to the crises of their time. Included may also be discussions of changing dramatic concepts, and the relevance to drama of other media (photography, cinema, television, video). Plays by Ibsen, Strindberg, Beckett, Brecht may be included to look at the way in which drama explores the history of the modern subject.

CLIT2005. Literary and cultural theory (6 credits)

This course is aimed at introducing some basic concepts of contemporary Western literary and cultural theory. We will examine the postmodern polemics against truth and objectivity, and see how this is related to our reading of literary and cultural texts. Students who intend to major in Comparative Literature are strongly encouraged to take this course in the first semester of their second year of study.

CLIT2007. Film culture I (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course focuses on the construction of meaning in cinema and the development of film language. It first investigates the major structural components of the narrative film text, such as narrative structure, *mise-en-scène*, the camera eye, editing and sound, then proceeds to introduce the major cinematic movements in film history and discuss some film classics in relation to the topics covered.

CLIT2008. Film culture II (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course seeks to investigate critical methodologies for reading film texts with a particular emphasis on psychoanalytic, feminist, and postcolonial theories. The approach will be cross-cultural and inter-disciplinary. Film texts will be examined in relation to questions of gender, sexual difference, sexuality, and subjectivity. The films to be examined may include films from Hollywood and Asian cinemas.

CLIT2014. Feminist cultural studies (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will examine the complex and often contradictory ways women and modern femininity are represented in popular culture. It will introduce you to some of the key concepts in feminist cultural studies and use them to critique cultural productions and practices associated with women such as romance narratives, film melodrama, soap operas, fashion, and shopping.

CLIT2016. The body in culture (6 credits)

This course will explore various theoretical approaches as we attempt to develop discourses to address the notion of ‘the body’. There will be an emphasis on issues of corporeal identity, movement, and performance. We will present and discuss texts from the fields of philosophy, critical theory, psychoanalysis, architecture, literature, dance, theatre, film/media studies, gender studies, anthropology,

technology, science, performance art, and cultural studies. Participants will develop their own projects in a medium of their choice (writing, visual art, video, performance, internet, interactive technology/cd-rom, etc.). These projects will not only present and elaborate upon the chosen concepts and topics, but also examine theoretically the medium in which they are presented. Specific foci of discussion will be based on participants' interests.

CLIT2017. A new introduction to modernism (6 credits)

This course attempts to rethink the concept of modernism by looking at many different forms that it took (literary, filmic, musical and artistic), and interrogating its politics, its relationship to bourgeois culture, its gender-bias, its view of past and traditional and non-traditional texts, and its place in critical theory. In the light of what remains of 'postmodernism', it asks how the term 'modernism' is now to be read.

CLIT2018. Critiques of modernity (6 credits)

This course will examine cultural critiques of, and reflections upon, modernity and its consequences in 'the West' and the non-West (primarily China) over the past century or so. While the course will be informed by theoretical consideration of capitalist modernity and 'alternative' modernities, the central texts discussed will be primary cultural texts that are foregrounded within their specific cultural contexts by the acuity and consciousness of their critique of modernity. Texts will be read as a metacommentary on modernity's contradictions.

CLIT2021. Reading the nineteenth-century: revolution, romanticism and realism (6 credits)

This course is one of two looking at the nineteenth-century in Europe and America through a reading of its texts: novels, poetry, painting, music, philosophical speculation, and psychoanalysis. Both courses are complete in themselves, but make most sense taken together. The first part looks at texts from the time of the French Revolution (1789) on to the Great Exhibition of 1851 - the triumph of bourgeois culture and of consumption over revolutionary aspiration.

CLIT2022. Reading the nineteenth-century: reaction and modernity (6 credits)

This is the second of two courses reading texts from the nineteenth-century. Fastening on the three 'masters of suspicion' in the nineteenth-century - Marx, Nietzsche, Freud - it reads the triumph of realism and of bourgeois culture, and examines ways in which this culture was critiqued. Teaching will look at literary texts drawn from European cultures - Russia, France, Germany, Britain, and America.

CLIT2023. Heterologies: the discourse of the other (6 credits)

'Heterology' is 'the science of what is completely other'. It, and the course, looks at a range of ways in which the 'other' appears in literary texts - as the colonial savage, as mad, as mystic, as criminal, as sexually deviant, or in relation to fascism.

CLIT2024. Reading comedy: Dante and Boccaccio (6 credits)

There are two texts derived from the Italian Renaissance to be used for this course: Dante's *Comedy*, which divides into three - *Inferno*, *Purgatory* and *Paradise*, and Boccaccio's *Decameron*. These are crucially important and formative texts, the second a response to the first, which deserve re-reading both

in order to confront texts of the past, and in the light of contemporary theoretical approaches from new historicism, from feminism, from work on the body and on sexuality and the city. We will examine the new forms of narrative that emerged with the urban and bourgeois culture of fourteenth-century Florence, with its new attention to the subject as individual and as communal. Above all, we will be considering what is meant by ‘comedy’ and why both Dante and Boccaccio work within its terms.

CLIT2025. Visual cultures (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

It has often been said that ours is pre-eminently a culture of the visual, a ‘Society of the Spectacle’. This course introduces students to one of the key developments in cultural theory today: a study of how visual cultures are formed, and how they inform the ways we see, feel and think. There is indeed ‘an optical unconscious’ made up of the criss-crossings of desire, ideology and reproductive technologies (or Freud, Marx and SONY), which manifests itself from ephemeral fashions to the permanencies of architecture. What the course will focus on, however, are specific examples of changes and innovations in visual culture found in art, photography, cinema, architecture, video, and urban life; and in particular, all the examples of visual material that problematize visibility. We will also attempt to draw out the implications of such problematic visibilities for critical and cultural theory.

CLIT2026. Digital culture and new media technologies I (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the interactions between contemporary critical and cultural theory and digital culture. We will discuss theoretical and compositional approaches in the work of international new media artists (via World Wide Web, CD-ROM, video, exhibition and slide formats as available), and create new media projects ourselves, in order to expose possible modes of critical interpretation and creation for these media. Issues of identity construction, gender, corporeal vs. psychic presence, interactivity, bodily motion and motion capture, community, interface, performativity, and representation will be discussed.

CLIT2027. Digital culture and new media technologies II (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This is a continuation of Digital Culture I.

CLIT2028. The city as cultural text (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

If contemporary cities are becoming more ‘invisible’, it is because the effects they have upon us are indirect and displaced. Our experience of cities becomes more problematic as cities themselves become more complex. This course explores the changing cultural space of cities mainly through major works of fiction and of cinema, though it will include other forms like painting and architecture as well as theoretical texts. Topics for discussion include: How is urban experience transformed by colonialism/imperialism, technology, information? What are the different ways of reading the city? Is Hong Kong a ‘Chinese city’? How can the city be read as a cultural text? Students are advised to take this course in their third year of study.

CLIT2031. Fashion theory (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Fashion lies somewhere between 'art' and 'consumption', and for mysterious reasons (according to historian Eric Hobsbawm) often anticipates future cultural tendencies better than both. We will discuss the relation of fashion to art, media, spectacles, and marketing; to questions of identity and self-fashioning; to images of the body and ideas of femininity and masculinity; to notions of style and anti-style (e.g. jeans as degree zero fashion); to looking and having 'the look'. Throughout, the focus will be on the surprising impact of fashion on culture, particularly contemporary culture.

CLIT2034. Advanced film theory (6 credits)

Adaptations from literature to film provide an extremely fertile ground for a) exploring the different possibilities of the two media involved and b) cross-cultural studies. Why is Kurosawa so obsessed by Shakespeare? Bresson has adapted Dostoevsky, and everybody has had a go at *War and Peace*. Are they successful and why? We will try to answer these questions through a comparative study of the original texts and the films. Students will also be encouraged to adapt their favorite short story or novel into film-scripts as an exercise.

CLIT2035. Writing madness (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Drawing on recent critical theory, the course will use both texts which have been described as mad, including those by Sylvia Plath, Charlotte Gilman, Holderlin, Blake, and Artaud; as well as look at representations of madness, e.g. in the writings of Gogol, Lu Xun, Dostoyevsky, and Henry James, or in films like *Psycho* or *Seven*. It will ask whether it is possible to think of writing a history of madness, without misrepresenting madness as 'other.' It will also distinguish between melancholia and manic states, hysteria and schizophrenia, while recognising that these terms themselves, instrumental in the construction of madness, are part of the problem.

CLIT2037. Gender and sexuality in contemporary Chinese literature and film (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The aim of the course is twofold: to serve as an introduction to some representative works in contemporary Chinese literature and film, and to analyze the representation of women in contemporary Chinese culture through these works. A key characteristic of contemporary Chinese literature and film is its obsession with gender and sexuality. Since the end of the Mao era and the beginning of the market reforms in the late 70s, "sex" has replaced "class" as one of the most frequently circulated motifs in the mass media and a new trend has thus emerged in contemporary Chinese literature and film with exclusive focus on issues of gender and sexuality. We will discuss this new phenomenon through two groups of writings: patriarchal representation of women and women's self-representation.

CLIT2042. Reading confessing (6 credits)

The objective of this course is to examine the relationship between literature and confession by examining some important works of literature produced in the West and the East. The nature and significance of the

discourse of confession and how it inflects literary textuality is central to the purpose of this course.

CLIT2045. Colonialism/postcolonialism (6 credits)

This course studies a number of topics central to colonial/postcolonial studies such as Orientalism and Occidentalism, colonial and postcolonial identities, sexuality and colonial discourse, and gender and imperialism. These issues will be examined from a cross-disciplinary and comparative perspective and the primary sources used include travel narratives, novels, films, advertisements, and tourist brochures.

CLIT2050. Globalization and culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

When Michael Jordan becomes the most popular sports figure in Mainland China and South Africa, does this mean that we are all becoming more alike? Or are we splitting apart, as the rise of new nationalisms in Yugoslavia and India would seem to indicate? Why has rap music become globally popular? This course will look at a variety of contemporary phenomena from pop culture to nationalism in terms of the global processes of circulation and transformation that are changing the world we live in. Special attention will be paid to Hong Kong culture and its changing role in Asia and the world.

CLIT2051. Jane Austen and popular culture (6 credits)

This course will read Jane Austen's novels through the visual medium of television series, film adaptations and the internet. It will consider the successful translation of Austen from high to popular and to global cultural form. It will study the ways in which her novels have been re-invented to reflect issues of contemporary importance such as feminism with its critique of marriage and masculinity and its call for more open expression of desire and sexuality. It will historicize this revision by analyzing the status of women, the role of the family and the importance of courtship in Austen's original novels.

CLIT2052. Chinese urban culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

With specific reference to major Chinese cities, for example Beijing, Shanghai, Taipei, and Hong Kong, the course is designed to examine how forces of modernization, colonialism and globalization have drastically transformed these cities. It explores problems of urban culture and the changing meaning of 'Chineseness' through major works of fiction, cinema, architecture and other relevant cultural texts. Although no prerequisites are required, students are advised to study CLIT2028 'The City as Cultural Text' before taking this course.

CLIT2057. Carnival versus tragedy: Reading renaissance culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course looks at how we can read the 'early modern' period in Europe – from the fifteenth century (the period of planning the ideal city and designing the ideal body, of the development of the printed book and of the colonization of America) to the seventeenth centuries. It uses the twin concepts of carnival and tragedy to look at the theatre, at representations of the body, monstrous and grotesque, and for an examination of state power and resistances to it. Texts include works by Machiavelli, Rabelais,

Shakespeare and Racine.

CLIT2058. Histories of sexuality (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course compares the theoretical approaches of Freud and Foucault to sexuality – a history of repression versus a history of the production of the subject – by looking at a number of literary and cultural texts whose interest for us is how they make problematic and fascinating either theory of the subject. Included will also be discussions of other critics and theorists (e.g. Judith Butler, Julia Kristeva, Eve Sedgwick) who refine or critique these two major theoretical approaches to the study of sexuality.

CLIT2060. Fiction and film in contemporary Chinese societies (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course studies modern Chinese culture as it is expressed and understood in contemporary stories and films. It aims to explore relationships between narrative arts and society. It also examines literature and film in relation to each other, as well as literary and aesthetic theories, themes, genres and expressive modes.

CLIT2061. Narratives of the past in contemporary culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Organized around different kinds of narratives of the past in contemporary culture, this course raises basic questions about historical representation: What is ‘history’? How is it differentiated from ‘memory’ and ‘nostalgia’? In what way is a spatial critique of culture pertinent to the study of historical representation? With reference to a range of texts such as literature, film, museum narratives, architecture and music from different cultures, the course explores the politics and poetics of historical representation in contemporary societies. Topics for discussion may include: tensions between official history and personal memory, different styles and forms of imagining and narrating history, and the role of the media and other cultural means such as oral narratives in the mediation of ‘history’.

CLIT2064. Hong Kong culture: Popular culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course explores the various aspects of popular culture in Hong Kong from the perspective of Cultural Studies. Major media and other popular forms of expression to be discussed include: television, radio, newspapers and popular magazines, popular music, popular literature, cartoons, youth, and fan culture. Theories of Cultural Studies will be introduced and discussed in relation to critical readings of such texts in order to expand the students’ horizons in understanding and interpreting Hong Kong popular culture.

CLIT2065. Hong Kong culture: Representations of identity in literature and film (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course traces the formation of identities in Hong Kong history and analyzes different perspectives in understanding these identities. It focuses on various forms of colonization and their influences on the construction of cultural artifacts and relationships. Various theoretical approaches and debates on postcolonialism, capitalism, and urban culture will be adopted to examine selected texts of literature and film.

CLIT2066. Postmodernism (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

We are constantly bombarded with images by the media day and night. MTV is equally popular in the developed as well as in the developing countries. The old distinction between high culture and popular culture is breaking down. Literary and cinematic genres are being constantly mixed, resulting in composite and hybrid works. More and more Hong Kong Chinese live in Toronto, Melbourne, London and San Francisco while more and more Filipinos come to Hong Kong as housemaids. The postmodern world is full of fascinating phenomena. In this course we plan to study postmodernism by focusing on literature, cinema, art, and other cultural productions. The aim of the course is not to define postmodernism but rather to evoke and question it as we seek to make sense of the radical changes taking place in ideas and experiences related to technology, entertainment, art, everyday life and the problems of representation.

CLIT2067. Re-placing Shakespeare (6 credits)

This course ‘replaces’ Shakespeare not by removing his work from the agenda, but by reconsidering his place in contemporary criticism and popular cultural practice. Some of the topics the course may deal with are: feminist, psychoanalytic and literary historicist re-readings of Shakespeare’s texts; comparisons of how international film directors, with their differing multi-cultural perspectives, have handled the problems of filming Shakespeare; and the way that Shakespeare has been adapted and re-imagined by innovative and influential modern artists.

CLIT2069. The making of modern masculinities (6 credits)

Using cross-cultural materials taken from a wide range of media such as films, fiction, magazines, paintings, TV and advertising, this course engages in a multidisciplinary study of the formation of different types of masculinities in the modern world.

CLIT2070. Heidegger and everydayness (6 credits)

As one of the most important Western thinkers of the 20th century, Heidegger addresses fundamental questions of human existence in ways that speak directly to our everyday experiences. For instance, why do we sometimes feel that life is meaningless, and how do we try to avoid this feeling? This course will introduce you to some of Heidegger’s core ideas through a study of his masterpiece *Being and Time*, which has had a profound impact not only on philosophy but also on literary theory. Students will learn both about Heidegger and the intellectual traditions he challenged.

CLIT2072. Deconstruction (6 credits)

This course examines the method of deconstruction around such issues as truth, power, subjectivity, modernity, postmodernity, and so on. Readings include texts by Derrida himself and by some other thinkers (e.g. Nietzsche, J. L. Austin, Habermas).

CLIT2073. Deleuze on cinema (6 credits)

Though not a film-maker or theorist, Deleuze's writings on cinema (which combine film theory and analyses, philosophy and cultural criticism) may prove to be as seminal as Eisenstein's or Bazin's. The course will introduce students to what is innovative about Deleuze's two books on cinema. This includes his radical manner of analysing films: instead of focusing on 'film language', he focuses on the kind of cinematic image each film constructs. Thus the books offer at one level a classification of different types of cinematic images. However, underlying the analyses is also a very provocative thesis about the 'history' of cinema, which Deleuze argues has undergone a crucial mutation: from different forms of 'the movement-image' pioneered by the classic cinema, to the much more elusive forms of 'the time-image' which characterize the contemporary cinema - with Hitchcock as the fulcrum around which the history of cinema turns. Finally, and most significantly, Deleuze relates both the 'movement-image' and the 'time-image' to developments in thought and culture; and this enables him to formulate, through the analyses of cinema, ideas like 'any-space-whatever', 'the crystals of time', 'the powers of the false', and 'the thought of the outside' - which take us way beyond the limits of film criticism. The great directors, Deleuze says, have to be compared to thinkers. The implication is that understanding cinema is understanding modern thought itself - its crises, ruptures and possibilities.

CLIT2074. Film and ideology in post-Mao China (6 credits)

This course offers (a) a survey of contemporary Chinese film, especially the most recent productions of mainstream cinema, and (b) a critical examination of post-Mao ideology in the context of market reforms. Topics include the following. (1) The meaning of wealth: We will look at how wealth is represented in post-Mao film, and whether this representation coheres with the Party's political program and serves the purpose of interpellating the general public. (2) The identity of the post-Mao hero. In post-Mao China, there is no longer any cinematic representation of the working class as hero and thus no more ideological interpellation of the working class as the central constituent of the Party. The entrepreneur has replaced the proletariat as the new hero of the reform era. (3) The re-sexualization of the population. The practice of Marxism in China after 1949 led to the disavowal of gender and sexuality as a suitable object of cultural representation. The population was de-sexualized, in the sense that no cultural 'signifiers' were available in the Maoist discourse to inscribe men and women as sexual beings. In post-Mao China, 'sex' has come back with a vengeance through the re-discovery of patriarchal sexual conventions, and 'woman' of a particular class has become the signifier of sexual difference.

The course will pay special attention to film language. Films will be treated as a collection of cinematic signifiers that contribute to the meaning of the texts rather than serving as transparent vehicles for plots.

CLIT2075. Reading modern poetry (6 credits)

This course will do two things: it will study some fine examples of poetry, asking the following questions: what is poetry? How does it work? Why should we read it, and how? Where should we start? What is the good of poetry?

Its time-span is the moment when Europe and America defined themselves as modern, as part of the modern world. So, it will begin with two examples of Romanticism, will continue with the urban poetry of Paris and the modernism it produced; it will look at three very different examples of American poetry, some of it obsessed with the question of how this poetry should relate to anything traditional and European; it will conclude with the Europe of the political crisis of two world wars, after which, as Adorno said - 'Auschwitz made lyric poetry impossible.' Adorno is not necessarily to be agreed with, and much poetry

would question his formulation, but his voice is important in a debate over the functions of poetry, and where it comes from.

There will be then, a mixture of English, French, American, German and Russian poetry: all of it will be looked at in English.

CLIT2076. Fashioning Femininities (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to the writings of some major contemporary feminists and their critical analysis of the construction of the images and roles of women. Cross-cultural materials taken from both print and non-print media will be used to illustrate feminist issues.

CLIT2078. Childhood, feminine roles and cultural myths (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will begin with 'liminal' works which chart a traumatic rite of passage for women from childhood to adulthood or suggest that there might be a dynamic interplay between the two states. It will focus, in particular, on texts in which women directly challenge prevailing social myths of human development, family organization, and sexual relations. It will be especially interested in texts which proceed to deconstruct the social codes governing women, their relationships, and their scope for defining and expressing themselves.

CLIT2079. Traumatic events (6 credits)

This course will observe the workings of trauma (the enactment and working-through of collective and individual symptoms of trauma), memory, and witnessing in various modes of everyday life. We will examine notions of catastrophe, disaster, accident, and violence, and explore the possibilities and impossibilities of bearing witness in many forms of cultural production. We will examine the representation of traumatic events in fiction, poetry, architecture, critical theory, visual art, philosophy, science, cartoons, film, video, television reportage, newspaper documentation, and performance, on the internet and World Wide Web, and in the public and domestic spaces of Hong Kong.

CLIT2080. Walter Benjamin as writer and cultural critic (6 credits)

The course is an introduction to the seminal work of Walter Benjamin. His essays - on literature, translation, photography and film, culture and politics, the experience of cities - develop a theory of reading and a style of argument that are indispensable to the understanding of contemporary cultural debates.

CLIT2081. Becoming post-human: animal bodies and virtual bodies (6 credits)

We study 'Humanities', but is there a relationship between humanist values and the global crises currently being experienced in environmental damage? What differences have cinema and even more, digital technologies made to perceptions of space, time, embodiment and human presence? That our cinematic and electronic lives have transformed us as subjects is apparent, but how they have altered consciousness and identity is for discussion. These changes have redefined the human, and 'nature' and 'human nature' and the course assumes a current overthrowing of the human within critical theory and within

digitalization, and the appearance of the ‘non-species’ (Derrida). It looks at ‘ecocriticism’ and explores the posthuman body as this has come into question in relation to new technologies.

CLIT2082. Literature and ‘queer’ theory (6 credits)

‘Queer theory’ has been developed over the past fifteen years in order to deal with the expanding subject of lesbian and gay writings and film, and the increasing representation of lesbian and gay writings and film, and the increasing representation of homosexuality within modern cultures. This course will discuss a number of the texts of ‘queer theory’ by Foucault, Judith Butler and Eve Sedgwick, and will study a variety of texts, contemporary and historical, which in literal or allegorical terms have represented male and female homosexuality, whether directly or indirectly. It will study how these changes of representation, and new critical theories have repositioned the subject of gender studies.

CLIT2083. Film, art, language and culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines key ways of analyzing film art and culture. How films create meaning and how viewers make sense of the cinema frame this exploration of film as visual language and culture. The course places emphasis on learning basic film terminology and the rudiments of film form. The student becomes acquainted with classical Hollywood cinema, other national cinemas, transnational cinemas, as well as hybrid, experimental and documentary film modes. At the conclusion of the course, the student should be able to look at motion pictures critically, understand films as formal constructs, and place films within broader institutional, economic, ideological, and cultural contexts.

CLIT2084. “New” cinemas across national boundaries (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to several prominent “new” cinemas after the Second World War. “The timing” [and spacing], are “something like: around 1948, Italy; about 1958, France; about 1968, Germany.” They were moments and localities that gave rise to new cinematic images, “as if the cinema had to begin again from zero, questioning afresh all the accepted facts of the American tradition,” wrote Gilles Deleuze in *Cinema 1*. And in his book *Hong Kong*, published in 1997, Ackbar Abbas added “about 1982, Hong Kong” to the Deleuzian timing and spacing.

As one of the losers in the Second World War, Italy escaped from fascism relatively successfully, and could point to a resistance and a popular life underlying oppression. This is favourable for the birth of a new type of narrative including the elliptical and the unorganised, questioning afresh the accepted and globalized American convention. The French, as victors delayed by being within the French dream, broke with its tradition rather belatedly and by a reflexive or intellectual detour which was that of the New Wave. And the Germans, confined by its late escape from fascism, even more belatedly dwell on the constantly variable spatio-temporal link. The case of Hong Kong, as a case beyond Deleuze’s scope, illuminates a rethinking of his thesis in a global context. Between 1942 and 1997, Hong Kong was a British colony. It is in the 80s and 90s that the British and Chinese governments negotiated about the handover of Hong Kong in 1997, and thus ignited a new Hong Kong cinema as a responsive cinematic intervention.

The first part of the course examines the ways Italian neorealism, the French new wave, the new German cinema, and the new Hong Kong cinema react to their specific geo-historical situations. In the second part, the focus will be shifted to some very recent films and look back at the agendas of the “new” cinemas in the last few decades.

HIST2082. Europe and its other (6 credits)

This course is an interdisciplinary exploration of European perception and understanding of non-European peoples and cultures from the 18th – 20th centuries. The objective of the course is to show how Western representations of non-Europeans were shaped by the various political debates, scientific theories and colonial ideology that dominated European societies of the time. The course uses the conceptual frameworks and methodologies of history and cultural studies to analyze a wide range of primary materials that include visual documents, travel narratives, fiction, scientific texts, philosophical treatises, and documentaries.

HIST2083. Gender, sexuality and empire (6 credits)

This course investigates the ways in which concepts of gender and sexuality have been used in British and French imperial discourse during the 19th and 20th centuries to manage their relationships with the colonized peoples and to showcase the superiority of European civilization. Part one of the course examines how the male colonial identities were constructed through the sexualization of the colonized subjects while the second half of the course focuses on the multiple roles of European women in the colonies. The course uses the conceptual frameworks and methodologies of history and cultural studies to analyze different types of historical narratives ranging from archival documents, personal memoirs and correspondence, travel accounts to autobiographical texts.

HIST2084. Sexing the spirit: the history of the modern feminist challenge to Christianity (6 credits)

Surveys of mainstream feminism have generally omitted the subject of faith. They have taken as a given wholesale feminist hostility to Christianity and have concluded that religion has little importance in the life of modern women. Recent global events are a reminder however that religion remains a passionate if volatile force in contemporary culture and politics. This course will consider a history that has been overlooked – the critical engagement of modern feminism with Christianity. The course will begin with two mid-twentieth century events that have proved to be crucial catalysts in the active feminist response to Christian religion. The first was the ordination of Florence Li Tim Oi as the first Anglican woman priest in Hong Kong in 1944. The second was Simone de Beauvoir's publication of the *The Second Sex* in 1949. Li's courageous war-time decision to pioneer female entrance into the all-male clerical establishment constitutes a reformist engagement with Christianity, while de Beauvoir's rejection of Christianity as a patriarchal institution oppressive to women reflects a more radical and uncompromising stance. Their two positions can be read as representational of the compatibility/incompatibility, reform/revolutionist debate that feminists have had with Christianity since the rise of second wave feminism in the 1960s.

HIST2085. The history of modern sexual identity and discourse (6 credits)

This course will focus on two 'new sciences' arising in the late nineteenth century that have shaped the modern understanding of sexual behaviour – sexology and psychoanalysis. It will look at some of the key thinkers who pioneered sexology – such as Havelock Ellis, Edmund Carpenter, Richard von Krafft-Ebing, and Maria Stopes – alongside the acknowledged founder of psychoanalysis Sigmund Freud. It will investigate primary sources in sexual science that have subject to censorship and not generally unavailable, until recently, for comparative study with Freudian discourse. Though the texts of sexology and psychoanalysis often start from different premises, all have been instrumental in the development of modern sexual language, assumptions and practices. It will contextualize their collective thinking by considering the impact of the emergent women's movement, of Darwin's evolutionary theory, of urban culture, and of secular modernity. It will study the historiographical debate (particularly among gay and feminist theorists) as to whether these early investigators of sexology and psychoanalysis formulated

progressive or repressive, revolutionary or conservative definitions of sexuality. It will explore the far-reaching consequences that these thinkers have had on attitudes to the body and people in the form of reproductive control, eugenics, race, homosexuality, the 'woman question,' and the politics of sexual identity.

Department of English

First Year

ENGL1009. Introduction to English studies (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to the study of English writing. Students will be introduced to the basic elements of literary analysis and theory in English, and to intellectual issues relevant to the study of the language and its culture. No previous experience of literary studies or linguistics is assumed, but at the end of this introductory course students will have a grasp of the basic concepts and skills needed to make advanced studies in English interesting and enjoyable. The course will also offer guidance and practice in reading, discussion, group work, writing and basic research, including the use of the library and the internet.

First Year Examinations

ENGL1009 will be examined by a two-hour written paper.

First Year Coursework Assessment

Coursework assessment marks for **ENGL1009** are based on tutorial assignments and class performance. The final grade is based on the student's performance in the written examination (50%) and in coursework (50%).

Second and Third Year

Mode of assessment

Modes of assessment vary from course to course. Please check the course description for details of how each course is assessed.

If staffing arrangements permit, the following second- and third-year courses will be offered:

ENGL2002. Language in society (6 credits)

This course will provide an introduction to the study of 'sociolinguistics', which deals with the relationship between language and society. Topics will vary, but may include the following: multilingualism, language varieties, language planning, language change, English in contact with other languages.

Assessment will be by 100% coursework.

ENGL2003. The history of English (6 credits)

This is a course about language origins and language change. It investigates the social, political and linguistic reasons that English has developed into the global superpower language of today, and introduces basic tools and methodologies for studying language change in English.
Assessment will be by 100% coursework.

ENGL2004. English syntax (6 credits)

This course introduces the structure of English by investigating approaches to grammar, models of grammatical analysis, and the grammar of contemporary English. It is interested in the relationship between morphology and syntax, and grammar and linguistics.
Assessment will be by 100% coursework.

ENGL2007. Literary linguistics (6 credits)

This course uses linguistic techniques to analyse literary texts by examining both the devices that literary authors employ and the literary effects they create in different styles and genres. It employs methods of structural linguistic analysis (looking at the syntax and phonology of texts) as well as socio-historical and pragmatic methods.
Assessment will be by 100% coursework.

ENGL2010. English novel I (6 credits)

A study of narrative fiction, and of its development in the eighteenth and nineteenth centuries.
Assessment will be by 100% coursework.

ENGL2011. English novel II (6 credits)

A study of narrative fiction, and of its development in the nineteenth and twentieth centuries.
Assessment will be by 100% coursework.

ENGL2012. Contemporary literary theory (6 credits)

In the late 20th century, developments in critical thought had a major impact on literature and criticism. Relations between literary production and language, politics and history were radically re-examined by and through what has become known as 'theory'. As a body of thought, theory includes such diverse and conflicting schools and movements as Marxism, poststructuralism, feminism and gender theory, new historicism, postcolonialism and postmodernism. As well as exploring the institution of theory in the academy, students will put theory into practice in readings of selected literary texts.
Assessment will be by 100% coursework.

ENGL2022. Women, feminism and writing I (6 credits)

This course will explore questions of identity and difference as expressed in women's writing. It will provide a general introduction to feminist literary theory and the on-going range of feminist interventions in literary and cultural studies.
Assessment will be by 100% written coursework.

ENGL2027. Text and discourse in contemporary English (6 credits)

This course will examine how writers exploit the resources of English for creative and communicational purposes in contemporary writing in different genres.

Assessment will be by 100% coursework.

ENGL2030. World Englishes (6 credits)

This course will survey the English language throughout the world, with reference to the use of English in Britain, Asia, and Hong Kong. This course will focus particularly on the development of ‘new Englishes’ in Asia and Hong Kong.

Assessment will be by 100% coursework.

ENGL2031. The semantics and pragmatics of English (6 credits)

This course introduces the study of meaning in the English language. We will examine semantic meanings – meanings encoded in the language system itself – and also pragmatic meanings – meanings inferred from the communicative context of language use.

Assessment will be by 100% coursework.

ENGL2033. English novel III (6 credits)

A study of narrative fiction, and of its developments in the twentieth century.

Assessment will be by 60% coursework, 40% examination.

ENGL2035. Reading poetry (6 credits)

An advanced reading course for students interested in specializing in poetry.

Assessment will be by 50% coursework, 50% examination.

ENGL2037. Science fiction (6 credits)

This is a survey of the genre of science fiction from late 19th century literature by H.G. Wells through to recent movies such as *Blade Runner* and *The Matrix*. As well as formal and historical study of the SF genre, the course will be concerned with fictional presentations of scientific possibility and the moral and political strategies that underlie representations of utopia and dystopia.

Assessment will be by 100% coursework.

ENGL2039. Language and gender (6 credits)

This course examines the relationship between cultural attitudes and language, how gender socialization is reflected in the structure and use of language, and the effectiveness of political and social forces in “legislated” linguistic change. Stereotypes and biases about the sexes, standard and vernacular norms will also be examined in the course.

Assessment will be by 100% coursework.

ENGL2040. Asian American literature (6 credits)

This course presents a survey of Asian American literature through literary texts from Asian American communities, including Japanese, Chinese, Korean, Filipino, and Southeast Asian Americans. We will touch on major themes explored in these texts, such as concepts of dislocation and relocation as well as finding and/or inventing a usable past. The readings span a range of genres and historical periods. The course will attempt to contextualize these texts both historically and culturally. Assessment will be by 100% coursework.

ENGL2045. Travel writing (6 credits)

This is a survey of European travel writing as a literary genre from the medieval period to the present day. The writings of travelers and explorers such as Marco Polo, Christopher Columbus and James Cook are examined, as well as those of modern travel writers such as Freya Stark, Graham Greene, D.H. Lawrence, Paul Theroux and Jan Morris. European travel writing is explored formally and thematically with the aim of introducing students to its many strategies and subtexts, and especially its historical role in articulating ‘otherness’ for the European imagination. Assessment will be by 100% coursework.

ENGL2046. English words (6 credits)

This course explores the structure, meaning, history, and usage of English words from a linguistic point of view. Assessment will be by 100% coursework.

ENGL2047. English discourse structures and strategies (6 credits)

This course will provide an introduction to the analysis of English discourse from a linguistic perspective. Students will learn rhetorical methodologies and examine their effects on readers and listeners. Units include: spoken and written English discourse, global organization and cohesion, discourse markers, information structure, narrative, and non-verbal structures and strategies. Assessment will be by 100% coursework.

ENGL2048. Language and jargon (6 credits)

This course focuses on specialized sub-group languages or jargons, and uses texts from a range of historical period to examine the socio-cultural dynamics behind the creation, maintenance and disappearance of such jargons. Particular attention will be paid to the history of criminal jargon, prison jargon and other speech varieties associated with other marginal or criminalized sub-groups (e.g. drug addicts, “tramps”, etc.), as well as to the history of the study of such jargons and the inclusion of jargon and slang items in mainstream dictionaries. Students will read texts from different periods in the history of English, as well as considering the role of jargons in modern societies such as the United States, Britain and Hong Kong, as well as in “cyber-space”. Assessment will be by 100% coursework.

ENGL2049. The history of English: sociolinguistic perspectives (6 credits)

This course will have a specific focus on the history of the English language from a sociolinguistic perspective. The course will discuss issues related to language contact, standardisation, variation, and

varieties of English. Particular reference will be made to the role of attitudes and ideologies in the development of the language.

Assessment will be by 100% coursework assessment.

ENGL2050. English corpus linguistics (6 credits)

Corpus linguistics is a rapidly-developing methodology in the study of language. It exploits the power of modern computer technology to manipulate and analyse large collections of naturally-occurring language (“corpora”). This course will introduce students to the use of computers and computerized corpora as tools for exploring the English language.

Assessment will be by 100% coursework.

ENGL2054. Race, language and identity (6 credits)

This course looks at different notions of identity and the origins of modern understandings of ethnicity. It focusses on the contribution made by ideas about language to theories of group identity, including nationalism, and the tensions between linguistic, racial, religious and cultural notions of identity.

Assessment will be by 100% coursework.

ENGL2055. American Gothic: Haunted Homes (6 credits)

In this course we will examine the gothic as an important genre in American literature and trace its tradition across two centuries. As a response to dominant ideas and conventions that shaped American literature, the gothic offers us a challenging perspective on the mainstream as well as on what it excludes. Beginning with some classic examples of the genre, we will seek to identify the elements and the rhetoric of the gothic text in order to appreciate the specific use that later writers have made of the gothic form.

Assessment will be by 100% coursework.

ENGL2057. Text and image (6 credits)

This interdisciplinary course explores relations between literature and various forms of image-based representation. It begins with ‘painterly’ descriptions in novels and poetry, and common strands in art and literary criticism, and proceeds to discussion of relations between film and literature, such as the presence of cinematographic form in modern literature. In the concluding module, we consider the shift in emphasis from text-based to image-based culture and its impact on postmodern society. Course material consists of critical essays, and examples from literature, the pictorial arts and the moving image.

Assessment will be by 100% coursework.

ENGL2058. Narrative prose: a linguistic investigation (6 credits)

This course examines the linguistic techniques by which narrative writing in English works. With a focus on literary texts, the course will consider topics such as co-reference and cohesion, syntactic style and patterning, place and time deixis, the handling of conversation, modality and point of view, and more generally, the linguistics of ‘realism’, and the linguistic basis of irony.

Assessment will be by 100% coursework.

ENGL2059. American drama and American film (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will introduce American drama and American film: developing stories of America in performance. We will emphasize performance, as well as analysis: casting, acting, directing, staging, special effects, and audience. As centers of industry, education, and culture moved across the country, form and innovation shifted accordingly. Looking at competing histories and narrative strategies, we will see how American plays and American films participate separately and together in remaking American myths and literary patterns, while assimilating and rejecting inherited models. Considerations of American English, silence, the loner's staged resistances, and audience participation will be included. We will read plays such as: Eugene O'Neill's *The Hairy Ape*, Tennessee Williams's *The Glass Menagerie*, Arthur Miller's *All My Sons*, Sam Shepard's *True West*, and Ishmael Reed's *Hubba City*. We will see films such as *Casablanca*, *High Noon*, *The Way We Were*, *Hair*, and *Boyz N the Hood*. Assessment will be by 100% coursework.

ENGL2062. The history of Western linguistics (6 credits)

This course will trace the history of ideas about language and its relationship to the mind and the world, from ancient to modern times. Assessment will be by 100% coursework.

ENGL2065. Meaning and metaphor (6 credits)

This course will introduce students to a number of questions about linguistic meaning and examine various definitions of metaphor. Among the questions considered are: What role does metaphor play in human language? In what way (if at all) do languages create or embody particular culturally-specific world-views? Assessment will be by 100% coursework.

ENGL2066. Orientalism and linguistics (6 credits)

This course studies linguistics as a branch of what Edward Said has termed 'Orientalism', i.e. western models of Asian language, literature, culture and society created within European colonialism. It looks at the ways western linguists of the 19th and 20th century have 'imagined' or categorized Asian languages, relating those categories to debates within western linguistics. Assessment will be by 100% coursework.

ENGL2069. Form and meaning (6 credits)

An investigation into the relationship between English structure and meaning (semantics and pragmatics), considering how meanings are encoded and inferred. Assessment will be by 100% coursework.

ENGL2074. Postcolonial readings (6 credits)

This course examines important works of literature in English from perspectives opened up by recent debates on 'nation', 'narration', and 'hybridity'. Assessment will be by 50% coursework, 50% examination.

ENGL2075. The idea of China (6 credits)

An examination of English representations and interpretations of China in a selection of writings from the 18th century to the early 20th century.

Assessment will be by 100% coursework.

ENGL2076. Romanticism (6 credits)

The course studies the Romantic era, and traces its history through a selection of its main texts.

Assessment will be by 100% coursework.

ENGL2078. The novel today (6 credits)

This course examines developments in the novel by studying a representative sample of recently published fiction in English. Innovations in narrative technique, such as metafiction and postmodern poetics, will be one strand of enquiry. Thematic strands will depend on the novels selected for study but are likely to include, gender, representation, globalism, postmodernism, race and ethnicity, and identity.

Assessment will be by 60% coursework, 40% examination.

ENGL2079. Shakespeare (6 credits)

This course will explore some of the themes and form of Shakespeare's drama, and will consider how his work has been interpreted in modern times.

Assessment will be by 60% coursework, 40% examination.

ENGL2080. Women, feminism and writing II (6 credits)

This course will explore the often difficult relationship between women and what has been traditionally known as the 'feminine sphere'. Women have commonly been associated with the feminine sphere of love, marriage and family and this course will consider how modernity and feminism have challenged and disrupted this assumption.

Assessment will be by 100% written coursework.

ENGL2082. Modern literary criticism (6 credits)

This course introduces students to a selection of major texts in literary criticism from the early 19th century to the 1960s. It examines principal critical concepts and methodological principles formulated in these texts and traces the developments of critical thought within this period.

Assessment will be by 100% coursework.

ENGL2084. Modernism and short fiction (6 credits)

This course studies the re-invention of traditional forms of writing in the modernist revolution that ushered in the twentieth century in Europe. Concentrating on short fiction, it investigates how modernist writers found ways to 'make it new'.

Assessment will be by 100% coursework.

ENGL2087. Persuasion (6 credits)

This is a course about rhetoric, in which students will explore ways in which language can be used to convey, reinforce or change ideas. The objective is to help students to understand, analyse, and develop the arts of discourse in English, and the critical skills on which they depend. Assessment will be by 100% coursework.

ENGL2089. Making Americans: Literature as ritual and renewal (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will be an introduction to American literature primarily through fictional and non-fictional accounts of exemplary lives. Our focus will be on how successive generations of immigrants and settlers have constructed and transformed a vision of “America” as process and promise. The course aims to introduce students to the diversity of writing that constitutes American literature, to guide them in the development of critical reading and writing skills and to provide them with opportunities to build, present and respond to arguments about the texts and topics under discussion. Assessment will be by 100% coursework.

ENGL2090. The moving production of America: reading recent films (6 credits)

In this course we will look at recent American movies and examine the ways in which they generate visions of American reality. Our inquiries will be guided by three focuses: 1) looking at movies, we will ask where they locate American life and how they represent it; 2) looking through movies, we will ask how they feel the pulse of an American public, what assumptions they make about their audience and how they seek to move it; 3) looking into movies, we will try to understand how they review and reconfigure the world of American movies itself. Assessment will be by 100% coursework.

ENGL2091. Comedy and Asian American drama (6 credits)

In this course we will look at Asian-American drama in two ways: through humor and an abbreviated history of drama in America. Topics to be addressed include Asian-American humor, oral and written developments of “character” in America, American tall tales, questions of youth and tradition, American story-telling on stage. The course involves students in several ways: as readers, as writers, as voluntary participants in short stage pieces, as collectors of data on humor in popular and literary settings. Assessment will be by 100% coursework.

ENGL2092. Postcolonial English (6 credits)

For many creative writers - writers of poetry, fiction, drama - from outside the Anglo-American world, English has a complex history and often an uneasy relationship, with native languages. The decision, or the choice, to write and publish in English, is an issue they have reflected upon and debated, nationally and internationally, with other writers. Such reflections and debates constitute one of the dynamic contours of “Global English” as a discourse. Critical questions often raised in the debate concern the English language as the bearer of cultures. They include the changing roles of English as a colonial or postcolonial language, as the language of the unitary or pluralistic nations, as a dominant or minority language, as the language of ‘English literature’ or ‘Literature in English’. In this course, students will be introduced to these questions through discussions of essays by writers who have considerable practical experience using

English as the language of creativity, and who are active contributors to debates about English in their own locations.

Assessment will be by 50% coursework, 50% examination.

ENGL2093. Literary islands: English poetry and prose from the South Pacific and the Caribbean (6 credits)

In this course we will read and discuss literary texts mainly poems and short stories from two cultural regions that received the English language as colonial cargo between the 17th and 19th centuries. Looking at the different histories of the insular cultures of the South Pacific and the Caribbean, we will consider how these histories have shaped the emergence of Anglophone literatures, and how these literatures in turn challenge our expectations of English literature. We will pay special attention to the forms of communication these texts represent and establish as they construct a sense of place, and parallels will perhaps be drawn to the case of Hong Kong. Topics: history and politics of English in the South Pacific and the Caribbean, the emergence of English-language literatures and the development of indigenous traditions, the relationship between writing and place, distance and insularity, the relationship between literature and vernacular culture (conversation, song, storytelling, oratory)

Assessment will be by 100% coursework.

ENGL2094. Cultural approaches to second language varieties of English (6 credits)

In this course, we will look at second language varieties of English and what they can tell us about the cultural background of their speakers. After an introduction to the relation of language and culture in general (*Linguistic Relativity Principle*), and some modern adaptations of this principle with respect to the role of English in the world, the students will be acquainted with specific methodologies from cognitive linguistics/cognitive anthropology and computer corpus analysis, which allow them to systematically analyze language from a cultural perspective. The students are required to conduct independent research, utilizing these methods of investigation.

Some prior knowledge about varieties of English (World Englishes) is of help, but is no requirement. Due to the restricted number of workstations in the computer lab, not more than 40 students can be admitted to this class.

Assessment will be by 100% coursework.

ENGL2095. The East: Asia in English writing (6 credits)

Interpretations of the Orient in modern western writings, from the colonial to the postcolonial period.

Assessment will be by 100% coursework.

ENGL2096. Creative Writing (12 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In this year-long seminar, students will study the craft of writing. As developing writers, they will find their attention directed toward elements of design in language. Practice will be offered in training the eye and ear for recognizing, developing, and editing elements of voice. In the first semester, stories and poems will be the focus. The second term will introduce the writing of plays, along with editorial work on the journal *Yuan Yang*. Continuous practice is emphasized, as is reading.

Assessment will be by 100% coursework.

ENGL2097. Imagining Hong Kong (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In this course, students will read selections of fiction, poetry, essays, and journalism from earlier moments in the twentieth century to post-1997. Questions of modernity, urbanization and the urban subject, and cross-cultural identities will be discussed from perspectives opened up by postcolonial theories, and with reference to historical change both locally and in Hong Kong's geopolitical situation in the last fifty years. Assessment will be by 50% coursework, 50% examination.

ENGL2098. Call and response: Southeast Asian literature written in English (6 credits)

This course considers a range of South East Asian texts by focusing on authors from India, Malaysia and Singapore. Discussions will centre on issues raised by the literature, such as: the effects of colonialism, post-colonialism and neo-colonialism over the last century, the construction of "nation" and the problematic relationship between individual, religious, cultural and national identities, the effects of exile and peripheral existence on identity, the role of the author as myth-maker and canonical revisionist, regional forms of feminism, and the consequences of globalization and transculturalism.

Assessment will be by 100% coursework.

ENGL2099. Language, identity, and Asian Americans (6 credits)

This interdisciplinary course explores the relationship between language and identity with a special focus on Asian Americans and linguistic issues relevant to Asian Americans. With particular attention to the linguistic practices of Asian Americans, we will examine such questions as: What attitudes are associated with being bilingual? Do Asian Americans speak with an accent? Does accent determine whether Asian Americans are perceived of as 'white'? Do any Asian Americans speak 'black'? We will also explore the position of Asian Americans in social, political, and educational discourses in order to understand how an 'Asian American' identity can be constructed through language practices. Although the course focuses on Asian American identities and experiences, students will be encouraged to discuss issues of social identity and language in general.

Assessment will be by 100% coursework.

ENGL2100. Language and social interaction (6 credits)

This course provides an introduction to the analysis of social interaction (in English) and explores the relationships between macro- and micro-level approaches to the study of language and social interaction. We will examine how language both reflects and contributes to the organization of social order by close analyses of naturally occurring interactions. Students will learn the fundamentals of data collection and transcription, explore ways of interpreting talk as a form of social action, and conduct original research on the analysis of data that they will collect for the course.

Assessment will be by 100% coursework.

ENGL2101. Culture and society (6 credits)

What is culture? What is Cultural Studies? Why should we consider cultural formations in literary studies? Focusing on the cultural critic Raymond Williams (1921 – 1988), this course introduces students to British Cultural Studies and discusses the importance of Cultural Studies in the changing landscape of literary studies. More specifically, we will discuss the historical transformation of literary studies from a text-based practice into a broad critical engagement with human experience and examine the critical

energies within literary studies that have brought about such a transformation. Students in this course will read a selection of seminal writings by Williams with close reference to the literary examples he cites from prose fiction, poetry and drama.

Assessment will be by 100% coursework.

ENGL2102. Theories of beauty (6 credits)

The idea and experience of the beautiful are inseparable from literary art. This course provides an introduction to literary aesthetics. Focusing on British tradition of aesthetics, we will examine the disciplinary establishment of aesthetics as a historical formation in relation to literary, cultural, and intellectual modernity and discuss developments of major aesthetic concepts in history. There will be weekly lectures and workshops, in which we will read closely major aesthetic texts and discuss important debates in aesthetics with reference to our studies of literature and our everyday experience of the beautiful.

Assessment will be by 100% coursework.

ENGL2103. Language and new media (6 credits)

Language is strongly influenced by the medium through which it is presented. When the medium itself is in wide use, norms emerge which determine not only the form that language can take, but also the pragmatic effects of any language use that either exploits or deviates from these norms. The nature of public language--that is, language generated by or for the public at large through various media--in turn influences public discourse (i.e., what is being talked about large-scale, and how it is talked about). When the nature of the medium is expressly exploited linguistically, then this change can achieve overwhelming and widespread effects.

Assessment will be by 100% coursework.

ENGL2104. Language in the USA (6 credits)

This course addresses the problems (theoretical and practical) inherent in defining a variety of English as 'American'. Issues treated include the history of American English; dialectology; sociolinguistics; Black English; and the politics of American English.

Assessment will be by 100% coursework.

ENGL2105. Contemporary North American novelists (6 credits)

In this course we will explore developments and issues in contemporary North American fiction by focusing on the work of selected novelists active in the USA and Canada (the adjective 'contemporary' loosely locating this activity within the lifetime of the lecturer). The specific works to be examined and discussed will vary from year to year but we will typically read closely three or four novels by one (or two) novelist(s) each year. This will allow us to address questions regarding particular writers' evolving craft and concerns, as well as to situate their work in the context of recent currents in North American literature.

Assessment will be by 100% coursework.

ENGL2106. Childhood, reading and literature in the nineteenth century (6 credits)

This course looks at ideas of childhood and reading in the nineteenth century through a detailed study of a number of representative texts. This course has both a historical and a practical aim. It studies a selection of literary texts from the 19th century, which can be broadly classified as 'children's literature'.

Children's literature has become a flourishing field of academic enquiry, and although this course touches upon theoretical considerations about the genre, it is more interested in following the idea of childhood through the nineteenth century through a number of literary representations. The books created for children, whether as teaching tools or engrossing stories reflect both the ideas about childhood in circulation at any given moment, and the experience of being a child.

Assessment will be by 100% coursework.

ENGL2107. Literature, culture and gender at the *Fin de Siècle* (6 credits)

This course locates the literature of the 1890s within the cultural and social context of the late nineteenth century through a detailed study of contemporary documents and pictorial material alongside the core texts. Some of the themes discussed in this context include: decadence and degeneration; sexual anarchy, new women and decadent men; the *fin de siècle* subject and the birth of psychoanalysis; civilisation and its discontents; old endings and new beginnings.

Assessment will be by 100% coursework.

ENGL2108. Shakespeare's language (6 credits)

This course focuses on diverse aspects of the language of Shakespeare's plays and poetry. It looks at Shakespeare's language in the context of the history of the English language and introduces its key grammatical and lexical features. Specific attention will be paid to linguistic variation relating to social class, occupation group and gender; the use of metaphor; ambiguity and punning; terms of address; rhetorical structure. Shakespeare's long term impact on the English language will be considered, along with an analysis of the place of his work in national and nationalist histories of the English language.

Assessment will be by 100% coursework

ENGL2109. Writing diaspora (6 credits)

This course examines problems and issues in the literature and film produced by diasporic and migrant communities. Structured around several modules in which various texts are used to investigate such issues as identity and subjectivity, displacement, nostalgia, memory, second-generation conflicts, "passing" and diasporic transformation. Elaborates on the problematic nature of these issues and explains their significance in global diasporas.

Assessment will be by 100% coursework.

ENGL2110. Writing back (6 credits)

'Writing Back: Post-Colonial Re-writings of the Canon' is a course that examines the strategy employed by some post-colonial literary texts of re-writing 'canonical' literary texts to expose their literary, cultural and ideological assumptions. The course investigates the ways in which such texts resist the imposed cultural assumptions of English literature.

Assessment will be by 100% coursework.

ENGL2111. Seeing Australia (6 credits)

'Seeing Australia' is a course that examines the way Australia has been 'seen' over the last two centuries, in art and literature. In investigating the way Australia has historically been depicted and understood, students will discover how Australia has come to exist in the mind of its own people and those from other countries. Australia is therefore seen as the subject of many culturally disparate 'ways of seeing'. We

begin the process by analysing the concept of 'seeing' itself. 'Seeing' stands for many different ways of knowing and representing and these will be explored in a range of texts: written texts in poetic and narrative form, and visual texts of various kinds.

Assessment will be by 100% coursework.

Courses available for third year students only

ENGL3032. Advanced topics in English studies (12 credits)

This is an advanced tutorial course which allows the student to follow an in-depth programme of research under the guidance of a member of staff. There are no lectures, and the course aims to encourage the student to pursue independent research. Students should choose a topic which falls within the broad area of the English Department's curriculum. This should be done in consultation with a member of staff. The student and staff member should agree a programme of study, and the student can opt either to produce a single extended piece of work (a dissertation) or four essays on related topics. The student should have regular meetings with the tutor. Admission to this course is conditional on good examination performance, and the subject matter and scope of the course requires the approval of the department.

ENGL3033. Research seminar in English studies (6 credits)

This course is designed for students who wish to pursue advanced work in a specialized area of English Studies. This course is open to third year students only. Students are normally expected to have prior knowledge in the subject area and should consult individual seminar co-ordinators before registering for the course. There will be no formal lectures. Students will meet regularly with their tutor for guidance but they will also be required to work independently. They will be expected to take the initiative in locating and evaluating primary and secondary sources research materials.

Assessment will be by written essay or project (100% coursework).

ENGL3034. Research seminar in English literary studies (6 credits)

This course is designed for students who wish to pursue advanced work in the study of literatures in English. This course is open to third year students only. Students are normally expected to have prior knowledge in the subject area and should consult individual seminar co-ordinators before registering for the course. There will be no formal lectures. Students will meet regularly with their tutor for guidance but they will also be required to work independently. They will be expected to take the initiative in locating and evaluating primary and secondary sources research materials.

Assessment will be by written essay or project (100% coursework).

ENGL3035. Research seminar in literary theory (6 credits)

This course is designed for students who wish to pursue advanced work in the study of literary theory and literary criticism. This course is open to third year students only. Students are normally expected to have prior knowledge in the subject area and should consult individual seminar co-ordinators before registering for the course. There will be no formal lectures. Students will meet regularly with their tutor for guidance but they will also be required to work independently. They will be expected to take the initiative in locating and evaluating primary and secondary sources research materials.

Assessment will be by written essay or project (100% coursework).

ENGL3036. Research seminar in English linguistics (6 credits)

This course is designed for students who wish to pursue advanced work in the study of English language and linguistics. This course is open to third year students only. Students are normally expected to have prior knowledge in the subject area and should consult individual seminar co-ordinators before registering for the course. There will be no formal lectures. Students will meet regularly with their tutor for guidance but they will also be required to work independently. They will be expected to take the initiative in locating and evaluating primary and secondary sources research materials.

Assessment will be by written essay or project (100% coursework).

ENGL3037. Research seminar in language & society (6 credits)

This course is designed for students who wish to pursue advanced work in the study of language and society. This course is open to third year students only. Students are normally expected to have prior knowledge in the subject area and should consult individual seminar co-ordinators before registering for the course. There will be no formal lectures. Students will meet regularly with their tutor for guidance but they will also be required to work independently. They will be expected to take the initiative in locating and evaluating primary and secondary sources research materials.

Assessment will be by written essay or project (100% coursework).

European Studies Programme

First Year Courses

EUST1010. Foundations of European Studies (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

This first year course serves as an introduction to European Studies. It is a core requirement for students wishing to major in European Studies, but it is also suitable for anyone seeking a broad understanding of European society and culture. The course examines the forces which have led to Europe becoming increasingly integrated (not the least being the sheer devastation of two world wars) as well as the subsequent tensions and objections to that process. We study the processes and structures of the specific institutions of the European Union and the Council of Europe as well as some of the major issues confronting the EU now, such as enlargement and the constitution. We will also look at some major European domestic concerns as well as divergent foreign policy issues between Europe and the USA.

Assessment: 50% coursework, 50% examination

Second and Third Year Courses

EUST2010. European identity (6 credits)

(This course is also offered to second year non-BA students for inter-Faculty broadening purposes.)

This course, which is required of all European Studies majors in their second year, will introduce students to the linkages between modern Europe, its historical foundations and its various national identities. Issues of identity will include history, politics, society, languages, religion and culture from the ancient to contemporary periods.

Assessment: 50% coursework, 50% examination

EUST2020. European Studies in Europe (6 credits)

This summer course, conducted for three weeks in Europe, is offered to European Studies majors between

their second and third years of study. This course gives students a direct experience of the culture and politics of parts of Europe. In addition to visiting a number of European countries we will be visiting key political European institutions in Brussels and Strasbourg and attending lectures by their representatives. We will also be hearing lectures from political analysts, university lecturers and representatives of other organizations. There will also be a range of cultural activities including visiting historical sites, museums and art galleries.

Assessment: 100% coursework

EUST2030. The modern imagination in Europe (6 credits)

(This course is offered to third year non-BA students for inter-Faculty broadening purposes.)

This course is an introduction to the modern imagination and changing aesthetic sensibility in the late nineteenth and early twentieth centuries in Europe. It emphasizes some of the major stylistic innovations and intellectual currents that have transformed the way in which Europeans (and now increasingly the world at large) perceive and shape the world around them. The course combines examples from literature (including drama), visual art and film. We will explore how the styles, currents and works we are studying have emerged as creative responses to the great upheavals that have taken place in European society with the rise of modernity.

Assessment: 100% coursework

EUST3003. European Studies dissertation (12 credits)

Students in this course will be expected to submit a written dissertation based on research into an aspect of European politics, history, culture, or economics. The dissertation must be supervised by a teacher, either in European Studies or in another department of the university. Students enrolled in this course may not enroll in EUST3004.

Assessment: 100% coursework

EUST3004. European Studies research project (6 credits)

Students in this course pursue independent research and produce a research paper under the supervision of a teacher, either in European Studies or in another department of the university. Students enrolled in this course may not enroll in EUST3003.

Assessment: 100% coursework

EUST3010. European political and economic institutions and processes (6 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

This course, which is required of all European Studies majors in their third year, will further familiarise students with the major international economic and political institutions in Europe such as the European Union and NATO. The structures will be explained along with the process by which decision making and change can be introduced. Included in the syllabus will be an examination of Europe in the international setting. Taught within a seminar type framework, students will be encouraged to select, in consultation with a staff member, subject areas within the area of focus for deeper examination.

Assessment: 50% coursework, 50% examination

BUSI0090. The European business environment (6 credits)

This course is intended for those who wish to study the evolution of the European Business environment

and the processes by which it operates. It investigates the broader political, cultural, economic, legal and philosophical basis of the business milieu mostly in western Europe but with reference, when appropriate, to the non-European Union eastern European states. It includes the typologies of businesses as conducted in selected states where the free market operates, systems with the remnants of state control and regional and global influences. Teaching will be based on lectures, case studies and simulations with visiting lectures from various consulates to enrich content.

Assessment: 40% coursework, 60% examination

Department of Fine Arts

First Year

FINE1001. Introduction to western art history (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course will introduce students to the art of Europe from the periods of ancient Greek and Roman civilization to the art of the twentieth century. Major developments in painting and sculpture will be studied, with the aim of giving students an understanding of the main characteristics of the art produced, and the relationship of art to the culture in which it was created. No previous knowledge of art history is assumed.

Assessment: 60% coursework, 40% examination.

FINE1004. Introduction to Chinese art history (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course gives an overview of the development of different forms of Chinese art in history. Students are introduced to the concept of visual analysis and art appreciation. Discussions are based on several generic themes, such as the nature of the pieces, the effects of ideology, and the influence of the ruling dynasties. In the course of the study, the social context under which the art pieces were made is constantly highlighted. No previous knowledge of art history is expected.

Assessment: 60% coursework, 40% examination.

FINE1006. Art and society (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course introduces visual and critical skills for interpreting the art of different cultures from both the past and the present. We examine a variety of themes related to the techniques and functions of art, and we study the way art expresses various moral, social, political, and religious ideas. Students will gain a better understanding of cross-cultural communication and will learn how to analyze the powerful visual culture of the contemporary world.

Assessment: 100% coursework.

FINE1007. Introduction to photography theory and practice (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to introduce students to principles of contemporary photography theory and a critical practice of the photographic medium. In addition to the teaching of basic photographic techniques, the course will also discuss how we can assess photographs with critical tools such as aesthetics and cultural theories.

Assessment: 100% coursework.

FINE1008. Introduction to Asian Art History (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This survey course introduces major themes in art from early formations of Asian civilizations to the twenty-first century. We investigate the various forms of art production in China, Japan, India and Southeast Asia with an emphasis on the means by which art creates meaning in diverse Asian cultures. Themes include issues such as patronage, personal style, artistic autonomy, art institutions and collecting practices.

Assessment: 100% coursework

Second and Third Years

The following courses are open to both second and third year students. Prerequisites, if required, are stated in the course descriptions. If staffing arrangements permit, the following courses will be offered:

FINE2003. Early Chinese painting (Warring States to Southern Song) (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will cover the history of Chinese painting from the Warring States to Southern Song dynasty. It will explore the transformation of forms of expression and styles of periods and individuals, as well as ideological and social factors behind the changes. The relationship of Chinese painting theory to Chinese philosophy, aesthetics, and literature will also be discussed.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2004. Later Chinese painting (Yuan to Qing) (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will cover the history of Chinese painting from the Yuan to Qing dynasty. With an emphasis on methodology and connoisseurship, it will explore the transformation of forms of expression and styles of periods and individuals, as well as ideological and social factors behind the changes. The relationship of Chinese painting theory to Chinese philosophy, aesthetics, and literature will also be discussed.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2005. Twentieth century Chinese art (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Taking a general view of the major trends in Chinese art of this century, this course will explore how political, social, and cultural changes have affected the artists' thoughts and practices. Most of the important artists and art schools of this century will be covered.

Assessment: 100% coursework.

FINE2006. A history of Chinese calligraphy and seals (6 credits)

Chinese calligraphy and seals are two traditional art forms that have a unique history of over three thousand years. This course will provide students with a basic knowledge of how to analyze these art forms, as well as their historical development. The ability to read in Chinese is advantageous for this course.

Assessment: 100% coursework.

FINE2007. Connoisseurship (6 credits)

The discrimination of authenticity and quality in works of art is essential to the study of art history. This course will lay equal stress on both theoretical study and practical training, and on both class discussion and outside investigation. Through demonstration and discussion of specific cases involving varied media and topics, students will learn how to make a judgement by inference on the authenticity and quality of an art work.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2008. The poetics of Japanese narrative painting (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the origins and emergence of peculiarly Japanese artistic codes in Japanese narrative painting. Topics under review include the tensions born from accommodation of Chinese painting materia, definition of Japanese narratology in painting and its texts, the birth of '*mono no aware*' (the 'ah!-ness of things') and its place in court and Buddhist painting, the dialectics of 'female' and 'male' modes, the functions of light humour, satire and the grotesque. In the case of works produced by groups of designers, editors and painters (such as Illustrations of the Tale of Genji), students will be encouraged to experiment with deconstructive analysis.

Assessment: 100% coursework.

FINE2009. Genji's dream: the courtly arts of Heian Japan (6 credits)

This course highlights the world of the Shining Prince Genji as revealed in the courtly arts of Heian Japan, especially in the 11th and 12th centuries. The princely accomplishments of the romance hero Genji included painting, calligraphy, waka poetry (a medium for social intercourse), design of his mansion and gardens for his various ladies. The course locates the various arts, their history, ideologies, and artistic codes, and proposes a symbiotic relationship among them as a further code. Students will study - as beginners - the manner in which classical *waka* poems are produced as artistic calligraphy, and encouraged to evaluate certain works. No knowledge of Japanese language is necessary.

Assessment: 100% coursework.

FINE2011. Japanese art: the interactive dimension (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course explores certain aspects of artistically defined environmental art, and its associated arts. This includes in particular architecture and garden art in the early and medieval periods of Japanese history, analysis of the nature of exhibitions of art, and exploration of tea-oriented environments and gardens. In all of these situations, it is proposed, a certain kind of audience participation is anticipated, inherent, or built into the overall structure. The course interrogates response to such environments, particularly in garden art, and examines the relevance of aesthetic codes, their social implications, and their myths,

metaphysics, or philosophy.
Assessment: 100% coursework.

FINE2012. Italian Renaissance art (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will examine the painting and sculpture of Italy from about 1300 to 1550. Beginning with Giotto's new approach to painting, the course will explore artistic developments in Italy throughout this period, concluding with a study of the art of the High Renaissance. The impact of the Antique and the interest in mathematics, characteristic of the Italian Renaissance, will be among the topics discussed.

Assessment: 60% coursework, 40% examination.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2013. Northern Renaissance art (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will examine the art produced in Flanders, France, and Germany between about 1300 and 1550, focusing primarily on painting and printmaking. It will begin with early 14th century illuminated manuscripts and the subsequent development of the International Style. It will then consider Flemish 15th century painting in some detail, concluding with a study of Flemish and German art of the 16th century.

Assessment: 60% coursework, 40% examination.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2020. American art (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course surveys painting, sculpture, photography, and architecture in the United States from European settlement to 1945. The underlying theme will be the ways in which art in the United States has helped project various new ideologies and values associated with this young and unique nation. Issues to be considered in relation to art will include Protestant values, democracy, wilderness, racial conflict, capitalism, popular culture, and America's gradual rise to power.

Assessment: 100% coursework.

FINE2025. The art of the Baroque (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will examine the art of the 17th century in Italy, Flanders, Spain, the Netherlands and France. The emphasis will be on painting, although sculpture will be studied as well. Particular attention will be given to the impact of the Counter Reformation, the features of Baroque naturalism, the use of allegory, and attitudes towards the antique by artists of this period.

Assessment: 60% coursework, 40% examination.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2026. The age of revolution: Art in Europe, 1750-1840 (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the radical transformation in European art from the age of kings to the age of revolutions, c.1750-1840. Painting, sculpture, and printmaking will be discussed in relation to various historical developments, including the decline of aristocratic culture and Christianity; the rise of science, industry, and democracy; and new, Romantic notions of nature, individuality, nationalism, and primitivism.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2027. The formation of modernity: Art in Europe, 1840-1890 (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the early formation of modern European visual culture, from Realism to Impressionism. The underlying historical theme will be the rise of bourgeois society. Painting, sculpture, printmaking, and photography will be discussed in the context of related ideological issues such as industrial capitalism, mass media, urban leisure, tourism, new gender roles, and European imperialism.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2028. Vision in crisis (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In art, as in other fields of knowledge, the late 19th century and the early 20th century was a time when pre-existing assumptions were challenged in a radical way. To certain artists in Europe, for instance, illusionistic realism or the conventions of perspective no longer seemed adequate tools for representing the world and our experience of it. Amongst the factors provoking this crisis of vision was an increasing awareness of other cultures and their differing modes of visual representation, and many non-Western artists shared with their Western counterparts this new sense of the relativity of cultural knowledge, although they tended to respond to it in different ways. *Vision in Crisis* will examine this moment of great artistic change, focusing primarily on European examples, with Chinese art being taken as the main non-Western case for study. Artists whose work may be discussed in depth include Van Gogh, Gauguin, Cézanne, Picasso and Matisse.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2029. Modernity and its discontents (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Although certain 20th century artists can be taken as celebrating the modern, many artists offered instead a critical engagement with the newly-emerging forms of experience they were encountering, or sought various forms of escape from them. While the response of European artists to the modern condition is most well known, artists from other parts of the world were equally engaged with the task of creating an art adequate to the new environment in which they found themselves. Both will be considered in this course, which will focus primarily on European art of the first half of the 20th century. Chinese art will provide the main non-Western case for study. Abstract art, Futurism, Expressionism, Dada and Surrealism may all be considered.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2030. Towards the global (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Paris has been described as the capital of the 19th century, and indeed one can talk of a European cultural hegemony that lasted until the outbreak of the Second World War. The postwar period, however, saw a migration of cultural authority across the Atlantic to the United States, and with the ending of the Cold War American cultural dominance seemed to become even more deeply entrenched. If the close of the colonial era did not then eliminate the asymmetry of power between Western and non-Western cultures, it did at least alter the conditions for artistic production in the latter. Furthermore, with an increasing pace of globalization at the end of the century, the opportunities for non-Western artists to reach new audiences have expanded enormously. This course will begin with a consideration of Pollock and Abstract Expressionism, and later developments in American art will be a major focus of the course, which will also be concerned to document the contribution of non-Western artists. A thematic approach will be adopted, with tendencies such as Pop Art, Minimal and Post-Minimal art, Environmental and Installation Art, Performance Art, Conceptual and Neo-Conceptual Art being amongst those which may be considered. A wide variety of artworks dating from 1945 to the present day will be discussed.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2031. The rise of modern architecture in Western culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Tracing the development of Western architecture from ancient Greece onward, this course focuses on the 19th and 20th centuries, from Neoclassicism in Washington, D.C. and Haussman's renovation of Paris to the Bauhaus in Germany and the international spread of Modernism and Postmodernism. Emphasis is placed on the way buildings express institutional ideologies, as well as on construction technology and architectural theory. Hong Kong architecture figures prominently throughout.

Assessment: 100% coursework.

FINE2032. Art and the portrayal of women (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will consider the representation of women in Western art. The approach will be thematic, and examples ranging from medieval to modern will be considered. Topics will include 'good' women (virgins, saints, mothers, wives) and 'bad' (fallen women, temptresses, witches), as well as the nude and the portrait. Both religious and secular images will be considered.

Assessment: 100% coursework.

FINE2033. Cross-cultural interaction in the 19th century (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Tracing the rise of global visual cultures, this course examines artistic interactions between Western and non-Western cultures brought on by colonialism, war, trade, and scientific exploration in the period 1750-1900. We study how European and American artists viewed the cultures they encountered in China,

Japan, India, the Near East and elsewhere, as well as how non-Westerners viewed the West. Emphasis is placed on the varied processes of cultural interaction and on the importance of such interaction for the development of modernity in different cultural contexts.

Assessment: 100% coursework.

FINE2034. Hong Kong art workshop (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will introduce Hong Kong art and related aspects of Hong Kong visual culture. It will be taught in a workshop format, and will provide the opportunity for students to develop skills in art criticism as well as an understanding of Hong Kong art history.

Assessment: 100% coursework.

Prerequisite: At least one FINE2000 level course.

FINE2035. Photography and the nineteenth century (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course studies the history of photography in the nineteenth century: its invention and technological evolution, its various early practices, and its interactions with other cultural practices. In discussing these topics it also investigates the social, cultural and ideological problems to which the medium gave rise especially in the Western world and the era of modernity. Some introductory practical lessons and field trips are included so that students can have a better understanding of the actual photographic process.

Assessment: 100% coursework.

FINE2036. Photography in the twentieth century (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course investigates the history of photography in the twentieth century. It charts how earlier photographic practices evolved and were transformed in the new era, and traces the workings of new practices such as photojournalism and fashion photography. As modernism and avant-gardism have pervaded twentieth century culture and arts, this course also focuses on how photography responded to these tendencies in different countries. Finally, it considers the medium's role in the age of global culture and digital imaging.

Assessment: 100% coursework.

Prerequisite: FINE2035.

FINE2039. Ink painting Muromachi Japan (6 credits)

This course will examine the impact of anti-orthodox, monastic and amateur painting styles, as they emerge in Japanese ink painting in early modern Japan (14c to 16c). Under discussion will be questions of ideology and aesthetics, contrasted against those of China, the roles of the promoters of art and its exhibition, and counter-movements by rebellious painters writing a new identity and social role for artists. The rise of the curator/taste-maker, and his successor, the tea-master, will illustrate the passage towards a new Japan, and a sense of "Japaneseness" in art.

Assessment: 100% coursework.

FINE2041. Japanese art: an introduction (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will outline some of the highlights of Japanese art from its early emergence to modern times. We will discuss how and why Japanese art became so distinctive and so rich a tradition. We will look at the major trends, and masterpieces, in painting, sculpture, architecture and garden art. We shall discuss the aesthetics of Japanese art, and its transformation of foreign arts. We shall also touch on the arts of tea ceremony, and premodern art in various media, including painting, Japanese prints, the hybrid *nihonga* (Japanese painting), and developments in 20th century Japanese painting, applied arts, pottery, and architecture. There will be some field work, in the form of trips to local art galleries.

Assessment: 100% coursework.

FINE2042. Chinese material culture I: Neolithic to Tang (6 credits)

China is considered to have at least five thousand years of continuous cultural development. This course will be a chronological survey of the material culture of China from the Neolithic period to the Tang dynasty. Students will explore the factors contributing to China's rich and unique visual culture through the study of early Chinese painted pottery, jades, bronzes, ceramics and sculptural works. The course will also address the impact of historical, philosophical and religious developments in China during this period on the production and uses of art. Students will be encouraged to consider how the relationship of art to personal and cultural identity has evolved from the development of archaeology in China.

Assessment: 100% coursework

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2043. Chinese material culture II: Song to Qing (6 credits)

This course will be a survey of the development of material culture in China from the Song dynasty to the fall of imperial China in 1911 and will focus in particular on the influence of imperial taste on art production. Ceramics in particular have reflected the aesthetics of the Court, from austere Buddhist-influenced expression to the highly decorative western-influenced wares of the Qing court, and so will feature prominently in the objects to be considered. Also included will be the iconography of tomb figurines and stone sculpture in imperial mausoleums as well as religious sculpture, bronzes, and carving in jade, wood, lacquer and bamboo.

Assessment: 100% coursework

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2044. The whys of where: visual geographies of China and Japan (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will examine the relationship between image-making and cultural encounters at regional and trans-national levels, and the role of visual artifacts in the making of real and imaginative geographies. The module will begin with 16th century Jesuit missionaries propagating their "universal history" with, amongst many things, world maps, and end with an investigation of modern Chinese artists' visions of an "East" in the global context. Themes will be organized into two or three week classes, which are designed to stimulate students into making comparisons and parallels. This course will examine a range of visual artifacts including visual technologies, such as cartography and photography, and how these have changed the ways in which we look. Although the emphasis is on space and territory, the visual themes investigated will also include portraits and architecture, as well as landscapes. There will be a one hour lecture with a one hour seminar to discuss images, themes and readings held later during the week.

Assessment: 100% coursework

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE2045. Colour and Culture (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Colour is a fascinating topic. What do our favourite colours say about us? Why do we prefer one colour over another? Can we define colours as feminine and masculine? Why do we say we feel 'blue' when we are depressed? What colour best symbolizes your self-concept? Are the meanings of colours culturally constructed? We will explore the world of colour in visual culture, particularly Asian art, using a variety of texts from art, mythology, science, psychology, film, culture, gender, literature, and even fashion to help us examine the uses and meanings of colour. We will compare the theories and techniques relating to colour of various disciplines based on different theme. Students are encouraged to be creative in their approaches in investigating this controversial topic. The core texts will be mainly books but photographs, slides and materials from Internet searches will also be utilized in our discussions.

Assessment: 100% coursework

Prerequisite: None.

FINE2046. Art and the Human Body (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The human body has become a central concern both in academic theory and in the wider culture. The body in art functions as a sign that transcends the physical body. It represents a range of metaphorical meanings, which artists delineate through the use of context, framing and style. This course will examine art that has sought to find various methods of representing the human body. Throughout history, the metamorphosis ranges from the unified body of academic theory in classical proportion and the Christian body made in God's image, to the standardised body of consumer culture. In examining the depiction of the body from Asian, Tribal, and Western cultures, we will explore social, political, religious, and cultural influences in the construction of corporal representation. Reading materials will be mainly books but photographs, popular magazines, TV programmes, films, and materials from Internet search will also be utilized in our discussions.

Assessment: Coursework 100%

Prerequisite: None

FINE2047. Arts of India (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the painting and sculpture of the Indian subcontinent and considers the impact of religion, politics, and patronage on art. Through an interdisciplinary approach, we focus on Buddhist and Vedic/Hindu art in its religious context and the later art patronage of the Muslim and Mughal rulers. The course will conclude by investigating the art of colonized India through the twentieth century. The various styles of Indian art are discussed in their respective historical, religious, social, and cultural contexts.

Assessment: 100% coursework

FINE2048. Arts of Japan (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening

purposes.)

This course surveys Japanese visual arts by looking at the historically changing role of the artist/producer. Lectures will proceed chronologically, beginning with the tomb figurines of prehistory and ending with gender-bending modern art. We will mainly view painting, sculpture, and architecture, but also consider calligraphy, ceramics, and fashion. Rather than attempting to be completely comprehensive, our exploration will be selective, considering both famous and lesser-known artists and works. Broadly, we will consider the ways Japanese visual culture was transformed in different periods under the impact of shifting patterns of patronage, sociopolitical development, and foreign contact. We will also conduct close readings of individual artworks to decode and understand their symbolic, descriptive and expressive values. The aim is to establish a solid critical foundation on which to develop an understanding of Japanese art history.

Assessment: 100% coursework

Prerequisite: Due to overlap of material covered, this course is not available to students who have previously taken FINE2041.

FINE2049. Art and Gender in China (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This class will examine the role of gender in the production, consumption, and interpretation of Chinese art. Classes are chronologically organized into three broad time periods covering different themes each week. Topics will include the coding of landscapes and bird-and-flower paintings as gendered spaces, and the construction of male and female socio-political identities in portraits and figure paintings. The course is not intended to provide an overview of Chinese art, but a base that can challenge traditional perceptions of what constitutes masculinity and femininity. The broad historical frame will address how socio-cultural factors influencing gender roles in the arts, culture, and society changed over time. It will, more importantly, look at how these issues intersect with questions of ethnicity, social hierarchy, economic and cultural capital, and nationalism.

Assessment: 100% coursework

Prerequisites: FINE1001, FINE1004 or FINE1006

FINE2050. Interpretations of Chinese landscape painting (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the history and significance of land and its depiction in China from the fifth to the twentieth century. We will examine the cultural circumstances that promoted landscape as one of the most, if not the most, valued subjects in Chinese art. Emphasis is placed on historical and interpretive issues that are important to the analysis of artwork and meaning.

Assessment: 100% coursework

Prerequisite: FINE1001, FINE1004 or FINE1006

FINE2051. Art, Politics, and Society in Modern China (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will consider the techniques and materials of art produced in modern China during the late nineteenth and early twentieth century. Our fundamental concern will be to examine art and modernity in its context: not just the art works themselves but the construction of a cultural discourse around art and art history. Topics explored will range from artistic identities and the art market to inter-cultural relations and critical interpretations of the subject. We will identify chains of transmission, search for other echoes,

encounters and exchanges between artistic trends, politics, and society. Through examining art works in different medias, including traditional ink and colour painting, oil painting, pictorial illustration, woodcut prints and printed advertising, along with theoretical writing, bibliographical and institutional data, the course will investigate the conflicts that underpinned Chinese artistic development and its negotiations with modernity.

Assessment: 100% coursework

Prerequisite: Due to overlap of material covered, this course is not available to students who have previously taken FINE2005.

Third Year

The following courses are open only to third year students and will be taught in a seminar format except for FINE3007.

FINE3003. Museum studies workshop (6 credits)

This course aims to give students an introduction to the principles and practises of working in an art museum. The course will be conducted at the University Museum and Art Gallery, and students will be given the opportunity to develop curatorial skills by completing projects relating to an art exhibition or other curatorial work. Students majoring in Fine Arts will be given first preference, but other third year students fulfilling the prerequisite may apply.

Assessment: 100% coursework.

Prerequisite: FINE1001 or FINE1004 or FINE1006.

FINE3004. Museum studies internship (6 credits)

The internship will allow a limited number of students to work with senior members of the staff of the University Museum and Art Gallery on a project relating to a current exhibition or the Museum's permanent collection. Preference will be given to students who wish to develop skills taught in FINE3003. Admission will be by interview.

Assessment: 100% coursework.

Prerequisite: FINE3003.

FINE3006. Art history methodology workshop (6 credits)

This course is taught in the form of seminars. It requires active participation from students, and is intended for those in their third year who have already engaged seriously with art history during their previous study. It aims to deepen students' understanding of the methods used by art historians by introducing various debates about interpretation. Students are expected to write a paper concerning an area of art history or visual culture of their own choice, in which they demonstrate their sensitivity to questions of method.

Assessment: 100% coursework.

Prerequisite: Students should have taken at least one first year Fine Arts course, and at least two Fine Arts courses (in any subject area) in their second year.

FINE3007. Independent research project (6 credits)

Students with a focus of interest and the approval of a teacher may undertake independent study to produce a research paper under the supervision of a teacher.

Assessment: 100% coursework.

FINE3008. Perspectives in Asian art (6 credits)

This seminar will focus in depth on one area of Asian art and visual culture, with an emphasis on art historical strategies. Students will prepare a seminar paper drawing on knowledge of a certain area, but will further be encouraged to demonstrate a critical approach to broader methodological and theoretical issues.

Assessment: 100% coursework.

Prerequisite: Students should have taken at least one first year Fine Arts course, and at least two Fine Arts courses (in any subject area) in their second year.

FINE3009. Perspectives in Western art (6 credits)

This seminar will focus in depth on one area of Western art and visual culture, with an emphasis on art historical strategies. Students will prepare a seminar paper drawing on knowledge of a certain area, but will further be encouraged to demonstrate a critical approach to broader methodological and theoretical issues.

Assessment: 100% coursework.

Prerequisite: Students should have taken at least one first year Fine Arts course, and at least two Fine Arts courses (in any subject area) in their second year.

Department of Geography**Level 100 Courses****GEOG1002. Hong Kong: land, people and resources (6 credits)**

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course provides students with a fundamental understanding of the physical and human environment of Hong Kong with its larger geographical and regional setting. After an introduction to the major physical features, a range of contemporary issues such as demographic structure and changes, economic development, industrialization, urbanization, housing and planning will be examined. It will conclude with a discussion on Hong Kong's future development problems and their possible solutions. This is an independent course which can be taken by students from various disciplines.

Assessment: 40% coursework, 60% examination.

GEOG1003. Contemporary global environmental issues (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Recent decades have been characterized by increasing awareness of environmental issues and the need to come to terms with them. The course will examine, in turn, many of the current major environmental issues related to the atmosphere the hydrosphere and the biosphere as well as looking at major threats posed by the environment itself in the form of natural hazards. In addition, the issue of the nuclear threat and the ever-increasing demand for energy are explored. Finally, the matter of sustained development and intelligent management of the planet for this and future generations is addressed.

Assessment: 40% coursework, 60% examination.

GEOG1005. Map use, reading and interpretation (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Maps have been used for centuries to describe spatial patterns and portray association and correlation. Recent developments in digital spatial data handling have changed the environment where maps are used. Maps are no longer confined to the printed format. The objective of this course is to provide an integrated discussion of standard planimetric maps, their uses, and the basic skills necessary to take full advantage of these maps. The lectures will cover fundamental concepts underlying different mapping/analytical techniques, their strengths, limitations, and application settings. The practicals will be devoted to imparting essential computer operating skills to visualize spatial data.

Assessment: 40% coursework, 60% examination.

GEOG1006. Natural resources and conservation (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The consumption of the Earth's resources has reached an alarming intensity and variety in modern times. The objective of this course is to survey the major issues related to the tenure of human-nature interactions, their current status as well as the prognosis for the future. A synoptic view on the cultural roots of the exploitative utilization of our planet sets the backdrop for a systematic assessment of the different but interrelated components of the resource system. Various abiotic, biotic and abiotic-cum-biotic segments are discussed in the light of their diversified uses and misuses in different human societies, and the possibility for a more enlightened approach towards a more sustainable future. Adopting a non-technical approach, this course appeals to students with a background in different humanity or science disciplines.

Assessment: 40% coursework, 60% examination.

GEOG1011. Introduction to human geography (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This is an introductory course about the processes and spatial patterns of human activities in a globalizing world. Important subjects to be discussed will include the main themes of human geography as a spatial science, geography of population and migration, technological innovation and cultural diffusion, the changing cultural landscape, human impacts on the natural environment, and changing geography in major world regions. Emphasis will be placed on the interaction between human society and the natural environment.

Assessment: 40% coursework, 60% examination.

GEOG1012. Economic and social development in an urbanizing world (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course introduces students to the processes and spatial patterns of economic development and social changes in an increasingly urbanizing world. Important subjects to be discussed include the geographical dynamics of economic development, the trend of economic globalization versus local development, the location issue in various economic sectors, geopolitics and the new world order, as well as social and environmental concerns in the urbanization process. Emphasis will be placed on the geographical explanation of economic development and emerging urban issues in this fast changing world. This course can be taken as an independent course or, for students intending to focus on the human dimensions of geographical matters in their second- and third-year studies, it can be taken as a complement to another Level 100 course 'GEOG1011 Introduction to human geography'.

Assessment: 40% coursework, 60% examination.

Level 200 & 300 Courses

Courses to be offered on alternate odd-year basis, i.e. in 2007-08, 2009-2010.

* Courses to be offered on alternate even-year basis, i.e. in 2006-07, 2008-09.

GEOG2001. Economic geography # (6 credits)

This course gives an introduction to competing theoretical interpretations of why economic activities are located where they are. Emphasis is placed on the processes of globalization, their geographical implications, and various theoretical attempts to understand the dynamics of the new economic landscape. Both topical and regional issues of economic geography are discussed and economic development at the global, national, and local scales are examined.

Assessment: 40% coursework, 60% examination.

GEOG2002. China: development issues * (6 credits)

China's space economy has undergone profound transformation over the past half a century. This course offers a selective evaluation of a number of issues that are critical to understanding China's ongoing economic and spatial transformation. Emphasis is placed on development strategies, agriculture, industry, transport, trade, and urban and regional development since 1949. The driving forces operating behind the scenes of economic transformation and the (un)intended consequences are critically evaluated. Students wishing to take this course must take or have taken the co-requisite/pre-requisite course **GEOG2062**.

China: the land and the people.

Assessment: 40% coursework, 60% examination.

GEOG2003. Japan, Korea and Southeast Asia # (6 credits)

This course is designed to provide an overview of contemporary geographical issues in the major sub-regions of the newly emerging 'Pacific-Asian' region: Japan, Korea, and Southeast Asia from the historical, geographical, social, economic, and environmental perspectives. Principal topics of discussion include population growth, economic development, and problems associated with rapid industrialization and urbanization such as environmental degradation and regional disparities.

Assessment: 40% coursework, 60% examination.

GEOG2004. Atmospheric environment and global climate * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is divided into three major sections. In the first, the basic characteristics and features of the atmospheric environment are examined from the viewpoint of the basic physical and dynamical processes which occur in the atmosphere and between the atmosphere and the underlying surface. In the second both the spatial and temporal dimensions of the resulting climate are explored at a range of scales to provide an understanding of the link between the processes occurring in the climate system and the diversity of climatic conditions which occur on Earth. A special section is devoted to the climates of China. In the last section, various means of reconstructing and modelling the climate system are explored with a view to understanding the nature of past climates and the variety of potential future climates that might be possible.

Assessment: 40% coursework, 60% examination.

GEOG2005. Biogeography and ecosystem modifications * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening

purposes.)

The course introduces students to the basic concepts of biogeography by studying the structure and functioning of natural ecosystems and their extensive modifications by human activities. It provides a comprehensive foundation on basic ecological concepts, including structure and organization of ecosystems, energy flow and nutrient cycling, evolution of the biosphere and ecosystem succession and changes. Some special issues of ecosystem management of relevance to nature conservation and protection are then expounded, including species interactions, biotic dispersal and migration, fire as a natural-cum-anthropogenic factor, continental drift and Pleistocene Glaciation, domestication and agricultural origin, the pervasive ecological impacts of modern agriculture and urbanization, and the application of island biogeography theory to habitat and species conservation. This is a course of general appeal to students with different backgrounds and dispositions.

Assessment: 40% coursework, 60% examination.

GEOG2006. Earth surface processes and landforms (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is a core element in physical environmental study. The course provides a systematic description and analysis of earth surface landscapes and the processes that create them. Since earth landsurface is located at the interface of the Earth's lithosphere, atmosphere, hydrosphere and biosphere, this study is closely related to a wide range of disciplines of natural environments. Topics discuss the landforms and their processes in different environments, including slope, fluvial, coastal, glacial and arid locations. The landforms created by tectonic movement and the techniques in geomorphology are also studied.

Assessment: 40% coursework, 60% examination.

GEOG2012. Survey and statistical techniques in geography (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course introduces students to the use of surveys and (spatial and non-spatial) statistics in geography. The aim is to provide students with a basic understanding of the research methodology and techniques commonly used in the discipline. Following a discussion of the uses, implementation and limitations of surveys, various descriptive and inferential statistics of spatial concentration, associations and autocorrelation are introduced. Underlying concepts and theories are illustrated with practical applications drawn extensively from both physical and human geography. Classroom teaching is supplemented by computer laboratory sessions and project work. Abilities to evaluate survey reports critically and to apply spatial and non-spatial statistics appropriately are emphasized.

Assessment: 100% coursework.

GEOG2013. Sustainable development (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course evaluates the links between environmental protection and economic development. The world must manage its natural and environmental resources to meet the human needs of the present while at the same time preserving these resources for future generations. The course introduces students to different views on how human society can achieve the goal of economic growth without depleting the Earth's capital and jeopardizing the planet's life support system. It aims to enhance students' understanding of the issues relating to sustainable development. Although the course cannot provide complete answers to the

issues, it helps develop students' ability of critical thinking and suggest promising directions in which answers may be sought.

Assessment: 40% coursework, 60% examination.

GEOG2014. Countryside recreation and management (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Expansion in leisure time has led to an associated increase in recreation. The countryside can provide a range of activities and attractions. The course examines the countryside as a resource and looks at management issues. The provision of leisure will also be examined, as will how to 'value' the countryside. Special case studies of National Parks in the USA and UK, along with Country Parks in Hong Kong will be undertaken. The environmental impact of recreation will also be studied. Competing claims for rural land and tensions resulting from countryside recreation will also be examined. Factors influencing participation in countryside recreation are examined.

Assessment: 40% coursework, 60% examination.

GEOG2015. Environmental monitoring and assessment (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course is divided into two parts. The first part deals with basic environmental monitoring methodology and techniques, which are how to obtain and analyse information on the existence and concentration of substances in the environment, either naturally occurring or from anthropogenic sources. It also examines natural hazards monitoring. The second part provides a basic concept and nature of environmental assessment (EA or EIA), an exploration of best practice in EA and a description of EA procedures.

Assessment: 40% coursework, 60% examination.

GEOG2018. Transport geography (6 credits)

This course provides an understanding of the spatial structures and development of transport systems from a people-oriented geographical approach. This approach emphasizes the role of people in determining the evolution and use of transport systems and the role of the transportation systems in serving and changing our daily life through improving accessibility and mobility. The course will cover the fundamentals of geographical analysis on transport, the analysis on transport demand, supply and regulations, and the relationship between transport and development. Case studies of airports, ports, and urban transport networks provide explanations about the mechanisms and dynamics of transport systems in different geographical situations, and how they interact with local and global development.

Assessment: 40% coursework, 60% examination.

GEOG2019. Environmental GIS * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to the methods of overlaying and merging of spatial data layers in environmental monitoring and decision making. The principles of such an approach will be discussed focusing on the nature of environmental data (particularly the raster data structure and remote sensing images), data transformation and geocoding, modeling techniques, and accuracy evaluation of spatial databases. Students must complete a simple project embodying the application of the GIS concept in an

environmental situation.

Assessment: 40% coursework, 60% examination.

GEOG2020. Geography of wine # (6 credits)

There is an intimate relationship between geography and wine - where a wine comes from determines its quality, style and taste. This is principally because of the importance of the site and size of the vineyard, its soil, slope, rainfall, sunshine; as well as the nature of the cultivation practices, choice of grape and methods of winemaking. This course first examines the history and evolution of winemaking and the fundamentals of the art and science of oenology to provide the student with a firm foundation for understanding the differences among the wide variety of wines produced worldwide. The remainder is dedicated to exploring the different wine regions of the world and the unique characteristics of each which give their products their distinctive features.

Assessment: 40% coursework, 60% examination.

GEOG2021. Physical environment of China (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course firstly provides an explanation of basic natural environmental elements of China. Based on understanding and distribution of these elements, Chinese physical environment is then regionalized and the individual environmental regions are discussed in detail. The course also covers the utilization and transformation of natural environment since civilization and the major environmental problems in different regions.

Assessment: 40% coursework, 60% examination.

GEOG2030. Global development (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course explains the processes of globalization and discusses its important implications for national and regional development. Special emphasis is placed on the interactions of modern transnational corporations (TNCs) and the nation states. Case studies are drawn from different sectors of the economy and different regions of the world. Major issues such as international trade and resource transfer, circuit of capital, product life cycle, technological innovations, the new international division of labour and transnational integration are addressed. This course is valuable to students who are interested in development studies, urbanization and public policy.

Assessment: 100% coursework.

GEOG2037. Soils and the environment * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to soils as an integral component of the environment and a pertinent natural resource. It provides a broad foundation to basic concepts of soil as a natural body by assessing systematically the mineral and organic composition as well as their related properties. The physical organization of soils in the form of structure and its manipulation by humankind in the form of tillage are elucidated. Topics on the ability of soils to supply nutrients for plant growth, the use of different forms of chemical and organic fertilizers, and contamination of soils by pollutants, are covered. The importance of soil moisture and their maintenance at an optimal state are explained in the context of drainage and

irrigation. The general degradation of soils due to human-accelerated erosion and other unsustainable activities are evaluated together with the prospects for proper ecological rehabilitation and conservation. The course contents and presentation are designed to cater to students with either arts or science backgrounds.

Assessment: 40% coursework, 60% examination.

GEOG2038. Climate change and the environment # (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course has as its primary concern climatic conditions on Earth and their interactions with life and human activities. It will focus on climate change, since to deal sensibly with questions raised concerning future climatic conditions and evaluation of their impact on environment and society, it is essential to understand the nature of the climate system and what causes it to change. In particular, the impact of human activities on the climate system will be set in perspective alongside the background of natural changes in the climate of our planet. Issues associated with societal decisions taken today and their potential impact on climate over the next century will also be discussed.

Assessment: 40% coursework, 60% examination.

GEOG2042. Urban hydrology and water quality # (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course aims to provide students with appropriate knowledge about water in the city. It starts with an introduction to the two water cycles in the city: the natural and man-made systems. The modification of the hydrologic cycle in the urban system is discussed along with the water supply and drainage systems. Access to water, as a scarce resource, and its geographic contrasts are studied. Hydrologic problems in the city such as flooding and subsidence are also examined. Water quality of both natural and man-made water cycle systems are also investigated.

Assessment: 40% coursework, 60% examination.

GEOG2045. Retail location * (6 credits)

This course introduces the basic principles and components of the retail system with the emphasis on the spatial pattern of demand and the value of location to various actors - the economic basis of location decision. The spatial structure of commercial activities are described and explained at both the settlement and the metropolitan scale with an eye on the location decisions of retail chains and developers. Students will be introduced to the most widely used procedures in store location studies and are urged to evaluate these techniques in terms of the retail chain's strategies and requirements in a local setting.

Assessment: 40% coursework, 60% examination.

GEOG2048. Environmental hazards * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines a range of environmental hazards of geological, geomorphological, atmospheric, biological and human origin focussing on their origins, characteristics and impacts on human society. It will also deal with the responses available to different societies to deal with these hazards including disaster relief, loss sharing and event modification adjustments as well as comprehensive hazard planning and management principles. Where practicable local and regional examples will be used as illustrations.

Assessment: 40% coursework, 60% examination.

GEOG2050. Modern environmentalism: society-environment relations (6 credits)

This course presents an introduction to environmentalism, which encompasses a set of beliefs and activities which inform and flow from a concern with the environment. Environmentalism has begun to assert itself globally (since the 1960s/1970s) and locally (from the late 1980s) as a significant force in response to, and sometimes influencing, patterns of development. This course will trace the emergence of environmentalism at both the global and local levels. It will examine the evolving linkages between environmentalism and some central societal issues such as social justice, poverty, and gender. The responses of the business sector to increasing public concern for the environment, as well as mounting opposition to environmentalism, will be considered. The course will conclude with a discussion on various manifestations of environmentalism in Hong Kong to illustrate the complex relations between society and environment in a compact and high-density metropolitan milieu.

Assessment: 40% coursework, 60% examination.

GEOG2051. Port and airport development # (6 credits)

Port and airport are regarded in transport geography as two nodal development forms in multi-modal transport systems. Through a series of seminar-like discussions, this course provides a basic understanding of port and airport operations, and how these two forms of nodal transport infrastructure interact with other transport components and with urban and regional development. Examples drawn from different parts of the world will be discussed in detail and students are required to examine the local cases through field trips.

Assessment: 40% coursework, 60% examination.

GEOG2054. Urban planning in practice in Hong Kong (6 credits)

On the understanding that students have already acquired some knowledge on urban planning (especially its basic theory and principles) and have keen interest in the work of the profession, this course will concentrate its discussions on selected aspects on urban planning in practice in Hong Kong. It will outline the actual functions and work of urban planning in real life and analyze the more important factors affecting urban planning in Hong Kong. A number of specific significant urban planning issues will be considered. The planning system, the planning legislation and other matters in the implementation mechanism will also be explained. The course will end with glimpses into the future development of Hong Kong and its planning-development relationship with neighbouring development areas.

Assessment: 40% coursework, 60% examination.

GEOG2055. Water resources and management * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course begins with an introduction to water as a resource, and the drainage basin hydrological cycle. The second part of the course focuses upon changing demand for water and explores possible solutions to the water problem. It also examines the issue of access to water. The human impact upon runoff and groundwater by means of land-use change is studied. Finally, water quality including pollution and its impact upon water supply is examined.

Assessment: 40% coursework, 60% examination.

GEOG2056. Tourism and the shrinking world (6 credits)

This course provides a comprehensive introduction to the tourism system in the global context. With a balanced coverage of the whole range of components within the tourism industry, it explores all aspects of both the private and public businesses related to tourism, such as theories, planning, environmental concerns, operations, and the interrelationships among the many tourism businesses. The material covered is intended to offer students knowledge of the tourism system, enable them to apply basic tourism concepts to various projects and problems, and help them to develop a career in the tourism industry.

Assessment: 40% coursework, 60% examination.

GEOG2057. Leisure and recreation in modern society (6 credits)

This course is an overview of the broad field of recreation and leisure, emphasizing the understanding of various leisure phenomena. As such, it aims to provide the students with an introductory understanding of the nature and scope of leisure, leisure behaviour and affiliated recreation activity. It also reviews relationships between leisure and space, place, time, play, work, family, education, ethnicity, gender, and environment.

Assessment: 40% coursework, 60% examination.

GEOG2059. Geography of information technology (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is about the spatial implications of 'convergent information technology' (IT), broadly defined as computers and telecommunications. It begins by exploring the historical roots and geographical spread of the Internet throughout the world. The course proceeds to examine the IT industries as spatial systems. The geographical concept of 'innovation milieu' and open windows of locational opportunities are introduced as the theoretical framework for analyzing the experiences of the Silicon Valley in the United States, the technopolis programme in Japan and the cyberport project in Hong Kong.

Assessment: 100% coursework.

GEOG2060. An introduction to archaeology (6 credits)

How do you know where you are going until you know where you have been? This course will introduce students to the role archaeology has played in the construction of humanity's history and prehistory. It is intended to be a broad survey of the discipline, its discoveries, scientific and analytical tools and applications. The course will assist students in recognising new cultural dimension within the landscape around them and provide a sound basis for further study here or abroad.

Assessment: 40% coursework, 60% examination.

GEOG2061. Cultural heritage management and tourism (6 credits)

Understanding the relationship between cultural heritage management and tourism is important for planning and managing tangible cultural heritage in a sustainable manner. The course examines the underlying principles, goals and concepts that drive current cultural heritage management and tourism activity around the world. It will provide students with a framework for analysing the complementary and competing demands made by conservation and tourism of tangible cultural heritage. How such demands arise during the planning and development of a heritage attraction will be discussed throughout the course using examples from five continents.

Assessment: 40% coursework, 60% examination.

GEOG2062. China: the land and the people (6 credits)

This is an introductory course about the evolving physical, cultural and political landscape of China. Emphasis is placed on (a) the natural environment and physical setting for development; (b) historical geography and evolution of the landscape; (c) the political system and post-1949 development; and (d) the growth and spatial distribution of population. This course is the co-requisite/pre-requisite for **GEOG2002. China development issues**.

Assessment: 40% coursework, 60% examination.

GEOG2065. Urban planning: principles and practices (6 credits)

This course introduces students to the subject of urban planning. It will first discuss the significance and objectives of urban planning, relating the rise of this profession to the changing configurations of our increasingly urbanizing world. Then, drawing upon primarily the experiences of the United States, some of the major concepts and issues relating to contemporary urban planning practice will be deliberated. These include competing planning theories on the planning process, the legal basis of planning as well as the interrelationships between planning, politics and social issues. The questions of land use planning, urban design, urban renewal, and environmental planning will be highlighted and experiences from the United States and Hong Kong will be discussed and contrasted to illustrate the complexity of urban planning issues in different geographical, political and social settings. Students are strongly encouraged to take one of the basic foundation courses on urban geography before enrolling in this course.

Assessment: 40% coursework, 60% examination.

GEOG2070. Coast and slope environments * (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course brings together material vital to any attempts to understand and manage our coasts and slopes and will be of interest to all those concerned with the environments. The aim of the course is to develop a basic understanding of coast and slope systems. It involves a basic study on the natural processes, including their landscape formation and evolution, and the physical, ecological and cultural systems of slopes and coasts. The current issues and problems in coastal and slope areas will be discussed, such as landslide, coastal erosion and land reclamation. The management methodology in the areas will be introduced with a focus on Hong Kong and regional cases.

Assessment: 40% coursework, 60% examination.

GEOG2072. Environmental management: impact assessment (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The purpose of this course is to discuss the role of Environmental Impact Assessment (EIA) studies in the environmental decision-making process and as a means for better environmental management. The major components, processes, and attributes to EIA systems will be discussed throughout the lectures. The course will also introduce different methodologies in planning and managing of an EIA study. Applications of EIA system in the local context will be discussed in detail and illustrated by real-life examples mainly from Hong Kong.

Assessment: 40% coursework, 60% examination.

GEOG2073. Principles of environmental management (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The purpose of this course is to highlight major aspects in environmental decision-making and to provide means for better environmental management. The course will introduce a range of concepts and methods in environmental management. The major components, processes, and attributes to the environmental management process will be discussed. The market and government regulations associated with environmental management will also be presented. Considering the complex and dynamic nature of the environmental management process, applications of environmental, social, and economic methods in environmental management are discussed in detail and illustrated by real-life examples mainly from Hong Kong. Integrated approaches for identifying desirable policy options in environmental decision-making are also introduced.

Assessment: 40% coursework, 60% examination.

GEOG2078. Urban geography I: growth, function and pattern of cities (6 credits)

Human beings and their activities are increasingly concentrated in cities. A holistic examination of the city involves understanding its role, internal physical and social structure, and systems of activities. This is one of the two basic courses on urban geography. It covers basic topics of the forces and patterns of urbanization, central place theories, functions of cities, rank size rule, primacy and urban systems, and new urbanization features such as the world city and Extended Metropolitan Regions. It is basic to the understanding of the city and related urban issues and problems.

Assessment: 40% coursework, 60% examination.

GEOG2079. Urban geography II: city structure and urban land use models (6 credits)

Human beings and their activities are increasingly concentrated in cities. A holistic examination of the city involves understanding its role, internal physical and social structure, and systems of activities. This is one of the two basic courses on urban geography. It deals with conventional urban land use models and the cultural and modern forces that shape the urban internal structures of different regions of today. It covers the conventional urban land use models, social areas, CBD, urban industrial location, urban renewal and the rural-urban fringe, urban structures of colonial cities, African cities, Islamic cities, Latin American cities, Chinese and Soviet cities, as well as the new city in the Information Age. The course will be useful for urban administration, planning and marketing.

Assessment: 40% coursework, 60% examination.

GEOG2080. Regional geography of Europe (6 credits)

Whereas physically Europe could arguably be regarded as just a part of Asia, it distinguishes itself culturally. So, the course first tries to define Europe and describe its characteristics. It does this by looking at cultures, landscapes and especially the cities. The fascinating thing about Europe is that as diverse historically, culturally and economically as it is, it chose to overcome differences and to actively engage in an unprecedented integration process. In its second part the course looks at this process and its political, economic and spatial implications. It links the European experience to globalisation and to integration processes in Asia. The last part of the course then explores the recent development of selected regions within Europe. Apart from introducing a unique continent to the participants the course provides an understanding of interrelated political and regional developments.

Assessment: 40% coursework, 60% examination.

GEOG2081. Sustainable urban transport (6 credits)

This course introduces a new approach to apply the concept of sustainability to urban transport. It provides basic knowledge about the operation of urban transportation systems, urban transport planning and policy. Trends in population and urbanization will be associated closely with the patterns of travel behavior and demand, transport technology, and energy use. Personal mobility and accessibility in the urbanized developed and developing worlds will be explained with case studies from around the world. An introduction of trends in intercity travel and freight mobility bring this course further with a regional context, and examples are drawn from the Pearl River Delta as well as other mega-city regions. Assessment: 40% coursework, 60% examination.

GEOG2082. Economic development in rural China (6 credits)

China is still largely an agricultural country with an overwhelmingly rural population. This course examines China's rural and agricultural development issues from both developmental and geographical perspectives. It focuses on three parts of knowledge: basic theories in rural and agricultural development, existing condition and situation of Chinese agricultural production and the rural economy, and hot topics of debates on contemporary reform and development in Chinese countryside. Agricultural and rural problems, government policies and the associated impacts will be analyzed along with natural environment and condition. The course emphasizes the training of critical thinking and comprehensive analytical skills, as well as practical problem-solving ability. The course is primarily organized into three parts: lectures, seminars and a fieldtrip. Part I are lectures, Part II are seminars presented by students, by topics and in groups, and Part III is a field excursion to China. Assessment: 40% coursework; 60% examination.

GEOG2083. Sustainable cities: theory and praxis # (6 credits)

There has been a rapidly increasing literature, since the latter half of the 1990s, on how cities and urban development in general could be made compatible with sustainable development goals. This course will examine key issues, both theoretical and practical, pertaining to this topic—such as the relationship between cities and environmental justice, health, transport, industry, agriculture, planning, designing with nature and waste management. Discussion will also extend to the problem of how best to assess, measure, and monitor progress towards the achievement of sustainable development goals at the city and national levels. Comparing and contrasting various policy and planning approaches exemplified by a range of urban projects introduced and implemented in both developed and developing countries, an overall emphasis will be placed on how 'sustainable cities' need to be considered within a regional and global context.

Assessment: 40% coursework; 60% examination.

GEOG2084. Trees in urban landscape and design # (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course aims to introduce students to trees as the most dominant element of the natural-green compartment of an urban ecosystem. As prominent landscape features and ecological contributors to biodiversities in human settlements, trees are surveyed with respect to composition and structure, environmental conditions for their existence, multiple benefits and functions that they can bring to city inhabitants, and general pattern of greenspaces in cities. Various stress factors dampening tree vigour in the trying urban environment in the above- and below-ground realms, and the resulting arboricultural problems, are considered. The practical management of trees in the urban landscape is elaborated with reference to species composition and selection to match different site conditions, tree planting techniques

and subsequent care, tree preservation and transplanting, and the assessment and valuation of urban trees. By adopting a non-technical approach, students with a science or an arts background with an interest in the natural aspects of cities and practical landscape management are targeted.
Assessment: 40% coursework, 60% examination.

GEOG2085. North America * (6 credits)

Regions are collections of places defined and connected by physical and human characteristics through the process of human observation and analysis. They thus exhibit both unity and diversity in their constituent elements which is dynamic both in time and place. This course provides a basic understanding of the geographical mosaic that is the continent of North America using a regional construct. The basic approach taken is to provide pertinent information on the nature of and our understanding of the topic being examined – North America’s geographic profile, people, culture, economy, urban system, and its relationship with the rest of the world. The key points covered in this course will permit students to grasp enough of the fundamentals to enable further, more detailed, exploration of the issues through self-guided use of materials provided on the course web page. These materials include Supplementary Information, a Glossary of Important Terms, Questions to Ponder, Recommended Reading and hyperlinks to Web sites where additional information can be found.
Assessment: 40% coursework, 60% examination.

GEOG2086. China’s tourism resources and management (6 credits)

This course provides a comprehensive introduction to China’s tourism resources and management. Through the study of the works by a multidisciplinary group of scholars, it explores China’s burgeoning tourism industry. Students are encouraged to trace the historical evolution of China’s development policies regarding the country’s tourism resource and management, as well as the organisations of the industry, including the hotel business and hospitality.
Assessment: 40% coursework, 60% examination.

GEOG2087. GIS in transport planning and management # (6 credits)

The increased complexity and rapid development of transport networks warrant the use of computerized techniques to undertake traffic control, monitoring, and analysis and planning. GIS is emerging as a valuable tool in transport-related areas that involve logistics and use of transportation services. This course covers the requirements and basic methods of constructing a transport database for the management of infrastructure or logistical problems, and for transportation-related services such as delivery and emergency routing. Extensive information and hands-on training in event routing, address matching, hotlinking and the use of data libraries using selected software are presented.
Assessment: 40% coursework, 60% examination.

GEOG2088. China: environment and sustainable development (6 credits)

Due to its geographic characteristics and its large population size, China is prone to natural resources degradation. Environmental problems have been accelerated by the rapid economic growth of recent years, high intensity of energy use, particularly in the industrial sector, and economic and pricing policies that did not take into account the intrinsic market value of the resources. These factors combine to cause over-exploitation of natural resources. This course comprises three main sections. Following the introduction, Section I provides an overview of the state of the natural environment of the country. Section II focuses on the institution, legislative and administrative framework for environment protection and nature conservation. Finally, Section III discusses the government’s strategy for the environment and

sustainable development as spelled out in recent Five-Year plans and China's Agenda 21.
Assessment: 40% coursework, 60% examination.

GEOG2089. The Pearl River Delta: development and interaction with Hong Kong (6 credits)

With the cross-boundary relocation of Hong Kong manufacturing activities, the Pearl River Delta (PRD) has experienced rapid economic growth, industrialization and urbanization since China's Opening and Reform initiated in the late 1970s. The PRD and Hong Kong have become inextricably linked together through the increasing cross-boundary movements of capital, people, goods, information and other activities especially since the 1990s. The objective of this course is to shed light on the significant changes in the PRD and economic restructuring in Hong Kong over the past two decades, as well as the socio-economic interaction between them. It examines the evolution and changing patterns of the regional integration under the unique framework of the "One Country Two Systems" (OCTS) and the newly established "Closer Economic Partnership Arrangement" (CEPA) between the Mainland and Hong Kong. Emphasis is placed on the nature, underlying factors and mechanism that account for the promising development and intensive interplay in the region.
Assessment: 40% coursework, 60% examination.

GEOG2090. Introduction to geographic information systems (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to the computer-assisted techniques of geographic data analysis, collectively known as GIS, which involve the overlaying and merging of spatial data layers. The principles of such an approach will be discussed focusing on the nature of the spatial data, raster and vector data structures, data transformation and geocoding, modeling techniques, and accuracy evaluation of spatial databases. Students must complete a simple project embodying the application of the GIS concept in a real-life situation.
Assessment: 40% coursework, 60% examination.

GEOG2091. Principles and practice of ecotourism (6 credits)

Ecotourism is the result of increasing interest amongst consumers in exploring the natural world as an alternative to more conventional holidays, along with a desire to reduce the environmental and cultural impact of their activities. This course introduces to students the basic principles and practices of ecotourism, including its prospects and problems from the points of view of host populations, tourist guests, environmentalists and tourism organisations. It leads students to examine the delicate interactions between tourism and the ecosystem by studying cases from five continents. It also encourages them to explore the prospects of ecotourism development in China through examining ecotourism practice in the country.
Assessment: 40% coursework, 60% examination.

GEOG2093. Visitor management in parks, heritage sites, and recreation areas (6 credits)

Parks, heritage sites, and recreation areas increasingly serve as international tourist attractions and play an important role in the international tourism industry. Visitor use of these areas may contribute significantly to sustainable local communities. However, overuse of parks and protected areas by visitors may result in problems. Visitor management and the related issues of perception of service quality and customer satisfaction, therefore assumes an important role in parks, heritage sites, and recreation areas management. The course examines various concepts and strategies for visitor management of parks, heritage sites, and

recreation areas. It also addresses the issue of assessing service quality and customer satisfaction for the management of diverse visitors.

Assessment: 40% coursework, 60% examination.

GEOG3028. Overseas field trip (6 credits)

This course is open **ONLY** to geography major students and requires them to complete one 'two weeks' overseas residential field camp in the summer after the second-year of study, and to produce a field work report on the field trip which will be assessed by the teachers leading the field trip groups.

IMPORTANT NOTICE: Geography majors, who have participated in the overseas field trip and enrolled in this course and who subsequently change their course enrolment in such a way that they would no longer be Geography majors will be deemed to have **FAILED** to meet the requirements of this course, since they will no longer be Geography majors. In such a situation, the enrolment of those students in GEOG3028 will become **INVALID** and they will be required to replace it with another 6-credit course in order to fulfill their degree requirement.

Assessment: 100% field report.

GEOG3035. Advanced urban survey (6 credits)

Prerequisite: Either GEOG2078. Urban geography I: growth, function and pattern of cities

Or GEOG2079 Urban geography II: city structure and urban land use models

The course examines the divergent forces shaping urbanization and growth of different parts of the world and the responses of various national governments to such dynamics and their consequences. This is done through lectures and small group discussions on conventional urbanization theories, globalization and national urbanization. Examples will be taken from developed countries such as United Kingdom and USA, socialist countries such as China, and Third World countries such as India and South Korea. Each student will need to choose one country for a case study. He/she will be directed by the lecturer to do the basic reading and to collect the necessary data. Through the case study, he/she has to apply the general theories, concepts and methodologies learned in the lectures in a participatory manner. He/she has to present the case study as a project report in the form of a long essay of about 5,000 words, which is the basis of coursework assessment. The course will be useful for advanced and professional studies in human geography, planning and social sciences in general.

Assessment: 100% coursework.

(Each student has to present a case study as a project report in the form of a long essay of about 5,000 words.)

Department of History

First-year Courses

HIST1003. Information technology for historical studies (3 credits)

This course will satisfy the requirements for the Information Technology component of the first-year curriculum. Students will learn a range of information technology skills within the framework of the historical discipline and will consider how best to apply information technology developments both critically and creatively in the pursuit of their historical studies. Students will be exposed to a variety of learning situations, especially workshops in computer laboratories. Students enrolling in HIST1003 must also enroll in another history course in the same semester.

Assessment: 100% coursework

HIST1008. The world at war (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

By the end of 1941, the entire world was engulfed in war, a war from which the world would emerge in ruins and permanently altered. This course surveys the origins and the course of the Second World War. Here we will examine fascism, national socialism, and German and Japanese expansionism policies. Much attention will focus on the military struggle between 1939 and 1945: tactics, strategy, and major battles. Then we will also examine the occupation policies of the New Order, collaboration and resistance, mass bombings, social change, the concentration camps and the Holocaust in some details. The course will conclude with an analysis of war-time diplomacy, which was the origins of the Cold War.

Assessment: 100% coursework

HIST1010. An introduction to European history and civilisation (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course introduces students to the development of European civilization from its earliest beginnings in the Fertile Crescent through the classical age of Ancient Greece, and the Roman Empire, to the Middle Ages, the Renaissance, the Reformation, the Enlightenment and the French Revolution. Selected highlights from these topics will be treated in the lectures and seminars and coursework assignments will seek to establish linkages between modern western civilization and its historical foundations. This course is valuable for history students, but should also appeal to others studying literature, art, music or philosophy. It will be especially useful for European Studies Majors. All students are welcome.

Assessment: 100% coursework

HIST1012. From imperial to colonial: nineteenth century Hong Kong (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course starts with looking at Hong Kong under Qing rule. It then goes on to examine the impact of British colonialism on this tiny outlying Chinese territory. Attention will be given to the colonial administration, the social scene, and the economic development of the new British colony until the end of the nineteenth century.

Assessment: 100% coursework

HIST1013. Doing history (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course teaches basic methods of historical research to students who intend to be history majors in their second and third years. Lectures will introduce the context in which have developed the methods that historians use to study documents, process information, organize information, and write historical papers. Seminars will investigate each of these topics in detail. Lectures and seminars will take place in the first 5 weeks of the semester. At the end of the semester, mentoring sessions focusing on the process and final production of a portfolio will guide students as they write an essay for any other 6-unit history course. Students enrolling in HIST1013 must also enroll in another 6-credit history course in the same semester.

Assessment: 100% coursework

HIST1014. The early modern world (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course offers a broad historical survey which aims at introducing students to the various interactions between the major civilizations of the world from the time of the European Renaissance until the early

phase of the Industrial Revolution. The geographical coverage of the course will include Europe, Asia, the Middle East, Africa and the Americas. The course will adopt a comparative approach where possible and will be particularly concerned with the theme of globalisation. This course does not aim to be a comprehensive survey of all aspects of the history of the early modern world, but it does range widely in attempting to acquaint students with important developments in the areas of culture, religion, politics, society, and the world economy.

Assessment: 100% coursework

HIST1015. Foundations of modern China: Dimensions of Qing history (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course starts with a series of survey lectures that cover political, institutional, social, economic, intellectual, and diplomatic trends from 1644 and 1912. These survey lectures will be followed by an in-depth study of two particular themes of Qing history, to be decided each year by the teachers who lecture this course. The historical significance of early, mid, and late Qing will be highlighted.

Learning will be facilitated by the use of a web-based "electronic textbook". Students will be required to write an essay, do a document study, and work as a team on a project related to Qing history.

Assessment: 100% coursework

HIST1016. The modern world (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course focuses upon providing a broad, non-specialized introduction to the nineteenth and twentieth-century world, and assumes no previous historical training on the part of its clientele. It will be organized around such themes as: industrialization, liberalism, conservatism, socialism, communism, nationalism, the impact of major wars, revolutions, the rise and fall of fascism and communism, the decline of the Western empires, the growth of popular democracy, urbanization, globalization, the changing status of women, cultural and environmental change.

Assessment: 100% coursework

HIST1017. Modern Hong Kong (6 credits)

This course is a broad historical survey of Hong Kong from the late Qing Dynasty until recent times. It explores the history of this Chinese city and former British colony from several angles: Chinese history, British colonial history, world history, and as a place with its own identity. The goals of the course are to introduce you to the history of Hong Kong; to introduce you to the ways historians have approached this history; and to help you think, read, and write analytically and critically.

Assessment: 100% coursework

Second and Third Years

SURVEY COURSES. Survey courses will normally be offered by the Department in alternate academic years. Students should consult the Department to find out which surveys are to be offered each year.

CHIN2225. History of the Ming period (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic history of China from the fourteenth century to the seventeenth century.

Assessment: 50% coursework, 50% examination

CHIN2226. History of the Qing period (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course deals with the dynastic history of China from the seventeenth century to the twentieth century.

Assessment: 100% coursework

HIST2003. Twentieth-century China, Part I: from revolution to revolution, 1900-1949 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course examines the political, social, economic, intellectual and diplomatic history of China from the last decade of Manchu rule to the Communist victory in 1949. Attention will be drawn to the historical forces of continuity and change, and to the themes of nationalism, modernization, militarism, democracy and revolution.

Assessment: 100% coursework

HIST2004. Twentieth-century China, Part II: from revolution to modernization, 1949 to present (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course examines the consolidation of Communist power, the dynamics and constraints of revolutionary ideology, and the PRC's quest for modernization and great-power status. Attention will be drawn to the Chinese Communists' methods of thought and work, and to the historical forces of continuity and change.

Assessment: 100% coursework

HIST2005. History of Hong Kong, Part I (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Beginning with the pre-British situation, the course proceeds to examine the establishment of colonial rule, the development of Chinese social institutions such as the Tung Wah Hospital, the emergence of Chinese revolutionaries led by Sun Yat-sen, the anti-colonial boycotts culminating in the general strike of 1925-26, and the events leading up to World War II. Throughout, emphasis is placed on thematic and interpretive concerns.

Assessment: 100% coursework

HIST2006. History of Hong Kong, Part II (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course examines the extraordinary development of Hong Kong after World War II. Hong Kong's relations with China, rapid industrialization in the 1950's and post-industrialization in the 1980's, the interdependence of real estate and financial development, immigration and cultural identity, social problems and riotous disorders, contrasts between modernization and westernization are major thematic concerns. Emphasis will be placed on developing interpretive understanding of historical events.

Assessment: 100% coursework

HIST2008. Meiji Japan, 1868-1912 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The Meiji leadership centralized Japan after centuries of decentralization. This course attempts to assess the quality of the leadership, identify the problems of centralization, analyze the effectiveness of the solutions, and appraise Japan's achievement at the end of the period especially in terms of its international standing.

Assessment: 100% coursework

HIST2009. Modern Japan since 1912 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course is a general survey of the domestic political, economic, and social history of Japan since 1912. Some of the developments covered will be industrialization, changing systems of international relations (including World War II and the subsequent Allied Occupation), and rapid political change and economic growth in the postwar era.

Assessment: 100% coursework

HIST2011. Nineteenth-century Europe, Part I: 1780-1850 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The modern Spanish philosopher Jorge Santayana once declared: 'Those who do not know the past are forever condemned to repeat its errors'. Many of the characteristics of contemporary Europe have their origins in the nineteenth century: urbanization and industrial change; rapid and misunderstood social development; the centrality of Germany; nationalism, which threatens to pull apart nations and the multi-national empire of Russia; new alliance patterns that are not so new; revolutionary political change; the development of a true civil society; and the threat from ultra-right-wing populist groups.

In this course we will cover European developments from the origins of the French Revolution through the Revolutions of 1848. Major topics discussed will include the Industrial Revolution, the 'isms' such as liberalism, conservatism, and nationalism, the Revolutions of 1848, and foreign affairs.

Assessment: 100% coursework

HIST2012. Nineteenth-century Europe, Part II: 1850-1914 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Many of the characteristics of contemporary Europe have had their origins in the nineteenth century. Today Europe has to deal with several of the problems World War I either failed to resolve or in itself caused.

In this course we will cover European developments from the unifications that transformed Central Europe up to World War I. Major topics will include the second Industrial Revolution, socialism, social and cultural changes, reaction to those changes (anti-semitism and proto-fascism), imperialism, nationalism and liberation movements in Eastern Europe, *fin-de-siècle* Europe, the decline of the multi-national empires, and the origins of World War I.

Assessment: 100% coursework

HIST2013. Twentieth-century Europe, Part I: The European Civil War, 1914-1945 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This period can be seen as a Thirty Years' War fought over the problem of Germany, beginning with the First World War, 1914-18, and climaxing with the total defeat of Germany at the end of the Second World War, 1939-45. Tensions between the Great Powers were exacerbated by new ideologies such as Fascism, Nazism and Communism, which appeared in Europe as part of a general crisis in Western Civilisation after the First World War. An attempt will be made to evaluate the debate between different schools of historians on what Fascism, Nazism and Communism signified. Finally one of the main aims of the course is to describe, and explain, the mass murders involving the deaths of millions carried out by a new breed of leaders such as Adolf Hitler and Joseph Stalin.

Assessment: 100% coursework

HIST2014. Twentieth-century Europe, Part II: Europe divided and undivided, 1945-1991 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

After the Second World War, Europe was divided into two camps, with Germany itself split into Western and Communist portions. The survey of the Western camp will focus on British, French and West German politics, social change, student revolts, and the growth of the consumer society and mass culture. In studying the 'Other Europe', the course will concentrate on the way Communism evolved and changed in the Soviet Union and its Eastern European empire, concluding with the dramatic popular revolutions that so suddenly toppled the Communist regimes in Eastern Europe in 1989 and the even more momentous collapse of Communism in the former Soviet Union in 1991. As the pace of change in the whole of Europe increased so dramatically in 1989, the course ends with a series of questions. What are the prospects for European unity, economically and politically? What role will the new unified Germany have in Europe? What are the prospects for Russia and the other republics that have emerged from the ruins of the Soviet Empire?

Students studying this course would find **Part I: The European Civil War, 1914-1945** very useful.

Assessment: 100% coursework

HIST2015. The United States before 1900 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This is a general survey history of the United States from the colonial era up to 1900. Emphasis will be primarily on the nineteenth century. Key areas of focus include: industrialization and economic growth, urbanization, frontier communities, immigration, slavery, the Civil War, socio-political reform movements, and the Spanish-American War. This course is continued by **The United States in the twentieth century**, though the two courses can be taken separately.

Assessment: 100% coursework

HIST2016. The United States in the twentieth century (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course continues the survey of United States history begun in **The United States before 1900**,

though it can be taken separately. It traces the United States' response to its adjustment from an agrarian, small-scale society to a large-scale, urban, industrialized nation, characterised by large organizations. Concurrently, it covers the development into a global power with interests throughout the world.
Assessment: 100% coursework

HIST2018. The foreign relations of China since 1949 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course studies the development of China's foreign relations after 1949 with reference to historical influences, ideological premises and practical political, strategic, and economic considerations. Special attention is given to the interaction between theory and practice in China's foreign relations, the evaluation of the impact of China's foreign policy on international politics and vice versa, and the assessment of the major approaches to the study of the topic.

Assessment: 100% coursework

HIST2021. Nineteenth century Russia, 1800-1905 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course surveys developments within the Russian Empire from the duel between Alexander I and Napoleon through the Revolution of 1905, the dress rehearsal for the Revolution of 1917 which destroyed Tsarism. This course focuses on internal developments, rather than on foreign policy; and thus includes topics such as Slavophilism vs. Westernizers, the tsarist reaction, and then reform under Nicholas I and Alexander II, the revolutionary movement from the Decembrists to the Bolsheviks, industrialisation, the Nationalities Question, and the peasantry before and after Emancipation. This course requires no prior knowledge of European history.

Assessment: 100% coursework

HIST2024. A century of business in Hong Kong, 1842-1949 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course traces the business history of Hong Kong after it became a British colony until the Communist Takeover of China in 1949. The topics covered in the course include Hong Kong as a centre of opium trade, the development of Western businesses, the mode and practice of Chinese businesses such as the Nam Pak Hong, relations between Western and Chinese businesses, the impact of Chinese nationalism, the world wars, the Great Depression, and communist control in China on Hong Kong business.

Assessment: 100% coursework

HIST2025. British Hong Kong and China 1895-1945 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course follows the development of the relations between British Hong Kong and China from 1895 to 1945. On the one hand, it was a relation of confrontation, with Chinese governments increasingly using the slogan of anti-imperialism as a political weapon against foreign powers. This affected China's policies towards Hong Kong. On the other hand, it was a relation with benefits for both sides. When China was in political turmoil, people from the mainland migrated to Hong Kong. This had significant effect on Hong Kong's economic and cultural developments. This course analyzes the interaction between these two

seemingly contradictory relations, with special emphasis on the rise of the position of the Chinese in the colony.

Assessment: 100% coursework

HIST2026. Interpreting Japanese history through movies (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course will view films, mainly Japanese and some Western, and study the interpretations of Japanese history and tradition present in the films. In addition to being a historiographic exercise, the course will examine popular attitudes toward the past.

Assessment: 100% coursework

HIST2027. The foundations of international trade and finance in the modern world (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The modern economic world of international trade and finance is the result of developments which took place in Europe from the early Renaissance through to the Industrial Revolution. This course will examine the foundations of these developments focusing particularly on the pre-modern industrial base of Europe, the change in European trading patterns from a Mediterranean to an Atlantic dominance during the Renaissance, the growth of banking and other financial institutions in the early modern period, and the role of urbanisation as a background to the major economic advances which took place during the Industrial Revolution. This course is open to students from all faculties.

Assessment: 75% coursework, 25% examination

HIST2031. History through film (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course looks at the manner in which film has portrayed events in history, considering the degree to which film can enhance or be detrimental to our understanding of history.

Students may expect to gain some appreciation, not just of the films themselves, but of the degree to which any movie is the product of a certain historical period and reflect its values and preoccupations. This course should be particularly enlightening to students who taking other United States history courses and American Studies majors.

Students are expected to produce one term paper, a comparative study of at least two films, to participate in class discussions, and to make at least one presentation in class.

Assessment: 100% coursework

HIST2034. An Introduction to the history of education in Hong Kong (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The course will provide students with the opportunity to relate educational developments in Hong Kong to contemporary opinion and other socio-economic pressures. It has been designed to introduce students to the perspectives, methods, and resources of history as they can be applied to educational matters and not merely to present a set of non-dispute-worthy "facts" about past Hong Kong schools. As such, it is essentially a form of social history.

Assessment: 100% coursework

HIST2035. The Bauhinia and the Lotus: Culture and history of the two SARs (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Prior to the Opium War, Macao was the major theatre for the first encounter between China and the West. After Hong Kong had been ceded to Great Britain by The Nanjing Treaty, Hong Kong soon replaced Macao as the centre for Sino-Western cultural and technical interchange.

Even though before 1997 and 1999 both Hong Kong and Macao were under the administration of Western countries, both have remained a predominantly Chinese society with their own unique heritage and history.

The aim of this course is to introduce to the student the development of Hong Kong and Macao's history and cultural heritage. It emphasizes the role and function of Hong Kong and Macao history in modern and contemporary Chinese history and its cultural interactions with the West.

Assessment: 100% coursework

HIST2037. Germany between the two World Wars: The rise and fall of Adolf Hitler (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The inter-war years between 1918 and 1945 were a time of traumatic upheaval in the history of modern Germany. After World War I freedom and democracy in the Weimar Republic were threatened by nationalism, fascism, socialism and communism. These pressures were intensified by economic tensions and high unemployment rates. The miserable conditions contributed to the rise of the Nazis and Adolf Hitler, an extreme nationalist who wanted a reawakened, racially united Germany to expand eastward at the expense of the Slavs. After finally seizing power in 1933, Hitler installed a totalitarian state wiping out all democratic institutions. The Nazi persecution of the Jews and occupation, exploitation and domination of much of continental Europe in World War II became one of the blackest chapters in the history of Europe. With the fall of Berlin and the suicide of Hitler in 1945, the German people were able to gain freedom and democracy again. In our course we will not concentrate on Hitler alone but study the outcome of World War I and the revolutions of 1918-19 on the mentality of the German people, consider the problems of the fledgling Weimar Republic, and discuss the era of fascism in Germany and Italy, the nazification of culture and society, the Holocaust, and German aggression against Europe in World War II.

Assessment: 100% coursework

HIST2038. Germany, 1871-1990: From unification to reunification (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Germany, the largest country in Western Europe, needed a long time to build up a sovereign national state and to develop a common national identity. After the unification was achieved in 1871, internal and external political struggles led the country in two devastating wars in 1914 and 1939. Following the Second World War two independent German republics, controlled by their respective superpowers USA and USSR, developed into a capitalist and communist society. Reunification was finally achieved in 1989/90 by the collapse of the Soviet power in Central Europe. The course surveys the most important developments within the German Imperial Empire, the Weimar Republic, Nazi Germany, and the Federal Republic and German Democratic Republic. We will study topics such as conservatism, liberalism, nationalism, imperialism, and socialism, the two World Wars, and concentrate on the developments and changes of the different political and economic systems in modern German history.

Assessment: 100% coursework

HIST2039. War and peace: Conflicts and conflict resolutions since 1945 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

War is an extension of politics. True or false? The objective of the course is to understand a) the nature of military conflicts, war and warfare and b) the ways and means of maintaining and keeping peace without resorting to war. In-depth case studies of major conflicts and conflict resolutions will be provided.

Assessment: 100% coursework

HIST2040. Life in Tokugawa Japan, 1603-1868 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Tokugawa society was colourful, interesting, multidimensional and full of energy. The period witnessed great urban expansion and advancement in rural technology. Students will enjoy looking at the ways of life of Tokugawa lords and merchants living in the great cities and castle towns, and that of the peasants in the countryside. The rich cultural life of the period also makes fascinating study.

Assessment: 100% coursework

HIST2042. The history of sport (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The course will focus on the development of modern sport in Europe (with a strong British focus), and develop historical themes of class, gender, age, 'race' and locality. Particular emphasis will be given to the history of sport in relation to themes such as nationalism, empire and public health, in addition to the role of the state, the media and business in shaping and controlling the nature of contemporary sport. In brief, the course examines how and why sport has been located at the interstices of gender, race and class and has produced, and been generated by, multiple and contested social identities.

Assessment: 100% coursework

HIST2046. The modern European city: Urban living and open spaces (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Over the past century and a half, the majority of Europeans have become urban dwellers. On an individual, civic, national and international level, every aspect of social life has been influenced by this evolution. Consequently, the study of cities provides a powerful perspective upon European history. An essential part of the process of urbanisation involved the allocation of urban open spaces to specific social and cultural functions. A key focus for public and private life, the city's open spaces – parks, gardens, streets and squares – had a fundamental influence upon the nature of urban living. As those in positions of power influenced the provision and purpose of these areas important developments in European social, economic, cultural and political life were linked closely to the evolution of open spaces in cities.

In this course the changing use and allocation of urban open spaces and the evolution of meanings of public and private space will provide a lens through which the development of modern European cities will be analysed. The importance of open spaces will be addressed with recourse to a number of key themes, including the 'greening' of cities of the nineteenth century, the construction of ideal Fascist and Socialist cities in the 1930s, functionalism and post-war reconstruction, and the 'sustainable city' of the 1990s. By the end of the course the students will not only be more familiar with historical approaches to urban 'space' but will also have received an introduction to the evolution of European cities and the

changing cultural importance of public and private open spaces.
Assessment: 100% coursework

HIST2062. From empire to EU: Culture, politics and society in twentieth century Britain (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

The course explores British politics, culture and society from the eve of World War I to the dawn of the third millennium. We will analyze and seek to understand some of the fundamental transformations that have occurred over the last century examining a number of prominent themes, including party politics, Britain and Europe, empire and decolonisation, and domestic social transformations. Additionally, we will look closely at how the fortunes of different social groups evolved across the period, focussing in particular on ethnic minorities, women and young people.

This will be an issues-based course, exploring themes of 20th century British history in relation to the wider European context and exploring how they have had an impact on the nature of British and European society today. The subject matter of the course will be shaped around the study of the evolving political system, the effect of industrial (and post-industrial) change on contemporary society, and the relationship of Britain to its former empire, to Europe, and the rest of the world.

Assessment: 100% coursework

HIST2063. Europe and modernity: cultures and identities, 1890-1940 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

In this course we look at key social and cultural aspects of European 'modernity' in the nineteenth and twentieth century, exploring in particular the way Europeans from all kinds of backgrounds were defined and defined themselves in relation to work, leisure, race, gender, regions and cities. We look at the impact of new forms of cultural expression such as advertising, cinema, sport and leisure, as well as the identities (of age, class, gender, race and ethnicity) which Europeans adopted and rejected in their pursuit of ways of belonging within the cultural parameters of urban modernity. In relation to this we will consider expressions of enthusiasm for 'the modern,' as well as outbursts of dissatisfaction or irritation with modern civilization, expressed not just in aesthetic forms but also in violence against those identified as 'outsiders.'

Assessment: 100% coursework

HIST2064. Sweat and abacus: Overseas Chinese in Southeast Asia (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course provides a broad survey of Chinese business development in Southeast Asia from the 15th century until modern times. Through four key themes of migration, diaspora, entrepreneurship and network, this course traces the evolution of the Chinese business communities overseas and examines the growth and expansion of their networks in Southeast Asia. The social, economic and cultural aspects closely associated with the Chinese business history, such as early Chinese migration, dialect organizations, guilds, occupational structure, Chinese merchant culture, as well as the transformation and globalization of Chinese business will also be discussed.

Students will be provided with an opportunity to understand the growth of Chinese business in Southeast Asia from a historical perspective. They will also have the opportunity to examine Chinese migrant and business experiences in a comparative sense with case studies being drawn from various countries of the region.

Assessment: 100% coursework

HIST2065. Workshop in historical research (6 credits)

The research skills and methodologies used by historians are based on the critical analysis of primary and secondary sources. Competency in these skills and an acquaintance with the various methodologies of the historian are central to advanced studies in the historical discipline, but these skills and methodologies are also highly transferable to the workplace. In this course, students will work in small groups on a research project. Learning will be through directed group discussions and coordinated individual research tasks. The course will introduce students to a wide range of historical sources, equip them with the skills to analyse and interpret those sources, and will also encourage students to develop leadership and team-work roles in solving real historical problems.

Assessment: 100% coursework

HIST2066. Narcotic culture: A history of drugs (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

The course will examine the global history of psychoactive substances from roughly the sixteenth to the twentieth century with special emphasis on opium in China. The first sessions will trace the spread of tobacco, tea, coffee and alcohol across the globe after the fifteenth century, before the uses of opium in the eighteenth and nineteenth centuries are elucidated in greater detail. We will also look at the rise of semi-synthetics, including morphine, heroin and cocaine, in the early twentieth century. The emphasis will be on the social dimensions and cultural meanings of substance use, as we look at context and consumption rather than at questions of policy and supply only: the intricate and diverse ways in which drugs interact, collude and even collaborate with human beings in a range of diverse social contexts give psychoactive substances their particular historical interest. The rise of prohibition in the twentieth century will be critically examined in the light of new scholarship, in particular in the case of China, where the anti-opium campaigns constituted the cornerstone of a growing international movement against 'drugs'.

Assessment: 100% coursework

HIST2067. Sex, gender and modernity in China (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course is designed to provide the student with the basic knowledge necessary to assess the different theories and problems of gender history and sensitively and electrically to apply these skills to the China-field. We will concentrate on the first half of the twentieth century, although frequent excursions will be made into the late imperial period in order to question the presumed disjuncture between 'tradition' and 'modernity'. As the course adopts a comparative perspective, it will also provide specific examples from European history, with an emphasis on France and England. A number of case studies will be critically examined in order to highlight the strengths and pitfalls of gender history.

Assessment: 100% coursework

HIST2068. The intellectual history of twentieth-century China (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course follows the thematic approach, with attention paid to both the intellectual leaders and the intellectual developments in China during the twentieth century. The leaders include Liang Qichao, Cai

Yuanpei, Chen Duxiu, Hu Shi, Li Dazhao, Lu Xun, Gu Hongming, Lin Shu, Liang Shuming, Tao Xisheng, Chen Yinke, Chen Lifu, Xiong Shili, Zhang Wentian, Qian Mu, etc. The discussion of the intellectual waves focuses on such themes as traditionalism, cultural conservatism, liberalism, westernization, modernization, and Marxism.

Assessment: 100% coursework

HIST2069. The history of American popular culture (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

From its inception as a nation, the people of the United States have been educated and entertained via modes of vernacular or popular culture. This course moves chronologically from the 18th century to the present looking at various expressions of popular culture as they developed and gained in popularity among the American public. As the course progresses, we will look for connections between popular culture in the U.S. and Asia, particularly in Hong Kong. Drawing on diverse samples of historical evidence (newspapers, magazines, advertisements, circus and vaudeville playbills, political cartoons, radio and television programs, films, and Internet materials, etc.) we will explore difference and common ground between various historical eras and their use of popular culture. Issues to be considered include: The definition of popular culture; Connections between popular culture and the construction of national identity, race, class, gender, ethnicity, and religion; The significance of popular culture in processes such as Americanization/globalization; The importance of looking historically at the way popular culture helps shape and is shaped by particular events.

Assessment: 100% coursework

HIST2070. Stories of self: History through autobiography (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

Autobiographies – stories of self – have been published in all cultures for centuries and they are still very popular today. In the recent past, autobiographical narratives have become a powerful tool for authors who wish to express their individuality, interrogate and transcend cultural constraints, protest political oppression, heal childhood wounds, run for public office, or pay the rent. Historians looking for "evidence" of the past contained within the autobiography face a variety of fascinating (and often complex) issues. This course, designed for students who are interested in links between autobiography and history, explores the following questions: What can autobiographies teach us about the past? What are the uses/pitfalls of using autobiographies for purposes of historical research? How has the autobiographical form changed over time? What are the links between memory and identity (gender, ethnicity, religious background, caste/class, etc.) in various autobiographies? What how are autobiographies shaped by/reflections of culture? How do historians approach autobiography differently from scholars in other fields? During the term students will read, write, and critique various autobiographical narratives. Text selections will be drawn mostly from the U.S., Hong Kong, and China.

Assessment: 100% coursework

HIST2071. Joseph Stalin: His life, policies and historical assessment (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course will focus on the life and policies of Joseph Stalin, leader of the Soviet Union from 1929 up through 1953. He is one of the most significant figures, not only for Russian and European history but for the entire world. His policies impacted on all countries. On a possibly positive side there was the "Stalin Revolution", which made Russia an advanced and powerful industrial state, able to withstand the Nazi

juggernaut. On the negative side, there was the Great Purges, and forced migration of entire peoples. Through repression, Stalin made the Soviet Union into one of the world's most tightly controlled societies, and the course will examine how and why this occurred. The German invasion of the Soviet Union made Stalin a Generalissimo, and the course will examine Stalin as a Commander of Soviet forces. After the war Stalin contributed to causing the Cold War, and the course will examine how and why. Another section in the course will cover the issue of whether or not there was a Stalinism, and whether it directly resulted from Marxism-Leninism.

Assessment: 100% coursework

HIST2072. A history of modern European warfare (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course will survey the evolution of modern warfare through the study of selected episodes in European (an Europe's two extensions – Russia/Soviet Union and the United States) military, naval, and aerial history from the dynastic and commercial wars of the eighteenth century, the French Revolutionary and Napoleonic Wars, the limited wars during the nineteenth century, the colonial wars, World War I, World War II, the proxy wars during the Cold War, Korea, Vietnam, through the war in Iraq earlier this year. While emphasis will be given to the larger conflicts, such as the two World Wars, attention will be given to less familiar but still important conflicts, such as the Crimean War, the Boer War, the Russian Civil War, the Spanish Civil War, Algeria and Palestine, and the Afghan Wars. The topics discussed will include causes of wars, technological changes, military strategies and tactics, social and economic changes, genocides, intelligence and espionage, and the use of ideology and propaganda in the conduct of warfare.

Assessment: 100% coursework

HIST2073. Prussia in the age of absolutism and reform, 1648-1815 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

Brandenburg-Prussia and the Hohenzollern Dynasty dominated the period of German history between the end of the Thirty Years' War and the French Revolution. Under the Great Elector and the Prussian Kings, Prussia became a military and political power within Europe, demonstrating its strength in many European wars. It also practiced mercantilism, religious toleration and an enlightened absolutism. The reign of King Frederick the Great (1740-1786) is marked by wars, economic initiative, and promotion of Enlightenment ideas. Prussia's capital Berlin became a European centre of science and culture in those years. During the Napoleonic period, the country was able to start a reform movement that paved the way to a modern German nation state.

The course will be organized around such themes as: political rivalries and wars in the 17th and 18th centuries; economic, social and intellectual changes in early modern Europe and their effects on Brandenburg-Prussia; mercantilism; enlightenment; absolutism and enlightened absolutism; religious toleration; promotion of sciences by academies; the development of Berlin and Potsdam as royal residences; the defeat of the Prussian army by Napoleon; the Prussian Reform Movement of Stein and Hardenberg; and the war of liberation.

Assessment: 100% coursework

HIST2076. Germany and the Cold War (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

During the Cold War period, Germany was divided into two independent states for more than forty years:

The western-oriented Federal Republic of Germany (FRG) and the eastern-oriented German Democratic Republic (GDR). Under the auspices of the respective superpowers, USA and USSR, the Bonn and the East Berlin governments developed their own political and economic systems but also a distinct way of life in society and culture. In the international scene, the FRG was a founding member of the European Communities and became one of their staunchest supporters, while the GDR found itself reduced to satellite status inside the Soviet-dominated Eastern Bloc. The 'German Question' remained open until the sudden downfall of the socialist-communist East Berlin regime in 1989 and the peaceful reunification in 1990, events, which also marked the end of the Cold War in Europe.

The course will not only treat Germany as a case study of the Cold War period but will also deal extensively with important phases, milestones and persons in the history of the divided country in a comparative approach.

Assessment: 100% coursework

HIST2077. Eating History: food culture from the 19th century to the present (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course is an introduction to selected aspects of the study of food culture through historical analysis. We will discuss examples of food preparation, distribution, marketing, and consumption from the early 19th Century to the present.

Assessment: 100% coursework

HIST2078. Renaissance Europe 1453-1648 (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The Intellectual upheavals of the Renaissance and Reformation changed the cultural and religious outlook of the whole European continent and opened the way for the emergence of the modern European state. This course therefore begins by considering the classical background to the Renaissance in Europe and seeks to explain how the intellectual changes of the fifteenth and early-sixteenth centuries contributed to the awakening of religious dissent in the 1520s. These developments are placed in the context of the general political history of the period and the course traces their impact through to the end of the Thirty Years' War.

Assessment: 100% coursework

HIST2079. Early Modern Europe 1648-1789 (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course examines a crucial period of European history in which the emergence of the modern state, the birth of capitalism, and the expansion of European influence into the American and Asian hemispheres laid the foundations of the modern world. While the course concentrates primarily on political changes in Europe between the Thirty Years' War and the French Revolution, considerable attention will also be paid to social, economic and cultural developments in this period. This course therefore provides a backdrop to the events of the nineteenth and twentieth centuries which have helped to shape modern Europe.

Assessment: 100% coursework

HIST2085. The History of Modern Sexual Identity and Discourse (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes).

This course will focus on two 'new sciences' arising in the late nineteenth century that have shaped the

modern understanding of sexual behaviour – sexology and psychoanalysis. It will look at some of the key thinkers who pioneered sexology – such as Havelock Ellis, Edmund Carpenter, Richard von Krafft-Ebing, and Maria Stopes – alongside the acknowledged founder of psychoanalysis Sigmund Freud. It will investigate primary sources in sexual science that have been subject to censorship and not generally available, until recently, for comparative study with Freudian discourse. Though the texts of sexology and psychoanalysis often start from different premises, all have been instrumental in the development of modern sexual language, assumptions and practices. It will contextualize their collective thinking by considering the impact of the emergent women's movement, of Darwin's evolutionary theory, of urban culture, and of secular modernity. It will study the historiographical debate (particularly among gay and feminist theorists) as to whether these early investigators of sexology and psychoanalysis formulated progressive or repressive, revolutionary or conservative definitions of sexuality. It will explore the far-reaching consequences that these thinkers have had on attitudes to the body and people in the form of reproductive control, eugenics, race, homosexuality, the 'woman question,' and the politics of sexual identity.

Assessment: 100% coursework

HIST2086. Bismarck: The Iron Chancellor (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Otto von Bismarck, a member of the Prussian nobility, began his political career as a conservative deputy in the Prussian diet, became Minister-President and served as Chancellor of the new German Empire. He is regarded as one of the leading European statesmen in this time. During his life span from 1815 to 1898, dramatic upheavals in political, constitutional, economic and social history took place in Prussia and in other parts of Germany, which had a deep impact on European history in the 19th and early 20th centuries. Therefore, the course will not deal with Bismarck's personality and career stations alone but will study the German Confederation and the German Empire, the Revolutions of 1848-49, the Unification Wars with Denmark, with Austria and with France, German domestic and foreign policies since 1871, and major developments that led into the First World War.

Assessment: 100% coursework

HIST2087. The Vietnam Wars (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Indochina, in particular Vietnam, had been under French control as either a full colony or a protectorate since the late nineteenth century. During World War II, the Japanese occupied Indochina, an occupation that spurred the Vietnamese to resist continued French colonial rule. From 1945 on, for the next thirty-years, Vietnam was engaged in a series of wars. In this course, we shall examine these various wars and their significances: decolonization and the French War, 1945-1954; the Cold War which featured the American involvement in Vietnam with all its bitter repercussions; a Civil War between a Communist North and a "capitalist and free" South; the War at Home—repercussions in the US and elsewhere; and the Fall of South Vietnam, Peace, and Reconciliation as a new Vietnam formed.

Assessment: 100% coursework

HIST2088. From Communism to Capitalism: Eastern Europe and the Soviet Union after 1980 (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Since 1980, the once perceived unchanging Communist Empire stretching from Berlin to Vladivostok has

been gripped by huge, revolutionary changes—politically, economically, socially and culturally. In this course we will first examine the causes for these changes, including the Prague Spring in 1968 and the Dissident movement within the Soviet Union. Then we will examine Communist attempts at reform, including “Goulash Communism” in Hungary, and most significantly, the advent of Mikhail Gorbachev with his twin policies of *Perestroika* and *Glasnost* in the Soviet Union. The failure of reforms and repression all from above, as seen in Poland’s declaration of martial law in December 1981, caused Revolutions to erupt first in Eastern Europe in 1989, and then in the Soviet Union itself in 1990 and 1991. By the start of 1992, Communism crumbled everywhere in Europe. People embarked on a revolutionary transition in all fields of life and commerce. We shall examine how successfully this transition has proved throughout Eastern Europe and the former Soviet Union, and what the implications of this unprecedented change have meant for the region and for Europe as a whole.

Assessment: 100% coursework

HIST2091. The British Empire (6 credits)

This course examines the British Empire from the late eighteenth century to the end of the twentieth century. The British Empire once spanned so much of the globe that it is impossible to understand the history of the modern world (including Hong Kong) without considering the role of this empire. Topics include the cultural and material foundations of empire; the economic, political, and social consequences of empire; the relationship between metropole and colony; collaboration and resistance; the dynamics of race, gender, and class; the relationship between empire and art, new national and local identities; decolonization, independence, and nation-building; and the contemporary legacies and implications of empire. The goals of the course are to introduce you to the history of the British Empire; to introduce you to the ways in which historians have approached this history; and to help you think, read, and write analytically and critically.

Assessment: 100% coursework

SEMINAR COURSES Except for the Theory and Practice of History and the Dissertation elective, the seminar courses listed may not be offered every year. Students should consult the Department to find out which Seminars are to be offered each year.

CHIN2235. Sources and methodology (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course intends to provide a thorough training in research methodology related to the study of Chinese history. The ideas of noted ancient and contemporary Chinese historians will be drawn on. Particular emphasis is placed on the use of reference works and information search through internet.

Assessment: 100% coursework

GEOG2060. An introduction to archaeology (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

How do you know where you are going until you know where you have been? This course will introduce students to the role archaeology has played in the construction of humanity’s history and prehistory. It is intended to be a broad survey of the discipline, its discoveries, scientific and analytical tools and applications. The course will assist students in recognizing new cultural dimension within the landscape around them and provide a sound basis for further study here or abroad.

Assessment: 40% coursework, 60% examination

HIST2032. Case studies in women's history: Hong Kong and the U.S. (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This seminar course will explore themes and issues in women's history/gender history in the 19th and 20th century. By focusing on Hong Kong and the U.S., students will work within a comparative framework to explore difference and common ground between societies and selected historical periods. Topics include: varieties of women's reform movements, gender and World War II, and gender and economic transformation in the late 20th century.

Assessment: 100% coursework

HIST2048. The history of young people in modern Europe (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Responses to and representations of young people provide a valuable insight into the values of the society and the culture which generated them. The aim of this course will be to compare changing experiences of growing up with evolving representations of the life-stages used to identify the young (childhood, adolescence and youth) in nineteenth- and twentieth century Europe. It therefore considers what it has meant to be young in different times and places. Through comparison of experiences and representations the course will reconsider the validity of terms used to describe the young, highlight the social, political and cultural motives for advancing different roles and representations young people and generate a broad insight into regional patterns of similarity and difference in the European history of this demographic group. This course aims to teach students the importance of the historical context in shaping young people's lives by addressing variables such as class, gender and race. It will also introduce students to a variety of different methodological and theoretical approaches to the topic.

Assessment: 100% coursework

HIST2052. Social issues in Hong Kong history (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Based on the reading and analysis of documentary sources, this course will explore social problems such as the survival of Chinese customs, poverty, social mobility, housing, immigration and emigration, and professionalization during Hong Kong's colonial period.

Assessment: 100% coursework

HIST2053. The Cold War (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course focuses upon the emergence and development of the Cold War in the 1940s and 1950s. It takes into account the new scholarship based on evidence from former Soviet, Eastern European, and Chinese archives since the early 1990s. Students are expected to make extensive use of documentary sources.

Assessment: 100% coursework

HIST2074. Historical studies using computers (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

purposes.)

Computers and information technology play an increasingly important role in historical research and teaching. This course will take up a problem in contemporary history and investigate it using information technology to the fullest extent. The course is run in conjunction with a course taking place at The College of William and Mary, Williamsburg, Virginia, USA, and most classes will use internet video conferencing so that teachers and students at W&M and HKU can continuously interact. The course offers a range of skill-learning opportunities for students who intend to pursue historical studies at advanced levels. It will also be valuable to students who wish to teach history in the schools where information technology has become common under government initiatives.

Assessment: 100% coursework

HIST2075. Directed reading (6 credits)

The aims and objectives of this intensive reading course are to provide the opportunity for students to pursue a specialized topic with a faculty member. Throughout the semester, the student and teacher will consult regularly on the direction of the readings and on the paper or papers (not to exceed 5,000 words) that will demonstrate the student's understanding of the material. This course cannot normally be taken before the fourth semester of candidature and subject to approval by the Head of department.

Assessment: 100% coursework

HIST2080. Classroom across the Pacific: American History and Anthropology (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course will study aspects of American history, culture and anthropology. Like HIST2074 Historical Studies Using Computers, this course is an internet-based classroom: all lectures will use internet video conferencing and other technologies to link classrooms and students at HKU and The College of William and Mary. At the end of the teaching period, HKU students will take a field trip to the United States to complete research projects through cooperative field work with their American counterparts. The students will conduct independent research projects in consultation with each other on an issue of central focus relevant to American history and culture, to be determined each year.

Assessment: 100% coursework

HIST2081. Gender and history: Beauty, fashion and sex (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

How do societies define what it means to be a man and a woman? Everyone, whatever their age, sex or social status, has an opinion on this issue, even if this is not always articulated consciously. Often, in fact, ideas about gender - the relations between the two sexes - are assumed to be 'natural' or 'normal' and timeless. However, by analysing the question of what being a 'man' and being a 'woman' means at different times and in different places this course sets out to illustrate how these identities are socially constructed. HIST2081 aims to introduce students to the various ways through which scholars have sought to understand gender over time. Beginning with the earliest efforts to write 'women's history,' selections from the recent deluge of historical writing and new research on gender will be highlighted.

The topics to be covered will include beauty norms, dress reform, prostitution, women's suffrage, the impact of War on constructions of manhood and womanhood, permissiveness in the 'swinging' sixties and so on, down to the present day. A comparative geographical focus will be used, and the course will draw on a wide variety of material from the Early Modern period to the 21st Century, to facilitate the study of changing gender norms.

Assessment: 100% coursework

HIST2082. Europe and its other (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course is an interdisciplinary exploration of European perception and understanding of non-European peoples and cultures from the 18th – 20th centuries. The objective of the course is to show how Western representations of non-Europeans were shaped by the various political debates, scientific theories and colonial ideology that dominated European societies of the time. The course uses the conceptual frameworks and methodologies of history and cultural studies to analyze a wide range of primary materials that include visual documents, travel narratives, fiction, scientific texts, philosophical treatises, and documentaries.

Assessment: 100% coursework

HIST2083. Gender, sexuality and empire (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

This course investigates the ways in which concepts of gender and sexuality have been used in British and French imperial discourse during the 19th and 20th centuries to manage their relationships with the colonized peoples and to showcase the superiority of European civilization. Part one of the course examines how the male colonial identities were constructed through the sexualization of the colonized subjects while the second half of the course focuses on the multiple roles of European women in the colonies. The course uses the conceptual frameworks and methodologies of history and cultural studies to analyze different types of historical narratives ranging from archival documents, personal memoirs and correspondence, travel accounts to autobiographical texts.

Assessment: 100% coursework

HIST2084. Sexing the spirit: The history of the modern feminist challenge to Christianity (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

Surveys of mainstream feminism have generally omitted the subject of faith. They have taken as a given wholesale feminist hostility to Christianity and have concluded that religion has little importance in the life of modern women. Recent global events are a reminder however that religion remains a passionate if volatile force in contemporary culture and politics. This course will consider a history that has been overlooked – the critical engagement of modern feminism with Christianity. The course will begin with two mid-twentieth century events that have proved to be crucial catalysts in the active feminist response to Christian religion. The first was the ordination of Florence Li Tim Oi as the first Anglican woman priest in Hong Kong in 1944. The second was Simone de Beauvoir's publication of *The Second Sex* in 1949. Li's courageous war-time decision to pioneer female entrance into the all-male clerical establishment constitutes a reformist engagement with Christianity, while De Beauvoir's rejection of Christianity as a patriarchal institution oppressive to women reflects a more radical and uncompromising stance. Their two positions can be read as representational of the compatibility/incompatibility, reform/revolutionist debate that feminists have had with Christianity since the rise of second wave feminism in the 1960s.

Assessment: 100% coursework

HIST2089. History's Closet: Clothing in Context (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

What we wear reflects our individual and collective histories as well as our sense of style. Clothes offer a glimpse into the age and place in which we live. Building on recent work in cultural history and studies of material culture, this seminar course will consider how bodies have been adorned in diverse historical contexts. We will pay attention to the way modes of dress and design reflect political ideology, nation, culture, gender, religion, class, and ethnicity. Looking for continuity across and ruptures within historical periods, students will examine various types and styles of clothing in the social/historical contexts in which they were made and worn. Adopting a thematic rather than chronological approach, students will participate in weekly discussions of topics ranging from childhood fashion in the Middle Ages to hip-hop style in 20th century.

Assessment: 100% coursework

HIST2090. The Great Famine (1959-61) (6 credits)

(This course is also offered to second and third-year non-BA students for inter-Faculty broadening purposes.)

The aim of this course is to introduce students to the history of famine through a sustained investigation of the Great Famine in China from 1959 to 1961. From a comparative perspective, the student will be introduced to a series of historical debates on the definition, causation and nature of famines with specific reference to some of the major famines of the nineteenth and twentieth century, including the Great Irish Famine of 1845-8, the Great Bengal Famine of 1943-4 and the Great Ukrainian Famine of 1932-22. From a methodological perspective, the student will work with a wide range of primary and secondary sources on the Great Famine in China (1959-61) in order to develop specific skills of documentary analysis and historical interpretation. While the seminar will look in detail at the nature of the famine and its political, economic, social and demographic dimensions, we will try to get closer to an understanding of the famine as it was experienced from the bottom up: how did ordinary people cope with hunger and death on such a large scale? A grassroots approach will lead us to consider not only a variety of experiences among victims and survivors across the social spectrum, but also a number of methodological issues on the use of primary sources, the nature of memory and the making of official historiography.

Assessment: 100% coursework

HIST3015. The theory and practice of history (6 credits)

(This course is open to third-year students only.)

This course aims to acquaint students with some of the theoretical and practical considerations which underlie the study and writing of history by considering the development of the discipline of history from its beginnings in the ancient world through to the postmodernist critique. The course is especially recommended to those who wish to pursue history at the postgraduate level. All students taking the **Dissertation elective** are required to take **The theory and practice of history**.

Assessment: 100% coursework

HIST3017. Dissertation elective (12 credits)

(This course is open to third-year students only.)

This is a research course which requires submission of an extended written dissertation. All students taking the **Dissertation elective** are required to take **The theory and practice of history**.

Assessment: 100% coursework

HIST3022. History by numbers: quantitative methods in History (6 credits)

(This course is open to third-year students only.)

This course seeks to introduce students to the various quantitative approaches used by historians in their research and to provide an opportunity for students to learn to use some of these methodologies in a workshop environment. Its focus is therefore both theoretical and practical, and students will learn skills which will be readily transferable to the workplace. This course is available only for History majors in their final year of study.

Assessment: 100% coursework

HIST3023. History research project (6 credits)

(This course is open to third-year students only.)

Students who wish to undertake a research project on a specialized historical topic in either semester of their final year of study may enroll in this course with the approval of the Head of Department. The course aims at providing an opportunity for intensive research leading to the production of a long essay (not exceeding 7,000 words) which will be supervised by a faculty member with expertise in the chosen area of study.

This course is open only to History majors and minors.

Assessment: 100% coursework

HIST3024. Writing Hong Kong History (6 credits)

This course looks at various approaches to Hong Kong's history from the late Qing Dynasty until recent times. Rather than focusing on the history of Hong Kong, we will look at the ways in which historians have dealt with certain themes, issues, and problems. Thus we will be less concerned with dates and facts than with analysis and interpretation. The goals of the course are to introduce you to the ways in which historians have approached Hong Kong's history; and to help you think, read, and write analytically and critically.

Assessment: 100% coursework

Department of Japanese Studies

First Year

Compulsory Courses

JAPN1011. Introduction to Japanese studies (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

Introduction to Japanese studies aims to provide a broad-based description of Japanese society and culture. The course will cover various different aspects of Japan, such as history, geography, politics and government, religion and literature. Students will be assigned to a tutorial group either in the first or second semester.

This course is available primarily for those Arts Faculty students who enrol in Japanese language, but students from other faculties may also take the course subject to available places.

Assessment: 100% coursework (presentations, essay assignments, etc).

JAPN1088. Japanese language I (Part 1) (9 credits)

This introductory course is designed for total beginners in the study of the Japanese language. The fundamentals of the Japanese language are presented through a carefully graded syllabus. To cultivate

overall Japanese-language ability, emphasis will be placed equally in developing all the four basic skills in speaking, listening, reading and writing.

Assessment: 100% coursework (including tests, quizzes, assignments/class performance and final oral test).

N.B. For pedagogical reasons, some of the classes in this course will be taught in Cantonese. Non-Cantonese speakers should ensure that they are in a class taught through the medium of English. Since Chinese characters will not be specifically taught but will be an integrated part of the course, students who have no prior knowledge of Chinese characters should seek the advice of their teacher at the beginning of the semester.

JAPN1099. Japanese language I (Part 2) (9 credits)

This elementary Japanese course continues to focus on proficiency-based foreign language learning, developing the students' overall Japanese-language ability established in Part 1. While the focus is on a thorough understanding of basic Japanese grammar, it also aims to develop communicative competence in a diversity of situations. At the end of the course, the successful learner's proficiency level should reach a level of proficiency adequate for the transition to higher-level Japanese studies in the second year.

Assessment: 100% coursework (including tests, quizzes, assignments/class performance, and final oral test).

Prerequisite: **JAPN1088 Japanese language I (Part 1)**

N.B. Since Chinese characters will not be specifically taught but will be an integrated part of the course, students who have no prior knowledge of Chinese characters should seek the advice of their teacher at the beginning of the semester.

Optional Courses

JAPN1009. Introduction to Japanese linguistics (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

The course is an introductory linguistics course with particular reference to the Japanese language. The language will be viewed from both diachronic and synchronic perspectives and frequent cross linguistic comparisons are made with Cantonese, Mandarin and English. The purpose is to stimulate interest in this particular language and facilitate the acquisitional process while promoting general understanding of human language behaviour, which is deemed important to the interested second language learner.

Assessment: 100% coursework (reading assignment summaries, test, presentation, midterm paper and term project).

JAPN1066. Japanese language I(a) (Part 1) (3 credits)

(This course is offered to first and second year non-BA students for inter-Faculty broadening purposes.)

This course is open to first and second year non-BA students with no previous knowledge of the Japanese language. It aims to provide the fundamental knowledge of Japanese language and is intended to help students build basic linguistic and communicative skills in Japanese.

Assessment: 100% coursework.

JAPN1077. Japanese language I(a) (Part 2) (3 credits)

(This course is offered to first and second year non-BA students for inter-Faculty broadening purposes.)

This course is continuation of **Japanese language I (a) (Part 1)** and provides a balanced training in reading, writing, speaking and listening to develop students' Japanese language ability established in Part 1.

Assessment: 100% coursework.
 Prerequisite: **JAPN1066 Japanese language I(a) (Part 1)**

Second and Third Years

Second Year Courses

JAPN2002. Japan in Japanese (6 credits)

This tutorial-based *language-intensive* course is primarily a reading course only offered to second-year students who have successfully completed **JAPN1088 Japanese language I (Part 1)** and **JAPN1099 Japanese language I (Part 2)**. The course aims to develop the students' reading skills through guided readings on Japanese culture and society. As the students learn to read more fluently, they also become aware of and enhance their knowledge of Japanese culture, and improve their linguistic skills.

Assessment: 100% coursework (weekly assignments, vocabulary quizzes, comprehension tests, project work (short report and presentation)).

Prerequisite: **JAPN1099 Japanese language I (Part 2)**

JAPN2007. Modern Japanese short stories (6 credits)

This is a tutorial-based *language-intensive* course for second year students. It aims to introduce students to the richness of Japanese literature, through careful study of a number of modern short stories. Students will be required to read original Japanese texts written by representative writers. Themes and ideas in the stories will be thoroughly discussed. Literary styles and techniques of different writers will be analysed and contrasted in order to enhance students' analytical power and critical thinking. Another aim of the course is to improve students' reading and speaking skills through literary appreciation and discussion. Grammatical explanation will be given in class in order to facilitate understanding.

Assessment: 100% coursework (tests, presentation(s) and essay assignment).

Prerequisite: **JAPN1099 Japanese language I (Part 2)**

JAPN2009. Translation I (Chinese/Japanese, Japanese/Chinese) (6 credits)

This *language-intensive* course aims to provide students with basic skills in translating Japanese texts into Chinese and vice versa. Students will translate short, simple texts, chosen to illustrate various sentence patterns in Chinese and Japanese. Texts with more complex structures with a variety of vocabulary and style will gradually be introduced to build up students' skills. Students will be familiarised with a number of reference tools useful in Chinese/Japanese translation and will use them in their work.

Assessment: 70% coursework, 30% examination.

Examination: A two-hour written examination at the end of the second semester.

Corequisite: **JAPN2088 Japanese language II (Part 1) and JAPN2099 Japanese language II (Part 2)**

JAPN2032. The changing image of Hong Kong in Japanese writings (6 credits)

This is a tutorial-based *language-intensive* course for second year students. Throughout the 19th and 20th centuries, numerous Japanese travellers visited Hong Kong for various purposes. As a highly modernized city with a colonial atmosphere, Hong Kong made a very strong impression on these travellers. Japanese records and articles about Hong Kong are thus abundant. In this course, representative passages will be selected and studied in their original texts.

Through reading these materials, we aim to enhance students' understanding of Hong Kong-Japan

relations. Typical images or views of Japanese people on Hong Kong will be investigated in association with their background. Events such as anti-Japan riots, the Diaoyutai issue and the phenomenon of the popularity of Japanese culture among youngsters, which have significant influence on Hong Kong-Japan relations, will be looked at and discussed.

As a *language-intensive* course, we also aim to improve the students' reading capacity by exposing them to various styles of writings. Writing techniques and the presentation of argument will also be noted to strengthen the students' analytical power and critical thinking.

Assessment: 100% coursework (quizzes, presentation(s) and essay assignment).

JAPN2036. Japanese text analysis (3 credits)

The course will use a variety of samples of short Japanese texts which will be read and explained in interactive tutorials. The course objectives are to train students in grammatical and textual analysis of Japanese texts. The aim is to enhance students' understanding of complex grammatical structures, to enable students to analyse and differentiate among different text types, and to grasp the textual elements that ensure the cohesion and coherence of a text. The course has no text book apart from material prepared (and put on Web CT) by the teacher. Students are however expected to use reference works on Japanese grammar as well as dictionaries. This course is a prerequisite for taking **JAPN3007 Translation II - Japanese –English** in the third year.

Assessment: 100% coursework (50% participation, 50% tests and assignments).

JAPN2037. Interpretation I (Putonghua and Cantonese – Japanese) (6 credits)

This elementary course in interpretation is skill-oriented (listening and speaking) with a focus on rendering Putonghua or Cantonese into simple Japanese and vice versa. This course is designed for those who had no previous Japanese training before they were admitted to **JAPN1088 Japanese language I (Part 1)**. A variety of carefully graded teaching material is selected to enhance comprehension and facilitate immediate response in the target language. This course places emphasis on the interpretation of a heard message and the expression of one's intention, not on grammaticality.

Assessment: 100% coursework (oral presentation, listening quizzes, individual assessment)

Prerequisite: **JAPN1099 Japanese language I (Part 2)** (with no Japanese language training prior to Japanese Language I (Part 1))

JAPN2038. Interpretation II (Putonghua and Cantonese – Japanese) (6 credits)

This continuation course from Interpretation I will further enhance students' ability in the reception and production of the target language.

Assessment: 100% coursework (oral presentation, listening quizzes, individual assessment)

Prerequisite: **JAPN2037 Interpretation I (Putonghua and Cantonese – Japanese)** (with no Japanese language training prior to Japanese Language I (Part 1))

JAPN2088. Japanese language II (Part 1) (6 credits)

This course is a continuation of **JAPN1099 Japanese language I (Part 2)**, and covers elementary Japanese grammar. It is a balanced course involving reading, writing, speaking and listening comprehension. The course aims to provide students with fundamental Japanese language ability.

Assessment: 100% coursework (including tests, quizzes, and assignments).

Prerequisite: **JAPN1099 Japanese language I (Part 2)** or equivalent

N.B. This course is designed for students who have studied only part of elementary Japanese grammar. Students with special/additional Japanese language background (e.g. Those who have attended language courses outside the university, have lived in Japan, or have Japanese parents)

should consult the teachers first to determine the suitability of taking the course. Students may be required to take a qualifying examination.

JAPN2099. Japanese language II (Part 2) (6 credits)

This course is a continuation of **JAPN2088 Japanese language II (Part 1)**, and basic grammar will be completely covered. More training will be provided to enable the students to successfully use the basic grammar already learnt to express themselves in natural and fluent Japanese. Real everyday learning materials will be used to encourage autonomous learning. At the end of the course, the successful learner should have acquired the necessary Japanese language ability and study skills to lead to intermediate level of Japanese proficiency and increased autonomous learning in the third year.

Assessment: 100% coursework (including tests, quizzes, and assignments).

Prerequisite: **JAPN2088 Japanese language II (Part 1)**

N.B. This course is designed for students who have studied only part of elementary Japanese grammar. Students with special/additional Japanese language background (e.g. Those who have attended language courses outside the university, have lived in Japan, or have Japanese parents) should consult the teachers first to determine the suitability of taking the course. Students may be required to take a qualifying examination.

Third Year Courses

JAPN2008. Translation I (Japanese into English) (6 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

This *language-intensive* course aims to provide students with skills in translating Japanese texts into English. Students will have the opportunity to learn how to analyse Japanese sentences in detail and translate them accurately into idiomatic English. We start with simple texts which are chosen to demonstrate a variety of sentence structures, and gradually we progress to more complicated texts, dealing with topics studied in some of the *content* courses. Various types of special vocabulary and style will be introduced as the course progresses. Students will be expected to prepare for class by working on the texts before coming to class. There will be a number of written assignments in which the students will have to analyse sentence structures and prepare written translations of short texts.

Assessment: 50% coursework, 50% examination.

Examination: A two-hour written examination at the end of the second semester.

Prerequisite: **JAPN1099 Japanese language I (Part 2)** or **JAPN2077 Japanese language II(a) (Part 2)**

Corequisite: **JAPN2088 Japanese language II (Part 1)** and **JAPN2099 Japanese language II (Part 2)** or **JAPN3066 Japanese language III(a) (Part 1)** and **JAPN3077 Japanese language III(a) (Part 2)**

JAPN3003. Selected readings in Japanese studies (6 credits)

This tutorial-based *language-intensive* course provides an opportunity to read and discuss prescribed Japanese texts in a specific field of Japanese Studies, and is open to third year students who have successfully completed **JAPN2088 Japanese language II (Part 1)** and **JAPN2099 Japanese language II (Part 2)** and at least one *language-intensive* course. The texts are selected with a view to improving the level of Japanese language proficiency of the third year students.

Assessment: 100% coursework (short quizzes, presentation(s) and essay assignment).

Prerequisite: **JAPN2099 Japanese language II (Part 2)**

JAPN3004. Contemporary Japanese fiction (6 credits)

This *interdisciplinary content* course looks at selected works of fiction written by postwar Japanese writers. Students will be expected to read, understand and analyse representative works of the writers in their original Japanese. Themes, literary techniques and styles of the various fictional works used in the course will be critically discussed in order to help students understand and enjoy Japanese literature in greater depth.

Assessment: 100% coursework (discussions and essay assignment).

Prerequisite: **JAPN2099 Japanese language II (Part 2)**

JAPN3005. Media Japanese (6 credits)

This *language-intensive* course is designed to further enhance students' listening ability of the Japanese language by means of intensive listening to the current Japanese news programme – primarily internet television and radio. Heavy emphasis will be placed on current affairs in Japan.

Assessment: 100% coursework (quizzes).

Prerequisite: **JAPN2099 Japanese language II (Part 2)**

JAPN3006. Extended essay in Japanese studies (9 credits)

This *interdisciplinary content* course may be taken only by third year students who have taken at least 54 credits as part of their BA in Japanese Studies, and who wish to specialize in a particular topic. This topic is to be selected, approved, and discussed under the tutorial guidance of a supervisor, before being written up in either English or Japanese as an extended research essay. The minimum length required is 8,000 words in English, or 10,000 Japanese characters.

Assessment: 100% coursework.

JAPN3007. Translation II - Japanese – English (6 credits)

This advanced translation course aims to help students acquire the necessary skills and strategies to be able to render a variety of Japanese texts into appropriate English. The first objective of the course is to improve the students' competence in both the original language (Japanese) and the target language (English). Students are expected to acquire the necessary grammatical and analytical tools to reach a grammatically and semantically correct understanding of the Japanese text. This objective will be attained through practical exercises in translating Japanese texts into English, both in class and as homework. The second objective is to introduce the students to a number of translation strategies and concepts which can help them evaluate their own translations and those of others. Various approaches to translation and their appropriateness for different types of texts will be discussed. This objective will be reached through lectures, handouts, and practical exercises in evaluating particular translations in terms of the theories introduced.

Assessment: 50% coursework, 50% examination.

Examination: A two-hour written examination at the end of the second semester.

Prerequisite: **JAPN2008 Translation I (Japanese into English)** or
JAPN2036 Japanese text analysis

JAPN3008. Contemporary Japanese popular music (6 credits)

This *interdisciplinary content* course looks at the contemporary Japanese popular music scene since World War Two. The main approach used will be anthropological rather than musicological or ethno-musicological. The course will take a close look at how the Japanese popular music industry was established and developed. It will also examine how the images of particular popular singers and songs were constructed by the music industry, and then revised to take account of the response of audiences. We

will also explore the social and historical situation in which the popularity of a particular singer and song reflects.

Assessment: 100% coursework (assignment, quiz and test).

Prerequisite: **JAPN2099 Japanese language II (Part 2)**

Corequisite: **JAPN3088 Japanese language III (Part 1)** and **JAPN3099 Japanese language III (Part 2)**

JAPN3009. Japanese film (6 credits)

This *interdisciplinary content* course, introduces contemporary Japanese filmmakers (e.g. Iwai Shunji, Kitano, Takeshi, etc.) and their works. Students will read part of scenarios of their major films, watch the films (with Japanese, English and/or Chinese subtitle) and discuss them all in Japanese. The course aims to enhance the students' skills of reading/listening/watching Japanese films and their scenarios, to provide them with the basic knowledge about Japanese films and their makers and to offer opportunities to discuss on Japanese films in Japanese.

Assessment: 100% coursework (presentation and discussions).

Prerequisite: **JAPN2099 Japanese language II (Part 2)**

JAPN3010. Translation II (Chinese/Japanese, Japanese/Chinese) (6 credits)

This *language-intensive* course is a continuation of **JAPN2009 Translation I (Chinese/Japanese, Japanese/Chinese)**. It aims to further develop students' skills in translating more complex passages written in Japanese and Chinese. Passages will be chosen from established sources in Chinese and Japanese covering various topics and subjects.

Assessment: 70% coursework, 30% examination.

Examination: A two-hour written examination at the end of the second semester.

Corequisite: **JAPN3088 Japanese language III (Part 1)** and **JAPN3099 Japanese language III (Part 2)**.

JAPN3011. Japanese in popular culture (6 credits)

This *language-intensive* course introduces a variety of Japanese found in fairy tales, children's songs, TV programmes, magazines, *manga*, *anime*, popular songs, poems and others. The course aims to provide the students with an opportunity to expose themselves to the various forms of Japanese and to enhance their Japanese language ability. This is a tutorial-based *language-intensive* course, taught in small groups.

Assessment: 100% coursework (short quizzes, presentations and essay assignments)

Prerequisite: **JAPN2099 Japanese language II (Part 2)**

JAPN3014. Project in Japanese business (6 credits)

This *interdisciplinary content* course is designed to integrate the student's knowledge of the Japanese language, society and culture, and to apply that knowledge to a practical internship with a Japanese business organization. Through a short-term internship, the student will gain real life experience dealing with Japanese managers while perfecting his or her communication and interpersonal skills in a Japanese business environment. Following the internship, the students will analyse and report in an essay the problems that he or she has encountered in light of theoretical frameworks.

Assessment: 100% coursework (Proposal, Project, and Essay).

Prerequisite: **JAPN2099 Japanese language II (Part 2)** and at least one *language-intensive* course and two *interdisciplinary content* courses.

JAPN3015. Business Japanese I (3 credits)

This is a *language-intensive* course for third year students. There is one class a week. The class will concentrate on basic skills for spoken business Japanese and on the appropriate behavior that needs to accompany it. Students will learn language styles, vocabulary, and phraseology to deal with a variety of business situations. Those who plan to take **Business Japanese II (JAPN3016)** are normally required to take this course unless they obtain special permission from the course teachers.

Assessment: 100% coursework (assignments, quizzes, and oral interview test)

JAPN3016. Business Japanese II (6 credits)

This is a *language-intensive* course for third year students. There are two classes a week. One class will concentrate on reading and understanding business correspondence and other business documents. Students will learn the formats required in Japanese business correspondence, and how to structure business correspondence on a variety of topics. They will increase their knowledge of formal honorific written Japanese, as well as specialized business vocabulary, in order to allow them to understand and compose these documents. The second class complements **Business Japanese I (JAPN3015)**, which is offered in the first semester. The class will go beyond the basics of spoken business Japanese and focus on more advanced interactive skills. Students will learn appropriate language styles, vocabulary, and phraseology to deal with a variety of business situations.

Assessment: 70% coursework, 30% examination.

Examination: A two-hour written examination at the end of the semester in which the course is taken.

Prerequisite: **JAPN3015 Business Japanese I** / permission from the course lecturers otherwise.

JAPN3020. Advanced translation, Japanese to Chinese (6 credits)

This *language-intensive* course aims to promote students' skills in translating Japanese texts into Chinese. Through discussions and regular practices, students will learn about the subtleties and complexities of Japanese expressions, and how to render them into fluent Chinese. To familiarize students with different genres of writings, various kinds of Japanese texts, for example newspaper articles, literary works etc. will be introduced. A small translation project will be incorporated to enhance language competence and translation skills.

Assessment: 70% coursework, 30% examination.

Examination: A two-hour written examination at the end of the second semester.

Corequisite: **JAPN3088 Japanese language III (Part 1)** and **JAPN3099 Japanese language III (Part 2)**.

JAPN3044. Japanese language II(b) (Part 1) (3 credits)

This course is a continuation of **JAPN2055 Japanese language I(b) (Part 2)**. It aims to provide a quick and effective way to learn essential Japanese, thereby establishing a solid foundation for study of Japanese at a higher level. To make the most of the course, students must commit themselves to working outside the classroom, for example, memorizing the new vocabulary and doing the weekly written and listening exercises. The course is open to third year students of the Faculty of Arts.

Assessment: 100% coursework.

Prerequisite: **JAPN2055 Japanese language I(b) (Part 2)**

JAPN3055. Japanese language II(b) (Part 2) (3 credits)

This course is a continuation of **JAPN3044 Japanese language II(b) (Part 1)**. It aims to consolidate what students have learned in **JAPN3044 Japanese language II(b) (Part 1)**. To make most of the course, students must commit themselves to working outside the classroom, for example, memorizing the new vocabulary and doing the weekly written and listening exercises. The course is open to third year students of the Faculty of Arts who have completed and passed the examination of **JAPN3044 Japanese language II(b) (Part 1)**.

Assessment: 100% coursework.

Prerequisite: **JAPN3044 Japanese language II(b) (Part 1)**

JAPN3066. Japanese language III(a)(Part 1) (3 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

This *language* course is open to students who have successfully completed **Japanese language II(a) (Part 2)**. The course provides further training for the students to obtain a balanced range of language skills. In addition, the course is designed to enhance students' understanding of Japanese society and culture so that they can use the obtained skills appropriately.

Assessment: 100% coursework.

Prerequisite: **JAPN2077 Japanese language II(a) (Part 2)**

JAPN3077. Japanese language III(a)(Part 2) (3 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Japanese language III(a) (Part 1)**. It aims to consolidate students' Japanese knowledge through oral practices and other classroom activities, and further develop their language skills. This course is open to students who have successfully completed **Japanese language III (a) (Part 1)**.

Assessment: 100% coursework.

Prerequisite: **JAPN3066 Japanese language III(a) (Part 1)**

JAPN3088. Japanese language III (Part 1) (6 credits)

This *language* course is a continuation of **JAPN2099 Japanese language II (Part 2)**, and offers a balanced range of language skills, but with an additional emphasis on the applications of linguistic principles and methodology, and on reading skills both general and specialized.

Assessment: 100% coursework (test, quizzes, presentation, homework/portfolio)

Prerequisite: **JAPN2099 Japanese language II (Part 2)** or equivalent.

JAPN3099. Japanese language III (Part 2) (6 credits)

This *language* course is a continuation of **JAPN3088 Japanese language III (Part 1)** and again offers a balanced range of language skills, but with an additional emphasis on the applications of linguistic principles and methodology, and on reading skills both general and specialized.

Assessment: 100% coursework (test, quizzes, presentation, homework/portfolio)

Prerequisite: **JAPN3088 Japanese language III (Part 1)**

Second and Third Year Courses

JAPN2003. Introduction to Japanese literature (6 credits)

This general survey *interdisciplinary content* course deals with Japanese novels, poems, and plays. The aim of this course is to provide students with a basic knowledge of the historical development of Japanese literature. The course covers Japanese myth, *monogatari*, *waka*, *renga*, and *haiku*

Assessment: 100% coursework (tests, presentation(s) and essay assignment).

Prerequisite: Basic Japanese language knowledge is required.

JAPN2010. Japanese business: an anthropological introduction (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course - taught by lectures and tutorials - focuses on various aspects of Japanese business. It is particularly concerned with the social organization and culture of the Japanese salaryman, and deals with such varied topics as company socialization, decision-making, management procedures, gender relations, leisure activities, sake drinking, and so on. The course is open to both second- and third-year students of Japanese Studies, as well as to students from other departments and faculties who may have an academic interest in its contents.

Assessment: 100% coursework (group projects & final essays).

JAPN2011. Anthropology of Japan (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course - taught by lectures and tutorials - is designed to provide undergraduate students specializing in Japanese Studies with a comprehensive introduction to, and understanding of, certain aspects of contemporary Japanese society. As such it will focus on such themes as comics, tourism, sexuality, and TV dramas.

Assessment: 100% coursework (group projects & final essays).

JAPN2014. China and Japan (6 credits)

This *interdisciplinary content* course will examine the history of Chinese-Japanese relations in the context of East Asian world order up to the early twentieth century. Attention will be paid to the fact that the transfer of Chinese culture from China to Japan throughout history has been as much a political process as a cultural one both for China and Japan. The reverse flow of 'acquired' Western culture from Meiji Japan to China in the early twentieth century will also be examined in some detail in order to provide a comparative perspective on the modernization of the two countries. Students must be able to read Chinese. A knowledge of Japanese will be helpful.

Assessment: 100% coursework (presentations and essays).

JAPN2015. Japanese enterprise groupings (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course - taught by lectures and tutorials - concentrates on the study of Japanese enterprise groupings. It will start with three major theoretical perspectives on economic organizations - structural, strategic, and institutional - to enable students to theoretically understand Japanese enterprise groupings. The histories of different enterprise groupings, their operation, and the function these groupings serve will then be examined. As such it will focus on such topics as the special roles of main banks, general trading firms, insurance companies, core member corporations of the groupings, and the so-called preferential trading between core large corporations and their peripheral

companies. Finally, the discussion of these topics will be placed in the context of Japanese and American trade conflicts so that students can have a general understanding of the conflicts.

Assessment: 100% coursework (group projects & final essays).

**JAPN2016. Comparative linguistics: Cantonese and Japanese I
Comparative phonology (6 credits)**

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course will detail the phonological components of Japanese and Cantonese through extensive reading of current theories and a contrastive analysis. Besides construing both common and specific traits of the sound system of human languages, the course will help students familiarize themselves with the most common sets of transcription used in language studies which include the most important one, the International Phonetic Alphabets (IPA).

Assessment: 100% coursework (a series of transcription tests and a final project on comparative studies).

Prerequisite: **JAPN1099 Japanese language I (Part 2)**, or **JAPN1077 Japanese language I(a) (Part 2)** or **Certificate Japanese Courses**

JAPN2018. Popular culture and artistic activity in Japan (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course looks at various aspects of art and popular culture in Japan. It will mainly focus on contemporary Japan, looking at (for example) television, manga (comics), music, tea ceremony, and ceramic art. The main approach used will be anthropological/sociological. We will look at the production and consumption of art and popular culture. How is it produced, by whom, and for whom? Who engages in these artistic or cultural activities, how, and why? We will ask what we can learn about Japanese society by looking at the way cultural and artistic activities are organized and engaged in. We will also look at some examples of art and popular culture in contemporary Japan – such as comics and television dramas – and ask what these texts tell us about Japanese society. Possibilities for coursework include the analysis of such texts and their penetration into other East Asian societies, including Hong Kong. However, it should be noted that a high standard of analysis will be demanded and the theoretical content is significant.

Assessment: 100% coursework (two essays, oral presentation and tutorial participation)

JAPN2019. Communication and society (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course explores the social behaviour of Japanese people that is embedded in their language use. A sociolinguistic approach to Japanese culture is promoted through students' active participation in the empirical analyses of language variation such as dialects, gender difference, and age markers. Coursework also includes the examination of problems that frequently occur in cross-cultural communication.

Assessment: 100% coursework (project, presentation, journal writing, essays).

Prerequisite: **JAPN1099 language I (Part 2)** or equivalent

**JAPN2024. Comparative linguistics: Cantonese and Japanese III
Syntactic features and pedagogical implications (6 credits)**

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course firstly focuses on theoretical discussion of grammatical peculiarities of the two languages in question, from the perspective as two rather distinctively typed natural languages of the world. Next, they are examined and contrasted in relation to potential problem areas when they are respectively considered as the source language as well as the target language in the course of acquisition, i.e. for Cantonese native speakers learning Japanese, and vice versa.

Assessment: 100% coursework (assessment portfolio including lecture and reading summaries, tests presentation and term paper).

JAPN2026. Japanese language III extended (6 credits)

This *language-intensive* course is designed for students who have spent one year studying in Japan or who have a similar level of proficiency in Japanese*. The course introduces activities that integrate the four language skills, listening, speaking, reading, and writing. Coursework assignments include discussions, role-plays, debating, summarizing written documents, expressing opinions in essays, oral presentations, etc. Some of the topics covered in the course are: self-improvement, cultural comparisons, social issues, and international relations.

(* For these students, a recommendation from a teacher of Department of Japanese Studies is required).

Assessment: 100% coursework (classroom performance, homework, project).

JAPN2027. Comparative linguistics: Cantonese and Japanese II Phonological transfer and pedagogy in foreign language acquisition (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Potential areas of native language interference in the acquisition of the pronunciation system in a foreign language are illustrated by native speakers of Cantonese and Japanese. Theoretical discussions and knowledge in **JAPN2016 Comparative linguistics : Cantonese and Japanese I** are used as a basis for training students to predict areas of interference in this *interdisciplinary content* course. Languages such as English, Mandarin, French and Korean will be cited for relevant reference.

Assessment: 100% coursework (tutorial tasks, test, and a final project on pedagogy).

Prerequisite: **JAPN2016 Comparative linguistics: Cantonese and Japanese I - Comparative phonology**

JAPN2029. Japanese popular music and Hong Kong society (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course introduces the way in which Japanese popular music was integrated into the Hong Kong music scene in the 1980s when the influence of Japanese popular music became highly visible. To do so, firstly we will take a close look at the popular music scene in Japan in the 1970s and the 1980s. Secondly, we will examine how socio-political developments in Hong Kong shaped the characteristics of the local popular music industry and affected the way it has selected, imported, and distributed Japanese popular music. Furthermore, the course will look at the changes in the way Japanese popular music was consumed in Hong Kong from the 1990s to the present. By so doing, it aims to give the students an introduction to the contemporary popular music scene in Hong Kong and Japan. The main approach used will be social scientific rather than musicological.

Assessment: 100% coursework (quiz, test and essay).

JAPN2030. Japanese business, culture and communication (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This interdisciplinary content course focuses on intercultural communication involving Japanese professionals. We will explore how and why members of different groups misunderstand each other in spoken, written and electronically mediated communication. We will consider the ways in which people use language to claim and to display their own complex and multiple identities. Rather than imposing one style on all Japanese or Chinese people, we will take a situation-based approach to professional communication across cultures.

Assessment: 100% coursework (projects, presentations and essays)

JAPN2031. The media and Japan (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This *interdisciplinary content* course introduces students to the workings of the electronic media in Japan. We will focus on the following three areas: coverage of the Hong Kong handover; TV documentary programmes on international affairs; and Japanese TV entertainment programmes available in Hong Kong. We will examine how the Japanese media covered the 1997 handover in comparison with other international media organisations. Students will then watch and analyse feature-length documentaries that influenced subsequent decisions of Japanese Government officials. In addition, we will consider how Hong Kong Chinese have distributed and consumed Japanese cartoons, dramas and entertainment shows since the 1970s.

Assessment: 100% coursework (projects, presentations and essays)

JAPN2034. Education in contemporary Japanese society (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Education in contemporary Japan has been both praised for being child-centred and humanistic, and criticized as pressurized and exam-focused. This course tries to sort out the myths from the realities. We look at education from preschools to high schools, and find out how serious problems like bullying and exam pressure really are. We also ask if Japanese education gives all children an equal chance, and look at how Japanese children who have lived overseas cope when they return. A visit to the Japanese schools in Hong Kong is arranged as part of the course, allowing those who take the course to see Japanese education with their own eyes.

Assessment: 100% coursework (two essays, oral presentation and class participation)

JAPN2035. Women in Japan and Hong Kong (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course aims to provide students with an overall knowledge of gender issues in contemporary Japan and Hong Kong. It aims to help students develop an awareness of gender issues in daily life in their own society, as well as to gain knowledge of the historical and cultural background for modern gender roles. The course encourages students to form independent opinions and ideas and to present them cogently and persuasively in speech and writing. Students are also expected to reflect on their own gender role and their assumptions about gender differences, as well as gender discrimination in their own society. Through lectures and tutorials we shall explore various sides of women's lives in Japan while comparing with Hong

Kong.

Assessment: 100% coursework (a research project, reflections, presentations, participation in group discussions)

JAPN2066. Japanese language II(a) (Part 1) (3 credits)

(This course is offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Japanese language I (a) (Part 2)**. It aims to provide a quick and effective way to learn essential Japanese, thereby establishing a solid foundation for study of Japanese at a higher level. To make the most of the course, students must commit themselves to working outside the classroom, for example, memorizing the new vocabulary and doing the weekly written and listening exercises. The course is open to the second and third year students of all other faculties.

Assessment: 100% coursework.

Prerequisite: **JAPN1077 Japanese language I(a) (Part 2)**

JAPN2077. Japanese language II(a) (Part 2) (3 credits)

(This course is offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Japanese language II (a) (Part 1)**. It aims to consolidate what students have learned in **Japanese language II (a) (Part 1)**. To make most of the course, students must commit themselves to working outside the classroom, for example, memorizing the new vocabulary and doing the weekly written and listening exercises. The course is open to the second and third year students of all other faculties who have completed and passed the examination of **Japanese language II (a) (Part 1)**.

Assessment: 100% coursework.

Prerequisite: **JAPN2066 Japanese language II(a) (Part 1)**

Programme in Language and Communication

First Year course

LCOM1001. Introduction to language and communication (6 credits)

In this course, students will be acquainted with two central concepts of language and communication, the concept of a “linguistic situation” and the concept of a “communicative situation.” The former relates language(s) to broader social factors in a given geographical unit and touches upon a number of fields of sociolinguistic investigation (e.g., language and power, bi- and multilingualism, contact languages, language policy and language planning, language and culture, language attitudes, language and ethnicity/identity). Students will research one specific area of a particular linguistic situation and present their findings in class. In turn, the concept of a communicative situation applies to actual linguistic encounters. It is constituted by numerous interrelated variables, as, among other things, the type of communicative situation, the social organizations, the location, the ‘players’ involved, their roles, etc. Students will explore different kinds of communicative situations. They will learn to evaluate the corresponding linguistic behavior and to identify potential sources of conflict, for example in intercultural encounters, where different expectations and conventions regarding a specific kind of communicative situation may collide.

Assessment: 100% coursework

Second and Third Year courses

LCOM2001. Theories of language and communication (6 credits)

The core course following LCOM1001 widens the scope to include theoretical discussions of language and communication. First, we will look at assumptions about language and the philosophical positions they are based on, their merits and shortcomings, as well as possible points of contact between them. Here, students or groups of students will look closer into any one of the assumptions, find exemplary linguistic studies which are based on this particular assumption, and present and discuss them critically in class. Then, we will turn to models/metaphors of communication, for example, the conduit metaphor, the toolmaker model, and the notion of 'language game.' Students will investigate how these models of communication are expressed in the languages they study. An examination of these different models of communication will also enable the students to understand the difference between subjectivist, objectivist, and constructionist conceptions of communication.

Assessment: 100% coursework

LCOM2002. Language in the workplace (6 credits)

People spend a considerable amount of time at work. The workplace thus provides a useful site for investigating various aspects of language and communication. This course will discuss a range of features of workplace discourse and illustrate the impact social factors may have on the ways in which language is used in this context. We will also discuss and compare different methodological approaches and a variety of theoretical frameworks used for an analysis of workplace discourse. These tools will then be used by the students to analyse naturalistic data.

Prerequisites: LCOM 1001

Assessment: 100% coursework

LCOM2003. Language and politeness (6 credits)

This course will discuss various approaches to linguistic politeness. Students will be introduced to a number of theoretical frameworks that have been developed in order to capture and assess this complex concept. A particular focus will be on the question of universality and culturally influenced perceptions of politeness. Moreover, the impact of various social factors (including power, gender and ethnicity) on the performance and perception of linguistic politeness is discussed, and the topic of impoliteness is covered.

Prerequisites: LCOM 1001

Assessment: 60% examination and 40% in-class presentation

LCOM3001. Cultural dimensions of language and communication (6 credits)

This course will look at the interrelatedness of culture and language. First, some influential ideas in the history of linguistics (by Humboldt and Whorf) concerning this topic will be discussed. Then, students will be acquainted with the latest developments in Cultural Linguistics and Cognitive Sociolinguistics, new branches of Cognitive Linguistics that specifically deal with culture-specific realizations in language and language varieties. These methods, which allow for a better understanding of cultural *meaning*, will be carried over to the field of intercultural communication, where functionalist approaches have dominated so far. In their final project, students will be required to apply some of the methods introduced in the seminar to elicit culture-specific realizations in linguistic varieties of their choice.

Assessment: 100% coursework

Language Centre

Arabic Courses

First Year

LANG1036. Arabic for beginners - Part I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to teach complete beginners the basics of Arabic with respect to the four linguistic skills of listening, speaking, reading and writing. Students will also be introduced to the cultures and societies of the Arabic speaking world. Vocabulary and grammar will be presented in a communicative way for a variety of situations, e.g. making introductions, leave-taking, giving directions, buying things, making telephone calls and so on. The emphasis will be on the spoken language, as well as on providing a foundation of basic Arabic script.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1037. Arabic for beginners - Part II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Arabic for beginners – Part I**.

Pre-requisite: Arabic for beginners – Part I.

Assessment: 100% coursework.

This course will be offered in the second semester.

Second Year

LANG2052. Arabic II (12 credits)

This course is taught throughout the year and is a continuation of **Arabic for beginners – Part II**. The aim of this course is to build further on the junior level work and widen the scope of exposure to more complex aspects of the language. The teaching will diversify through the use of more elaborate materials and a variety of teaching techniques including work with authentic audiovisual resources. Participants are expected to consolidate their understanding of Arabic and develop further their production and reception skills.

Prerequisites: Students wishing to be admitted to **Arabic II** will be required to attend an intensive session (Transition 1) usually held in June.

Students wishing to be admitted to **Arabic II** without having previously completed **Arabic for beginners – Part II** and Transition 1 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Arabic II** consists of one written paper of 2-hour duration and a separate oral examination.

Third Year

LANG3049. Arabic III (12 credits)

This course is taught throughout the year and continues to build on the two previous years' work on a more advanced level. The intention is to lead participants towards a fairly comprehensive understanding of Arabic language features through the study of a variety of documents (written, audio and video). The

selection of documents will also serve as a basis for discussion on some social issues regarding the contemporary Arabic-speaking world, as well as the history and cultural backgrounds.

Prerequisites: Students wishing to be admitted to **Arabic III** will be required to attend an intensive session (Transition 2) usually held in June.

Students wishing to be admitted to **Arabic III** without having previously completed **Arabic II** and Transition 2 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Arabic III** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3050. Arabic in an Arabic-speaking country (3 credits)

This course is taught and organized by several Middle Eastern universities and teaching institutions during the summer between the 2nd and 3rd Year of the Arabic B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2052** (Arabic II), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

French Courses

First Year

LANG1001. French I.1 (6 credits)

This course is intended for complete beginners in French and does not require any previous knowledge of the language. Participants will acquire a basic knowledge in the four areas of competence (listening, speaking, reading and writing) with a particular emphasis on communicative skills. Classes will be conducted in small groups in order to ensure a high degree of interactivity between participants and teachers. Conversation groups and laboratory groups will also be arranged separately on a regular basis.

Prerequisite: Nil

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1002. French I.2 (12 credits)

This course is a continuation of **French I.1**. It will further develop the four areas of competence with the view of expanding students' linguistic, pronunciation and communicative skills. As in **French I.1**, separate conversation and laboratory groups will be arranged to complement classroom tuition. In addition, participants will be asked to make use of a range of materials available in the Centre's self-access facilities (which include audio, video, CD Rom and computer programmes), as well as take advantage of resources accessible through various Internet sites.

Prerequisite: Students must have satisfactorily completed **French I.1** or provide evidence that they have attained a comparable level elsewhere.

Assessment: One Examination and a Coursework element which shall count respectively 60% and 40% of the final grade awarded.

The Examination for **French I.2** consists of one written paper of 2-hour duration and a separate oral

examination.

This course will be offered in the second semester.

LANG1035. France today: an overview (3 credits)

The objective of this one-semester course is to present a broad introduction to contemporary France, its geographical features, its institutions and customs, its people and society. The lectures will be arranged as a series of discussions on selected topics which will include, where needed, insights into France's history and evolution, so as to enable a better understanding of the country's identity and characteristics today. France's current relationship with, and presence in, China and Hong Kong will also be discussed.

This course is essentially intended for First Year students. The medium of instruction is English, no previous knowledge of French is required.

Prerequisite: Nil

Assessment: 100% coursework.

Second Year

LANG2001. French language – II.1 (12 credits)

This course is taught throughout the year and continues to build on the first-year work. It offers a balanced range of the various language skills through further syntax acquisition, reading and textual analysis, listening comprehension, composition, translation, oral expression and communicative skills. A wide variety of teaching techniques and materials is used. Small groups are arranged throughout the year to ensure maximum opportunities for interactive practice. All students intending to continue the study of French in their third year are strongly encouraged to attend a summer intensive immersion course in France.

Prerequisites: (i) **French II.1** is open to students who have successfully completed **French I.1** and **I.2**.

(ii) Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

Assessment: One Examination and a Coursework element which shall count respectively 60% and 40% of the final grade awarded.

The Examination for **French II.1** consists of one written paper of 3-hour duration and a separate oral examination.

LANG2035. Introduction to French/Chinese translation – Part I (3 credits)

This course provides an introduction to the task of translating French into Chinese and, to a lesser extent, Chinese into French. Particular attention will be paid to the correction of common errors caused by cross-influences, especially at grammatical and syntactical levels, between French and Chinese.

One important aim of this course is to consolidate and expand the participants' knowledge of the grammar of French through a comparative study with Chinese on key areas, such as verbs and tenses, syntactic placement, pronouns and prepositions. This will be done through a large array of practical exercises focused on translating selected materials from French into Chinese and vice versa. Another important objective of this course is to provide the students with good skills in basic translation techniques.

Prerequisites: (i) **LANG2035** is open to students who have successfully completed **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

(ii) Students may not enrol in **LANG2035** without enrolling in **LANG2001**.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG2036. Introduction to French/English translation – Part I (3 credits)

This course provides an introduction to the task of translating French into English and, to a lesser extent, English into French. Particular attention will be paid to the correction of common errors caused by cross-influences, at grammatical and lexical levels, between French and English.

One important aim of this course is to consolidate and expand the participants' knowledge of the grammar of French through a comparative study with English on key areas, such as verbs and tenses, syntactic placement, pronouns and prepositions. This will be done through a large array of practical exercises focused on translating selected materials from French into English and vice versa. Another important objective of this course is to provide students with good skills in basic translation techniques.

Prerequisites: (i) **LANG2036** is open to students who have successfully completed **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.
(ii) Students may not enrol in **LANG2036** without enrolling in **LANG2001**.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG2037. Introduction to French/Chinese translation – Part II (3 credits)

This course is a continuation of **LANG2035** (Introduction to French/Chinese translation – Part I) taught in the first semester. The objective is to build on the initial work and to widen the scope of investigation regarding the task of translating French into Chinese and, to a lesser extent, Chinese into French. Particular attention will be paid again to the correction of common errors caused by cross-influences, especially at grammatical and syntactical levels, between French and Chinese.

One important aim of this course is to consolidate and expand the participants' knowledge of the grammar of French through a comparative study with Chinese in key areas, such as verbs and tenses, syntactic placement, pronouns and prepositions. This will be done through a large array of practical exercises focused on translating selected materials from French into Chinese and vice versa. Another important objective of this course is to provide the students with good skills in basic translation techniques.

Prerequisites: (i) **LANG2037** is open to students who have successfully completed **LANG2035** (Introduction to French/Chinese translation – Part I) in the first semester. Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.
(ii) Students may not enrol in **LANG2037** without enrolling in **LANG2001**.

Assessment: 100% coursework.

This course will be offered in the second semester.

LANG2038. Introduction to French/English translation – Part II (3 credits)

This course is a continuation of **LANG2036** (Introduction to French/English translation – Part I) taught in the first semester. The objective is to build on the initial work and to widen the scope of investigation regarding the task of translating French into English and, to a lesser extent, English into French. Particular attention will be paid again to the correction of common errors caused by cross-influences, at grammatical and lexical levels, between French and English.

One important aim of this course is to consolidate and expand the participants' knowledge of the grammar of French through a comparative study with English in key areas, such as verbs and tenses, syntactic placement, pronouns and prepositions. This will be done through a large array of practical exercises focused on translating selected materials from French into English and vice versa. Another important objective of this course is to provide students with good skills in basic translation techniques.

Prerequisites: (i) **LANG2038** is open to students who have successfully completed **LANG2036** (Introduction to French/English translation – Part I) in the first semester. Alternatively,

students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

- (ii) Students may not enrol in **LANG2038** without enrolling in **LANG2001**.

Assessment: 100% coursework.

This course will be offered in the second semester.

LANG2043. French language and culture I (3 credits)

This course is designed to review key aspects of France's contemporary society and culture. The lectures will offer a concise introduction to the country's present institutions and society (government, education, politics, economy, work, current affairs, etc.), and discuss essential cultural features (festivals, customs, traditions, etiquette, colloquialisms, way of life, leisure, etc.) The investigation will be supported by an array of documentation drawn from the media, video footage and web sources. This course is also meant to prepare students for the period of time they are advised to spend in the country during the summer. The teaching material used for this course will be in French, and the main medium of instruction will be French.

Prerequisites: (i) **LANG2043** is open to students who have successfully completed **LANG1001** (French I.1) and **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

- (ii) Students may not enrol in **LANG2043** without also enrolling in **LANG2001** (French II.1).

Assessment: 100% coursework.

This course is taught in the first semester.

LANG2044. French language and culture II (3 credits)

This course offers a concise description of the main stages of France's historical development. Key events that have contributed to the shaping of the country throughout its various periods will be presented and their significance discussed. The role and place of the regions within this process will also be discussed, so as to understand the correlation of distinct regional characteristics (e.g., culture, traditions, dialects, architectural heritage, religions) with related historical developments (e.g., invasions and migrations, wars and alliances, social upheavals, regionalisms). The teaching material used for this course will be in French, and the main medium of instruction will be French.

Prerequisites: (i) **LANG2044** is open to students who have successfully completed **LANG1001** (French I.1) and **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

- (ii) Students may not enrol in **LANG2044** without also enrolling in **LANG2001** (French II.1).

Assessment: 100% coursework.

This course is taught in the second semester.

LANG2045. French speech and sounds – Part I (3 credits)

The general objectives of this course are as follows: i. to introduce the fundamental notions of French phonetics; ii. to account for typical pronunciation difficulties encountered by students due to the interference of French, Chinese and English, and iii. to improve students' preception and production of French sounds so as to step up their proficiency in spoken French. Class activities and tutorials will be organized in small groups. The course material will be in French, and French will be used as the medium of instruction.

- Prerequisites: (i) **LANG2045** is open to students who have successfully completed **LANG1001** (French I.1) and **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.
- (ii) Students may not enrol in **LANG2045** without also enrolling in **LANG2001** (French II.1).

Assessment: 100% coursework.

This course is taught in the first semester.

LANG2046. French speech and sounds – Part II (3 credits)

The general objectives of this course are as follows: i. to discuss important phonological aspects of the French language which generally cause difficulties of perception among students; ii. to step up students' proficiency in French with respect to the spoken and aural dimensions; and iii. to prepare students for the period of time they are advised to spend in France during the summer. Discussion topics will cover various phonological phenomena in French connected speech, such as elision and assimilation, *liaison and enchaînement*, as well as prosodic features and their paralinguistic implications. Class activities and tutorials will be organized in small groups. The course material will be in French, and French will be the medium of instruction.

- Prerequisites: (i) **LANG2046** is open to students who have successfully completed **LANG2045** (French speech and sounds – Part I).
- (ii) Students may not enrol in **LANG2046** without also enrolling in **LANG2001** (French II.1).

Assessment: 100% coursework.

This course is taught in the second semester.

LANG2047. French reading course (3 credits)

The objective of this course is to present and discuss a range of genres and styles of writing (literary and non-literary) so as to reinforce reading skills in French. In this process, the participants will familiarize themselves with specific forms and conventions that relate to and/or define these genres. The investigation will also lead to the analysis of how important acts of communication and types of discourses (*viz.*, descriptive, informative, narrative, prescriptive and argumentative) may appear in these various genres and/or mutate across several genres. This course is very practical in nature and will largely rely on small group activities. The teaching material used for this course will be in French, and the main medium of instruction will be French.

- Prerequisites: (i) **LANG2047** is open to students who have successfully completed **LANG1001** (French I.1) and **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.
- (ii) Students may not enrol in **LANG2047** without also enrolling in **LANG2001** (French II.1).

Assessment: 100% coursework.

This course is taught in the second semester.

LANG2048. French songs and lyrics (3 credits)

This course offers a review of key authors who have marked the popular music of the French-speaking world (*la Chanson française*), from the early 20th century to the present day. Through a selection of representative works, the discussion will focus on the reading of texts, their reception by the public, the social context and how, in many instances, particular song lyrics have interacted with and been

incorporated into the French language. The literary nature and the cultural dimension of these lyrics will be emphasized throughout the course. Short biographies of important authors will also be examined. In this course, participants will be able to enhance their proficiency in the language and will gain more understanding of French contemporary popular culture. The teaching material used for this course will be in French, and the main medium of instruction will be French.

Prerequisites: (i) **LANG2048** is open to students who have successfully completed **LANG1001** (French I.1) and **LANG1002** (French I.2). Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

(ii) Students may not enrol in **LANG2048** without also enrolling in **LANG2001** (French II.1).

Assessment: 100% coursework.

This course is taught in the second semester.

Third Year

LANG3001. French language – III.1 (12 credits)

This course is taught throughout the year in lectures and tutorials and continues to build on the first- and second-year work. Lectures will make use of literary texts and authentic documents (press clippings, etc.) from France and other French-speaking countries, with the aim of stimulating critical reading. This study of authentic materials will also help students to investigate further French civilization and contemporary culture.

Prerequisite: (i) **French III.1** is open to students who have successfully completed **French II.1**

(ii) Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

Assessment: One Examination and a Coursework element which shall count respectively 60% and 40% of the final grade awarded.

The Examination for **French III.1** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3003. French/English translation: practical skills (3 credits)

The objective of this course is to reinforce students' language skills in French while making them aware of problems arising from transferring meaning from French to English and conversely. Most of the work will focus on common translation difficulties between the two languages and will propose various ways of dealing with them. This course, very practical in nature, will make use of materials drawn from various sources, e.g., literature, press articles, movies, bilingual documents, business correspondence etc.

Prerequisites: (i) **LANG3003** is open to students who have successfully completed **French II.1**. Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

(ii) Students may not enrol in **LANG3003** without enrolling in **French III.1**.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG3004. French/Chinese translation: practical skills (3 credits)

The objective of this course is to reinforce students' language skills in French while making them aware of problems arising from transferring meaning from French to Chinese, and conversely. Most of the work will focus on common translation difficulties between the two languages and will propose ways of dealing with them. This course, very practical in nature, will make use of materials drawn from various sources,

e.g., literature, press articles, movies, bilingual documents, business correspondence, etc.

Prerequisites: (i) **LANG3004** is open to students who have successfully completed **French II.1**.
Alternatively, candidates will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in prerequisite courses.

(ii) Students may not enrol in **LANG3004** without enrolling in **French III.1**.

Assessment: 100% coursework.

This course will be offered in the second semester.

LANG3005. French and business (3 credits)

This course is an introduction to the use of French in a business context. A variety of topics and situations will be studied, such as the structure of a firm and the way it operates both internally and with its partners, job application etc. The teaching materials used for this course will be drawn from actual sources and discussions will also focus on the local region, with the particular aim to provide the participants with first-hand facts and information on the business relationship between France and Hong Kong.

Prerequisites: (i) **LANG3005** is open to students who have successfully completed **French II.1**.
Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

(ii) Students may not enrol in **LANG3005** without enrolling in **French III.1**.

Assessment: 100% coursework.

This course will be offered in the second semester.

LANG3022. French eastern narratives (3 credits)

This course offers an overview of how French writers and travellers wrote about China, Indochina and Japan over the last three centuries, from the debut of French global travelling (early 18th century) to recent periods. Through the close study of depictions and narrations of encounters, the objective will be to recognize trends, contradictions and invariants in this process of channeling home the Far East, either as a romanticized cultural alternative or as a strong repellent. The extent to which these various accounts and representations have inspired the aesthetics and literary productions of contemporary France will also be examined in some instances. The medium of discussion will be mainly French, and the texts (novel excerpts, press, films, iconography) will be in French or, where appropriate, provided with translation.

Prerequisites: (i) **LANG3022** is open to students who have successfully completed **French II.1**.
Alternatively, students will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite courses.

(ii) Students may not enrol in **LANG3022** without enrolling in **French III.1**.

Assessment: 100% coursework.

LANG3033. French media and advertising (3 credits)

The discussion will start with an inventory of the media in France with a particular focus on newspapers and magazines, including web-based publications. It will examine how the press targets the public, using various areas of specialization (e.g. political affiliation, social and current affairs, women issues, family and domestic sphere, etc.). In a second phase, we shall look into how advertising techniques convey information as well as messages of various natures. While studying a large range of selected materials, we will aim at disclosing the rhetorical devices at work in the process of construction of images, mainly inspired by prevalent social mythologies and stereotyped representations.

The discussion will make extensive use of materials under various forms, such as pictures, posters, advertisements, videos, TV excerpts, press samples, webpages etc. The main medium of instruction is French.

Prerequisites: (i) **LANG3033** is open to students who have successfully completed **French II.1**.

Alternatively, candidates will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in prerequisite courses.

- (ii) Students may not enrol in **LANG3033** without enrolling in **French III.1**.

Assessment: 100% coursework.

LANG3034. French essay writing (3 credits)

In this course, participants will receive tuition and guidance to complete an extended piece of writing in French based on a topic of their choice and in connection with France. Participants will be also encouraged to make use of any materials they may have collected in the course of their stay in the country. The objectives of this course are to increase students' confidence in their handling of written French, to stimulate creative writing and to enhance composition skills.

Prerequisites: (i) **LANG3034** is open to students who have successfully completed **French II.1**.

Alternatively, candidates will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in prerequisite courses.

- (ii) Students may not enrol in **LANG3034** without enrolling in **French III.1**.

Assessment: 100% coursework.

LANG3036. French society and cinema (3 credits)

This course will make use of films to examine French contemporary society. Cinema will be discussed in connection with social changes brought about since the Second World War. The aim of this course is to use images to analyse how cinema through its language and technical evolution reflected the transformations of modern society.

The discussion will start with 'conventional films', e.g., narratives following the nineteenth century literary tradition focusing on plots and characters. The '*Nouvelle Vague*' and its celebrated directors François Truffaut and Eric Rohmer will help to give a better understanding of the revolution triggered by the post war period and marking the birth of a new film language. Students will use films to discuss social, cultural and gender issues. The role of women in French society will be examined through a series of recent films. The main medium of instruction is French.

Prerequisites: (i) **LANG3036** is open to students who have successfully completed **French II.1**.

Alternatively, candidates will be required to provide evidence that they have attained elsewhere a standard at least comparable to a pass in prerequisite courses.

- (ii) Students may not enrol in **LANG3036** without enrolling in **French III.1**.

Assessment: 100% coursework.

LANG3038. French in France (3 credits)

This course is taught and organized by several French universities and teaching institutions during the summer between the 2nd and 3rd Year of the French B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2001** (French Language II.1), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

LANG3053. French literature : the 19th century (3 credits)

French writers such as Chateaubriand, Balzac, Stendhal, Flaubert, Baudelaire and Mallarmé were

instrumental in shaping new directions in French and world literatures. The 19th century is a period of overwhelming transformation, with literature and arts at the heart of this wave of changes. In this course, we shall provide a concise introduction to the key figures and works that have marked the literary scene, as well as to the main schools of thought to which contemporary writers are still indebted. The course is particularly designed to enhance participants' reading and analytical skills in the French language and to broaden their knowledge of French life and culture. The discussion will concentrate on texts and excerpts from works in a variety of genres (fiction, drama and poetry) chosen for their representativeness. Biographies of writers will be discussed too. The medium of instruction and discussion will be French, and the texts examined will be in French.

Prerequisites: (i) **LANG3053** is open to students who have successfully completed **French II.1**. Alternatively, students must provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite course.

(ii) Students may not enrol in **LANG3053** without enrolling in **French III.1**.

Assessments: 100% coursework.

LANG3054. French literature : the 20th century (3 credits)

French literature was the scene of radical explorations and experiences in the 20th century, from the early surrealists to the oulipian generation. Writers were closely connected to social and political developments in France and outside France, as well as open to other forms of art, such as painting and cinema. This course will introduce the participants to the major writers and movements of this period. The course is particularly designed to enhance participants' reading and analytical skills in the French language and to broaden their knowledge of French life and culture. The discussion will concentrate on texts and excerpts from works in a variety of genres (fiction, drama and poetry) chosen for their representativeness. Biographies of writers will be discussed too. The medium of instruction and discussion will be French, and the texts examined will be in French.

Prerequisites: (i) **LANG3054** is open to students who have successfully completed **French II.1**. Alternatively, students must provide evidence that they have attained elsewhere a standard at least comparable to a pass in the prerequisite course.

(ii) Students may not enrol in **LANG3054** without enrolling in **French III.1**.

Assessments: 100% coursework.

German Courses

First Year

LANG1003. German I.1 (6 credits)

This beginners course in German language does not require any previous knowledge of German. Students will acquire basic linguistic and communicative skills in German in speaking, listening, reading and writing. Apart from their regular language classes students will be taught in small tutorial groups to ensure an environment highly conducive to practising language skills.

Prerequisite: Nil.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1004. German I.2 (12 credits)

This course is a continuation of **German I.1**. It combines linguistic and communicative skills in German with a balanced emphasis on speaking, listening, reading and writing. Small tutorial groups, which will be arranged in addition to the regular language classes, will provide the students with an environment highly

conducive to practising their language skills. The course will also encourage students to exploit resources available on the *Internet* and in the Centre's self-practice facilities (*Language Resource Centres* and *Practice Lab*) which provide a wide range of materials for language practice, including audio and videotapes, CD-ROMs and computer programmes. Students intending to proceed to the second year will be provided with a range of self-access materials to maintain and enhance their skills during the summer break.

Prerequisite: **German I.1** or comparable level acquired elsewhere. Students wishing to be admitted to **German I.2** without having enrolled in **German I.1** previously will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere a standard adequate to enable them to complete the course satisfactorily.

Examination: The Examination for **German I.2** consists of one written paper of two hours' duration, an oral examination and a coursework assessment element.

Assessment: Coursework shall count 40% of the grade awarded for **German I.2**.

This course will be offered in the second semester.

Second Year

LANG2004. German II.1 (12 credits)

This course is taught throughout the year and builds on the first year work. It offers a balanced range of the various language skills through further syntax acquisition; reading and text analysis, listening comprehension, composition, oral expression and communicative skills. A wide variety of teaching techniques is used. Small tutorial groups are arranged throughout the year to ensure maximum opportunities for interactive practice. All students continuing their studies in the third year are strongly encouraged to attend a summer intensive immersion course in Germany.

Prerequisites: **German I.2** or comparable level acquired elsewhere. Students wishing to be admitted to **German II.1** without having enrolled for **German I.2** previously will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere a standard adequate to enable them to complete the course satisfactorily.

Examination: The Examination for this course consists of one three-hour paper and a coursework assessment element. In addition, the examination also includes an oral examination.

Assessment: Coursework assessment shall count 40% of the grade awarded for **German II.1**.

LANG2039. Translation exercise I (3 credits)

Students will practise written translations from German to Chinese and Chinese to German using a variety of texts written in different styles. The main aim is to make students aware of the major structural differences between German and Chinese and to provide them with additional information on contemporary German topics.

Co-requisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **Translation exercise I** without having enrolled in **German II.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% coursework.

This course is taught in the first semester only.

LANG2040. Translation exercise II (3 credits)

This course is taught in the second semester only. It is a continuation of **Translation exercise I** and students will practise additional structures and texts.

Prerequisite: **LANG2039** Translation exercise I

Co-requisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **Translation exercise II** without having enrolled in **German II.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% coursework.

LANG2041. Representations of contemporary German society in the media (3 credits)

This course will look at representations of various aspects of contemporary German society in the media over the past 50 years. Topics will include: The changing role of women in advertisements since the 50s, American influences on youth culture and everyday life, society in film, society in music, and contemporary German comedians. For each topic students will study authentic materials in German such as advertisements, TV commercials, newspaper texts, songs, film clips and movies.

Co-requisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **LANG2041** without having enrolled in **German II.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% Coursework.

This course will be offered in the first semester.

LANG2042. Producing German texts I (3 credits)

This course will provide students with the skills needed to produce texts of different styles such as postcards, personal letters, formal letters, short essays, etc. It will strengthen their vocabulary base and at the same time improve and enhance their ability to write in German.

Co-requisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **LANG2042** without having enrolled in **German II.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% Coursework.

This course will be offered in the second semester.

LANG2056. Understanding Germany and the Germans (3 credits)

This course provides an introduction to geographical, political, social and cultural aspects of contemporary Germany. The topics may include: Germany's political system, contemporary life in the unified Germany, family and social life, German customs and traditions and multicultural aspects of Germany society. Emphasis will be given to topics that relate to major current events / developments in Germany. The aim is to assist students in developing a better understanding of contemporary life in Germany and its society as well as to broaden their vocabulary and enhance their German language skills. Guest speakers will be invited to give talks on selected topics. Students will be given the opportunity to discuss and raise in-depth questions during the talks. Classes will be conducted in German and English.

Co-requisites: **German II.1** or comparable level acquired elsewhere. Students may not enroll in **Understanding Germany and the Germans** without enrolling in **German II.1** unless they have previously attained a standard adequate to enable them to complete the course satisfactorily.

Assessment: 100% Coursework.

This course will be offered in the second semester.

Second/Third Years

LANG0002. Introducing Germany and the Germans (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course provides an introduction to contemporary life in Germany. Topics to be covered include: The German Language, Outline of German History, Geographical Diversity, Housing and Urban Development, Federalism, Germany's Political System, Festivals, Family, Youth, Education, Arts and Music, Leisure Time and Sports, Protection of the Environment, Women and Society, and Cultural Representations in Advertising. All lectures will be conducted in English.

Prerequisites: Nil.

Assessment: 100% Coursework.

This course will be offered in the first semester.

Third Year

LANG3007. German III.1 (12 credits)

This course is taught throughout the year and is a continuation of **German II.1**. It offers a balanced range of language skills, and furthers the exploration of various linguistic aspects of the language. Special attention will be given to language registers and patterns, specific terminology and structures used in a variety of fields (literature, press reports, business documents etc.) with the aim of stimulating critical reading. As in **German II.1** small tutorial groups will be arranged to ensure oral fluency and writing techniques as well as the development of oral skills in the context of argued discourses and presentations.

Prerequisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **German III.1** without having enrolled in **German II.1** previously will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere a standard adequate to enable them to complete the course satisfactorily.

Examination: The Examination for this course consists of one three-hour paper and a coursework assessment element. In addition, the examination also includes an oral examination.

Assessment: Coursework assessment shall count 40% of the grade awarded for **German III.1**.

LANG3008. Reading course (3 credits)

This course will only be offered during the first semester. It enhances and extends the language skills acquired during the first and second year through systematic study in the form of text analysis, discussion, translation, etc. of contemporary texts and documents written in different styles such as newspaper and magazine articles, songs etc. drawn from current affairs and life in Germany.

Prerequisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **Reading course** without having enrolled in **German II.1** previously will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere a standard adequate to enable them to complete the course satisfactorily. Students may not enrol in **Reading course** without enrolling in **German III.1** unless they have previously attained a standard adequate to enable them to complete the course satisfactorily.

Assessment: Coursework assessment shall count 100% of the grade awarded for **Reading course**

This course will be offered in the first semester.

LANG3010. German project (3 credits)

In this course students will study in depth an approved topic of their choice in German. They will present their findings in class and submit a written project of around 2,000 words in German at the end of the course. Students wishing to enrol in this course are encouraged to make use of their stay in Germany to collect materials for their project.

Prerequisites: **German II.1** or comparable level acquired elsewhere. Students wishing to be admitted to **German project** without having enrolled in **German II.1** previously will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere a standard adequate to enable them to complete the course satisfactorily. Students may not enrol in **German project** without enrolling in **German III.1** unless they have previously attained a standard adequate to enable them to complete the course satisfactorily.

Assessment: Coursework assessment shall count 100% of the grade awarded for **German project**. This course will be offered in the second semester.

LANG3039. German in Germany (3 credits)

This course is taught and organized by several German universities and teaching institutions during the summer between the 2nd and 3rd Year of the German B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2004** (Deutsch II.1), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

LANG3045. Translation exercise III (3 credits)

Students practise translations mainly from English to German using a variety of texts written in different styles. The texts discussed refer to contemporary life in Germany and other German-speaking countries and usually include the following topics: culture, politics and social life. The aim is to make students aware of the major structural and lexical differences between German and English as well as to provide them with some information on contemporary German topics and life-style.

Co-requisites: **German III.1** or comparable level acquired elsewhere. Students wishing to be admitted to **Translation exercise III** without having enrolled in **German III.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% Coursework.

This course will be offered in the first semester only.

LANG3046. Translation exercise IV (3 credits)

This course is a continuation of **LANG3045 Translation exercise III** enhancing and extending the acquired translation skills. Major topics to be discussed are: German customs and traditions, life experiences of foreigners studying or working in Germany, and integration of immigrants in Germany.

Prerequisite: **LANG3045** Translation exercise III

Co-requisites: **German III.1** or comparable level acquired elsewhere. Students wishing to be admitted to **Translation exercise IV** without having enrolled in **German III.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% Coursework.

This course will be offered in the second semester only.

LANG3047. Producing German texts II (3 credits)

This course will enable students to produce longer texts such as critical essays, short stories, etc. It will provide students with strategies to structure texts of various styles and topics. Sessions will be divided into two parts: Part I will be a discussion and analysis of texts prepared by the students following the introduction of the topic in the previous session. Part II will introduce the topic of the following session. It will teach students how to approach the topic and how to structure their texts. This will be illustrated by a critical reading of sample texts.

Co-requisites: **German III.1** or comparable level acquired elsewhere. Students wishing to be admitted to **LANG3047** without having enrolled in **German III.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% Coursework.

This course will be offered in the first semester only.

LANG3048. Fairytale princes, nature lovers and revolutionaries – The German Romantics (3 credits)

This course explores one of the most popular periods in German literature - German Romanticism. While this period is well known for its emotional and imaginative descriptions of nature and expressions of feelings, many of its writers also had been deeply affected by the historical, political and social events of their times. The course begins with providing a short overview over the literary and historical developments leading up to and following this period, followed by an in-depth study of authentic texts from various authors representing the two main streams of German Romanticism and it concludes by tracing Romantic influences in modern society.

Co-requisites: **German III.1** or comparable level acquired elsewhere. Students wishing to be admitted to **LANG3048** without having enrolled in **German III.1** will have to satisfy the Faculty Board through the Director of the Language Centre that they have attained the requisite standard elsewhere.

Assessment: 100% Coursework.

This course will be offered in the second semester only.

Italian Courses**First Year****LANG1007. Italian I.1 (6 credits)**

This course is intended for complete beginners in Italian and does not require any previous knowledge of the language. Participants will acquire a basic knowledge in the four areas of competence (listening, speaking, reading and writing) with a particular emphasis on communicative skills.

Prerequisite: Nil

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1008. Italian I.2 (6 credits)

This course is a continuation of **Italian I.1**. It will further develop the four areas of competence with the view of expanding students' linguistic, pronunciation and communicative skills. Participants will be

asked to make use of a range of materials available in the Centre's self-access facilities (which include audio, video, CD Rom and computer programmes), as well as to take advantage of resources accessible through Internet

Prerequisite: Students must have satisfactorily completed **Italian I.1** or provide evidence that they have attained a comparable level elsewhere.

Assessment: 100% coursework.

This course will be offered in the second semester.

Second Year

LANG2010. Italian II (12 credits)

This course is taught throughout the year and is a continuation of **Italian I.2**. The intention is to build further on the junior level work and widen the scope of exposure to more complex aspects of the language. The teaching will diversify through the use of more elaborate material and a variety of teaching techniques including work with video. Participants are expected to consolidate their understanding of Italian language and develop further their production and reception skills.

Prerequisites: Students wishing to be admitted to **Italian II** will be required to attend an intensive session (Transition 1) usually held in June.

Students wishing to be admitted to **Italian II** without having previously completed **Italian I.2** and Transition 1 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Italian II** consists of one written paper of 2-hour duration and a separate oral examination.

LANG2031. Italian reading course (3 credits)

This course is offered to the students at intermediate and advanced levels in order to improve their skills in textual analysis, discussion and translation of contemporary texts and documents such as magazines, newspaper, songs and articles related to current Italian life.

Prerequisite: Students must have satisfactorily completed **Italian I.2** or provide evidence that they have attained a comparable level elsewhere.

Students may not enrol in the Italian reading course without enrolling in **Italian II**.

It is also open to students currently studying LANG3012 Italian III or an equivalent certificate course.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG2032. Italian and business (3 credits)

This course is offered to students at intermediate and advanced levels. It will focus on a variety of topics, such as commercial correspondence, marketing strategies, advertising campaigns, job applications, banking terminology, etc.

Prerequisite: Students must have satisfactorily completed **Italian I.2** or provide evidence that they have attained a comparable level elsewhere.

Students may not enrol in the Italian and business course without enrolling in **Italian II**.

It is also open to students currently studying LANG3012 Italian III or an equivalent certificate course.

Assessment: 100% coursework.

LANG2050. A profile of Italian literature I (3 credits)

This course presents a broad introduction to Italian Literature from the 13th to the 20th century. It will examine works of the prominent Italian writers through the study of excerpts and is particularly designed to enhance students' reading and analytical skills in the Italian language. The medium of instruction and discussion will be Italian.

Prerequisites: (i) the course is open to students who have successfully completed **Italian I.2**;
(ii) students may not enrol without enrolling in **Italian II.1**.

It is also open to students currently studying LANG3012 Italian III or an equivalent certificate course.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG2051. A profile of Italian literature II (Contemporary Italian literature) (3 credits)

This course offers an introduction to the major movements and authors of Italian Literature over the last fifty years. The selection of texts will also serve as a basis for discussion on some social issues regarding contemporary Italy. The medium of instruction and discussion will be Italian.

Prerequisites: (i) the course is open to students who have successfully completed **Italian I.2**;
(ii) students may not enrol without enrolling in **Italian II.1**.

It is also open to students currently studying LANG3012 Italian III or an equivalent certificate course.

Assessment: 100% coursework.

This course will be offered in the second semester.

Second/Third Years

LANG0001. Introduction to Italian life and culture (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course will give an outline of Italian civilization and contemporary culture in its manifold aspects, ranging from arts, history, music, Italian customs and traditions in the different regions and cities, to cinema and tourism, food, fashion, environment, education, sport and politics with particular focus on the youth world. The teacher will present a variety of subjects making use of videos and authentic materials (music, magazines, advertising, etc.), from which the students will choose topics and discuss them in discussion groups. Each group will then present, at the end of the course, a project on a particular subject. In case the students should be interested, some basic knowledge of the Italian language will be offered.

Prerequisite: Nil.

Assessment: 100% coursework.

Medium of instruction: English. Knowledge of Italian is not necessary.

This course will be offered in the second semester.

LANG0006. Italian classical roots of European civilization (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Touching on different subjects such as Latin Language and Philosophy, Architecture and Law, Literature and History, Religion and Politics, the course will examine how Europe was shaped by its Roman heritage and how classical roots contributed to create a multifaced but unique civilization. All lectures will be conducted in English.

Prerequisite: Nil
 Assessment: 100% coursework.
 This course will be offered in the first semester.

Third Year

LANG3012. Italian III (12 credits)

This course is taught throughout the year and continues to build on the two previous years' work on a more advanced level. The intention is to lead participants towards a fairly comprehensive understanding of the Italian language features through the study of a variety of documents (written, audio and video). The selection of documents will also serve as a basis for discussion on some social issues regarding contemporary Italy, as well as her history and cultural background.

Prerequisites: Students wishing to be admitted to **Italian III** will be required to attend an intensive session (Transition 2) usually held in June.

Students wishing to be admitted to **Italian III** without having previously completed **Italian II** and Transition 2 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Italian III** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3040. Italian in Italy (3 credits)

This course is taught and organized by several Italian universities and teaching institutions during the summer between the 2nd and 3rd Year of the Italian B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2010** (Italian II), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

Portuguese Courses

First Year

LANG1025. Portuguese for beginners - Part I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The aim of this course is to enable students to reach a basic communicative competence in Portuguese, while developing their listening, speaking, writing and reading skills. Development of self-learning strategies will also be introduced in the later part of the course.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1026. Portuguese for beginners - Part II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Portuguese for beginners I**. Pre-requisite for Portuguese for beginners II: Portuguese for beginners I.

Assessment: 100% coursework.

This course will be offered in the second semester.

Second Year

LANG2024. Portuguese II (12 credits)

This course is taught throughout the year and is a continuation of **Portuguese for beginners – Part II**. The intention is to build further on the junior level work and widen the scope of exposure to more complex aspects of the language. The teaching will diversify through the use of more elaborate material and a variety of teaching techniques including work with video. Participants are expected to consolidate their understanding of Portuguese language and develop further their production and reception skills.

Prerequisites: Students wishing to be admitted to **Portuguese II** will be required to attend an intensive session (Transition 1) usually held in June.

Students wishing to be admitted to **Portuguese II** without having previously completed **Portuguese for beginners – Part II** and Transition 1 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Portuguese II** consists of one written paper of 2-hour duration and a separate oral examination.

Third Year

LANG3026. Portuguese III (12 credits)

This course is taught throughout the year and continues to build on the two previous years' work on a more advanced level. The intention is to lead participants towards a fairly comprehensive understanding of the Portuguese language features through the study of a variety of documents (written, audio and video). The selection of documents will also serve as a basis for discussion on some social issues regarding contemporary Portugal, as well as her history and cultural background.

Prerequisites: Students wishing to be admitted to **Portuguese III** will be required to attend an intensive session (Transition 2) usually held in June.

Students wishing to be admitted to **Portuguese III** without having previously completed **Portuguese II** and Transition 2 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Portuguese III** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3041. Portuguese in Portugal (3 credits)

This course is taught and organized by several Portuguese universities and teaching institutions during the summer between the 2nd and 3rd Year of the Portuguese B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2024** (Portuguese II), or establish that they have attained

a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

Spanish Courses

First Year

LANG1038. Spanish language I.1 (6 credits)

The main objective of the course is to teach students the basics of Spanish and to provide the participants with a firm foundation in the spoken and written language as well as to offer insights into Spanish culture. Through a communicative approach this course should quickly enable participants to engage in simple conversations and understand a variety of interactive situations at both linguistic and cultural levels. Emphasis will also be put on the acquisition of a sound grammar base for more advanced work.

Prerequisite: Nil

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1039. Spanish language I.2 (12 credits)

This course is a continuation of **Spanish language I.1**. The objective of the course is built on the work completed in the first semester so as to consolidate and broaden participants' foundation in spoken and written Spanish. Emphasis will be put on expanding the four skills as well as on the development of autonomous learning through the use of self-access facilities.

Prerequisite: Students must have satisfactorily completed **Spanish language I.1** or provide evidence that they have attained a comparable level elsewhere.

Assessment: One Examination and a Coursework element which shall count respectively 60% and 40% of the final grade awarded.

The Examination for **Spanish language I.2**. consists of one written paper of 2-hour duration and a separate oral examination.

This course will be offered in the second semester.

Second Year

LANG2011. Spanish II (12 credits)

This course is taught throughout the year and is a continuation of **Spanish I.2**. The course builds further on the first year's work and widens the scope of exposure to more complex aspects of the language. The teaching will diversify through the use of more elaborate material and a variety of teaching techniques including work with video. Participants are expected to consolidate their understanding of Spanish and develop further their production and reception skills.

Prerequisites: Students wishing to be admitted to **Spanish II** will be required to attend an intensive session (Transition 1) usually held in June and/or September.

Students wishing to be admitted to **Spanish II** without having previously completed **Spanish I.2** and Transition 1 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: The examination and coursework elements count 60% and 40% respectively.

Examination: The examination for **Spanish II** consists of one written paper of 2-hour duration and a separate oral examination.

LANG2055. Spanish for business I (3 credits)

This course is aimed to provide students with a relevant knowledge of the specific vocabulary and language skills necessary to successfully communicate in Spanish in the most common situations of international business. This course will also allow students to become familiar with the main characteristics of the economy in Spanish-speaking countries, focusing on the commercial relations between Asia and these countries.

Prerequisite: (i) This course is open to students who have successfully completed **Spanish I.2** and are currently enrolled in **Spanish II**, or the **intermediate Spanish certificate course**.
(ii) Alternatively, students will be required to provide evidence that they have attained elsewhere a comparable standard in Spanish.
(iii) Knowledge in the field of business and economics is not necessary.

Assessment: 100% Coursework.

This course will be offered in the second semester.

Second/Third Years**LANG0003. Introduction to Spanish culture (3 credits)**

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to give students an insight into Spanish culture and traditions with an emphasis on Spain. Guest speakers will give talks about different aspects of culture and discussion about the topics seen in the course will be encouraged.

Prerequisites: Nil.

Assessment: 100% Coursework.

Medium of instruction: English. Knowledge of Spanish is not necessary.

This course will be offered in the first semester.

LANG0005. Hispanic film and literature (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

The goal of this course is to introduce Spanish and Spanish American cinema and literature as well as to improve students' analytical and critical thinking skills. At the same time, this course may be very useful to students who wish to improve their language skills by themselves and learn more about the culture of Spanish speaking countries from direct sources, such as writers and film makers. The course objectives will be tackled in three ways: a) with a focus on film and literature as a representation of Hispanic culture; b) by analyzing a selection of representative cinematographic and literary texts; and c) by considering how literature written in Spanish has inspired films.

Prerequisite: Nil. Students of all faculties are welcome.

Medium of Instruction: English. Knowledge of Spanish is not necessary.

Assessment: 100% Coursework.

This course will be offered in the second semester.

Third Year**LANG3013. Spanish III (12 credits)**

This course is taught throughout the year and continues to build on the two previous years' work on a more advanced level. The intention is to lead participants towards a fairly comprehensive understanding of the Spanish language through the study of a variety of documents (written, audio and video). The selection of

documents will also serve as a basis for discussion on some social issues regarding contemporary Spain, as well as her history and culture.

Prerequisites: Students wishing to be admitted to **Spanish III** will be required to attend an intensive session (Transition 2) usually held in June and/or September.

Students wishing to be admitted to **Spanish III** without having previously completed **Spanish II** and Transition 2 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: The examination and coursework elements count 60% and 40% respectively.

Examination: The examination of **Spanish III** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3042. Spanish in Spain (3 credits)

This course is taught and organized by several Spanish universities and teaching institutions during the summer between the 2nd and 3rd Year of the Spanish B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2011** (Spanish II), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

LANG3055. Spanish for business II (3 credits)

This course is a continuation of **Spanish for Business I** and it aimed at facilitating students' acquisition of the necessary skills to work in companies that require the knowledge of Spanish to deliver their business. The focus is skill development, such as letter writing, phone conversations and product presentation. Guest speakers will be invited to present topics relevant to the course contents, in order to allow students to have a close contact with the Hispanic business community in Hong Kong.

Prerequisite: (i) This course is open to students who have successfully completed **Spanish II** and are currently enrolled in **Spanish III**, or the **advanced Spanish certificate course**.

(ii) Alternatively, students will be required to provide evidence that they have attained elsewhere a comparable standard in Spanish.

(iii) Students may not enroll in **Spanish for business II** without having completed **Spanish for business I**.

Assessment: 100% Coursework.

This course will be offered in the first semester.

Swedish Courses

First Year

LANG1023. Swedish for beginners - Part I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is for beginners of Swedish and will introduce the students to the essentials of the Swedish language through a communicative approach. The course will cover speaking, listening, reading and writing but with emphasis on speaking. Students will learn how to interact in everyday situations such as shopping, taking the bus, asking for directions, making a phone call etc. Apart from using textbooks, additional classroom materials, such as videos, and other audio-visuals will be used.

The course will also give students an insight to Swedish culture and society. Since Sweden, Norway and

Denmark are closely related in culture and language, the course will also give a wider understanding of Scandinavia.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1024. Swedish for beginners - Part II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Swedish for beginners I**. Pre-requisite for Swedish for beginners II: Swedish for beginners I.

Assessment: 100% coursework.

This course will be offered in the second semester.

Second Year

LANG2023. Swedish II (12 credits)

This course is taught throughout the year and is a continuation of **Swedish for beginners – Part II**. The intention is to build further on the junior level work and widen the scope of exposure to more complex aspects of the language. The teaching will diversify through the use of more elaborate material and a variety of teaching techniques including work with video. Participants are expected to consolidate their understanding of Swedish language and develop further their production and reception skills.

Prerequisites: Students wishing to be admitted to **Swedish II** will be required to attend an intensive session (Transition 1) usually held in June.

Students wishing to be admitted to **Swedish II** without having previously completed **Swedish for beginners – Part II** and Transition 1 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Swedish II** consists of one written paper of 2-hour duration and a separate oral examination.

Second / Third Year

LANG0007. From Vikings to Volvo: an introduction to contemporary Sweden (3 credits)

This course will give an insight into historical and cultural developments leading up to present day Sweden and also a closer look at different aspects of contemporary Sweden and the role of the Swedish Model in the 21st century. A variety of materials will be used and the students are expected to present a project at the end of the semester.

Prerequisite: Nil

Medium of Instruction: English

Assessment: 100% coursework.

This course will be offered in the second semester.

Third Year

LANG3025. Swedish III (12 credits)

This course is taught throughout the year and continues to build on the two previous years' work on a more advanced level. The intention is to lead participants towards a fairly comprehensive understanding of the Swedish language features through the study of a variety of documents (written, audio and video). The selection of documents will also serve as a basis for discussion on some social issues regarding contemporary Sweden, as well as her history and cultural background.

Prerequisites: Students wishing to be admitted to **Swedish III** will be required to attend an intensive session (Transition 2) usually held in June.

Students wishing to be admitted to **Swedish III** without having previously completed **Swedish II** and Transition 2 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Swedish III** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3043. Swedish in Sweden (3 credits)

This course is taught and organized by several Swedish universities and teaching institutions during the summer between the 2nd and 3rd Year of the Swedish B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2023** (Swedish II), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

Thai Courses

First Year

LANG1021. Thai for beginners - Part I (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course aims to teach complete beginners the basics of Thai with respect to the four linguistic skills of listening, speaking, reading and writing. Students will also be introduced to Thai culture and society. Vocabulary and grammar will be presented in a communicative way for a variety of situations, e.g. making introductions, leave-taking, giving directions, buying things, making telephone calls and so on. The emphasis will be on the spoken language, as well as on providing a secure foundation for basic Thai.

Assessment: 100% coursework.

This course will be offered in the first semester.

LANG1022. Thai for beginners - Part II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of **Thai for beginners I**. Pre-requisite for Thai for beginners II: Thai for beginners I.

Assessment: 100% coursework.

This course will be offered in the second semester.

Second Year

LANG2022. Thai II (12 credits)

This course is taught throughout the year and is a continuation of **Thai for beginners – Part II**. The intention is to build further on the junior level work and widen the scope of exposure to more complex aspects of the language. The teaching will diversify through the use of more elaborate material and a variety of teaching techniques including work with video. Participants are expected to consolidate their understanding of Thai language and develop further their production and reception skills.

Prerequisites: Students wishing to be admitted to **Thai II** will be required to attend an intensive session (Transition 1) usually held in June.

Students wishing to be admitted to **Thai II** without having previously completed **Thai for beginners – Part II** and Transition 1 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Thai II** consists of one written paper of 2-hour duration and a separate oral examination.

Third Year**LANG3024. Thai III (12 credits)**

This course is taught throughout the year and continues to build on the two previous years' work on a more advanced level. The intention is to lead participants towards a fairly comprehensive understanding of the Thai language features through the study of a variety of documents (written, audio and video). The selection of documents will also serve as a basis for discussion on some social issues regarding contemporary Thailand, as well as her history and cultural background.

Prerequisites: Students wishing to be admitted to **Thai III** will be required to attend an intensive session (Transition 2) usually held in June.

Students wishing to be admitted to **Thai III** without having previously completed **Thai II** and Transition 2 will be required to satisfy the Faculty Board through the Director of the Language Centre that they have attained elsewhere the required standard.

Assessment: One examination and a coursework element which shall count 60% and 40% respectively of the final grade awarded.

Examination: The examination for **Thai III** consists of one written paper of 3-hour duration and a separate oral examination.

LANG3044. Thai in Thailand (3 credits)

This course is taught and organized by several Thai universities and teaching institutions during the summer between the 2nd and 3rd Year of the Thai B.A. programme. The course lasts about three to four weeks and is designed to build on and to reinforce the language competence acquired during the first two years of study. This course should also prepare the participants for more advanced work in the final year.

Prerequisite: Students must have completed **LANG2022** (Thai II), or establish that they have attained a similar standard.

Assessment: 100% coursework. In order to be granted credits for this course, participants will be requested to produce a statement with the mention of a grade from the host institution.

First-year Courses

LING1001. Introduction to linguistics (6 credits)

This course is a prerequisite for all courses taught in the department, and a requirement for all students majoring in linguistics. It is an introduction to the basic topics of linguistics: the nature of human language, speech sounds and sound patterns, word formation, sentence structure, and the study of meaning and use.

Students will learn about the general structure that underlies all language as well as the great variety of existing human languages. The course gives plenty of practice in solving problems, analysing languages, including Chinese and English, and dealing with data.

Assessment: 50% coursework, 50% examination

LING1002. Language.com: Language in the contemporary world (3 credits)

This course is designated as an IT-integrated course. Students who do the course can use it to fulfill the university's IT requirement.

The 21st century will be the Age of the Internet. What is the Internet all about? Essentially, it is about information and communication. Language is by far the most important means of communication and information exchange amongst human beings. To fully appreciate our own place in the contemporary world and to make the best of the many opportunities presented by new forms of communication, we need to know more about language. This course is an introduction to language: its nature and its relationship with facets of life in the contemporary world.

- Natural Language Processing: Can computers be trained to understand and produce human language?
- Machine Translation: Can computers do translations automatically and accurately?
- Corpus Linguistics: What kinds of language data are available on the Internet? How can they be used to make grammars and dictionaries?
- Chinese Language Computing: How many kinds of Chinese inputting methods are there? Which one suits you best?
- Internet Tools: What tools are available on the Internet for the learning of languages and linguistics?
- Human-Computer Interfaces: What is "ergonomics"? What is currently being done to improve the quality of communication between people and their computers?
- Speech analysis: What computer programs are available to analyse speech signals? How can computer speech analysis help language learners?

As this course may include topics relating to Chinese Language Information Processing, students who have no prior knowledge of Chinese characters are advised against taking this course.

Assessment: 100% coursework.

LING1003. Language, thought, and culture (6 credits)

Students majoring in linguistics are required to take both LING1001 and this course. It offers a survey of the study of language, with a focus on the relationship between language structure on the one hand and thought and culture on the other. It is designed as a complementary course to LING1001 'Introduction to Linguistics', and covers topics which cannot be dealt with in the other course due to the limitation of time. Through reading and participation in regular discussions on a selection of topics, students will gain a deeper understanding of the ways in which language is structured, learned, processed and used.

Assessment: 50% coursework, 50% examination

Second- and Third-year Courses

LING2001. Computational linguistics (6 credits)

How can the computer help us analyse sentences? Can a computer really understand language? These are some of the questions explored in this course. The course will introduce basic concepts and techniques of natural language understanding and Chinese language information processing.

Assessment: 100% coursework.

LING2002. Conversation analysis (6 credits)

How is it that we manage to have conversations in which lots of different people take part and everyone has a chance to speak as well as to listen? At least, most of the time we manage that all right. What rules are followed when we have conversations? On this course you will discover what these rules are and learn how to describe the structure of conversations.

Assessment: 100% coursework.

LING2003. Semantics: meaning and grammar (6 credits)

This course focuses on structural and cognitive aspects of meaning which are relevant to the description and theory of grammar. Examples will be drawn from Cantonese, Mandarin and English together with some other European and Asian languages.

Assessment: 100% coursework.

LING2004. Phonetics: describing sounds (6 credits)

This is a required course for students majoring in Linguistics or Human Language Technology and is normally taken in the second year. The focus will be on articulatory phonetics; the speech mechanism; the description and classification of sounds of languages; sounds in context; prosodic features; tone and intonation; and practical work.

Assessment: 100% coursework.

LING2009. Languages of the world (6 credits)

This survey of the world's languages covers how languages are classified into families and types as well as issues of linguistic diversity and endangered languages. The course involves regular practical work. The course satisfies the prerequisite for the advanced course, **Language typology**, and also provides useful background for all courses in linguistics.

Assessment: 100% coursework.

LING2010. Language and dialect (6 credits)

In this course you will learn about the difference between a standard language and a dialect, with particular reference to Modern Chinese and British English.

We shall study the writing systems of Modern Chinese and British English, and compare them with alternative systems which are used for Chinese and English dialects.

You will learn to distinguish between 'Chinese' and 'Putonghua', between 'Cantonese', 'Guangdong speech', and 'Yue dialects', and between *wenyan* and *baihua*; similar phenomena in British English will also be discussed.

Assessment: 100% coursework.

LING2011. Language and literacy in the information age (6 credits)

This course aims at helping students gain an understanding of the role of language and literacy education in the socio-economic development of many societies. After the introduction of basic concepts in sociolinguistics and in literacy, we will compare linguistic situations in selected parts of the world and then take up major issues such as multilingualism, literacy education, including definitions and types of literacies, language planning policies, and how to integrate linguistic and educational issues in development projects.

Assessment: 100% coursework.

LING2012. Experimental phonetics (6 credits)

The theoretical and instrumental study of the acoustic properties of speech sounds; classificatory criteria; speech analysis and synthesis; experimental techniques; and laboratory work.

Assessment: 100% coursework.

LING2013. Language typology: the study of linguistic diversity (6 credits)

A survey of the structural diversity of the world's languages. Topics covered include: notions of language type; morphological, case marking, and word order typology; diachronic and areal typology; universals of language and their explanation.

Assessment: 100% coursework.

LING2018. Lexical-functional grammar (6 credits)

An intensive introduction to the architecture of Lexical-Functional Grammar, with a discussion of how this syntactic theory addresses issues such as levels of representation, lexical integrity, complex predicates, serial verbs, optimality, and the syntax - semantics interface.

Assessment: 100% coursework.

LING2019. Contrastive study of the sound systems of English and Chinese (6 credits)

Do you think the sounds of English and Chinese are very similar or very different? Is it possible to write Chinese words using phonetic signs instead of characters? You will find out the answers to these and other questions on this course as you investigate and describe the sound and writing systems of these two great world languages.

Assessment: 100% coursework.

LING2022. Pragmatics (6 credits)

An introduction to the study of Pragmatics. Topics include: linguistic meaning, speaker intention, interpretation and understanding, context, deixis, reference, conversational implicature, inference, presupposition, speech acts, politeness, relevance theory.

Assessment: 100% coursework.

LING2023. Discourse analysis (6 credits)

An introduction to Discourse analysis. Topics include: linguistic forms and functions, speech and writing, discourse topic, discourse structure, information structure, cohesion and coherence, knowledge representation.

Assessment: 100% coursework.

LING2024. Lexicology and lexicography (6 credits)

An introduction to Lexicology and lexicography. Topics include: kinds of unit in the lexicon, lexical entries, lexical relations, lexical semantics, the mental lexicon, application of lexicology to dictionary compilation in various languages.

Assessment: 100% coursework.

LING2025. Corpus linguistics (6 credits)

An introduction to Corpus linguistics. Topics include: the use of corpora in linguistic analysis, methods in the design and collection of spoken and written texts, uses of corpora. Topics are discussed with reference to various languages.

Assessment: 100% coursework.

LING2027. Phonology: An introduction to the study of sound systems (6 credits)

The notion of the phoneme and its place in phonology; distinctive features; phonological processes and their description; rules and representations.

Assessment: 100% coursework.

LING2030. Morphological theory (6 credits)

Current models of morphology, including Lexical Morphology, Word and Paradigm Morphology, Prosodic Morphology, and other models.

Assessment: 100% coursework.

LING2031. Phonological theory (6 credits)

Current theories of phonology, including Autosegmental Phonology, Metrical Theory, Lexical Phonology, Optimality Theory and other models.

Assessment: 100% coursework.

LING2032. Syntactic theory (6 credits)

The course explores recent theoretical approaches to syntax, focusing on generative grammar.

Assessment: 100% coursework.

LING2033. Contrastive grammar of English and Chinese (6 credits)

In this course we will compare the grammar of English and Chinese. We will find some surprising similarities as well as interesting differences. You will have a firmer grasp of the structure of both languages by the end of the course. In addition, you will be in a better position to undertake bilingual research or to become effective language instructors or translators.

Assessment: 100% coursework.

LING2034. Psycholinguistics (6 credits)

This course is an introduction to psycholinguistics and will examine issues concerning how language is acquired and processed in the mind. Essential concepts of the mental processes involved in language comprehension and production and contemporary research will be covered in this course. There will also be practical laboratory classes.

Assessment: 100% coursework.

LING2035. Neurolinguistics (6 credits)

This course will introduce students to the study of the representation and processing of language in the brain. Recent literature regarding language organization in the cortex, language disorder, and the bilingual brain will be reviewed.

Assessment: 100% coursework.

LING2036. Child language (6 credits)

The focus of this course is on language acquisition, including a consideration of the stages of language development, biological basis, language disorders, dyslexia, and the differences in learning to speak and read in Chinese and English.

Assessment: 100% coursework.

LING2037. Bilingualism (6 credits)

This course is a general introduction to the study of bilingualism from a psycholinguistic perspective, with emphasis on various aspects of bilingual behavior, such as code-switching and language mixing. Age-related differences, the influence of the first language, the role of attitudes, motivation and learning contexts will be examined.

Assessment: 100% coursework.

LING2038. Historical linguistics (6 credits)

The purpose of the course is to introduce students to the principles of historical linguistics and the methods linguistics use to describe and account for language change. The emphasis is on sound change; however, morphological and syntactic changes are also discussed. The language data to be examined are mainly from the Indo-European language family and Chinese dialects.

Assessment: 100% coursework.

LING2039. Language variation and change (6 credits)

The course introduces the students to language variation and its implications in the discussion of language change in progress. It also covers the general principles involved in language change as well as the

problems of the initiation and transmission of language change.
Assessment: 100% coursework.

LING2040. Languages in contact (6 credits)

No language develops in isolation and all show some effect of contact with other languages. The course will introduce basic concepts in language contact, distinguishing phenomena such as code-mixing and lexical borrowing, language shift and substrate influence. It will then focus on the most striking cases of “contact languages” – pidgins and creoles – and the challenges and opportunities they present to linguistics. The course is especially relevant for those studying French and will feature audio-visual materials illustrating contact languages such as Singapore Colloquial English, Macau Portuguese creole and Haitian French creole.

Assessment: 100% coursework.

LING2041. Language and information technology (6 credits)

This course continues with major themes from **LING1002. Language.com** and aims to create a greater awareness of the growing importance of language information processing methods. The objective of the course is to explore the interface between language, linguistics, and information technology.

Assessment: 100% coursework.

LING2042. Educational linguistics (6 credits)

This course is preferably taken after **LING2011. Language and literacy in the information age** and examines how linguistic and literacy issues impact educational systems in various parts of the world. The course aims to lead students to an understanding of the cognitive and social underpinnings of the interface between language, literacy and education.

Prerequisite: **Language and literacy**

Assessment: 100% coursework.

LING2043. Language and animal communication (6 credits)

This course examines communication systems amongst animals, including bees, apes, parrots and dolphins, against the background of human language. The course also explores the question of whether it is possible for animals to learn human language.

Assessment: 100% coursework.

LING2044. Language and culture (6 credits)

The aim of this course is to explore the relationship between language and culture. Topics include language and thought, language and religion, language and nationalities, language and social changes.

Assessment: 100% coursework.

LING2045. Writing systems (6 credits)

An introduction to the major writing systems of the world.

Assessment: 100% coursework.

LING2046. British linguistics (6 credits)

This course is a study of the major contributions to linguistic description and theory made by British linguists from the later part of the 19th century to the end of the 20th century.

Assessment: 100% coursework.

LING2047. Optimality theory (6 credits)

This course introduces current issues in Optimality Theory, with reference to phonology, morphology, and syntax.

Assessment: 100% coursework.

LING2048. Language and cognition (6 credits)

This course examines various issues regarding cognition and language. Topics to be covered are:

- How is language processed and represented in the mind and the brain?
- Commonalities and particularities of cognitive and neuro-cognitive processing of different languages (e.g., English and Chinese).
- First and second language learning. What are the critical factors that facilitate language learning?
- The Chinese language and the brain; language and reading disorders.
- Applied cognitive psychology of language. Headline designs for newspaper, TV program, and advertisement. Cognitive basis of persuasion.

Assessment: 100% coursework.

LING2050. Grammatical description (6 credits)

This course aims at giving the student a comprehensive introduction to basic concepts used in the description of morphology and syntax, independent of any model of grammar. Exercises accompany the topics introduced. Example analyses are drawn from various languages. The following topics in morphology and syntax will be covered: words, morphemes and morphs, word classes, immediate constituents, phrase structure, functional relations, sentence structure..

Assessment: 100% coursework.

LING2051. French syntax and universal grammar (6 credits)

An overview of the major aspects of French Linguistics will be provided in this course. The basics of morphology, semantics and syntax will be covered, with emphasis on the syntactic component of the course. Students will learn how to analyze French sentences in formal perspectives, using the basics of grammatical frameworks such as Lexical Functional Grammar and the Principles and Parametres approaches. Prior knowledge of introductory linguistics and French grammar are helpful but not essential.

Assessment: 100% coursework.

LING2052. Swahili structure and universal grammar (6 credits)

Swahili is the most widely spoken African language and one of the most intensively studied in many universities in Africa, Europe, and North America. In this course, an overview of the major aspects of Swahili and Bantu Linguistics will be provided. The basics of phonology, morphology, syntax and semantics will be covered, with emphasis on the morphosyntactic component of the language. Students

will learn how to analyze basic Swahili sentence structures from formal perspectives, using the basics of grammatical frameworks such as Lexical Functional Grammar and the Minimalist approaches. Prior knowledge of introductory linguistics and spoken Swahili are helpful but not essential.
Assessment: 100% coursework.

LING2053. Language and the brain (6 credits)

This course is an introduction to the representation and processing of language in the human brain, the systems and processes that enables us to speak, understand speech, learn languages, and read and write. Through attending the course, students will acquire in-depth knowledge of how language is developed, processed, and organized in the brain. Traditional as well as most recent research from linguistics, cognitive neuroscience (e.g. brain imaging) and the study of language disorders will be reviewed.
Assessment: 100% coursework.

LING2054. Linguistics in the Asian context (6 credits)

The broad aim of the course will be to familiarize students with Asian languages and approaches to their description and analysis. This course will be particularly relevant to students with an interest in linguistic research across the Asian region.
Assessment: 100% coursework.

LING2055. Language and globalization (6 credits)

The broad aim of this course will be to help students to understand and discuss issues relating to ‘global languages’ (as ‘linguae francae’) and their impact on the linguistic diversity of the world. It has estimated that, of the world’s 6,000 languages, 5,000 will disappear by the year 2050.
Assessment: 100% coursework.

Assessment

All courses taught in the department except LING1001 and LING1003 are assessed by 100% coursework. Coursework assessment may take a variety of formats, including projects, term-papers, essays, portfolios, class tests, and student presentations.

LING3002. Extended essay (6 credits)

This is a course for individual research on a topic chosen by the student in consultation with staff, in preparation for possible postgraduate work and is offered for third year majors only. Students intending to study this course are required to attend an interview at the beginning of their third year to give a short presentation on their proposed topic. The thesis which should normally be 8,000 words in length, should be submitted before the end of December. There is no written examination but an oral exam will be required.

LING3003. Linguistics field trip (6 credits)

This is a required course for students majoring in Linguistics or Human Language Technology. The field trip is technically designated as a Third year course but is actually taught in the second semester of the second year. The trip itself usually takes place in May or June of that year. Students majoring in

Linguistics should plan their courses with this in mind.

The aim of the course is to provide an opportunity for students of linguistics to have first-hand experience with languages as they are spoken and used in particular settings, and to carry out an empirical investigation on some aspect of a language 'on-site' (e.g. structural, cognitive, socio-cultural, or technological aspects of a language). The field trip is the best way of putting knowledge about language structure and use into practice, and forms an essential part of a linguist's training.

To satisfy the requirements of the course, students should (1) participate in a two-week field trip outside Hong Kong (e.g. to China, Europe, or Africa), led and supervised by members of staff; (2) carry out an empirical investigation of a linguistics topic in consultation with their supervisors; and (3) write up and hand in a report upon return from the field trip.

Assessment: Participation in the field trip and a written report.

Department of Music

First Year

Level 100 courses

MUSI1001. The language of music (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course, which is open only to non-majors, is an introduction to the main elements of music - melody, rhythm, harmony, texture, timbre and articulation - as they occur in traditional, classical and popular musics of the world.

Assessment: 100% coursework.

MUSI1004. Introduction to musics of the world (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, introduces a range of music from throughout the world including the North America, Southeast Asia, West Africa, the Caribbean, and Europe. Genres such as salsa and zydeco (United States), gamelan gong kebyar (Bali), bawo and highlife (Ghana), djembe (Senegal), son and rumba (Cuba), samba (Brazil), flamenco (Spain), and rembetika (Greece) are examined in their social, cultural and historical contexts. The course also discusses issues raised by cross-cultural research. Practical performance in a Department ensemble may be included in the course.

Assessment: 100% coursework.

MUSI1005. Introduction to music in Western culture (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, focuses on a limited number of representative musical works in the Western Classical Tradition. Bi-weekly musical case studies will spotlight such significant historical and cultural issues as the development of a written tradition, the relationship between music and Christianity, the shifting role of performance, and the rise of Nationalism. These issues will be contextualized by relevant scholarly, literary, and journalistic writings. The introduction to the main elements of music as theorised in the West -- melody, rhythm, harmony, texture, timbre and articulation—also represents an integral part of the course. Although this course does not require prior musical knowledge, the ability to read musical notation will be an asset.

Assessment: 100% coursework.

MUSI1006. Music technology (3 credits)

(This course fulfills the Information Technology requirement, and is also offered to non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, is a hands-on introduction to the use of music technology including music notation, sequencing, synthesizer techniques, and digital audio. Technical methods of information access, especially in the Music Library, are introduced.

Assessment: 50% coursework, 50% examination.

MUSI1011. Orchestral studies and techniques 1 (for students in their first year of study) (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Students participate in weekly rehearsals and performances with the University's orchestra over two semesters. Besides musical skills, this course focuses on teamwork, discipline and creativity. To gain admission to the course, students must have reached the standard of ABRSM Grade 6 or the equivalent on one of the following: flute, oboe, clarinet, bassoon, horn, trumpet, trombone, tuba, percussion, violin, viola, cello or double bass and must pass an audition.

Assessment: 100% practical examination (and conductor assessment).

MUSI1014. Aural skills (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A student completing this two-semester course will have re-invented what it is to listen, and will be able to translate what is heard into other forms of communication. The course concerns rhythm, pitch, and timbre of many kinds of music. It develops practical skills such as rhythmic memory, imitation, dictation, sight-singing, and identification/classification.

Assessment: 100% coursework.

MUSI1016. University choir 1 (for students in their first year of study) (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all first-year students, focuses on musical performance. Students participate in weekly rehearsals and performances with the Department's University Choir over two semesters. Besides musical skills, this course focuses on teamwork, discipline and creativity.

Assessment: 100% practical examination (and conductor assessment).

MUSI1017. Performance workshop 1 (for students in their first year of study) (3 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

Students may choose to enroll in any workshop offered by the Music Department, or take individual instrumental instruction with a teacher approved by the Department over two semesters. Beginners are welcome, but places in this course are limited, especially for individual instrumental instruction. Except with the permission of the Head of Department, Performance Workshop 1 is open only to students taking a major in music. Please check with the Music Department for details.

Assessment: 100% practical examination (and instructor assessment).

MUSI1018. Advanced music performance 1 (for students in their first year of study) (6 credits)

Students prepare a recital of 30/40 minutes under the supervision of a vocal or instrumental teacher approved by the Department. At least one piece must be performed on a period instrument, or must use either period or advanced twentieth-century techniques, as appropriate. Places in this course are limited and admission is by audition. Except with the permission of the Head of Department, Advanced Music Performance 1 is available only to students taking a major in music.
Assessment: 100% coursework.

MUSI1019. Fundamentals of tonal music I (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This course begins with fundamental music materials, such as scales and keys, and moves rapidly into species counterpoint and voice-leading principles of diatonic harmony. Student completing this course are expected to have established a clear and solid understanding of rudiments of tonal music, and be able to make practical demonstrations of this knowledge.

Assessment: 100% coursework.

MUSI1020. Fundamentals of tonal music II (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

A continuation of MUSI1019 Fundamentals of Tonal Music I, this course explores further into tonal procedures. It begins with the use of seventh chords, and will progress to basic chromatic harmony. Contrapuntal gestures and simple formal structures such as binary and ternary forms will also be introduced. Students completing the course are expected to have attained thorough understanding of the function and voice-leading principles of diatonic and simple chromatic harmonies, and be able to analyse simple forms and contrapuntal textures.

Prerequisite: MUSI1019.

Assessment: 100% coursework.

Second and Third Years

Level 200 courses

MUSI2004. University gamelan 1 (for students in their second year of study) (3 credits)

(This course is also offered to second year non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, focuses on Balinese *gamelan* or 'orchestral' performance, specifically the *gamelan gong kebyar*. No previous musical experience is necessary. Students participate in weekly rehearsals with the *gamelan* over two semesters and by the end of the course students will be expected to know how to play the main melody, the main support parts, and the interlocking (*kotekan*) parts of selected compositions. Students will also have the opportunity to participate in public performance.

Assessment: 20% coursework, 80% practical examination (and instructor assessment).

MUSI2006. Analysis of orally transmitted musics (6 credits)

This course will focus on the description, transcription and analysis of music that is essentially orally transmitted. Issues such as 'emic' and 'etic' transcription, prescriptive and descriptive notation, and various methods and theories of analysis will be discussed. Music from a variety of cultures, including musical cultures of Asia, will be used as examples for study.

Prerequisite: MUSI1004.

Assessment: 100% coursework.

MUSI2007. Western music history 1 (6 credits)

This course traces the development of European music from its earliest beginnings in ancient Greece and Rome, through the flowering of sacred and secular music in the Middle Ages and the Renaissance, to the integrated instrumental and vocal idioms of the Baroque. The course demands familiarity with a number of representative works composed between ca. 800 AD and 1750. A strong focus is placed on the analytical study of scores through listening and reading. In addition, we focus on the ways in which music relates to the other arts and the social contexts in which music was created.

Prerequisite: MUSI1005.

Assessment: 100% coursework.

MUSI2008. Western music history 2 (6 credits)

This course will focus on the Western art music tradition from 1750 to the present, moving through the apparent stylistic perfection of the Classical era to the revolutions and restless variety of the Romantic era, and finally working through the complex experiments of modernist and postmodernist musics. A standard repertoire will be introduced, and the student will be expected to become familiar with the scores, sounds and history of these periods. In addition, we focus on the ways in which music relates to the other arts and the social contexts in which music was created.

Prerequisite: MUSI2007.

Assessment: 100% coursework.

MUSI2009. Topics in Asian music history (6 credits)

Selected topics in the history of Asian musical cultures will be examined.

Assessment: 100% coursework.

MUSI2010. Music of China (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course presents the essential features of the music of China, its role in Chinese culture and history, and its position in world music. Subjects will include qin and other musical instruments, theatrical genres such as kunqu, Peking opera and Cantonese opera, narrative songs such as Peking drum song, Suzhou tanci, and Cantonese nanyin, folk songs, and music in Confucian, Buddhist, and Taoist rituals. The course aims not only to introduce students to traditional Chinese music, but also to explore the nature of Chinese culture through its musical practices. Important works of Chinese music will be introduced, as well as issues such as change/stasis, politics/aesthetics, theory/practice, literati/masses, professional/amateur, ritual/entertainment, home-grown/foreign-influenced, and Han/Minority.

Assessment: 100% coursework.

MUSI2013. Computer and electronic music (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course provides students with a general knowledge of acoustics, sampling, sound design, sound editing, sound recording and mixing, audio-visual synchronisation, synthesiser techniques and MIDI

sequencing. The course comprises lectures, workshops and individual studio exercises. Students are required to produce various practical, creative projects using the Music Department's studio equipment and computer programs.

Assessment: 50% coursework, 50% examination.

MUSI2015. Popular music: from Cantopop to techno (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course covers a wide variety of popular musics ranging from the latest trends in the global market to locally produced music such as Hong Kong's Cantopop. The course surveys the development of key genres popular music, in particular, those from the United States, such as, Blues, Country, Rock and Roll, Motown, Soul, Hard Rock, Disco, Hardcore, Heavy Metal, Grunge, Techno, and Rap. In addition, the course examines themes and concepts that can be applied to the serious study of popular musics beyond those discussed. These themes and concepts concern the ways in which popular music is defined, produced, disseminated, and consumed across the world. Students will learn the basic critical tools to examine popular music from a scholarly perspective. Lectures are augmented with videos, film slides, and recordings.

Assessment: 100% coursework.

MUSI2016. Music of contemporary Hong Kong (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, aims to promote an understanding of the various styles of music practiced in contemporary Hong Kong. Through comparison with the musical landscapes of other modern societies (e.g., US, Japan, Singapore, Taiwan), we shall endeavour to understand music and ourselves better. Topics to be discussed may include technical analysis of selected musical works, procedures of musical production, and a look at radio programmes, the recording industry, film music, high-art, jazz, new-age, and alternative musics, as well as traditional local and popular idioms.

Assessment: 100% coursework.

MUSI2018. Understanding music (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is open only to non-majors, and is designed for students with little or no background who wish to learn of music's beauties, ideas, and meanings. Music can be seen both as formal ideas in abstract arrangements, and as rapturous emotion rising from the heart. This course will explore both aspects by introducing musical works from many cultures, ranging from the grandeur of a Beethoven symphony to the subtleties of the Chinese zither.

Assessment: 50% coursework, 50% examination.

MUSI2019. Music in society (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is open only to non-majors, and is designed for students with little or no background who are interested in music as a social activity. Discussion of music in tribal cultures, popular music and its cultural meanings, political musics, and social patterns of performance, consumption and communication

are explored.

Assessment: 100% coursework.

MUSI2026. Fundamentals of music composition (6 credits)

This course seeks to provide an understanding of various musical techniques through writing music. It covers topics in notation, instrumentation, melodic writing, harmonization, timbral control, expansion and refinement of raw material, and structural design. The course comprises lectures, small-group tutorials, individual supervision, composer/performer workshops and concert performances of student works.

Assessment: 100% coursework.

MUSI2027. Composing for the concert world (6 credits)

This course encourages students to write music using 20th century techniques. It introduces students to organising and manipulating various musical parameters such as pitch, rhythm, meter, texture, colour, form, etc. It also helps students to experiment with the incorporation of extra-musical inspiration and alternative aesthetics.

Prerequisite: MUSI2026.

Assessment: 100% coursework.

MUSI2028. The business of music (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces students to basic arts administration concepts with a focus on the business of music. Topics to be discussed include strategic planning, organization, marketing, fundraising, financial management, arts law, as well as arts provision and arts policies in Hong Kong as compared to models in China, Europe and the USA. The lectures provide the students with theoretical foundations of management for the performing arts, and various assignments would help students to develop practical skills in writing, communication, critical thinking and analysis.

Assessment: 100% coursework.

MUSI2029. Chinese music history (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will introduce the history of China through an examination of selective source material including bells from the bronze period, the Book of Music attributed to Confucian philosophy, the earliest known musical notation of a composition from the sixth century A.D., major encyclopaedic compilations of musical sources from the Song dynasty, and Mao Zedong's 'Talk on Literature and Art' in 1942.

Assessment: 100% coursework.

MUSI2030. Composing for the commercial world (6 credits)

This course helps students to write music that works for a given practical application such as film scores, theatre music, multimedia performances, radio and television commercials, Web pages, new age music and popular songs. Students are required to work on topics that vary from year to year.

Prerequisite: MUSI2026.

Assessment: 100% coursework.

MUSI2031. American music (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will examine the history, genres, styles, innovations and cultural contexts of music in America. Following an overview of its European and African roots and the development of American music up to World War I, intensive consideration will be given to jazz, rock, blues, musicals, classical and avant-garde musics. This course is available to all students.

Assessment: 100% coursework.

MUSI2032. Orchestral studies and techniques 2 (for students in their second year of study) (3 credits)

(This course is also offered to second year non-BA students for inter-Faculty broadening purposes.)

Students participate in weekly rehearsals and performances with the University's orchestra over two semesters. Besides musical skills, this course focuses on teamwork, discipline and creativity. To gain admission to the course, students must have reached the standard of ABRSM Grade 6 or the equivalent on one of the following: flute, oboe, clarinet, bassoon, horn, trumpet, trombone, tuba, percussion, violin, viola, cello or double bass and must pass an audition. Orchestral Studies and Techniques 1 is not a prerequisite.

Assessment: 100% practical examination (and conductor assessment).

MUSI2033. Music and culture in Bali: an overseas fieldtrip (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course focuses on the study of gamelan music and its cultural context over a two week field trip in Bali. Students will spend one week in intensive workshops at the Sekolah Tinggi Seni Indonesia (STSI), the principal institution for the Indonesian performing arts in Bali, and another week participating in and observing gamelan performance in a traditional Balinese community. The course is open to students who have completed one of the following courses: (i) Aural Skills, (ii) University Gamelan 1, or (iii) University Gamelan 2. Students will be required to produce a field work report.

Assessment: 100% field report.

MUSI2035. Love, sex and death in music of the ancient and modern world (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines cultural and historical representations of feelings, situations and stories that focus on passion, romance, sexuality, tragedy, and death in music. We shall consider both semiotic and formal aspects of a number of works through which such expressions can be conveyed, and shall examine their resultant power and meaning. The course covers popular and art music from the late twelfth to the twenty-first century, drawing on an eclectic range of repertoires both from the West and from other parts of the world.

Assessment: 100% coursework.

MUSI2036. Audio digital signal processing (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course looks at various techniques of signal processing and algorithmic composition commonly used in computer music. Basic knowledge of trigonometry and algebra is expected, and some experience with computer programming is recommended. Students will use the tools of computer music to create simulations or models demonstrating the ideas presented in class. Students will have the option to pick their own tools, including software learned in previous classes, or to use tools taught in class. We will use some or all of the following programming environments: MAX/MSP, SuperCollider, Mathematica, Csound, cmusic, C++, Java.

Assessment: 100% coursework.

MUSI2037. Directed study 1 (for students in their second year of study) (6 credits)

This is a one-to-one course in which the student works with a supervisor throughout the year. During the first semester, the supervisor introduces theories and techniques of musical research through reading, discussion, and book reports. Towards the end of the semester, a research topic is to be decided upon between the student and supervisor. The second semester is devoted to the research on the topic and the writing of a thesis under the guidance of the supervisor. Entry to this course is at the discretion of the Head of Department.

Assessment: 100% thesis.

MUSI2041. University choir 2 (for students in their second year of study) (3 credits)

(This course is also offered to second year non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all second-year students, focuses on musical performance. Students participate in weekly rehearsals and performances with the Department's University Choir over two semesters. Besides musical skills, this course focuses on teamwork, discipline and creativity. University Choir 1 is not a prerequisite.

Assessment: 100% practical examination (and conductor assessment).

MUSI2042. Contrapuntal techniques (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course provides students with a comprehensive knowledge of contrapuntal techniques used in Western music. Topics include species counterpoint, free counterpoint, and 18th-century contrapuntal writing, with special reference to the style of J. S. Bach. Contrapuntal treatment in music beyond the common practice period will also be examined.

Pre-requisite: MUSI1020.

Assessment: 100% coursework.

MUSI2043. Orchestration (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course provides students with a comprehensive knowledge of orchestration. The characteristics of standard orchestral instruments will be studied, as well as the techniques of combining these instruments when writing for small and large orchestral forces. Aspects of psycho-acoustics will also be studied. Teaching materials will be derived from examples of the classical music repertoire and from film scores.

Pre-requisite: MUSI1020.

Assessment: 100% coursework.

MUSI2044. Film music (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

What does music contribute to a fiction film? When is it used? And why is there in the first place? Directors use music with an effect in mind and it is music's force in the "here and now" of the movie-going experience that we will try to describe. To do so, we will study films from various cinematic traditions through the various ways in which music functions within them as a powerful meaning-making element. Under the assumption that film is an *audio-visual* medium, we will examine individual works representative of different genres – musicals, horrors, dramas, comedies, and cartoons. Consideration will be given to the relationship between music and image as well as music and sound as they emerge from close readings of individual scenes. We will also look at how music is represented in the story world of the film, whether a character performs, listens to, or ignores it.

Assessment: 100% coursework.

MUSI2046. Performance workshop 2 (for students in their second year of study) (3 credits)

(This course is also offered to second year non-BA students for inter-Faculty broadening purposes.)

Students may choose to enroll in any workshop offered by the Music Department, or take individual instrumental instruction with a teacher approved by the Department over two semesters. Beginners are welcome, but places in this course are limited, especially for individual instrumental instruction. Except with the permission of the Head of Department, Performance Workshop 2 is open only to students taking a major in music. Please check with the Music Department for details. Performance Workshop 1 is not a prerequisite.

Assessment: 100% practical examination (and instructor assessment).

MUSI2047. Advanced music performance 2 (for students in their second year of study) (6 credits)

Students prepare a recital of 30/40 minutes under the supervision of a vocal or instrumental teacher approved by the Department. At least one piece must be performed on a period instrument, or must use either period or advanced twentieth-century techniques, as appropriate. Places in this course are limited and admission is by audition. Except with the permission of the Head of Department, Advanced Music Performance 2 is available only to students taking a major in music. Advanced Music Performance 1 is not a prerequisite.

Assessment: 100% coursework.

MUSI2048. Music, language, and meaning (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course explores the question of meaning in music and how this is articulated in music as medium. In what ways can music be construed as a "language"? How are emotions expressed in it? Are words equivalent to musical tones and phrases, sentences? What do tones mean? Do they mean nothing but sheer pleasurable physical sensations? Or do tones refer to things external to the music itself? How does music indicate human subjectivity and act? Why do all human societies have songs and dances? Why are these associated with healing, occult and magic in ancient societies? How is music valued and used in technologically-advanced societies? Where and how did the idea of listening to music in itself come about?

How does music mean when valued as entertainment and commodity in leisure, consumer societies? All these questions center around a philosophy of music that views it as a socially meaningful sign.

Assessment: 100% coursework.

MUSI2049. Music and power (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course, which is open only to non-majors, looks into specific studies that highlight how music shapes or is shaped by power relations. It argues that the exercise of power is involved in the performance of songs and dances during events that range from playful, yet intimate, face to face gatherings to serious, impersonal, public rituals in advanced, complex societies. A theory of music is not just a theory of tones, but a theory of social processes that a music is about. This course will enable students to think critically about the relationships between music and power in various contexts of group relations that are not necessarily political in nature. Readings pertinent to the use of music in relation to gender, class, race, and ethnicity will reveal that music as power can galvanize consent, identity, conformity and cooperation, much as it can also become a moral weapon of the weak to resist domination and oppression.

Assessment: 100% coursework.

MUSI2050. Representation of the supernatural in music (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

From the very beginnings of human memory, witches, ghouls, ghosts and goblins have played a highly significant role in the formation and continuance of stories that have attempted an explanation of natural phenomena and inexplicable cultural conventions. In Western culture, visual, conceptual and aural embodiments of such mythological creatures have numerously appeared in sculpture, painting, literature and music. This course, which is open only to non-majors, surveys musical representations of the supernatural throughout the ages. It will focus on a selection of eclectic musical works ranging from expressions of veiled medieval occultism to present-day cinematic productions of gothic horror, in which mythology and the supernatural continue to resonate.

Assessment: 100% coursework.

MUSI2051. Rhythms of life: music and culture in West Africa (for students in their second year of study) (3 credits)

(This course is also offered to second year non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, is a performance-based introduction to West African music, in particular, the percussion ensemble. The course focuses on the music and dance of the Dagaaba and Ewe people of Ghana, in particular, the music for *Gahu*, a type of traditional music and dance of the Ewe people. No previous musical experience is necessary. Students will participate in 12 hours of intensive instruction during the summer and will have the opportunity to learn to play, sing and dance music for *Gahu*. There will also be introductory lectures on the cultural context of various West African musics including, *djembe*, *griot*, *high-life*, *juju* and *mbalax*.

Assessment: 100% practical examination (and instructor assessment).

MUSI2052. Advanced tonal chromaticism and analysis (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is a continuation of MUSI1020 Fundamentals of Tonal Music II, with emphasis on chromatic harmonies, larger forms such as rondo and sonata, and contrapuntal genres such as canon and fugue. The basic concepts of Schenkerian theory will also be introduced. Students are required to complete a number of harmonic exercises and analytical projects.

Prerequisite: MUSI1020.

Assessment: 100% coursework.

MUSI2053. Post-Tonal techniques and advanced analysis (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will focus on the modern and post-tonal techniques such as modality, atonality, serialism, minimalism, aleatoric music, collage, neo-tonality, jazz harmony, etc. Analytic techniques of pitch-class set theory, transformational theory, timbral analysis will also be introduced. Students are required to complete various analytical and technical projects.

Prerequisite: MUSI2052.

Assessment: 100% coursework.

MUSI2054. The piano (3 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The course is open only to non-majors with either some experience with, or interest in, the piano. It offers an overview of the history of the piano through a montage of lectures that focus on the personalities that were involved with it, the repertoires they either composed for, or performed on it, and the social and cultural milieus that provided the context for its extraordinary rise as arguably the most important instrument in the history of Western Classical Music. Students will be given the opportunity to study the piano as a medium of musical explorations and expression, the occasion for the display of virtuosity, a staple of the 19th-century bourgeois home, and an object of almost maniacal veneration. The course will end with an overview of the dissemination of the piano in East Asia, with particular reference to the piano culture of Hong Kong.

Assessment: 100% coursework.

MUSI2055. Chinese opera (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course starts with an exploration of the structural and theoretical aspects of Chinese Opera, including the classification of tune types, text setting and performance practice. While examples are mostly drawn from *Kunqu*, Peking Opera, and Cantonese Opera, other regional derivatives will also be introduced for comparison and analysis. The second half of this course comprises a series of reading and examination of representative operas and their performances, through which the interplay between Chinese Opera and its religious, social, cultural, and political contexts is investigated.

Assessment: 100% coursework.

MUSI2056. Defining the arts scene in Hong Kong (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

What is an 'arts scene'? Does Hong Kong have one? Is a 'scene' a concrete social entity? Or is it a myth, a

retrospective, artificial construction by critics and historians, a rationalization of random events, processes, and individual choices? This course will attempt to answer these questions through close readings and discussions of selected works, artistic events, entities, and venues characteristic of Hong Kong's cultural life: the multiplex cinema, the soho commercial gallery, cantopop, the international film festival, the classical music organizations, independent cinema, Cantonese opera, the cattle depot artist village, and cyberspace. What will emerge is a fragmented, yet extraordinarily open, cultural space, one which the audience – be they critics, students, amateurs, and even tourists -- can play a crucial role in shaping and nurturing. "Defining the Arts Scene in Hong Kong," then, will mean not only finding the right words and tools to understand something that already exists as becoming active agents in bringing its existence to a new level of awareness, participating in the process of its creation.

Assessment: 100% coursework.

Level 300 courses

MUSI3008. University gamelan 2 (for students in their third year of study) (3 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all students, focuses on Balinese *gamelan* or 'orchestral' performance, specifically the *gamelan gong kebyar*. No previous musical experience is necessary. Students participate in weekly rehearsals with the *gamelan* over two semesters and by the end of the course students will be expected to know how to play the main melody, the main support parts, and the interlocking (*kotekan*) parts of selected compositions. In addition, students will be required to demonstrate their understanding of Balinese *gong kebyar* musical form by composing the interlocking parts for a specified melody. For this assignment, the class will be divided into groups consisting of four to six students. Students will also have the opportunity to participate in public performance.

Assessment: 20% coursework, 80% practical examination (and instructor assessment).

MUSI3012. Orchestral studies and techniques 3 (for students in their third year of study) (3 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

Students participate in weekly rehearsals and performances with the University's orchestra over two semesters. Besides musical skills, this course focuses on teamwork, discipline and creativity. To gain admission to the course, students must have reached the standard of ABRSM Grade 6 or the equivalent on one of the following: flute, oboe, clarinet, bassoon, horn, trumpet, trombone, tuba, percussion, violin, viola, cello or double bass and must pass an audition. Orchestral Studies and Techniques 1 and 2 are not prerequisites.

Assessment: 100% practical examination (and conductor assessment).

MUSI3016. Directed study 2 (for students in their third year of study) (6 credits)

This is a one-to-one course in which the student works with a supervisor throughout the year. During the first semester, the supervisor introduces theories and techniques of musical research through reading, discussion, and book reports. Towards the end of the semester, a research topic is to be decided upon between the student and supervisor. The second semester is devoted to the research on the topic and the writing of a thesis under the guidance of the supervisor. Entry to this course is at the discretion of the Head of Department. Directed Study 1 is not a prerequisite.

Assessment: 100% thesis.

MUSI3017. University choir 3 (for students in their third year of study) (3 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

This course, which is open to all third-year students, focuses on musical performance. Students participate in weekly rehearsals and performances with the Department's University Choir over two semesters. Besides musical skills, this course focuses on teamwork, discipline and creativity. University Choir 1 and University Choir 2 are not prerequisites.

Assessment: 100% practical examination (and conductor assessment).

MUSI3018. Performance workshop 3 (for students in their third year of study) (3 credits)

(This course is also offered to third year non-BA students for inter-Faculty broadening purposes.)

Students may choose to enroll in any workshop offered by the Music Department, or take individual instrumental instruction with a teacher approved by the Department over two semesters. Beginners are welcome, but places in this course are limited, especially for individual instrumental instruction. Except with the permission of the Head of Department, Performance Workshop 3 is open only to students taking a major in music. Please check with the Music Department for details. Performance Workshop 1 and Performance Workshop 2 are not prerequisites.

Assessment: 100% practical examination (and instructor assessment).

MUSI3019. Advanced music performance 3 (for students in their third year of study) (6 credits)

Students prepare a recital of 30/40 minutes under the supervision of a vocal or instrumental teacher approved by the Department. At least one piece must be performed on a period instrument, or must use either period or advanced twentieth-century techniques, as appropriate. Places in this course are limited and admission is by audition. Except with the permission of the Head of Department, Advanced Music Performance 3 is available only to students taking a major in music. Advanced Music Performance 1 and Advanced Music Performance 2 are not prerequisites.

Assessment: 100% coursework.

Department of Philosophy

First Year

PHIL1001. Knowledge of the world: an introduction to philosophy (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

Human beings have always attempted to understand and control the world they live in by asking questions, and seeking effective answers, about that world. These attempts have taken many forms, but philosophy has always been a central part of this process of explanation and the progress of knowledge. The questions of what we can know, how we can know, and how we can use what we know, are prime examples of philosophical questions that have come down to us in a long history of inquiry – philosophy is a part of the natural and practical curiosity of mankind.

Assessment: 100% coursework.

PHIL1002. The human mind: an introduction to philosophy (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

This course is an introduction to philosophical issues about the mind. These include metaphysical questions about what minds are, whether the mind is something non-physical or whether it is some kind of

a computer. Then there are the epistemological questions about the limitation of human knowledge, such as whether we can really know what other people's experiences are like, or whether there is a God.

Assessment: 100% coursework.

PHIL1003. Ethics and society: an introduction to philosophy (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

One of the founders of Western philosophy, Socrates, claimed that the most important philosophical question is "How is one to live?" How are we to live in our relations with others as individuals? And how are we to live together as in communities and societies? This course will introduce some of the ways that key philosophers in the Western tradition have answered these questions. Reading texts by Plato and Aristotle in ancient Greece, and modern and contemporary writings by Locke, Kant, Mill, Rawls and contemporary theorists of democracy, we will explore questions about the way we relate to other people.

Assessment: 100% coursework.

PHIL1004. Chinese and Western thought: an introduction to philosophy (6 credits)

(This course is also offered to first year non-BA students for inter-Faculty broadening purposes.)

The course compares central themes in the philosophical dialogues of the Chinese and Western traditions. Topics may include Confucian intuition, Daoist paradox, Greek rationalism, British Empiricism, Existentialism, Pragmatism, Maoism, Zen Buddhism, and positivism.

Assessment: 100% coursework.

PHIL1005. Critical thinking and logic (6 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

Critical thinking is a matter of thinking clearly and rationally. It is important for solving problems, effective planning, and expressing ideas clearly and systematically. We shall study the basic principles of critical thinking, and see how they can be applied in everyday life.

Assessment: 60% coursework, 40% final exam.

PHIL1006. Elementary logic (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes.)

This is a web-based self-study course on elementary formal logic. Formal logic uses special symbolic notations to study reasoning and arguments systematically. In this course we shall look at some basic concepts in logic, and learn how to use special logical symbols to construct and evaluate arguments. There are no lectures in this course, and all teaching material is available online for self-study. There are, however, optional tutorials for students to ask questions. Registered students should visit the philosophy department web site at the beginning of the semester to find out how they can obtain access to the learning material.

Assessment: 60% coursework, 40% final exam.

Not available to students who have taken **PHIL2510. Logic**.

Second and Third Years

Group I: Knowledge and Reality

PHIL2110. Knowledge (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Theory of knowledge deals with the nature and possibility of knowledge and its limits. We shall address questions that include: Is Scepticism possible? Are some kinds of knowledge more basic than others? Are our views of the world really true or just elaborate stories that serve our purposes? Can philosophers learn about knowledge from psychology and physiology? What could philosophers add to their stories? Is there one concept of justification (reason) or many (social and cultural differences)? Is truth an important goal of knowledge?

Assessment: 100% coursework.

PHIL2120. Topics in Analytic Philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

An advanced introduction to contemporary philosophy, this course will focus on three areas of lively current debate. Students will have an opportunity to critically examine a sample of the best recent work in analytic philosophy. Careful attention will be paid to the roots of these debates in the work of Frege, Russell, Moore or Wittgenstein. Topics will include: skepticism, vagueness, and causation.

Assessment: 100% coursework

Prerequisites: none required, but one previous philosophy course is highly recommended.

PHIL2130. Philosophy of the sciences (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

If we want to find out about the world around us, we look to science to provide the answers to our questions. But why? What justifies our faith in this enterprise? In this course, we shall investigate two related questions. First, what is scientific method? We shall examine answers ranging from the rigid prescriptions of Popper to the anarchism of Feyerabend. Second, what reason do we have to think that the explanations provided by science are true? Here the answers range from optimism based on the success of science, to pessimism based on our repeated rejection of past theories. Along the way, we shall critically consider notions such as progress, objectivity, and the difference between science and non-science. We shall examine how philosophical questions arise in actual scientific practice. What examples are selected for this purpose will, to some extent, be determined by the interests of students.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2140. Philosophy of social science (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

How should we understand and explain human life and activities? This course will examine different models of explanation in the social sciences, and will proceed by case studies. Which cases are taken will depend on the interests and knowledge of those who enrol for the course.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2150. Philosophy and biology (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Charles Darwin's theory of evolution had a huge impact on the way we think about mankind's place in the world. In this course we will discuss some of the philosophical consequences of this impact. No previous knowledge of the theory is required as we will begin with a critical introduction to its development and main features. Later in the course we will also consider the contemporary debate concerning the scope and limits of evolutionary theory.

Assessment: 100% coursework.

PHIL2210. Metaphysics (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course covers both the nature of reality and the nature of knowledge of it and treats the two questions as intrinsically connected. We shall examine a number of important theories of metaphysics, as well as anti-metaphysics, including those of Plato, Descartes, Hume, Kant, Nietzsche, Heidegger, and contemporary philosophers such as Habermas, Rorty and Putnam. We will treat these theories not only as representing different views on metaphysics but also as forming a logical order of development.

Assessment: 100% coursework.

PHIL2420. Chinese philosophy: metaphysics (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

We study Chinese views of reality, human nature, language, wisdom and the relation of each to human society. Our main texts will be Daoist texts from the classical period, but we shall also discuss Neo-Daoism, Buddhism and Neo-Confucian metaphysics.

Assessment: 100% coursework.

Group II: Mind and Language

PHIL2070. Pragmatism (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course is in two unequal parts. In the first and longer part, we shall study the writings of the classical pragmatists: Peirce, Dewey and James; in the second, we shall look more briefly at some of the so-called 'neo-pragmatists' such as Quine, Davidson and Putnam. We shall then consider the question of the relationship between these two schools, and think seriously about the recent suggestion that the earlier is in fact the better.

Topics to be discussed include: truth and knowledge; religion and science; and rationality, personality and aesthetics.

Assessment: 100% coursework.

PHIL2075. The semantics/pragmatics distinction (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

One of the central issues in contemporary philosophy of language and linguistics concerns whether and where one should draw the line between semantic meaning and pragmatic meaning, or the meanings had

by the words and sentences a speaker uses, and what a speaker means in using those words and sentences. One reason the issue is central is that there are debates over the semantic meanings of certain expressions, e.g. names and definite descriptions. Without a general account of the difference between semantic and pragmatic meaning, these debates cannot be settled. Another reason the issue is central is that there are some who, in a roughly Wittgensteinian manner, deny that there is any real sense to be made of the notion of semantic, or literal, meaning. According to them, there is, therefore, no line between pragmatic and semantic meaning at all. In this course we will try to determine whether the distinction can be drawn, and, if so, where.

Assessment: 100% coursework.

PHIL2220. The mind (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The human mind is the nexus of a number of great mysteries. What is the nature of self? Is the mind identical to the brain, or is it an immaterial substance? Is Artificial Intelligence possible, and can computers experience emotions and other feelings? Are our actions free, or are they determined by our genes and upbringing? We shall be exploring some of these issues and other related topics in this course.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2230. Philosophy and cognitive science (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

We shall look at some of the philosophical issues involved in studying minds and behaviour scientifically. We might discuss questions such as: Can we explain all mental phenomena in computational terms? What is consciousness? What is the role of language in thinking? How useful are neural networks in understanding the mind?

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2460. Philosophical Chinese (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In this course, we shall learn to analyse grammatically and semantically the language used in the classical texts of Chinese philosophy. The analysis will help us construct arguments in favour of or against various interpretations and translations. We briefly discuss texts from the *Analects* of Confucius, the *Mozi*, the *Zhuangzi* and then do a detailed analysis of the *Daode Jing*.

Assessment: 100% coursework.

PHIL2510. Logic (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This is an introduction to formal logic. We will review sentential and predicate logic. We will discuss theorems about formal systems of logic, including soundness and completeness. Time permitting, we will discuss advanced topics such as Gödel's incompleteness theorems, computability, Tarski's theorem, or modal logic. Students are expected to know some elementary formal logic before enrolling in this course.

In preparation, students can take PHIL1005, or PHIL1006, or else students can study the online material on logic produced by the Department. For further details, please contact the Department.

Assessment: 100% coursework.

PHIL2511. Paradoxes (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Paradoxes are arguments which proceed from highly plausible assumptions, through highly plausible and usually simple steps to highly implausible conclusions. Some examples: Zeno's paradoxes of motion, Kant's antinomies, the Liar and the paradox of the surprise examination. What such paradoxes show is that there is something deeply wrong with some of our most fundamental ways of thinking. We shall attempt to find solutions to certain of these paradoxes. Students are expected to know some elementary formal logic before studying this course. To prepare for the course, they can either take PHIL1006 Elementary Logic, or study the online material on logic produced by the Department. For further details, please contact the Department.

Assessment: 100% coursework.

PHIL2520. Philosophy of logic (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

When thinking about inference, a number of concepts come to our attention, such as *truth*, *logical constants*, *propositions*, *necessity*, *consequence*, *logical form*. Various questions with which the course deals include: 'What is the relation of Logic to reasoning?'; 'What does the existence of paradoxes tell us about our accepted logical principles?'; 'What is the best way to represent arguments in ordinary language if we wish to study the validity of such arguments?' 'Are there types of discourse which are by nature fuzzy, demanding a fuzzy logic for their representation?'; 'Must logic fit empirical facts, or is it a 'pure' discipline?' Students are expected to know some elementary formal logic before studying this course. To prepare for the course, they can either take PHIL1006 Elementary Logic, or study the online material on logic produced by the Department. For further details, please contact the Department.

Assessment: 100% coursework.

PHIL2610. Philosophy of language (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

What is a language, and what is involved in knowing or understanding a language? In this course we will see how philosophers and linguists answer such questions as the following: What can logic tell us about the grammar of natural languages? Are human beings born with a universal grammar? What makes a word meaningful? What is the difference between what we mean and what we convey when we say something? How does a metaphor work? Can we learn something from slips of the tongue about the nature of language?

Assessment: 100% coursework.

Group III: Moral and Political Philosophy

PHIL2080. Marxist philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

purposes.)

The world has changed a great deal since the time of Marx. But Marxism, duly updated and refined, still has a lot to teach us about the nature of human society and historical change, the capitalist organization of society, the foundation and limits of liberal democracy, the constitution of power and the political. These and other issues raised by Marxism are, or ought to be, among the central concerns of political philosophy or philosophy of history. We will examine how Marxism, especially contemporary Marxism, can serve as a useful critique of liberal political philosophy and liberal political institutions. We will also discuss how Marxism itself needs to be transformed or reconceived in order to create an appealing democratic vision of genuine contemporary relevance.

Assessment: 100% coursework.

PHIL2310. Theories of morality (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course covers some of the main highlights of 20th century moral philosophy, with passing attention to some of the earlier, historical background as needed. Questions covered include: Is morality relative or absolute? Can a moral practice be right in one culture but wrong in another? Is morality basically a form of personal or social opinion, or is there any way it can be made objective or even scientific? If morality is not science, is there any rational way of resolving moral disputes? Perspectives considered include religious and nature-based theories, performative theories, rational intuitionism, utilitarianism and modern theories of justice.

Assessment: 100% coursework.

PHIL2320. Happiness (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Happiness is something we all strive for, despite the fact that we have only hazy and inconsistent notions of what it would involve. Is it a psychological state or the condition of living a good life? Is it to be gained by withdrawing from the world, or engaging in it? Are we, in some sense, designed to be happy, or is it always an impossibility? This course will lead students through some of the most influential conceptualisations of happiness in the Western tradition. We will consider, in detail, the work of Aristotle (*Nicomachean Ethics*), J.S.Mill (*Utilitarianism*) and Freud (*Civilisation and Its Discontents*). This focus will allow us to explore a range of ideas about the nature of happiness and the possibility (or impossibility) of our achieving it. Particular emphasis will be placed on the ongoing influence of these conflicting ideas in our contemporary world.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2340. Moral problems (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Many practical problems give rise to moral controversies. Among the questions to be considered in this course are 'Should one person treat all others equally?'; 'Is abortion a type of killing, and is it acceptable?'; 'Should certain types of pornography be banned?'; 'Can capital punishment be justified?'; 'Is it right to take affirmative action in favour of groups who have been discriminated against in the past?'; 'Should old people be helped to die, if that is what they wish?'. These are all 'large-scale' questions, but we shall also be discussing less grand, but no less important moral dilemmas that we each confront from time to time.

Assessment: 100% coursework.

PHIL2345. Social Contract Theories (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In this course we study the major modern theories of social contract, starting with the seventeenth-century *Leviathan* of Thomas Hobbes, which places the state above its subjects. Later in the same century John Locke's *Second Treatise of Government* argued that the contracting parties to the state would seek protection of their property above all, and that they could dismiss a non-performing government, an inspiration for the American Revolution. Jean-Jacques Rousseau rejected the positions of Hobbes and Locke, basing his social contract on the will of all jointly to secure the common good, or 'general will'. John Rawls' *A Theory of Justice* in the twentieth century bases the democratic system on a conception of social justice grounded in equality of basic rights and regard for the least advantaged members of society. Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2350. Philosophy of law (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

We shall set the scene by contrasting classical Western and Chinese views of law. Then we shall focus on what moral and political presuppositions are required to justify the rule of law. This will guide our view of how one ought to reason in interpreting the law, and finally see what the implications of theory of law are for our views of punishment, rights, justice, equality, responsibility, insanity, and negligence. This course should help you evaluate the arguments for the importance of the rule of law in Hong Kong.

Assessment: 100% coursework.

PHIL2355. Theories of justice (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

All of us care about justice but perhaps you seldom pause to reflect on the nature of justice and the many difficult issues which justice raises. This course introduces you to these issues and systematic ways of thinking about them. In a nutshell, justice is concerned with the question, How should the benefits and burdens of social cooperation be distributed among members of society under conditions of scarcity and conflicting values? Or, as Serge-Christophe Kolm puts it, "What should be done when different people's desires or interests oppose one another and cannot all be fully satisfied? Justice is the justified answer to this question and its science is the theory of justice." We will think about this question at two levels: the distribution of fundamental rights and duties in the basic structure of society; and the distribution of goods in particular domains, such as health care. Since controversy abounds at both levels, we will discuss and compare a variety of positions, including those of John Rawls, Brian Barry, Amartya Sen, Ronald Dworkin, Robert Nozick, Serge-Christophe Kolm, Norman Daniels, and Francis Kamm. We will also consider whether, and to what degree, Western theories of justice such as these are useful for thinking about issues of justice in Hong Kong and the PRC at large.

Assessment: 100% coursework.

PHIL2360. Political philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This survey course addresses fundamental questions in the history of political philosophy. Questions about government, justice, property and rights will be addressed through the work of a range of historical and contemporary thinkers. Philosophers to be studied may include Aristotle, Hobbes, Marx, Rawls, and others.

Assessment: 100% coursework.

PHIL2362. Liberal democracy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Liberal democracy is the dominant political value and form of government in terms of power and influence in the world today. It is supposed to be a coherent combination of liberalism and democracy, and yet there are deep tensions between these two components. It is by identifying these tensions that we can best understand the workings of liberal democracy as a form of government and assess its plausibility and appeal as a political value. Within this context, such familiar topics as political agency, freedom, rights, and private life will be seen in a fresh light.

Assessment: 100% coursework.

PHIL2365. Philosophical problems of modernity (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will focus on responses to one of the key questions that is posed by twentieth century European philosophy: that is, what is the nature of this modernity in which we live? According to Marx, the experience of modernity is one in which 'all that is solid melts into air'; while according to some contemporary philosophers this is precisely the experience of *post*-modernity. In this course, we will examine the responses of key 20th century philosophers to the question of modernity and postmodernity (these may include, Benjamin, Adorno & Horkheimer, Habermas, Foucault, Lyotard and Bauman). Particular attention will be paid to the way this questioning has led to a reconceptualisation of ethics and politics in contemporary societies.

Assessment: 100% coursework.

PHIL2369. Philosophy of nature (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

In this course we will develop an understanding of historically and philosophically significant approaches to the environment such as *anthropocentrism* (mainstream environmentalism) and *biocentrism* (deep ecology). We will read authors both from the history of philosophy (Bacon, Descartes and Locke) as well as modern philosophers. We will look at the implications of these philosophies in recent environmental controversies in Hong Kong.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2375. Philosophy of art (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course focuses on the philosophical issues which arise when we consider the nature of aesthetic appreciation and judgement. These are some of the questions which will be discussed in the course: What

is *mimesis*? Does art simply mirror nature? Is beauty merely 'in the eye of the beholder'? What differences might there be between aesthetic appreciation of art and aesthetic appreciation of nature? What is the relation between art and society? What is the difference between the sublime and the beautiful? These and other questions will be explored through the work of philosophers such as Plato, Aristotle, Hume, Kant, Dewey, Heidegger Foucault and Lyotard.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2380. Philosophy and literature (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces two ways of studying philosophy and literature in relation to each other. On the one hand, we shall try to illuminate a range of philosophical, particularly ethical, problems through a close reading of literary texts (which may include the work of Dostoevsky, Henry James, Franz Kafka, and James Joyce). On the other hand, we shall bring the resources of philosophy to bear on questions of literary theory and interpretation (for example, the role of the reader, the position of the writer and the ethics of reading). Both philosophical essays and literary works will be used in the course.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2390. Philosophy of religion (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Topics discussed will include: the nature of religious experience, the existence of God, life after death, religion and morality, religion and reason.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2430. Chinese philosophy: ethics (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

An introduction to comparative moral philosophy, with readings drawn from the classical Chinese tradition as well as from modern, analytical sources. Figures likely to be taken up include Confucius, Mencius, Mo Tzu and Han Fei Tzu. Attention will be given to the historical development of Chinese moral thinking through these key representatives. Questions to be taken up include the question of whether traditional Chinese thought can have relevance to us in the modern world, and how our beliefs about our nature may shape our beliefs about what is moral or immoral.

Assessment: 100% coursework.

PHIL2480. Confucianism and the modern world (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course introduces some of the central ideas of Confucianism, particularly as they have been developed by Neo-Confucian thinkers, and considers the contemporary meaning and relevance of these ideas for societies with a Confucian tradition. The thematic focus of the course is on whether and how (Neo-)Confucianism promotes or hinders economic, political and cultural modernization. We shall also

discuss how (Neo-)Confucianism interacts with Western ideas, and (in the case of the PRC) Marxism in the process of social transformation.

Assessment: 100% coursework.

Group IV: History of Philosophy

PHIL2001. The beginnings of philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The contents of this course will vary from year to year, but it is likely to include important early thinkers like Plato and Aristotle in the West, and/or Confucius and Lao Tze in China. Details will be announced in good time in the departmental booklet 'Choices in Philosophy'.

Assessment: 100% coursework.

PHIL2002. Early modern philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course examines the works of early-modern philosophers writing on politics and science, stressing the interconnections between them. We will examine the claim by some of these philosophers that modern science and technology hold the key to what Francis Bacon called 'the relief of man's estate'. We will read Bacon, Descartes, Bossuet, Locke, La Mettrie, Diderot and Rousseau.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2010. Plato (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course offers a general introduction to the central concerns of Plato's philosophy. It focuses on Plato's early and middle dialogues in which the enigmatic character of Socrates is central. It addresses Plato's teachings on the role of philosophy in the life of the individual, the relation between knowledge and virtue, and his contribution to questions about the nature of love and desire.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2011. Aristotle (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The ancient Greek philosopher Aristotle (384-322 BCE) researched virtually every aspect of human knowledge, producing works that influence philosophy and many other fields down to the present. This course looks at his political and social philosophy; we will read his *Parts of Animals*, *Politics* and *Constitution of Athens*, examining his concepts of nature, human nature, slavery, property, citizenship, democracy, education and the ideal city.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2020. Descartes (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The standard accounts of Descartes' philosophy have tended to focus on his late metaphysics and epistemology, but this course is intended as an introduction to many more of the interesting aspects of Descartes' thought. We shall, of course, discuss some of the standard issues in their rightful place (and discuss what that place might be), but we shall also consider Descartes' contributions to, and philosophical thoughts about, e.g. physics, mathematics, and medicine. (*N.B.* No specialist knowledge of these areas is required). The reading will be a combination of Descartes' primary texts (recently published in a very clear translation) and contemporary secondary material.

Assessment: 100% coursework.

PHIL2025. Hume (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

David Hume (1711 – 1776) was one of the great founders of modern empiricism. This course will serve not only as an introduction to Hume's philosophy, but also as an introduction to modern empiricism as developed especially in the analytical tradition of modern philosophy. The course will appeal especially to students interested in the theory of knowledge, metaphysics and philosophy of mind, as well as to students interested primarily in the history of philosophy.

The course takes up key topics in Hume, such as: Hume's theory of ideas; the formation of reason and imagination; knowledge of the external world and skepticism with regard to the senses; induction; causation, probability and the idea of necessary connection; personal identity; freedom and determinism, reasoning in animals; miracles; virtue and vice in the context of Hume's naturalism. Readings will be drawn primarily from Hume's *A Treatise on Human Nature* and *An Enquiry Concerning Human Understanding*.

Assessment: 100% coursework.

PHIL2027. Rousseau (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Jean-Jacques Rousseau (1712-1778) was one of the most important philosophers of the French eighteenth century. He was critical of the Enlightenment's fascination with science, arguing that virtue, community and a kind of freedom, not technological 'progress', should be the goal of human striving. In this course we seek to understand Rousseau's thought in its historical context; we consider how he can be considered a philosopher for our own time, who respected the rights of nature as well as those of humanity. We read selections from his *Confessions*, and the entire texts of his *Discourse on the Sciences and the Arts*, and his *Discourse on the Origins of Inequality among Men*.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2030. Kant's critical philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Two aspects of Kant's philosophy will be examined: first, topics in his theoretical philosophy such as objective knowledge, transcendental idealism and the thing-in-itself; second, topics in his practical philosophy such as moral duty, free will and rationality. Attempts will also be made to unify these two

aspects of Kant's philosophy.
Assessment: 100% coursework.

PHIL2035. Philosophy of the Enlightenment (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The eighteenth-century European philosophical movement known as 'The Enlightenment' called all previous philosophy into question, destabilizing conventional views of humanity, nature, society and the cosmos; the Enlightenment influences philosophy to this day. This course examines important European thinkers such as Francis Bacon, Bernard Mandeville, Denis Diderot, Jean le Rond D'Alembert, Julien Offray de La Mettrie, Jean-Jacques Rousseau and Immanuel Kant from a historical as well as philosophical perspective.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2040. Nietzsche (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Nietzsche occupies a special place in Western thought, both as a wholesale critic of the philosophical tradition that went before him (e.g. Socrates, Kant), and as a precursor of certain philosophical trends that are important today (e.g. Foucault, Derrida). This course offers an overview of Nietzsche's philosophy (including the will to power, perspectivism, nihilism, eternal return) and discusses Nietzsche's influence on contemporary thought.

Assessment: 100% coursework.

PHIL2060. Wittgenstein (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Wittgenstein said that his aim in philosophy was 'to show the fly the way out of the fly bottle'. By this he meant that certain preconceptions, oversimplifications and poor analogies had led philosophers to construct misguided theories about such things as sensation, meaning, understanding and the nature of language, and that it was his task not to construct alternative theories but to point out the ways in which the theorists (including his earlier self) had become entrapped. This programme may appear modest, but Wittgenstein's approach has had far-reaching consequences and his work has received more discussion than that of any other twentieth century philosopher and has influenced philosophy and many other disciplines.

Assessment: 100% coursework.

PHIL2077. Habermas (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The important German philosopher Habermas, combining strengths of the Continental and Anglo-American philosophical traditions, has developed a highly influential theory on a wide range of moral, political and historical issues. This course is designed to provide a general introduction to Habermas's interdisciplinary, comprehensive, and politically engaged way of doing philosophy. Topics covered include discourse ethics, the public sphere, social action and rationality, technology and science

as ideology, the nature of modernity, and legitimation problems in late capitalism.
Assessment: 100% coursework.

PHIL2085. Contemporary European philosophy (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The contents of this course will vary from year to year, but it is likely to cover various important twentieth century thinkers (these may include Husserl, Heidegger, Sartre, Foucault, Derrida) and/or major movements in twentieth century European thought (such as phenomenology, existentialism, structuralism and poststructuralism). Details will be announced in good time in the departmental booklet '*Choices in Philosophy*'.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2090. Foucault (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

The work of French philosopher Michel Foucault (1924-1984) has been enormously influential in many fields: from philosophy and politics to social theory and gender studies. This course offers a general introduction to this work, with particular focus on power, knowledge and sexuality. It will end with a consideration of Foucault's contribution to a contemporary re-thinking of subjectivity and ethics.

Assessment: 100% coursework.

There is no prerequisite for this course.

PHIL2440. Confucius (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

This course will look at modern interpretations of traditional Confucianism, primarily from the perspective of modern analytical philosophy, but with some attention also to the sociological literature, and to modern applications of Confucianism, for example in Singapore.

Assessment: 100% coursework.

PHIL2442. Mencius (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

Mencius, the most influential of Confucian philosophers, presents interesting challenges to interpretation. Does his philosophy provide a basis for a Chinese theory of human rights? Is his conception of human nature defensible today? Which tradition of interpretation (mind or principle) gives the most plausible interpretation? We shall discuss these questions while looking at some modern scholarly interpretations of Mencius in his ancient context.

Assessment: 100% coursework.

PHIL2450. Zhuangzi (6 credits)

(This course is also offered to second and third year non-BA students for inter-Faculty broadening purposes.)

purposes.)

In this course we shall explore different lines of interpretation of Zhuangzi's Daoist philosophy. Students will participate in defending either relativist, sceptical or mystical readings of key passages. We shall start our analysis with the historical context and some textual theory. Then we shall discuss several chapters in some detail, including the historical account of the development of Daoism in 'Tianxia', the relativism in 'Autumn Floods' and 'Free and Easy Wandering', and finally the analytic scepticism and pluralism of the 'Essay on Making Things Equal'.

Assessment: 100% coursework.

Courses of unspecified category

PHIL3810. Senior seminar (6 credits)

This course will focus each year on a different key philosophical text. Presentations will be made by students and discussed according to a schedule worked out in advance between students and the course co-ordinator. Selected third-year students will be included.

Assessment: 100% coursework.

This is a third-year course, and is normally offered every year. Permission to attend it will be given to those students with good second year grades.

PHIL3910. Senior thesis (12 credits)

A thesis may be prepared under supervision for submission not later than March 31 of the final year. Students have to decide a topic on which they would like to write, then select a teacher in the relevant field and discuss the project with him/her, before the end of their second year. If the teacher deems the project viable, then a thesis title must be agreed by the closing date of June 15. The student will then have to work on the thesis over the summer, and be able to demonstrate progress made. If the progress is adequate, work on the thesis may continue; if not, the student will have to take two courses instead.

There are no word limits prescribed, but theses tend to be between 15,000 and 25,000 words in length. Assessment will be based entirely on the completed thesis. This course is only available to students majoring in Philosophy.

The courses listed below will not be necessarily offered every year.

Junior Level Courses

BUSI1002. Introduction to accounting (6 credits)

The course will cover the principles of double entry book-keeping, the interpretation of financial statements, the issues raised by corporate regulation, and the use of management information for decision making.

BUSI1003. Introduction to management information systems (6 credits)

The objectives of this course are to (i) examine the new opportunities and challenges brought about by technological developments, and (ii) outline effective ways information technology can be utilised in different functional areas of the business to sustain the firm's strategic position in today's interrelated global market.

BUSI1004. Marketing (6 credits)

An introductory course on the basic concepts of marketing and their implications in management. The ingredients of the Marketing Plan will be analysed and the problems involved in formulating marketing strategy; interpreting marketing data and coping with the changing market environment will be examined.

BUSI1006. Principles and practices of modern business (3 credits)

This course is deliberately designed to make students aware of the mechanics and environments in which modern day business operate in global, regional and domestic markets. This course aims to help students to understand modern business operations and development in the knowledge economy. This orientation is organized around the new emerging paradigms of business configuration and the skills required of future business leaders.

Mutually exclusive courses: BUSI0015, and YSOB0001

BUSI1007. Principles of management (6 credits)

This introductory course traces back to how the study and practice of management evolved over this past century, with particular focus on the landmark discoveries and lessons learned. The course aims to develop students' awareness of the nature of management processes and involves a study of the following topics: planning, organizing, controlling, leading, communication and change management. The programme's pedagogical design combines the ingredients of theoretical conceptualization and emphasizes interactive discussions, skill-building experiential exercises and students' presentations.

Remarks: Students having completed BUSI1007 Principles of management (3 credits) offered in the academic year 2002-2003 or earlier are not allowed to take this course.

BUSI0001. Accounting systems and financial reporting in China (6 credits)

The course will be an introduction to current accounting systems and financial reporting practices in China. The topics covered in this course include administration of accounting work, accounting legislation and regulations, business accounting standards, practices of cost accounting and managerial accounting, accounting for governments and non-profit organizations (budgetary accounting), financial reporting of the listed corporations, disclosure of other information, preparation of financial statements, auditing requirements, practices of public accounting, and analysis of financial statements in China.

Prerequisite: BUSI1002 Introduction to accounting

BUSI0002. Accounting theory (6 credits)

The development and structure of accounting theory. Income determination. Asset valuation. Special areas of controversy, including social accounting and accounting for inflation. Principles of human information processing.

Prerequisite: BUSI0020 Intermediate accounting II

BUSI0003. Advanced financial accounting (6 credits)

Application of accounting theory to the preparation of accounting standards and their implications for reporting purposes, particularly those related to the consolidation of group accounts, asset valuation and the influence on income determination. Other topics may include current cost accounting, income tax allocation, government entities and nonprofit organizations.

Prerequisite: BUSI0020 Intermediate accounting II

BUSI0004. Advertising management (6 credits)

The preparation, use and administration of advertising, emphasizing the use of research to direct and measure the effectiveness of each stage in the operation.

Prerequisite: BUSI1004 Marketing

BUSI0006. Auditing (6 credits)

Professional ethics, and the social and legal responsibilities of auditors; basic auditing concepts and principles; evidence; evaluation of internal control; standard procedures and methods of investigation.

Prerequisite: BUSI0020 Intermediate accounting II

BUSI0008. Business cycles and strategy (6 credits)

A course on business cycles in a global economy and how firms devise business strategies. Topics include business expansion and contraction, hiring and layoff decisions, consumer spending, banking relationship and hedging strategies in a world of fluctuating exchange rates.

Remarks: It is not available to Year I students.

BUSI0009. Business policy (6 credits)

293

The course will review the analysis and implementation of strategic corporate decisions which encompass all functional areas of business. Students will be split into small groups and will be required to write a mini-project of not more than 5,000 words outlining the desired corporate strategy for a given corporate problem.

Remarks: Only available to students in the School of Business.

BUSI0010. Company law (6 credits)

Formation of companies; memoranda and articles of association. Powers and duties of directors, secretaries and auditors. Shareholders' rights and powers and the role of the courts. Takeovers, mergers and investments; statutes, regulations and codes. Insolvency law and practice.

Remarks: It is advisable to take BUSI1001 Business law prior to this course.

BUSI0012. Comparative and international management (6 credits)

This course introduces students to cross-cultural differences in social values and in psychological attitudes and considers their implications for behaviour in organizations. Initial consideration will be given to the process of development and the changes which that brings. This will be followed by a review of the major business cultures in Asia, contrasting them with Western examples. Concentration will be focused on Chinese forms of business.

BUSI0013. Current business affairs (3 credits)

The course focuses on current business affairs with emphasis is on the interaction between business behaviour and the economic environment. Topics include government policy, legal framework, imports and exports, banking and finance, property and land markets, retail and wholesale trade, public utilities, infrastructure investment projects, small and medium enterprises, and technology and innovation.

Prerequisite: ECON1001 Introduction to economics I

BUSI0015. Entrepreneurship, creativity and innovation (6 credits)

This course explores the central issues involved in entrepreneurship, with particular on creativity and innovativeness. The course introduces some novel approach to learning and reflection in order to take advantage of a rapidly expanding intellectual core which gives meaning and coherence to entrepreneurial activities.

Mutually exclusive courses: BUSI1006, and YSOB0001

BUSI0018. Hong Kong taxation (6 credits)

A study of the accounting for, and management of, taxes on income under the Inland Revenue Ordinance, within the context of taxation theory.

Prerequisite: BUSI1002 Introduction to accounting

BUSI0019. Intermediate accounting I (6 credits)

The course provides an in-depth knowledge of the first part of financial accounting. It covers the

environment of financial accounting and the development of accounting standards; conceptual framework underlying financial accounting; statement of income and retained earnings; balance sheet; accounting and the time value of money; cash and receivables; valuation of inventories; acquisition and disposition of property, plant and equipment; depreciation and depletion; intangible assets; current liabilities and contingencies; long-term liabilities; temporary investments and long-term investments; and revenue recognition.

Prerequisite: BUSI1002 Introduction to accounting

BUSI0020. Intermediate accounting II (6 credits)

This course provides an in-depth knowledge of the second part of financial accounting. It covers stockholders' equity; dilutive securities and earnings per share calculations; accounting for income taxes; accounting for pensions and postretirement benefits; accounting for leases; accounting changes and error analysis; statements of cash flows; basic financial statement analysis; and full disclosure in financial reporting.

Prerequisite: BUSI0019 Intermediate accounting I

BUSI0021. International accounting (6 credits)

Cross-cultural paradigms in accounting. Accounting in the People's Republic of China. The German, Japanese and French accounting approaches. The history of the Anglo-American paradigm. Harmonisation of accounting standards and practices. Transfer pricing and international tax management. International accounting bodies and firms. Cash flow statements, secret reserves and other key variations in disclosure and measurement practices in developed countries.

Prerequisite: BUSI1002 Introduction to accounting

BUSI0022. International marketing (6 credits)

This course shows how the basic principles of marketing can be applied to the problems of marketing across national boundaries and within foreign countries. Attention is paid to the development of global marketing strategies and to the different approaches needed to market consumer items, industrial goods and services internationally.

Prerequisite: BUSI1004 Marketing

BUSI0023. Operations and quality management (6 credits)

A general introduction to the basic concepts and principles of management of manufacturing and service operations. Emphasis will be on both the quantitative and qualitative aspects of operations management and the intention is to give students moderate exposure to the major topics in operations management.

BUSI0025. Advanced topics in investments (6 credits)

A course on the modern portfolio theory and the various pricing models of securities.

Prerequisite: FINA2802 Investments and portfolio analysis

BUSI0026. Employment and labour relations (6 credits)

This course intends to give an overview on the fundamentals of labour relations theories pertaining to

trade unionism, collective bargaining and workplace labour-management relations. Particular attention is also given to the development of the labour market, employment pattern and labour law in Hong Kong.²⁹⁵

BUSI0027. Management accounting I (6 credits)

The theory and techniques involved in serving the accounting needs of management in the decision making, control, evaluation and motivational aspects.

Prerequisite: BUSI1002 Introduction to accounting. Students who have taken BUSI0007 Budgetary planning and control are not allowed to take this course.

BUSI0028. Management accounting II (6 credits)

A course on advanced problems in managerial accounting and management information and reporting systems for planning and control of operations. In particular it will include problems associated with large decentralized companies - divisional performance control, measurement and evaluation, transfer pricing.

Prerequisite: BUSI0027 Management accounting I

BUSI0029. Human resource management and business strategy (6 credits)

This course proposes to look at the basic concepts of human resource management (HRM) and its application to Hong Kong. Emphasis will be placed on the strategic linkage between HRM and corporate management in the context of business changes and re-structuring. Comparative references will also be made to practices elsewhere in other industrial societies.

BUSI0030. Market competition and quality management (6 credits)

The objective of this course is to explore the problems and issues involved in the management of quality improvement and market competition. Emphasis will be on the strategic aspects of quality and marketing management and the intention is to give students exposure to important topics like customer value, quality improvement tools, quality concepts and its relationship with different aspects of marketing management.

Prerequisite: BUSI1004 Marketing

BUSI0031. Marketing research (6 credits)

This course will cover the broad principles of marketing research. Emphasis will be placed on the use of marketing research as an aid to decision making. In this spirit students will be introduced to a variety of types of marketing research data. Students will be given the opportunity to engage in practical marketing research based exercises.

Prerequisite: BUSI1004 Marketing

BUSI0032. Multinational corporations (6 credits)

This course studies the multinational enterprise (MNE) and the theoretical approaches that have been formulated to explain the growth and operation of this form of business on an international scale. Recent general theories will be considered in a critical manner to allow judgements to be made on their strengths and limitations.

Prerequisite: BUSI1007 Principles of management

BUSI0033. Organizational change and development (6 credits)

The objective of this course is to explore the problems and issues involved in the management of organizational change and development. Major approaches and attempts to conceptualize the phenomenon will be examined in a critical manner. Particular attention will be paid to problems arising from company formation, entrepreneurial ventures, company expansion and growth, maturity and bureaucratization, corporate failure and recovery. Major strategies for change will be examined.

BUSI0034. Human resource: theory and practice (6 credits)

A course that draws upon an understanding of organizational behaviour to examine the techniques and practice of HRM. Topics include HRM and corporate strategy, human resource planning, recruitment and selection, performance management, training and development, employee relations.

BUSI0035. Production and operations (6 credits)

A course to introduce a systems-oriented view of production and operations management.

Prerequisites: BUSI0023 Operations and quality management, *and* BUSI0036 Quantitative analysis for business decisions I

BUSI0036. Quantitative analysis for business decisions I (6 credits)

A course on the quantitative methods used to solve business problems and make managerial decisions. The course involves the use of computers in the teaching process.

Prerequisite: STAT1008/STAT0302 Business statistics *or* STAT1003 Introductory statistics *or* STAT1004 Probability and statistics *or* STAT1001 Elementary statistical methods *or* STAT1301 Probability & statistics I *or* STAT1306 Introductory Statistics *or* ECON1003 Analysis of economic data *or* equivalent

BUSI0037. Quantitative analysis for business decisions II (6 credits)

A more advanced course on quantitative methods to problem solving. Topics include mathematical programming, dynamic programming, game theory, reliability, Markov chains, stochastic processes and applications in logistics, finance, marketing, inventory and operations.

Prerequisite: BUSI0036 Quantitative analysis for business decisions I *or* STAT0106 Business logistics

BUSI0038. Services marketing (6 credits)

The course examines the characteristics of service organizations and how this affects their approach to marketing. Issues in the three dimensions of internal marketing; transactional marketing and external marketing are examined and the role of research analysed. Attention is paid to service culture and service value and the problems are illustrated by examples from Asian, American and European service firms.

Prerequisite: BUSI1004 Marketing

BUSI0039. The development of modern China (6 credits)

The course will examine the historical development of modern China and the emergence of new forces and ideologies in the recent past. This should provide a backcloth for the interpretation of the economic and social events of the present time.²⁹⁷

BUSI0044. International business (6 credits)

This is an introductory course to the field of international business, which will examine contemporary and historical changes in this field. The focus will be on three main areas: international trade, the international payments system and international production. The approach will consider the roles of various actors in these areas, including firms, states and international organizations and will discuss differing explanations of outcomes in each of the main areas that are offered by differing theoretical perspectives.

BUSI0045. Accounting seminar (6 credits)

A course on (a) the nature of accounting theory and research and (b) topical accounting issues.

Prerequisite: BUSI0020 Intermediate accounting II

BUSI0046. Advanced information systems development (6 credits)

This course studies how emerging information technologies affect both the information systems development process and the information systems. Topics include computer-aided software engineering tools, distributed systems, electronic data interchange, and web-based technologies. Students will carry out a field study of a new technology or new techniques.

Prerequisites: BUSI0048 Business applications development, *and* BUSI0052 Database development and management *or* equivalent

BUSI0047. Applied organization (6 credits)

This is a course on the design of high performance organization in the modern world. Topics include management structures of control and co-ordination, high-commitment work systems, design of compensation systems, virtual organization and the use of IT, organizational learning, organizational change, organization for cultural synergy, organization of international companies.

BUSI0048. Business applications development (6 credits)

This course introduces the basic concepts of programme development for business applications with an emphasis on user interface design and development, database design and querying and operating environments. Hands-on experience in selected application systems development tools will be emphasized.

Prerequisite: BUSI1003 Introduction to management information systems

Remarks: This course is not available to BBA(IS) students.

BUSI0049. Business ethics (6 credits)

The course introduces concepts and tools that can be used for thinking about ethics and how ethical issues enter into the workplace in the modern world. Students will be guided to recognize ethical issues and dilemmas in business activities; to examine the situational forces at work in various business contexts; to learn the differences between the various approaches to ethics and how they play out in modern society, so

as to become better able to devise ways out of ethical dilemmas. Special emphasis will be given to a corporation's responsibility to its shareholders and to society arising from the globalization of business activity, the growing role of government, and the increasing politicization of society.²⁹⁸

BUSI0050. Consumer behaviour (6 credits)

This course is designed to understand how customers behave. It integrates the psychological processes that motivate and direct consumers and organizations in their consumption decisions. Students will learn to apply concepts and measurement tools to managing firms in Hong Kong and Mainland China through exercises, cases and projects. Implications for marketing decisions will be shared.

Prerequisite: BUSI1004 Marketing

BUSI0051. Current topics in marketing management (6 credits)

This course focuses on current topics in managing a firm's marketing functions. Organized along a seminar mode, students will be exposed through their interactions in Hong Kong. Real life experiences and exposures to firms together with indepth intellectual challenges will be emphasized throughout the course. Indepth classroom discussion, management cases and applied business projects will be emphasized.

Prerequisite: BUSI1004 Marketing

BUSI0052. Database development and management (6 credits)

This course studies the principles of design, development and administration of database management systems for business applications. Emphasis will be placed on the user/developer/administrator points of view.

Prerequisite: BUSI0048 Business applications development *or* equivalent

Eligibility: Students taking or having taken CSIS0278 are not allowed to take this course.

BUSI0053. Decision support and expert systems (6 credits)

This course explores a range of modern technologies used to support business decision making. Topics include decision support systems, group support systems, electronic meeting systems, artificial intelligence, expert systems, and neural networks. Both technical and managerial issues related to the development and implementation of decision support systems will be discussed.

Prerequisites: BUSI0048 Business applications development, *and* BUSI0052 Database development and management *or* equivalent

BUSI0054. Developing competencies in business creativity and innovation (6 credits)

This is a skill-building course, which aims to develop core entrepreneurial competencies. These competencies are the mental and behavioural skills required for undertaking the various forms of creative and innovative activity. The course builds upon the course on "Entrepreneurship, creativity and innovation". The course design emphasizes self-understanding and self-direction, and will be largely workshop based.

Prerequisite: BUSI0015 Entrepreneurship, creativity and innovation

BUSI0055. Electronic commerce and virtual businesses (6 credits)

This course focuses on business opportunities brought about by the Internet. Students will learn how²⁹⁹ to use web-based technologies to set up a business.

Prerequisites: BUSI1003 Introduction to management information systems, *or* CSIS1127 Introduction to information systems

BUSI0057. High-performance work systems (6 credits)

This course examines the principles and practice of designing and operating systems of work that combine the optimum use of technology with high performance and motivation. Topics include socio-technical systems analysis, teamwork and networking.

BUSI0058. Human resource planning and career management (6 credits)

This course aims to provide an understanding of how the demand and supply of human resources can be brought into balance, and people already in employment can be helped to develop in their work careers. Topics covered include appraisal, counselling, development and training, and career planning. Ways in which HRM managers can facilitate organizational learning are also examined.

BUSI0059. Information systems analysis and design (6 credits)

This course examines the application of information technology to business and analyses the various stages of a system development life cycle. Techniques for modeling data and process requirements will be discussed.

Prerequisite: BUSI1003 Introduction to management information systems *or* CSIS1127 Introduction to information systems

Remarks: This course is not available to BBA(IS) students.

BUSI0060. Information systems development and project management I (6 credits)

This course examines the concepts, techniques, and activities related to information systems development projects. Teams of student will carry out projects that span the entire information systems analysis and design life cycle, including planning and scheduling, cost estimation, risk analysis, team organization, process management and quality assurance. In the process students will become familiar with the use of computer-based tools and managerial techniques used in information systems development projects.

Remarks: This course is available to Year III students in BBA(IS) only.

BUSI0061. Information systems development and project management II (6 credits)

This is a continuation of the course BUSI0060 Information systems development and project management I. Remarks: This course is available to Year III students in BBA IS Major and BBA(IS) only.

Prerequisite: BUSI0060 Information systems development and project management I

BUSI0062. Information systems management and strategy (6 credits)

This course examines various issues related to the management of information systems in organizations. The link between information systems planning and business strategy will be explored to see how companies can use information systems not only to support their daily operations but to sustain and

enhance their strategic advantage.

Prerequisite: BUSI1003 Introduction to management information systems *or* equivalent

300

BUSI0063. Internet applications development (6 credits)

In this course students will learn how to develop Internet-based business applications using the resources, tools and services available on the Internet. Topics include HTML, Java applets, HTTP and CGI, JavaScript, Java Servlets and JSP, Perl, PHP, ASP, Web spiders and search engines, and wireless applications.

Prerequisites: Proficiency in Java Programming; *and* BUSI0048 Business applications development *or* equivalent; *and* BUSI0052 Database development and management *or* equivalent

BUSI0064. Leadership development programme (3 credits)

This workshop will explore key processes of leadership experientially in a simulated political, social and business environment. The purpose is to provide students with knowledge in leadership theories, models and frameworks with opportunities to experiment with natural and new leadership behaviour in a simulated context. Having gone through these processes in a collective, multi-staged exercise, there will be opportunity for reflection, sharing of experience and integration of practice with theories, in the presence of facilitators.

BUSI0065. Information systems security management (6 credits)

This course focuses on key issues related to security of Internet-based business applications. Topics include data security, including encryption and authentication.

Prerequisite: BUSI1003 Introduction to management information systems *or* equivalent

BUSI0066. Marketing on the commercial internet (6 credits)

This course examines the evolution of the World Wide Web as a powerful tool for selling, distributing and servicing of goods and services. Particular attention will be paid to customer relationship management and its impact on competitive positioning of a firm.

Prerequisites: BUSI1004 Marketing, *and* BUSI1003 Introduction to management information systems *or* equivalent

BUSI0067. Mergers and acquisitions (6 credits)

A course focusing on the theories and market practices of mergers, acquisitions, corporate restructuring and corporate control. Various valuation, strategic and economic issues are examined through case analysis.

Prerequisite: FINA1003 Corporate finance

BUSI0068. Multimedia applications development (6 credits)

This course introduces various technologies used in multimedia applications. Students will learn how to develop information systems that use text, graphics, sound and video.

Prerequisites: BUSI0048 Business applications development, *and* BUSI0052 Database development and management *or* equivalent

BUSI0070. Reward and compensation (6 credits)

This course addresses the design of reward and compensation systems and the contribution they can make to the attainment of an organization's strategic objectives. Among the specific techniques covered are job evaluation, design of incentives, performance-related pay, and non-monetary rewards.

BUSI0071. Strategic marketing management (6 credits)

This course is designed as a capstone course that integrates a firm's marketing decisions. It covers a firm's strategic market orientation, its allocation of resources and effectiveness of its marketing strategies. The course emphasizes managerial implications for different types of firms. Students will learn how to apply the course contents through indepth studies of firms, research projects and management cases.

Prerequisites: BUSI1004 Marketing, *and* BUSI0031 Marketing research

BUSI0072. Team building programme (3 credits)

The objective of the workshop is to explore key aspects of group dynamics through a process of experiential learning. The aspects that we shall be considering include leadership and communication, planning and organizing, decision-making and problem solving, trust and team building in the context of business and management. The activities you will undertake consist of a series of problems to be resolved through the combined efforts of your group members. The problems are physical in nature, rather than hypothetical and cognitive, and require the application of organizational skills for successful and efficient solutions.

BUSI0073. Data communications and networking management (6 credits)

This course introduces telecommunications and computing networks used in support of business activities. Topics include data, voice, image and communication technologies; networking and communication architectures; and protocols and standards. Prerequisite: BUSI0059 Information systems analysis and design *or* equivalent

Eligibility: Students taking or having taken CSIS0234 are not allowed to take this course.

BUSI0074. Telecommunications policy (6 credits)

This course provides an overview of recent developments of the telecommunications industry in Hong Kong and around Asia-Pacific. Telecommunications infrastructure policies introduced by respective governments in the region and the impacts of these policies on business operations will be examined.

Prerequisite: BUSI1003 Introduction to management information systems *or* equivalent

BUSI0075. Current topics in human resource management (6 credits)

This course focuses on current topics in managing a firm's human resource management functions. Indepth classroom discussion, management cases and applied business projects will be emphasized.

BUSI0076. Current topics in information systems (6 credits)

This course discusses the contemporary areas of information systems, including emerging technologies and the way they affect businesses.

BUSI0077. Selections and training (6 credits)

This course will focus on the basic concepts of selections and recruitment, training and development of different employees, and human resources utility analysis. In particular, students will be exposed to different recruiting process and the whole spectrum of training and development techniques and demonstrates how they can add value to business success.

BUSI0078. Compensation and benefits (6 credits)

This course will focus on the basic concepts of pay and compensation policy of different employees. In particular, students will be exposed to the fundamental pay and benefits administration, along with the importance of rewards and the impact of rewards on employee attraction, motivation and retention.

BUSI0080. International financial management (6 credits)

The international corporation and its environment. Forex markets, Forex risk management. International working capital management. International treasury management. Foreign investment and capital budgeting. International financial markets: Euro-currency, Euro-bond, and Euro-notes markets.

BUSI0082. Professional preparation program I (No credit)

To prepare BBA and BBA(Acc&Fin) Year 1 students for a career in professional accounting, this non-credit course is a full-year course including a series of seminar/workshop discussing career opportunities and professional ethics, developing interpersonal, communication and time-management skills and also social events providing opportunities to interact with accounting and business professionals. Class meets once a month for an hour and half during the first academic year. Pass/Fail grade.

BUSI0083. Professional preparation program II (No credit)

To prepare BBA(Acc&Fin) Year 2 students for a career in professional accounting, this non-credit course is a full-year course including presentations by leading business and accounting professionals on current business and accounting issues and seminars/workshops developing skills in job search, interview, leadership and organization. Class meets once a month for an hour and half during the second academic year. Pass/Fail grade.

BUSI0084. Advanced topics in auditing (6 credits)

This course extends the first Auditing course to further examine various advanced topics including advanced auditing techniques, auditing for operations and efficiency, auditing web based information, EDP auditing, environmental auditing, forensic accounting and contemporary issues of auditing. Prerequisites: BUSI0006 Auditing, and BUSI0003 Advanced Financial Accounting

BUSI0085. Advanced topics in taxation (6 credits)

The course is an in-depth review of the law and practice of taxation for planning and management in the Hong Kong environment. The subject will discuss how international tax principles affect foreign³⁰³ direct investment decisions and highlight the relationships between the international tax principles and the local tax system. General discussion of the Mainland tax system will also be included.

Prerequisite: BUSI0018 Hong Kong Taxation

BUSI0086. Controllership (6 credits)

This course is a comprehensive examination of the diverse functions of a controller within the contemporary business enterprise. Topics cover include strategic cost management, the advanced use of information for management planning, control and decision making, the evaluation of incentive and performance measurement systems as well as international and contemporary management accounting issues.

Prerequisites: BUSI0028 Management Accounting II, *and* BUSI0020 Intermediate Accounting II

BUSI0087. Business case analysis (3 credits)

This course is designed to show students how to deal with complex business issues. Most business issues are complex and multifaceted. It puts students in a rich teaching and learning environment that encourages asking the right questions, formulating problems, and discovering and designing doable courses of action. Through a large number of case studies students learn to think laterally, develop a variety of ideas, explore their leadership potential within groups, and communicate their ideas articulately.

Remarks: This course is available to Year II or above students of the Faculty of Business and Economics only.

BUSI0088. Artificial Intelligence for Business Applications (6 credits)

This course focuses on the fundamentals of artificial intelligence (AI), with emphasis on business applications. Students will gain hands-on experience in developing and using different AI tools to solve real-world business problems. Topics include AI algorithms, intelligent agents, document management, expert systems, and data mining.

Prerequisites: Proficiency in Java Programming, *and* BUSI0048 Business applications development *or* equivalent; *and* BUSI0052 Database development and management *or* equivalent

BUSI0089. Studies on China's competitiveness (6 credits)

Studies on China's Competitiveness will focus on the competitiveness of the economy and industries of Mainland China and examine China's competitiveness on a regional, industry and activity basis. Globalization and China's accession to WTO will present unprecedented opportunities and challenges for China's economy and industries. As such, China's position in the globalized world economic system and its ability to move up the value-added ladder is critical to its sustainable economic development. Given Hong Kong's close links to the economy of the Chinese Mainland, China's economic future will heavily influence that of every industry in Hong Kong. Through a detailed analysis of a cross section of Chinese industries, the course will help the students to have a better understanding of the current status of China's competitiveness and future dynamics.

BUSI0090. The European business environment (6 credits)

This course is intended for those who wish to study the evolution of the European Business Environment

and the processes by which it operates. It investigates the broader political, cultural, economic, legal,³⁰⁴ and philosophical basis of the business milieu mostly in Western Europe but with, when appropriate, reference to the Eastern European states. It includes the typologies of businesses as conducted in selected states where the free market, remnants of state control and the regional and global influences all have a part to play. Teaching would be based on lectures, case studies and simulations with visiting lectures from various Consulates to enrich the content.

Assessment: For this course the assessment would be by one written final examination of two hours carrying 60% of the total, one individual submission based on a case study (25%) and one group classroom session in analysis of a business problem (15%).

BUSI0091. Business intelligent systems (6 credits)

This course is designed to provide an overview of business intelligent systems (BIS) and their use in the business environment. Topics include business intelligent systems/technology concepts, introduction to various BIS (e.g., Knowledge Management Systems), and business cases for BIS development and adoption.

Prerequisite: BUSI1003 Introduction to management information systems

BUSI0092. Advanced database management & data mining (6 credits)

The course consists of two parts. In the first part advanced database concepts such as views, triggers, stored procedures, SQL*Plus, database administration and performance tuning. In the second part, various techniques in data mining such as decision trees, neural networks, and clustering will be covered. Student will be exposed to the applications of these techniques in business.

Prerequisite: BUSI0052 Database development and management *or* CSIS0278 Introduction to database management systems

BUSI0093. Enterprise resource planning systems (6 credits)

This course provides an overview of enterprise resource planning systems and their use in the business environment. Topics include business processes management, functions and data requirements, and systems implementation and integration.

Prerequisite: BUSI1003 Introduction to management information systems

BUSI0094. Managing business transformation (6 credits)

The course provides a roadmap for managers planning to transform their companies into an inter-networked enterprise where shared infrastructures are used to link customers, suppliers, partners and employees to create superior economic value. It covers business strategy, infrastructure, process management, and integration and implementation. The course is based on the premise that integrating Internet technologies throughout the value chain is crucial in building and managing customer relationships and thus brand equity.

Prerequisite: BUSI1003 Introduction to management information systems

BUSI1001. Business law (6 credits)

An introduction to the Hong Kong legal system, the fundamentals and general principles of Hong Kong law, and other legal concepts which a manager may be expected to encounter in the business environment.

BUSI1005. Organizational behaviour (6 credits)

A course on the concepts and key research findings which can help us to understand the human behaviour in organizations. Topics include motivation, leadership theory, group dynamics, morale, communications, control techniques and organizational culture.

Prerequisite: BUSI1007 Principles of management

BUSI2111. Information systems in accounting (6 credits)

Design and evaluation of computer-based accounting information system, analysis of efficient and effective business processes and include current topics such as Enterprise Resource Planning, inter-organizational solutions and computer security.

Prerequisites: BUSI1002 Introduction to accounting, *and* BUSI1003 Introduction to management information systems

BUSI3001. Global analysis team project (6 credits)

The primary objective of this course is to develop the students' capability to understand the strategic situation in a business, economic, social, political and/or environmental aspect in the global arena. Students are also expected to devise viable alternatives for dealing with the key issues facing it. They will partner with students from overseas universities to work on this global analysis team project in their final year of study.

BUSI3002. Leadership development programme (3 credits)

This course aims at enabling students to develop themselves as leaders of organizations and to embark on paths of personal leadership development. The following concepts will be covered: motivation, lifelong leadership development, personal leadership development plan, stress and adversity management, peer mentoring, group dynamics, work and life balance as well as purpose-driven leadership.

BUSI3011. Corporate governance and social responsibility (6 credits)

In this course, students learn about the complex responsibilities facing business leaders today. It will explore the use of accounting information and internal control in ensuring efficient and effective operations, reducing the cost of capital, production and distribution, and complying with legal, regulatory and corporate oversight requirements. It also teaches students about ethics and governance systems that leaders can use to promote socially responsible conduct by organizations and their employees, and shows how personal values can play a critical role in effective leadership.

BUSI3012. International and cross-boundary trade law (6 credits)

This course covers the legal aspects of the international trade. It also provides students with background on international legal framework for cross-border trading and business activities, as China embarks on liberalization of its business environment as a member of the World Trade Organization.

BUSI3111. Current topics on assurance services (6 credits)

Study of selected topics of application of auditing standards and procedures, auditor responsibilities, and ethical behavior, internal control and corporate governance issues. 306

Remarks: Students having completed BUSI0006 Auditing (6 credits) are not allowed to take this course.

BUSI3112. Current topics on advanced financial reporting (6 credits)

Study of selected topics of theory and concept of financial accounting, consolidated financial statements, application of financial reporting standards and other financial reporting topics.

Prerequisite: BUSI0020 Intermediate Accounting II

Remarks: Students having completed BUSI0003 Advanced Financial Accounting (6 credits) are not allowed to take this course.

BUSI3113. Current topics on China accounting, auditing and taxation (3 credits)

A Year 3 elective course examining the accounting standards setting environment in China, the China Accounting, Auditing and Taxation standards/rules issued and their unique aspects and implications for the Accounting profession.

Prerequisites: BUSI0020 Intermediate Accounting II *or* BUSI0028 Management Accounting II *or* BUSI0006 Auditing, *and* BUSI0018 Hong Kong Taxation.

BUSI3511. Selected topics in marketing strategy (6 credits)

This course is designed to focus on selected topics that are of salience to managing firm marketing strategies and operations in Mainland China or Hong Kong. It may include but not restricted to the following contemporary marketing issues including branding, new product development, marketing high-technology products and customer relationship management.

BUSI3512. Developing marketing competence (6 credits)

This course is designed to explore various issues on how firms develop and manage their marketing operations in our consistently changing market environment. How firms assess and learn from its environment, design their internal strategic cultures, develop proper strategic options, ensure its key marketing functions operate efficiently and effectively are key topics to be covered. The course will use case studies and guest lectures extensively.

BUSI3601. Supply chain management (6 credits)

The course introduces students to concepts, strategies, and technologies related to supply chain management. The course focuses on the systems approach to planning, analysis, design, development, and management of supply chain. Using cases and real-life projects students will learn how to use appropriate

information technologies to reduce cost and improve service in supply chain

Pre-requisite: BUSI1003 Introduction to management information systems *or* equivalent

BUSI3602. Information technology and entrepreneurship (6 credits)

This course introduces students to the core concepts of entrepreneurship with a special emphasis on those

entrepreneurial settings involving the use of information technology. Students will be exposed to the key processes, challenges, risks and rewards of starting up an entrepreneurial business and are³⁰⁷ expected to apply the concepts and knowledge learned in the course to develop a business plan that could be presented to potential investors and venture capitalists.

Pre-requisites: BUSI1003 Introduction to management information systems, *and* BUSI1007 Principles of management

BUSI0095. Critical thinking and business judgment (6 credits)

To succeed in today complex and rapidly changing business environment managers must be able to 1) analyze (the separating of a whole into its component parts), 2) synthesize (the combining of often diverse conceptions into a coherent whole), 3) make judgment (the forming an opinion or evaluation by discerning and comparing), and 4) sell their ideas (the ability to articulate with the objective of influencing others). This course relies on the case method to instill and foster these skills. Students will learn how to identify appropriate sources of information, sieve through information, differentiate between major and minor issues, analyze new developments, synthesize different ideas and ultimately articulate their thoughts to others. In the process students will learn how to ask the right questions, explore the trade-offs involved in managerial decisions, and discover and design doable courses of action.

Prerequisite: This course is open only to second- and third-year students.

Remarks: Students having completed BUSI0013 Current business affairs (3 credits) and BUSI0087 Business case analysis (3 credits) are not allowed to take this course.

DESCRIPTION FOR UNDERGRADUATE COURSES OFFERED BY SCHOOL OF ECONOMICS AND FINANCE 2006-07

“ECON1001 Introduction to Economics I” is a prerequisite for all year 2 and year 3 Economics and Finance courses. Additional prerequisites are specified in the descriptions for the courses concerned. Not all courses listed below will necessarily be offered every year.

YEAR ONE

ECON0003. Great economists of our time (3 credits)

Through the biographies of 12 of the great economists of the 20th century, this course introduces students to the power of economic analysis of real world observations and problems, and in a broader context, to the fascination of intellectual pursuits. This course also serves to illustrate the central ideas of economics, which are still very much in use today.

ECON1001. Introduction to economics I (6 credits)

An introduction to the basic concepts and principles of microeconomics - the study of demand and supply, consumer theory, cost and production, market structure, and resource allocation efficiency.

ECON1002. Introduction to economics II (6 credits)

This course is an introduction to macroeconomics – the study of business cycle fluctuations and long run economic growth. Topics include the measurement of national economic performance; the problems of recession, unemployment, and inflation; money supply, government spending, and taxation; fiscal and monetary policies for full employment and price stability; the determination of the exchange rate; and international trade and payments.

ECON1003. Analysis of economic data (6 credits)

This course studies the measurement and interpretation of economic variables, and how to model their relationships using appropriate empirical methods. Topics include interpretation of headline statistics, describing economic aggregates, modeling of economic relationships and drawing conclusions from observations.

Remarks: Not open to students taking or having taken STAT0301, STAT0302, STAT0601, STAT0602, STAT1000, STAT1001, STAT1003, STAT1006, STAT1007, STAT1008, STAT1301, STAT1306 *or* STAT1801.

FINA0003. Current Asian finance: issues, ideas and practices (3 credits)

This course aims to provide students with an understanding of the most important issues in Asian financial markets, develop their interests and knowledge in areas related to business and finance in Asia (with a focus on Hong Kong), and give them hands-on experience in writing reports and presenting analytical results.

Remarks: Open only to students of the Faculty of Business and Economics.

FINA1002. Introduction to finance (6 credits)

An introduction to finance with an emphasis on the decisions and issues faced by the firm. The course will also cover the interrelated topics of individuals choosing between different investment alternatives, and the functioning of capital markets in equating the supply and demand of capital. Specific areas

covered include: the basics of valuation using discounted cash flows, valuation of stocks and bonds, valuation and choosing between competing projects, risk and return, the cost of capital, and financial planning and forecasting. Throughout the course, emphasis will be placed on the basic paradigms in finance including net present value, the capital asset pricing model and market efficiency.

Remarks: It is advisable to take BUSI1002 Introduction to accounting prior to this course.

From 2006-07, not open to students in the Faculty of Business and Economics.

Candidates majoring or minoring in finance are required to take FINA1003.

Mutually exclusive course: FINA1003 Corporate finance

FINA1003. Corporate finance (6 credits)

This is an introductory course that develops the basic concepts and tools applicable to corporate financial decisions. Three main tasks of financial managers are studied: (i) project evaluation, (ii) financing decisions, and (iii) working capital management. Specific topics include present value calculation, valuation of stocks and bonds, investment criteria and capital budgeting, risk and return, cost of capital, capital structure, dividend policy, short term financial planning, and credit and inventory management.

Prerequisite: BUSI1002 Introduction to Accounting

Mutually exclusive course: FINA1002 Introduction to finance

YEAR TWO

ECON0701. Introductory econometrics (6 credits)

Econometrics is the branch of economics that formulates statistical methodology for use in analyzing economic data. Consequently, the objective of this course is to prepare students for basic empirical work in economics. In particular, topics will include multiple regression analysis, statistical inference and hypothesis testing, functional form specification, time series models, and limited dependent variable models. Students will have the opportunity to use actual economic data to test economic theories.

Remarks: Not open to students taking or having taken STAT2301, STAT2804, STAT3301 or STAT3302.

ECON2101. Microeconomic theory (6 credits)

The laws of demand, supply, returns, and costs; price and output determination in different market situations; theory of factor pricing and income distribution; general equilibrium; interest and capital.

Remarks: Not open to students taking or having taken ECON2113 Microeconomic analysis.

ECON2102. Macroeconomic theory (6 credits)

Theories of income, employment, and the price level; analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy.

Remarks: Not open to students taking or having taken ECON2114 Macroeconomic analysis.

ECON2113. Microeconomic analysis (6 credits)

Examine microeconomic issues with applications. Topics include: consumer behaviour, cost structure, market structure, theory of the firm, factor market and general equilibrium.

Remarks: Open only to non-BEcon, non-BFin and non-BEcon&Fin students; candidates who have taken ECON2101 Microeconomic theory are not allowed to take this course.

ECON2114. Macroeconomic analysis (6 credits)

Economics of inflation, unemployment, income and output determination in the short run and the long run. Money, interest rates and exchange rates. Macroeconomic stabilization policies and open economy macroeconomic issues.

Remarks: Open only to non-BEcon, non-BFin and non-BEcon&Fin students; candidates who have taken ECON2102 Macroeconomic theory are not allowed to take this course.

FINA0301. Derivative securities (6 credits)

To provide a comprehensive analysis of the properties of options and futures and to offer a theoretical framework within which all derivatives can be valued and hedged. Topics covered: simple arbitrage relationships for forward and futures contracts, hedging and basis risk, stock index futures, swaps, trading strategies involving options, valuation of options using a binomial model and the Black-Scholes analysis, options on interest rates, stock indices, currencies and futures, and exotic options.

Prerequisite: FINA1003 Corporate finance

FINA2802. Investments and portfolio analysis (6 credits)

A comprehensive analysis of various investment vehicles and portfolio management techniques. Topics covered: modern portfolio theory and asset pricing models, portfolio management, investment strategies, analysis of common stocks and bonds, and introduction to derivatives securities.

Prerequisite: FINA1003 Corporate finance

YEAR TWO or YEAR THREE ELECTIVES

(Economics courses)

ECON0103. Economics of human resources (6 credits)

This course studies the allocation of human resources through the labour market and the utilisation of human resources inside the firm. Issues related to investment in human capital, wage determination, labour force participation, worker mobility, hiring decisions and other personnel practices are examined.

ECON0104. Public finance (6 credits)

Study of the role of government in the economy, using microeconomic theory. The course covers public expenditure analysis and methods of financing government expenditures. It explores the underlying theory of welfare economics as well as the economic effects of public policy such as public sector pricing, expenditure and tax policies.

ECON0106. Games and decisions (6 credits)

This course offers an introduction to game theory. It covers core concepts in game theory and its applications. The core concepts include sequential games, game tree, subgame-perfect equilibrium, simultaneous games, game table, Nash equilibrium in pure strategies, mixed-strategy Nash equilibrium, and expected utility. These concepts are used to provide analyses of the role of reputation, and penalties and rewards in sustaining cooperation; the importance of credibility in commitments, threats and promises; the problems, and solutions, of public goods and externalities; behavior under asymmetric information: moral hazard, adverse selection, signaling, and screening; and interaction between individuals when the assumption of perfect rationality is relaxed.

ECON0107. History of economic thought (6 credits)

This course is a survey of key developments in economic thought since the 18th century, with emphasis on works in English. The first lectures review the writings of classical economists like Smith, Ricardo, and Mill, with an aside on Marx. The lectures then go on to discuss the development of neoclassical theory from Jevons to Marshall and the Cambridge School, and mathematical modelers like Fisher, Pareto, Wicksell, Hicks, and Samuelson. If time allows, we will trace the evolution of macroeconomics from Keynes to the neoclassical synthesis, monetarism, and new classical economics.

ECON0109. Topics in macroeconomics (6 credits)

This course provides students with an up-to-date account of the theory and practice of modern macroeconomics. The following areas that have shaped modern macroeconomic research will be covered: real business cycle theory, endogenous growth theory, and new Keynesian theories of labour markets, asset markets and stick prices. Other selected topics on fiscal and monetary policy will also be discussed.

Prerequisites: ECON2101 Microeconomic theory *or* ECON2113 Microeconomic analysis, *and* ECON2102 Macroeconomic theory *or* ECON2114 Macroeconomic analysis

ECON0204. The economics of finance (6 credits)

A survey of the economic theory underlying corporate and investment finance models, with an emphasis on financial instruments. Topics include: balance sheet management and evaluation, capital market equilibrium and efficiency, evolution of credit and money market instruments like financial swaps, stocks and bonds, financial futures and options. Eurocurrencies and the role played by banks, insurance companies and other financial institutions.

ECON0205. Theories of investment (6 credits)

Applications of the theory of choice over time (capital theory) to the investment decisions of individuals, firms and economies, under different assumptions regarding certainty, uncertainty, and adjustment costs.

ECON0206. Capital theory (6 credits)

General equilibrium theory involving time under certainty conditions. The concepts of full information, stationary state, and steady state. Assumptions about information costs, transaction costs and complete markets. Fisher's separation theorem. Theory of consumption over discrete and continuous time. Theory of production over discrete and continuous time. Determination of general equilibrium over time. Intertemporal prices and interest rates.

ECON0207. Monetary economics (6 credits)

This course discusses the role of money in the economy, including how money affects inflation, interest rates and output and employment in both the static and dynamic contexts. Related topics are theories of money demand and supply, the conduct of monetary policy, rules vs. discretion, adaptive and rational expectations, time inconsistency, origin of money, and electronic means of payments .

ECON0208. Economics of banking (6 credits)

This course examines the functions and behaviour of banks from an economic rather than a management perspective. Topics include origin of financial intermediaries, banks vs. non-bank financial institutions, organization of the banking industry, lender-borrower relationship, equilibrium credit rationing, banks as delegated monitors, banks in the macroeconomy, bank runs and systematic risks, risk management of the banking firm, and the regulation of banks.

ECON0209. Finance and development (6 credits)

This course studies the interaction between the financial sector and the rest of the economy, that is, how financial markets and institutions affect economic performance and vice versa. Topics include flow-of-funds accounts, financial structure and economic development, financial repression, financial liberalization and financial deepening, financial reform in developing and transition economies, banking crises and currency crises, capital account liberalization, the globalization of world capital markets, and financial policies and regulation.

ECON0210. Investment, technology, and economic growth (6 credits)

The course begins by reviewing the neoclassical theory of investment in 'physical' assets like plant and machinery, at the micro- and macro- levels. The analysis is then extended to incorporate technological change, especially with regard to its impact on the relationship between investment and economic growth. As far as possible, the exposition will be non-technical.

Remarks: Not open to students having taken ECON0205 Theories of investment.

ECON0301. Theory of international trade (6 credits)

The theory of international trade: the bases, direction, terms, volume, and gains of trade. The effects of tariffs, quantitative restrictions, and international integration.

ECON0302. International finance (6 credits)

The interpretation of balance of payments and the adjustment to national and international equilibria, through changes in price levels, exchange rates, and national income. Other topics may include: foreign exchange market and Eurocurrency market, alternative exchange rate regimes, capital movements, exchange controls, and international monetary organizations.

ECON0401. Comparative economic systems (6 credits)

Alternative approaches to the understanding of the operation of economic systems, including an approach based on different structures of property rights.

ECON0402. Industrial organization (6 credits)

This course studies the pricing and output decisions of firms and the performance of the market under various market structures. Topics include theories of oligopoly; product differentiation; the effects of imperfect and asymmetric information; the examination of pricing practices such as price discrimination, tie-in selling, and resale price maintenance; collusion and anti-competitive behaviours, and public policies related to the promotion or restriction of competition.

ECON0403. The economics of property rights (6 credits)

Implications of different structures of property rights for economic behaviour; rights structures classified in terms of exclusivity and transferability; costs of enforcing rights and of forming contracts as main constraints in the derivation of hypotheses; the Coase Theorem and the theories associated with contracting.

ECON0405. The economics of law (6 credits)

Economic analysis applied to law. Topics may include: efficiency of law, rules of liability, tort rights and remedies, criminal sanction, legislative processes as resource allocating and income distributing mechanisms.

ECON0406. The economy and the state (6 credits)

Economic analysis is applied to the study of public choice and the relationship between the state and the economy. Topics include: social choice, collective action, voting and elections, interest groups, bureaucracy, constitutions, law and courts, property rights and institutional change.

ECON0501. Economic development (6 credits)

Characteristics of underdevelopment; factors in economic development; theoretical and policy aspects of development.

ECON0503. Urban economics (6 credits)

Urban economics is the study of the location choices of firms and households. It examines the question of the where of economic activity, a question largely ignored by the other branches of economics. Topics include the growth and development of cities; land use within cities; urban transportation; housing and public policy; urban problems such as pollution, poverty and crime; and market forces determining the locations of ports and other transshipment points.

ECON0504. Transportation economics (6 credits)

Microeconomic theory applied to transportation, with an emphasis placed on intercity freight and passenger transportation. Topics include: cost function approach to transport supply, economies of scale and traffic density, structure of demand among discrete modal choices, value of time, forecasting of demand and modal split, optimal pricing and investment in infrastructure, contestable markets and the theory of network competition, and regulation of rates, entry and exit.

ECON0601. Economic development of China (6 credits)

An analytical study of the major problems in China's economic development since 1949. Topics include: economic heritage, development strategy, economic organization, planning, management, reform, and an evaluation of the Chinese experiments.

ECON0602. Foreign trade and investment in China (6 credits)

This course has three parts: China trade, Chinese financial markets and direct investment in China. For China trade, topics include: structure and trend of Chinese exports and imports, reform of Chinese foreign trade regime, foreign exchange rate regime and China's role in the new trade environment under

the World Trade Organization. For Chinese financial markets, emphasis will be placed on Chinese financial institutions and markets including: the central banking system, the commercial banking industry, government and corporate debt markets, the stock market, and the foreign exchange market. For direct investment in China, theories of corporate finance and corporate governance will be used to analyze the behaviour of Chinese enterprises and the implications of such behaviour for foreign joint ventures. Government regulations will also be covered.

ECON0603. The economic system of Hong Kong (6 credits)

The course provides a comprehensive discussion of the salient aspects of the Hong Kong economy. Topics include Hong Kong's national income accounting and economic development, the monetary system and exchange rate regime, the financial system, public finance and fiscal policy, external trade and foreign investment, economic relations with the Mainland, the labour market and employment, the property market and housing policy, regulation of public utilities and competition policy, industrial development and policy, and income distribution. Emphasis will be given to both economic analysis and institutional arrangements of the major economic sectors and related policies. Attention will be given to topics of recent public concern.

ECON0605. Economic history of China (6 credits)

An overview of China's economy from the Han dynasty to the 20th Century and its relation with the rest of the world. Growth in productivity and population, development of transportation and market infrastructure, money and credit in the two Han, Sui/Tang, Song/Yuan, and Ming/Qing era. China's foreign trade in classical, medieval and modern times. European discovery of the New World and its impact on China's economy and trade. Comparisons of Ming/Qing China with early modern Europe. Reasons why China fell behind and why the Industrial Revolution did not happen in Ming/Qing China. Implications for the 21st century.

ECON0606. Current economic affairs (6 credits)

This seminar-style course is designed to train students to analyse economic problems of the day, particularly those relating to the Hong Kong economy. Students are expected to conduct supervised research on current economic problems and to lead and participate in classroom discussions.

ECON0702. Mathematical methods in economics (6 credits)

The main emphasis of the course is to explain the mathematical structure of some undergraduate level economic theories, in terms of the way in which each particular mathematical assumption is translated into their economic counterpart. The course covers multi-variable unconstrained maximization, constrained maximization, comparative statics, and a brief introduction to some dynamic economic models.

ECON0703. Mathematical economics (6 credits)

Modern economic theory treated mathematically. Topics may include: applications of optimization to choice theory, applications of the implicit function theorem to comparative statics, applications of differential and difference equations to stability of equilibrium, applications of linear mathematics and fixed point theorems to Leontief and Arrow-Debreu models.

ECON0706. Uncertainty and information (6 credits)

This course examines the effects of uncertainty and imperfect information on individual decision making and on market equilibrium. Topics may include the expected utility hypothesis, risk bearing and risk sharing, search, adverse selection, signaling, contract theory, mechanism design, information acquisition and information transmission.

ECON0707. Economic forecasting (6 credits)

This course introduces basic techniques in forecasting economic structural relationships. Topics include smoothing, filters, arima models, unit roots and stochastic trends, vector autoregressions, cointegration and error correction, regime switching, volatility, diagnostics, model selection, forecast evaluation and combination.

Prerequisite: ECON0701 Introductory econometrics

ECON3108. Selected topics in price theory (6 credits)

This course acts as a platform to provide an overview of topics that are conceived to be pivotal in economics. The topics are essentially micro-based, but have applications in other disciplines like macroeconomics and finance. Specific topics are picked by the instructor. Previous examples include venture capital and private equity; property rights, theory of the firm, incomplete contracting, financial contracting, bankruptcy, and corporate voting.

Prerequisite: ECON2101 Microeconomic theory *or* ECON2113 Microeconomic analysis

ECON3505. Project evaluation (6 credits)

This course covers the economic evaluation of projects from a public sector viewpoint using microeconomic tools. It explores the normative aspects of evaluating public projects and policies, the measurement of welfare change and public investment criteria, and employs basic financial analysis. Economic and financial evaluation of government projects and Build-Operate-Transfer infrastructure projects (so-called BOT projects) will be discussed.

Prerequisite: ECON2101 Microeconomic theory *or* ECON2113 Microeconomic analysis

**YEAR THREE ELECTIVES
(Economics courses)**

ECON3801. Reading course (6 credits)

This course consists of supervised reading and written work. Candidates may specialize in one topic under the supervision of faculty members of the School of Economics and Finance. Examples of topics are: the problem of social cost, investment in human capital, general equilibrium theory, empirical methods in international trade, international monetary relations, theories of saving and the East Asian economies, and current economic problems of Hong Kong.

Candidates must submit the title of their project within the first two weeks of the semester for approval by the Director of the School of Economics and Finance. An original project paper is required in lieu of a written paper in the Examination. The project paper shall not exceed 10,000 words in length, and must be completed and presented not later than the last day of the examination period for that semester. Candidates shall submit a statement that the project paper represent their own work (or in the case of joint work, a statement countersigned by their co-worker(s), which shows the degree of their work) undertaken after the registration in the course.

ECON3802. Dissertation (12 credits)

Candidates may write a dissertation under the supervision of faculty members of the School of

Economics and Finance. Topics offered may vary from year to year, depending on the research interests of the lecturer. A satisfactory dissertation may be offered in lieu of two written papers in the Examination.

Candidates must submit the title and an outline of their dissertation for approval by the Director of the School of Economics and Finance not later than December 1 of the final year of the curriculum, and the dissertation, which should not exceed 20,000 words in length, shall be completed and presented not later than May 31 of that academic year. (Note: The course extends over two semesters. Candidates must enroll in the first semester.)

Prerequisite: Cumulative GPA of 3.0 or above at the time of enrolment

Remarks: Open only to BEcon/BEcon&Fin students and students major in Economics.

YEAR TWO or YEAR THREE ELECTIVEs **(Finance Courses)**

FINA0102. Financial markets and institutions (6 credits)

This course is designed to introduce and analyze the structure, operations and functions of the financial system. The course starts with an introduction to financial markets' role in the economy, and the determination of interest rates and valuation of cash flows. The course then discusses various financial markets including money markets, bond markets, mortgage markets, stock markets and derivatives markets. Financial institutions will be discussed with an emphasis on their major functions and operations.

Prerequisite: FINA1003 Corporate finance

FINA0103. International banking (6 credits)

Nature of international banking. Comparison with domestic banking. Jurisdiction and regulatory framework: the Basle Concordat. Xeno-currency markets and international banking. International financing techniques: loan syndication, project finance, NIFs, RUFs etc. Risk exposure and control: sovereign risk, country risk, exchange risk, interest risk and credit risk. Management and strategies of international banks. "National treatment" and financial centres.

FINA0104. Management of commercial banks (6 credits)

This course introduces basic bank management techniques that include: asset and liability management, liquidity and reserve management, credit analysis, loan pricing and off-balance-sheet banking. Regulatory issues of commercial banks are also discussed.

FINA0105. International financial management (6 credits)

The international corporation and its environment. Forex markets. Forex risk management. International working capital management. International treasury management. Foreign investment and capital budgeting. International financial markets: Euro-currency, Euro-bond, and Euro-notes markets.

FINA0106. Insurance: theory and practice (6 credits)

Insurance is the study of risk financing through risk pooling. The use of insurance to reduce the adverse financial impact in case of a loss has become an important element of financial and risk management in our society. This course will cover the theories underlying each major type of insurance products; the characteristics of the contractual agreements pertaining to insurance products; the structure of the insurance industry and its impact on the pricing of insurance products; the operation of insurance

companies and the need for government regulations of the industry.

FINA0302. Theories of corporate finance (6 credits)

A course on the advanced treatment of corporate financial decisions. Topics to be covered include corporate valuation; cost of capital; capital structure; leasing; mergers and acquisitions; options; warrants; and convertible bonds.

Prerequisite: BUSI0016/FINA1002 Introduction to finance *or* FINA1003 Corporate finance

FINA0401. Empirical finance (6 credits)

This course is a survey and introduction to the empirical research methods commonly used in the analysis of financial markets and how they are applied to actual market data. Topics may include: properties and patterns of returns, tests of asset pricing models and term structure models, efficient markets hypothesis and return anomalies, event study methodology, and estimating time-varying volatility models.

Prerequisite: ECON0701 Introductory econometrics

FINA0402. Mathematical finance (6 credits)

Arbitrage Theory. Properties of the portfolio frontier. Two fund separation. Valuation of state contingent claims. Derivative assets analysis. Multiperiod securities markets. Differential information.

FINA0501. Asian financial institutions (6 credits)

History and institutional aspects of financial markets in Hong Kong, Singapore, Thailand and other Asian economies. Regulatory policies and practices.

FINA0804. Fixed income securities (6 credits)

An integrated analysis of the market institutions, theory and empirical evidence in the area of fixed-income markets. Topics covered: Treasury markets, bond mathematics, arbitrage-free models of the term structure, corporate-debt pricing, convertible bonds, primary mortgage markets and securitization, immunization and portfolio insurance, valuation of futures and options on bonds, embedded options, and interest rate risk management.

Prerequisites: FINA1003 Corporate finance, *and* FINA0301 Derivative securities

FINA0805. Real estate finance (6 credits)

An introduction to real estate economics, mortgage market, real estate auctions in Hong Kong, pre-sale market in Hong Kong, pricing of land and residential/commercial properties, mortgage-backed securities and mortgage company.

FINA1001. Financial statement analysis (6 credits)

This course covers the basic issues and principles of fundamental analysis, which deals with the valuation of a firm's equity shares and debt by using the information of financial statements. The objective of this course is to enable students to understand the key financial statements, important

elements of financial statement analysis, and the application of financial statement analysis to forecasting and valuation analysis.

Prerequisite: BUSI1002 Introduction to Accounting

FINA3806. Risk management (6 credits)

This course introduces students to corporate financial risk management. Topics include identification and measurement of financial risk, and management of financial risk using forwards, futures, swaps, options, and innovations such as caps, floors, collars, break and range forwards, and swaptions.

Prerequisites: FINA0301 Derivative securities *and* FINA2802 Investments and portfolio analysis

FINA3807. Special topics in finance (6 credits)

This course covers current developments in finance. Possible topics include security trading and market making, venture analysis, financial contracting, investment strategies for local markets and other current issues in finance. The exact topic to be offered will be determined by the lecturer(s).

Prerequisites: FINA0301 Derivative securities *and* FINA2802 Investments and portfolio analysis

YEAR THREE ELECTIVES

(Finance courses)

FINA3601. Reading course (6 credits)

The course consists of supervised reading and written work. Candidates may specialize in one topic under the supervision of faculty members of the School of Economics and Finance.

Candidates must submit the title of their project within the first two weeks of the semester for approval by the Director of the School of Economics and Finance. An original project paper is required in lieu of a written paper in the Examination. The project paper shall not exceed 10,000 words in length, and must be completed and presented not later than the last day of the examination period for that semester. Candidates shall submit a statement that the project paper represents their own work (or in case of joint work, a statement countersigned by their co-worker(s), which shows the degree of their work) undertaken after the registration in the course.

FINA3602. Dissertation (12 credits)

Candidates may write a dissertation under the supervision of faculty members of the School of Economics and Finance. A satisfactory dissertation may be offered in lieu of two written papers in the Examination.

Candidates must submit the title and an outline of their dissertation for approval by the Director of the School of Economics and Finance not later than December 1 of the final year of the curriculum, and the dissertation, which should not exceed 20,000 words in length, shall be completed and presented not later than May 31 of that academic year (Note: The course extends over two semesters. Candidates must enroll in the first semester).

Prerequisite: Cumulative GPA of 3.0 or above at the time of enrolment

Remarks: Open only to BFin/BEcon&Fin students and students major in Finance.

LANGUAGE COURSES OFFERED TO FBE STUDENTS

CBBA0001. Practical Chinese language course for business, economics and finance students (3 credits)

This course will cover the following topics: (1) practical Chinese writing skills (2) Chinese characters (3) letter-writing (4) office documents (5) Chinese for special purposes (6) presentation and communication techniques and (7) information technology in Chinese. Assessment: 50% coursework, 50% examination.

Remarks: Only available to BBA/BBA(Acc&Fin)/BBA(IS)/BEcon/BFin/BEcon&Fin students.

CBBL0001. Practical Chinese language course for BBA(Law) students (3 credits)

This course will cover the following topics: (1) practical Chinese writing skills (2) Chinese characters (3) letter-writing (4) office documents (5) Chinese for special purposes (6) presentation and communication techniques and (7) information technology in Chinese. Assessment: 50% coursework, 50% examination.

Remarks: Only available to BBA(Law) students.

ECEN1504. Professional and technical communication for Computer Science (3 credits)

The course is designed to enable computer science and information systems majors to acquire professional and technical communication skills. The focus is on the understanding and using professional and technical language. Topics include: producing and asking questions to elicit information; conducting effective interviews; organizing and analyzing information; writing effective technical reports with a focus on coherence and cohesion; and increasing technical vocabulary. Students are required to design and conduct authentic oral interviews and, produce written technical reports and vocabulary journals.

Remarks: Only available to BBA(IS) students.

ECEN1602. Writing solutions to legal problems (3 credits)

The course follows on from language input into the Legal Research and Writing I course in Year 1, Sem. 1. *Writing solutions to legal problems* dovetails closely with a substantive law course (Tort), allowing students to apply and articulate their knowledge of tort law as they frame a written response to the kinds of legal issues typically found in tutorial and examination questions. The focus is on the discourse structure of legal arguments, with attention paid to control of the grammar, vocabulary and stylistic features typical of problem solutions. Students receive substantial individual feedback on 3 problem cycles, featuring revisions of each answer. Assessment is wholly by coursework, including 2 extended pieces of writing under examination conditions at the end of the course.

Remarks: Only available to BBA(Law) students.

ECEN1904. English for academic communication for economics and finance students (3 credits)

The course prepares students to respond effectively to the communicative demands of academic study in English. Through text-based activities in class and assigned work related to language and disciplinary issues, the course develops abilities to analyse and evaluate extended texts, and to produce clear and coherent spoken and written discourses. Particular emphasis is given to the use of source material: how to cite and refer to material, and how to make use of and attribute ideas without copying. Stress is also put on acquiring an academic vocabulary, oral presentation skills, plus careful revision and editing of essays to ensure that lexical and grammatical choices are appropriate. Assessment: 100% coursework.

Remarks: Only available to students from the School of Economics and Finance.

ECEN1906. English for academic communication for business students (3 credits)

The course prepares students to respond effectively to the demands of academic study in English. Through text-based activities in class and assigned work related to language and disciplinary issues, the course develops language abilities in a number of areas. Stress is laid upon developing an adequate academic vocabulary, and strategies to achieve this are taught. Particular emphasis is also given to the use of source material: how to cite and refer to material, and how to make use of and attribute ideas without copying. For oral work, extemporaneous delivery is practiced, without the need to rely on scripts. Pronunciation and grammatical difficulties are addressed as they occur. Assessment is wholly by coursework.

Remarks: Only available to students from the School of Business.

ECEN1907. Business communication (3 credits)

This course prepares students to communicate effectively both at university and in anticipation of work situations which entail the use of English. A major project involves investigation of real business activity in Hong Kong and compiling a written report and a seminar presentation based on interview data. The written reporting involves using an appropriate format, and repeated proofreading of drafts to ensure grammatical accuracy and language of appropriate style and formality. In a separate project, there is emphasis on identification and understanding of idiomatic language, both in informal business situations and in more formal written and spoken texts. Assessment is wholly by coursework.

Remarks: Only available to BBA/BBA(Acc&Fin)/BBA(IS) students.

ECEN1908. English for Academic Communication for BBA (Law) (3 credits)

The course aims to assist students with the demands of academic study in their dual discipline areas. Reading and writing skills are reviewed through diagnostic in-class activities, and independent study strategies and resources to counter any weaknesses identified will be promoted. The importance of suitable attribution of source material and the avoidance of plagiarism will be stressed. Speaking and listening skills will also be reviewed with an emphasis on extemporaneous rather than scripted delivery. Complex sentence structure will be studied to facilitate understanding of the kind of language met with in ordinances and other legal documents. The importance of vocabulary development will be stressed, and strategies for learning and dealing with new words will be addressed by using contextual reading and listening activities related to the students' field of study.

Assessment - coursework 100%.

ECEN1909. English for International Business and Global Management (3 credits)

This course in a series of intensive workshops reviews academic language issues encountered during the first two semesters of university study, and prepares students to be active and confident users of English in international contexts. Reading and writing skills are reviewed through diagnostic in-class activities, and independent study strategies and resources to counter any weaknesses identified will be discussed. The importance of attribution of sources material and the avoidance of plagiarism will be stressed. Speaking and listening skills will also be reviewed through in-class practice, with the emphasis on international standards of pronunciation and grammar and an extemporaneous approach to oral presentations. Some features of the major native-speaker varieties of English such as British, American and Australasian will be described, and the role of idiomatic language in both formal and informal contexts will be examined. Vocabulary learning and recognition strategies will be studied and independent study skills will be developed.

Assessment - coursework 100%.

ECEN2905. English for professional communication for economics and finance students (3 credits)

The course prepares students to communicate effectively and accurately and prepare themselves for workplace situations which entail the use of English. It requires students to investigate an issue relevant to their studies, improve their interview and presentation skills, and write a variety of professional documents. Assessment: 100% coursework.

Remarks: Only available to students from the School of Economics and Finance.

BUSI0081. Advanced business communication skills (6 credits)

This course focuses on building on the current strengths and sharpening the skills second year students have acquired in the first year course Business Communication. The course aims at helping students develop their business communication skills for a variety of workplace situations. In addition to learning the principles and skills, students are expected to identify and make effective use of in-class and out-of-class practice opportunities.

Remarks: Only available to BBA/BBA(Acc&Fin) students.

OR

ECEN2908. Advanced business communication skills (6 credits)

This course focuses on building on the current strengths and sharpening the skills second year students have acquired in the first year course Business Communication. The course aims at helping students develop their business communication skills for a variety of workplace situations. In addition to learning the principles and skills, students are expected to identify and make effective use of in-class and out-of-class practice opportunities.

Remarks: Only available to BBA/BBA(Acc&Fin) students.

FACULTY OF EDUCATION

BSIM0001. Information management foundations (6 credits)

This course introduces the literature of librarianship and information management and to provide an overview of the historical, current, and potential roles of libraries and information agencies. Approaches to needs analysis will be explored.

BSIM0002. Information literacy (3 credits)

This course provides a framework for an examination of information literacy issues. The central concerns are the nature of information, the nature of the autonomous learner and user needs, enquiry based learning, and information seeking behaviour.

BSIM0003. Information policy (6 credits)

The course examines the need for information policy at the macro and micro levels. Emphasis is given to the technological, political and ethical issues about information policy in the information management contexts. Topics include the role of the government in production and dissemination of information, the tension between privacy and freedom of access to information, and issues of potential conflicts in values and priorities in information policy. Models of policy development will also be examined.

BSIM0004. Information retrieval (6 credits)

This course investigates information retrieval principles, techniques and strategies from electronic information sources. It evaluates commercial and Internet databases and search engines. Data analysis, end-user products and services will also be explored.

BSIM0005. Information society issues (6 credits)

The course examines entrenched and emerging technological, political, economic, social, legal and ethical issues in the information based global society. Specific topics include intellectual property rights and copyright, information rich and poor, information and culture, technology and culture, societal needs and demands of information, and sociology of knowledge.

BSIM0006. Knowledge management (6 credits)

This course provides an introduction to KM theory, issues and developments. Human elements relating to organizational culture and learning are the focus for examining models for knowledge creation, taxonomies and sharing. Change management, communities of practice and decision-making are explored. Technical elements relating to electronic tools and platforms such as groupware, document management, intranets, customer relationship management and the use of information and communication technologies will be examined.

BSIM0007. Metadata (6 credits)

This course will examine metadata schemas and standards in the digital environment with emphasis on the development and implementation of metadata and its technological applications used in libraries and information centers to create machine understandable metadata. XML, with its ability to define

formal structure and semantic definitions for metadata and models, will be introduced.

BSIM0008. Networks and telecommunications (6 credits)

This course aims to cover basic computer networks concepts and telecommunications applications. Topics include network planning, implementation, management and security as well as their application in organizations. Network configuration issues and telecommunications applications are also examined.

BSIM0009. Database systems and information warehousing (6 credits)

This course aims to introduce fundamental concepts of database management systems, with an emphasis on the relational database model and applications in information agencies. Topics include the motivation of database systems, conceptual and implementation data models, data modeling, principles of database design, data definition and manipulation languages. This course also introduces the concepts of information warehousing and data mining in the context of organizations and information management.

BSIM0010. Digital libraries: principles and applications (6 credits)

This course focuses on research and development issues in digital libraries; access strategies and interfaces; metadata and interoperability; economic and social policies and management and evaluation.

BSIM0011. Project management (6 credits)

This course introduces the project life cycle and the techniques and change management aspects of managing and planning successful projects in organizations. Conceptual foundations are the focus so students can use project management software effectively.

BSIM0012. Records management (6 credits)

This course explores the philosophy of records management and presents the basic techniques and standards for managing records. It describes the application of these techniques both to existing situations and to the creation of new records management programs. The course investigates methods for improving active, inactive and permanent records management, and the retention and disposal of records.

BSIM0013. Web services & digital publishing (6 credits)

This course focuses on the theories and techniques in using the Internet as a medium for information, research, education, communication, and multimedia resources. This course also introduces the basic standards and design that enable web services and digital publishing.

BSIM0014. User-based systems analysis (6 credits)

This subject introduces students to the evaluation and design of information systems in the context of information agencies. Technologies of networking and databases will be examined with an emphasis on usability and internal and external human factors. Mapping technology planning to organizational functions and goals as well as human-computer interactions will be discussed.

BSIM0015. Reading and understanding research in information management (3 credits)

This course focuses on introducing and framing the notion of reading and understanding research in information management. Basic concepts of various research methods are also introduced.

BSIM0016. Social and organizational issues of information management (6 credits)

This subject introduces the relationship between information and information systems, technology, practices, and artifacts on how people organize their work, interact, and understand experience. Individual, group, organizational, and social issues in information production and use as well as information systems design and management are discussed.

EDUC1001 Language and learning (6 credits)

This course considers the nature, organization and functioning of language itself, as our primary meaning-making resource. It covers language development in children, the role of language in learning, at home and in school, the challenges of mastering literacy, the linguistic component in educational knowledge, language across the curriculum, the language and genres of specific school subjects, and academic genres at tertiary level and beyond.

EDUC1002 Hong Kong education: systemic features and social approaches * (6 credits)

After studying the course, students will be able to identify, understand and analyse major features underlying the Hong Kong educational system, their trends of development and the social factors contributing to the formation of these systemic features.

** This course is a prerequisite for teaching methods courses: EDUC8301, EDUC8302 and EDUC8303.*

EDUC2001 Psychology of teaching and learning * (6 credits)

This course explores a broad range of issues that affect teaching and learning. It provides opportunities for reflecting on and understanding educational practice. Emphasis will be given to the impact of the interplay between personological characteristics and learning environments upon both teaching effectiveness and learning outcome. Upon completing this course, learners will achieve an enhanced ability to create learning environments that are more conducive to student learning and development.

** This course is a prerequisite for teaching methods courses: EDUC8301, EDUC8302 and EDUC8303.*

EDUC3001 Children with learning difficulties (3 credits)

This course considers the definition, the characteristics and the different strategies of helping children with learning difficulties. It addresses the origins of learning difficulties in children, in schools and in systems; referral procedures and means of identifying children with special needs; and the provision of services for these children.

EDUC3005 Guidance and counselling (3 credits)

This course provides an introduction to guidance and counselling. It examines the rationale underlying

the provision of guidance and counselling services in schools. It is also offered as an introduction to the knowledge and skills that are basic to counselling and guidance.

EDUC4002 Curriculum concepts and issues (3 credits)

This course examines the key elements or components of school curricula and the critical questions which need to be asked about those components. The influence of social, political and economic factors on the design and implementation of the curriculum are also analysed.

EDUC4003 Concepts and values in education (3 credits)

The purpose of this course is to introduce students to conceptual understanding of the nature and process of education as well as its values in society. Topics concerning the nature of education include definitions of education, and aims of education. Topics concerning the values of education in society include the justification of education, educational values, and human nature and potential. Topics concerning the process of education include education and personal relationships, teaching and learning, freedom and authority, and punishment and discipline. Students are asked to discuss these issues in the context of Hong Kong education.

EDUC8001 Understanding and guiding the development of young children (6 credits)

This course will consider theoretical approaches to understanding young children and will provide an overview of physical, cognitive and social/emotional development at the infant, toddler, preschool and early primary levels. It will critically evaluate the different models of teaching, consider various methods of guiding young children's behaviour, and focus on how to create and maintain a positive learning environment. The significance and effects of play in the early childhood curriculum and ways of facilitating play will be emphasized. Methods of fostering social competence, self-esteem and self-control in the preschool environment will also be addressed.

Prerequisite: PSYC0009

(URL: <http://www.hku.hk/education/courses/course-ugdyc.htm>)

EDUC8002 Planning, managing and assessing services for young children (6 credits)

This course will first consider how theoretical approaches have shaped early childhood education and contemporary curriculum models. It will then address planning and implementing the curriculum/programme. Finally, it will consider assessment and evaluation in early childhood programmes. This part will address ways of assessing, recording and reporting children's progress, and ways of evaluating the different components of early childhood programmes such as the theoretical foundations, goals, physical environment, curriculum, teaching practices, social interaction and parental involvement.

Prerequisite: PSYC0009

(URL: <http://www.hku.hk/education/courses/course-pmasyc.htm>)

EDUC8301 Teaching science in schools (6 credits)

This course aims to help students to acquire and develop expertise as science teachers. It focuses on how best to promote and organize learning in schools.

Prerequisite: EDUC1002 and EDUC2001

EDUC8302 Teaching computer and information technology in schools (6 credits)

This course aims to help students to develop understanding about the teaching of computer studies and information technology subjects in schools. It focuses on the evolution of the curricula concerned, learning theories that would help the teaching of such subjects, and critical awareness about the power and problems of the technology.

Prerequisite: EDUC1002 and EDUC2001

EDUC8303 Teaching mathematics in schools (6 credits)

This course aims to help students to reflect upon the aims and objectives of mathematics teaching, familiarize themselves with the local school mathematics curriculum, broaden their awareness of mathematics as a subject, gain an understanding of how school students learn mathematics, and be aware of the issues in school mathematics.

Prerequisite: EDUC1002 and EDUC2001

EDUC8304 Project/Individual study (6 credits)

Students may undertake curriculum or school programme related work to develop learning resources or co-curricular programmes in an area of interest which may develop from their educational studies or teaching methods courses. Such a project could extend or be different from assignments written for specific courses.

FACULTY OF ENGINEERING

Department of Computer Science

Assessment of each course will be based on a three-hour written examination and in-course assessment in a ratio as indicated below.

CSIS1117. Computer programming I (6 credits)

The goal of this course is for students to learn the general principles of programming, including how to design, implement, document, test, and debug programs.

Assessment: 50% coursework; 50% examination

CSIS1118. Mathematical foundations of computer science (6 credits)

Logic, sets, and functions; mathematical reasoning; counting techniques; relations; graphs; trees; modelling computation.

CSIS1119. Introduction to data structures and algorithms (6 credits)

Arrays, linked lists, trees and graphs; stacks and queues; symbol tables; priority queues, balanced trees; sorting algorithms; complexity analysis.

Assessment: 40% coursework; 60% examination

Prerequisite: CSIS1117 *or* ELEC1501

Co-requisite: CSIS1122

CSIS1120. Machine organization and assembly language programming (6 credits)

Fundamentals of computer organization and machine architecture; number, character and instruction representations; addressing modes; assembly language programming including stack manipulation and subroutine linkage; basic logic design and integrated devices; the central processing unit and its control; concepts of microprogramming, data flow and control flow; I/O devices and their controllers, interrupts and memory organization; computer arithmetic.

Co-requisite: CSIS1117 *or* ELEC1501

CSIS1122. Computer programming II (6 credits) [for intake of 2006 and after]

This is the second programming course following the CSIS1117. The goal of this course is to strengthen students' programming skills, in particular, on implementing basic data structures and algorithms. Students will also learn various tools for developing programs in the UNIX/Linux environment.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1117 *or* ELEC1501

CSIS0230. Principles of operating systems (6 credits)

Operating system structures, process and thread, CPU scheduling, process synchronization, deadlocks, memory management, file systems, I/O systems and device driver, mass-storage structure and disk scheduling, network structure, distributed systems, case studies.

Prerequisites: CSIS1119; *and* CSIS1120 *or* ELEC1401 *or* ELEC1613

CSIS0234. Computer and communication networks (6 credits)

Network structure and architecture; reference models; stop and wait protocol; sliding window protocols; character and bit oriented protocols; virtual circuits and datagrams; routing; flow control; congestion control; local area networks; issues and principles of network interconnection; transport protocols and application layer; and examples of network protocols.

Prerequisite: CSIS1120 *or* ELEC1401 *or* ELEC1613

CSIS0250. Design and analysis of algorithms (6 credits)

The course studies various algorithm design techniques, such as divide and conquer, and dynamic programming. These techniques are applied to design highly non-trivial algorithms from various areas of computer science. Topics include: advanced data structures; graph algorithms; searching algorithms; geometric algorithms; overview of NP-complete problems.

Assessment: 50% coursework; 50% examination

Pre/Co-requisite: CSIS1119 *or* ELEC1501

CSIS0259. Principles of programming languages (6 credits) [for intake of 2005]

Syntax and semantics specification; data types; data control and memory management; expressions, precedence and associativity of operators; control structures; comparative study of existing programming languages; advanced topics such as polymorphism, programming paradigms, exception handling and concurrency.

Prerequisites: CSIS1119; *and* CSIS1120 *or* ELEC1401 *or* ELEC1613

CSIS0270. Artificial intelligence (6 credits)

This is an introduction course on the subject of artificial intelligence. Topics include: intelligent agents; search techniques for problem solving; knowledge representation; logical inference; reasoning under uncertainty; statistical models and machine learning. This course may not be taken with BUSI0088.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1119 *or* CSIS1122

CSIS0271. Computer graphics (6 credits)

Overview of graphics hardware, basic drawing algorithms, 2-D transformations, windowing and clipping, interactive input devices, curves and surfaces, 3-D transformations and viewing, hidden-surface and hidden-line removal, shading and colour models, modelling, illumination models, image synthesis, computer animation.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1119 *or* CSIS1122

CSIS0278. Introduction to database management systems (6 credits)

This course studies the principles, design, administration, and implementation of database management systems. Topics include: entity-relationship model, relational model, relational algebra and calculus, database design and normalization, database query languages, indexing schemes, integrity, concurrency control, and query processing. This course may not be taken with BUSI0052.

Assessment: 60% coursework; 40% examination

Prerequisite: CSIS1119 *or* ELEC1501

CSIS0293. Introduction to theory of computation (6 credits)

This course focuses on three traditional areas of the theory of computation: automata, computability and complexity. Topics include finite state automata and regular languages; pushdown automata and context free languages; Turing machines and random access machines; time complexity; space complexity; intractable problems; reduction and completeness; relationship among complexity classes; approximation algorithms and nonapproximability.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1119

CSIS0297. Introduction to software engineering (6 credits)

This course introduces the fundamental principles and methodologies of software engineering. It covers the software process and methods and tools employed in the development of modern systems. The use of CASE tools and the UML are emphasized. The course includes a team-based project in which students apply their new knowledge to a full development lifecycle, including maintenance.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1117 *or* CSIS0396 *or* ELEC1501 (for intake of 2005 or before)
CSIS1122 (for intake of 2006 and after)

CSIS0311. Legal aspects of computing (6 credits)

To introduce students to the laws affecting computing and the legal issues arising from the technology. Contents include: the legal system of Hong Kong; copyright protection for computer programs and databases; intellectual property issues on the Internet; patent protection for computer-related inventions; computer-related crime.

This course may not be taken with LLAW3065.

Assessment: 30% coursework; 70% examination

CSIS0315. Multimedia computing and applications (6 credits)

This course introduces various aspects of the interdisciplinary and multidisciplinary field of multimedia computing. Current developments of technologies and techniques in multimedia will also be covered. Applications of multimedia techniques are also highlighted through a media production course project. Major topics include: what are media, audio, acoustics and psychoacoustics, MIDI, basic compression techniques, video compression techniques, standards, and current multimedia technologies. This course may not be taken with BUSI0068.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1119

CSIS0317. Computer vision (6 credits)

This course introduces the principles, mathematical models and applications of computer vision. Topics include: image processing techniques, feature extraction techniques, imaging models and camera calibration techniques, stereo vision, and motion analysis.

Assessment: 50% coursework; 50% examination

Prerequisite: CSIS1119 *or* ELEC1501

CSIS0320. Electronic commerce technology (6 credits)

This course aims to help students to understand the technical and managerial challenges they will face as electronic commerce becomes a new locus of economics activities. Topics include Internet and

WWW technology, information security technologies, public-key crypto-systems, public-key infrastructure, electronic payment systems, and electronic commerce activities in different sectors.

Assessment: 40% coursework; 60% examination

Prerequisite: CSIS0278

CSIS0322. Internet and the World Wide Web (6 credits)

Introduction and history; networks, internetworking, and network protocols; TCP/IP and related protocols; client-server model and programming; distributed applications; Domain Name System; Internet applications: TELNET, mail, FTP, etc.; Internet security; intranet and extranet; virtual private networks; World Wide Web; Web addressing; HTTP; HTML, XML, style sheets, etc.; programming the Web: CGI, Java, JavaScript, etc.; Web servers; Web security; Web searching; push technology; other topics of current interest. This course may not be taken with BUSI0063.

Assessment: 40% coursework; 60% examination

Prerequisite: CSIS1117 or ELEC1501

CSIS0396. Object-oriented programming and Java (6 credits)

Introduction to object-oriented programming; abstract data types and classes; inheritance and polymorphism; object-oriented program design; Java language and its program development environment; user interfaces and GUI programming; collection class and iteration protocol; program documentation. Assessment: 40% coursework; 60% examination

Pre-requisite: CSIS1117 or ELEC1501

CSIS0405. Professionalism and ethics (3 credits)

This course exposes students to issues of professionalism in computing. Topics included professional societies and ethics, professional competency and life-long learning, methods and tools of analysis, risks and liabilities of computer-based systems, intellectual property and software law, information security and privacy, and the social impacts of computing.

CSIS0521. Concepts and tools for software development (6 credit-units)

This course will introduce the following concepts and techniques for software development: key steps in a software development life cycle; software development methodologies; components of a web-based software tools; installation of servers (e.g. web server, database server etc.); web programming (e.g. PHP, MySQL); key issues in human-user interface; data visualization (e.g. visualization on the web with SVG). Examples will be drawn from practical cases such as bioinformatics software tools development. The emphasis is on how to formulate the computational problem based on the user requirements and the related practical concerns for the development of the software. This course is open to non-Engineering students only.

Assessment: 50% coursework; 50% examination

Pre-requisite: CSIS1117

CSIS0801. Final year project (12 credits)

This is a team project, to be taken by students in the final year, which requires substantial contribution from every individual team member. The project will go through the common process of requirements, analysis, design, implementation, testing, etc. Project standards will be enforced.

CSIS0803. System integration project (6 credits)

This is a team project involving development and integration of software components. The objective is to put the concepts and theories covered in the core courses into practice. The output will be a distributed software system based on well-defined requirements. Software tools will be used and system programming is a compulsory part of the project.

CSIS1410. Industrial training (3 credits)

Industrial Training requires students to spend a minimum of six weeks employed, full-time, as IT interns or trainees. During this period, they are engaged in work of direct relevance to their programme of study. CSIS1410 provides students with practical, real-world experience and represents a valuable complement to their academic training.

CSIS1411. Workshop training (3 credits)

This is a compulsory course taken after completing the first year of studies. Workshop Training is structured as a series of modules in which students gain direct, hands-on experience of various industry-standard software tools and technologies. As well as providing an exposure to current "tools of the trade", the course also emphasizes the application of engineering principles to the development and use of software systems.

CSIS1421. Engineering mathematics (6 credits)

Linear algebra, probability and statistics, calculus, and ordinary differential equations.

Other CSIS Courses

Students may apply to enrol in other CSIS courses not listed above, subject to the approval of the Head of the Department of Computer Science.

FACULTY OF LAW

Department of Law

LLAW1001. and LLAW1002. Law of contract I and II (12 credits)

The function of contract; formation of a valid contract; offer and acceptance; capacity; illegality; interpretation of the terms of a contract; misinterpretation; mistake; duress and undue influence; privity; performance; discharge and breach; quasi-contract; remedies; principles of agency.

LLAW1005. and LLAW1006. Law of tort I and II (12 credits)

General principles of liability, negligence, defences to negligence, vicarious liability, loss distribution, fatal accidents, duty of care towards employees, statutory compensation for employees, breach of statutory duty, occupiers' liability, nuisance, *Rylands v. Fletcher*, trespass to person, trespass to property, other intentional torts to person and property, defences to trespass, defamation, other interests protected by the law of tort, remedies (damages and injunction).

LLAW1008 The legal system (6 credits)

An overview of major legal systems in the world (common law, civil law, socialist law, religious law), including a brief overview on a comparison between the common law system and the PRC legal system; the ideology of the common law system and the rule of law, justice and separation of powers; development of the Hong Kong legal system; classification of law, sources of Hong Kong law; law making process; Hong Kong court system; doctrine of *stare decisis*; access to justice and legal aid; legal profession and legal services; jury system; law reform; Government lawyers and organization of Government legal services; the language of the law; interface between the PRC legal system and the Hong Kong legal system

LLAW1009 Law and society (6 credits)

This course aims to capture the dynamics between law and society, namely, how law is shaped by social changes, perception and thought, and how society is moulded by legal rules and norms. Broad interdisciplinary knowledge and perspectives relevant to the study of the relationship between law and society will be discussed. Theoretical, empirical and policy considerations will be taken into account. General themes chosen to highlight the above dynamics will include the relationship between law and political power, law and economic development, law and history, law and family, and law and social life. Specific topics covered may vary from year to year and may include the following: the rule of law and the liberal constitutional state; law and economic development in the age of globalisation; the anthropology of law; law and culture; law and morality; the historical and philosophical foundations of western and Chinese law; current socio-legal issues in Hong Kong.

LLAW2001 Constitutional Law (6 credits)

The nature and characteristics of constitutions; constitutional doctrines : constitutionalism, the rule of law, the separation of powers, judicial review, autonomy, democracy, and human rights protection; the resumption of sovereignty and the Basic Law of the Hong Kong Special Administrative Region, its framework and content, interpretation and amendment; international dimension and external affairs; the Constitution of the People's Republic of China and their inter-relationship; comparison of the constitution of Hong Kong with the territory's colonial constitution and constitutions in other parts of the world; the relationship between Hong Kong Special Administrative Region and the Central Government of the People's Republic of China; the executive, legislative and judicial organs of the Hong Kong Special Administrative Region and their inter-relationships; human rights protection in

Hong Kong; the prospect of constitutionalism in Hong Kong; judicial review of administrative action; control of law-making by delegates; the ombudsman; administrative appeals.

LLAW2003. Criminal law I (6 credits)

This course introduces students to the principles of Hong Kong criminal law and liability. Topics include the nature and classification of crime, elements of criminal procedure in Hong Kong, the burden of proof and the impact of constitutional human rights, and the general principles of criminal responsibility, including criminal defences and degrees of participation. Offences considered will include homicide and theft.

[Co-requisite: LLAW2004 Criminal law II]

LLAW2004. Criminal law II (6 credits)

This course examines further aspects of criminal law and liability in Hong Kong, including additional criminal defences and inchoate liability. It will examine the application of the general principles of criminal responsibility in selected criminal offence areas, including homicide, assaults, sexual offences, and theft and deception. Where possible, students will be encouraged to consider alternative approaches to the principles of liability, and to develop social policy analysis skills.

[Prerequisite: LLAW 2003 Criminal law I]

LLAW2009. Introduction to Chinese law (6 credits)

A general overview of the legal system and the basic principles of law in force in mainland China today. Topics to be covered include the historical background to the contemporary Chinese legal system; constitutional law; sources of law; the law-making institutions and processes; the courts, procuratorates and legal profession; basic principles of civil and criminal procedure and administrative litigation; basic principles of civil, commercial, administrative and criminal law; and the impact of globalisation on Chinese legal developments.

LLAW 1010 Legal research and writing I (3 credits)

Case reading: distinguishing law/fact; learning the structure and language of common law judgments; identifying relevant facts; identifying and defining legal issues, ratios, arguments, reasoning with precision; learning the ways in which judges in one case treat the judgments in earlier cases; precedent in action.

Basic legal writing skills using short weekly marked up and graded writing assignments in the format of case briefs, letters to clients, closed internal memoranda. Emphasis will be placed upon correct use of general English and appropriate legal terminology, clarity of expression and logical, effective organisation of ideas and arguments.

Learning skills: pre-class preparation; in class exercises, participation in class discussions using group and Socratic methods.

LLAW 1011 Legal research and writing II (3 credits)

All about legislation: the anatomy of an ordinance; the life cycle of an ordinance; the nature and use of the revised and loose-left editions of the Laws of Hong Kong and the Legal Supplements to the Gazette; the structure of the English Statute Book, the nature of subordinate legislation; reading ordinances; statutory interpretation in common law jurisdictions.

Basic legal writing skills using short, weekly marked up and graded writing assignments involving precise identification and resolution of statutory interpretation problems.

Learning skills; pre-class preparation, in class presentation on part of the life cycle of an ordinance, participation in very small group discussions with systematic reporting and feedback.

LLAW 1012 Legal research and writing III (3 credits)

Library research involving identifying and physically locating appropriate Hong Kong and English case law and statutory provisions using (i) paper and (ii) electronic sources with emphasis upon thoroughness, efficiency and being as up to date as practically possible; basic research tools for Canada and Australia; use of legal encyclopedias, especially Halsburys, and digests such as Current Law and Hong Kong's own materials; a first introduction to legal journals.

Students will be expected to do a number of ungraded, narrowly focused research assignments, designed to assist students in familiarizing themselves with legal research tools and methods. They will then be expected to complete a research plan, a research file, an office memo, a barrister's skeleton, oral argument and final judgment – all based on an assigned research request (a different research request set by each tutor).

LLAW 2012 Commercial law (6 credits)

This course will introduce the fundamental principles of commercial law through the integration of legal issues associated with contracts, personal property, security and finance and equity in the context of commercial transactions. It focuses on the types of commercial transactions, the legal relations between parties thereto, issues arising from interrelated financial transactions, and credit and security. It covers introduction to personal property, rights in rem and rights in personam, bailment; commercial transactions (sale of goods and services, statutory control on unconscionable terms; implied terms and exemption/limitation clauses; transfer of title, nemo dat); gift; negotiable instruments, assignment of choses in action and security interests (retention of title, lien, pledges, mortgages, fixed and floating charges, guarantees); protection of interests in property and remedies (conversion, detinue, trespass, unjust enrichment, set-off); introduction to bankruptcy and corporate insolvency; settlement of commercial disputes.

LLAW2013 and LLAW2014 Land law I and II (12 credits)

Introduction: concept of a proprietary interest; what is property law; classification of property; the nature of a trust.

Ownership, title and possession: legal ownership; title; leasehold estates in Hong Kong; ownership and possession; tenure and estates; equitable interests; possession-recovery and protection of possession; adverse possession and possessory title.

Priority: doctrine of notice; statutory intervention (e.g. land registration); subrogation.

Creation and transfer of proprietary interests in land: creation; assignment; intervention of equity (e.g. *Walsh v Lonsdale*, part performance, estoppel, constructive and resulting trusts).

Future interests: remainders and reversions: trusts for sale; vested and contingent interest; rules against inalienability.

Concurrent interests: joint tenancy and tenancy in common; ownership in multi-storey buildings; severance; termination.

Leases: nature of leases; relationship of landlord and tenant; termination; statutory intervention.

Easements: nature; creation and determination.

Licences: revocability; enforceability.

Covenants: between landlord and tenant; between adjoining and co-owners; role in use and management of land.

Security interests: mortgages; charges; pledges; liens.

Land registration and priorities.

LLAW 2015 Legal research and writing IV (3 credits)

Using materials from a range of substantive law courses, students will be required to complete a number of written assignments such as a draft legal brief and a revised version, clauses for or answering problem questions in relation to simple hire purchase, car parking, employment or tenancy agreements; a simple set of pleadings, an essay critically commenting on a legal journal article.

LLAW 2016 Legal research and writing V (3 credits)

Students will be required to complete two supervised assignments, each involving the preparation of a research plan, working bibliography (if appropriate), full draft and final polished product. One assignment, to be completed in the first semester, will require research in an area of private law, probably in the form of an open memorandum. The other assignment will require research in an area of public or comparative law with the additional requirement of a presentation of the paper to a seminar of peers as a work in progress. The second assignment and presentation will be completed in the second semester.

LLAW3001. Introduction to legal theory (6 credits)

This course encourages critical reflections on the nature of law, the central issues of jurisprudence and the concepts and techniques used in the operation of legal systems. Topics to be covered may include some of the following: the relationship between law and morality; natural law; legal positivism; Ronald Dworkin's jurisprudence; utilitarianism and economic analysis of law; justice; liberty; rights; the Rule of Law; punishment; adjudication and legal reasoning; legal realism; sociological jurisprudence; critical legal studies; feminist jurisprudence; postmodern jurisprudence.

LLAW3007 Alternative Dispute Resolution (6 credits)

This course will examine the traditional methods of dispute resolution such as judicial adjudication, and consider alternative dispute resolution from both a Hong Kong and an Asian perspective.

This course is composed of two main parts:

- (a) an introduction to traditional methods of dispute resolution and a critique of their advantages and disadvantages; and
- (b) an examination of alternative dispute resolution methods, which will cover the following:
 - (i) the origin and development of the alternative dispute resolution movement, and
 - (ii) an in-depth study of the following methods: confidential private listening; negotiation, mediation and conciliation; arbitration; good offices/ombudsman; mini-trials/summary jury trials; private courts, dispute resolution centres and online web-based ADR schemes.

These methods of alternative dispute resolution will be examined by considering their present and potential application in Hong Kong and other parts of Asia, in such areas as: administrative complaints, commercial and construction disputes (both domestic and international), labour relations, landlord and tenant disputes and matrimonial disputes. Students will also engage in role playing exercises in simulated negotiation, mediation and arbitration with video taped assessment.

LLAW3010. Business associations (6 credits)

Outline of different types of business associations.

Partnership: their nature and creation and the rights and duties of the partner *inter se* and *vis-a-vis* third parties.

Registered companies: their development and nature; problems relating to incorporation; separate corporate personality; limited liability; memorandum and articles of association; *ultra vires* doctrine; an overview of membership, management and control.

LLAW3022. Human rights in Hong Kong (6 credits)

History of enactment, the Bill of Rights Regime, ICCPR, implementation of human rights treaties, Basic Law, interpretation, scope of application, inter-citizen rights, locus standi, permissible limitations, derogation and reservation, enforcement and remedy.

Study of selected rights, including civil and political rights, economic, social & cultural rights and people's rights. Topics covered include impact on civil and criminal process, right to a fair and public trial, arrest, search and seizure, torture and degrading treatment, liberty and security of person, freedom of association and assembly, freedom of expression, right to nationality, right to family, right to political participation, discrimination and equality, right to housing, social securities, education and environment.

LLAW3034 Labour Law (6 credits)

This course is intended to provide an introduction to the major issues in labour and employment law in Hong Kong. It is concerned with the law governing the workplace: the common law of the contract of employment, the statutory provisions regulating the contract of employment and governing the rights and obligations of workers and employers, workers' entitlements under legislation, workplace safety, the right to compensation for work-related injury, protection against discrimination, and collective rights such as the right to form trade unions, to bargain and to strike. International law, in the form of the International Labour Organisation conventions as well as the major UN conventions on human rights, and their interface with domestic law, will be considered.

LLAW3040 Medico-Legal Issues (6 credits)

This course examine how the law regulates medical practice. Topics examined include consent to medical treatment, abortion, pre-natal injuries, death and withholding life sustaining treatment, euthanasia, organ transplant, confidentiality and access to medical records.

LLAW3043 Principles of Family Law (6 credits)

This course covers basic principles of Hong Kong family law and its historical development. It examines marriage formation, nullity and legal consequences of marriage. It covers protection of spouse and children from domestic violence. This course also covers judicial separation, divorce and ancillary relief. The law relating to children is also examined with emphasis on parental responsibility, child adoption and child protection from abuse and neglect. Also studied is the impact on family law of the UN Convention on the Rights of the Child and other international treaties binding on Hong Kong.

LLAW3044 Public International Law (6 credits)

Topics will include some of the following: introduction to the nature of international law and its historical development; sources of international law; the relationship between international and municipal law; the subjects of international law; the concept of sovereignty and state recognition; state jurisdiction; the acquisition and loss of territory; state responsibility; state succession; treaties and other international legal agreements; the pacific settlement of disputes; the use of force; international institutions; human rights.

The above is intended merely as a guide to the general nature of the subject matter to be covered. Special reference will be made throughout to considerations which are particularly relevant in the Hong Kong and Southeast Asian contexts.

LLAW3046 Child and the Law (6 credits)

This course covers the law of parent and child with emphasis on the emerging concept of parental responsibility and the rights of the child. It examines the increasing importance of parentage as a status and the effect of Parent and Child Ordinance (1993) on the status of children in Hong Kong. Also examined here is the effect of divorce on children and the enforcement of child support obligation. The course also examines the importance of listening to children in family proceedings and the role of mediation in the settlement of family disputes over children. Also considered is the law of child adoption and protection from abuse and neglect.

LLAW3047. The Hong Kong basic law (6 credits)

The background to the Basic Law (the Joint Declaration and the process of drafting and agreeing on the Basic Law), basic Chinese and Western liberal constitutional concepts relevant to an understanding of the structure and orientation of the Basic Law, the relationship of the Basic Law to the Chinese Constitution, the relationship between the Hong Kong Special Administrative Region and the Chinese central government, the institutional structure of the Hong Kong SAR, especially the relationship between the executive and the legislature, the concept and special aspects of 'one country, two systems' (e.g. the economic system preserved in the Basic Law), human rights, judicial review and constitutional litigation.

LLAW3057. International criminal law (6 credits)

This course explores the rationale, origins, normative development, institutional mechanisms and role of international criminal law. To do this, we trace the roots of international criminal law in customary laws of war and early attempts to enforce rules prohibiting war crimes, before reviewing the operation of the Nuremberg and Tokyo International Military Tribunals that were established after the Second World War. We then take account of the Geneva Conventions, 1949, and the rise of international human rights law, focusing on the crimes of aggression, genocide, war crimes and crimes against humanity. We then delve into the law and practice of the ad hoc International Criminal Tribunals for the former Yugoslavia and Rwanda and relate their establishment and operation to the emerging system of international criminal law, and the process under way to establish the International Criminal Court. Other problems of international crime, including terrorism, drug-trafficking, hostage-taking and hijacking, also will be considered against the backdrop of the domestic and international socio-political realities of our time.

LLAW3062. Human Rights in China (6 credits)

This course will examine the international and domestic dimensions of the protection of human rights in the People's Republic of China. It will examine the applicability of international human rights standards to the PRC, the stance of the PRC in relation to international national mechanisms for the protection of human rights, and the place of international standards in domestic law. The course will consider the theoretical debates about the origin and contingency of human rights standards, questions of priorities in human rights, and the issue of rights in Chinese cultural contexts. It will also examine the extent of human rights protections available under the Chinese constitution and other laws, and will focus on selected issues, which may include the criminal justice system, freedom of expression, freedom of association, freedom of religion, labour rights, gender discrimination, and minorities/self-determination. The course will also examine the social and political forces that may contribute to the improvement of human rights in China.

LLAW3069 Regulation of Financial Markets (6 credits)

This foundation course addresses the nature and operation of financial markets and the role of regulation. Coverage, based on comparative analysis and international standards, will include major financial sectors (banking, securities, insurance), supporting legal and institutional structures, and current issues and trends.

LLAW3080 Governance and Law (6 credits)

This course seeks to understand why the state regulates certain activities and behaviour in society, what different forms of regulation exist, when and what kind of legal regulation is deemed necessary, how legal regulation is enforced, and checks balances against abuse in enforcement. This course is jointly taught by staff from the Department of Politics and Public Administration and the Department of Law. The main objective of the course is to explore the interface between the study of Politics and Law in understanding governance. Relevant case studies will be included for illustration and discussion. To take this course, student must have successfully completed POLI1002 Fundamentals of Public Administration and LLAW3093 Administrative Law. Students are allowed to take either POLI0064 or LLAW3080 to fulfill the respective programme requirements for the Department of Politics and Public Administration or the Department of Law.

LLAW3090. Legal aspects of white collar crime (6 credits)

The course applies international and comparative perspectives to the problem of white collar crime in the HKSAR. The topics covered include defining 'white collar crime', money laundering, terrorist financing, forfeiture/confiscation of crime tainted property, corporate criminal liability, punishing the corporation, investigating and prosecuting white collar crime, and possibly others.

LLAW3091. Ethnicity, human rights and democracy (6 credits)

The rise of ethnic consciousness and the prevalence of conflicts based on diverse ethnic claims raise fundamental problems for rights and democracy. The course examines the causes of the rise of ethnicity and the challenges it poses to rights and democracy. The dominant modes of rights and liberal democracy, based on notions of the individual (or citizen) and social homogeneity, seem to clash with the claims of groups rights and cultural relativism. Many recent developments in the regime of rights and international law respond to this clash: the rise of rights of indigenous peoples, consociationalist democracy, new modes of expression of self-determination, developments in the rights of minorities, various forms of autonomy, the expansion of the scope of humanitarian intervention, and the adaptation of bills of rights to accommodate multi-culturalism.

LLAW3093 Administrative Law (6 credits)

The topics which may be included in the course in any particular year include theories of administrative decision-making, judicial review of administrative action (ultra vires and procedural fairness, Wednesbury unreasonableness, proportionality, abuse of power), delegated legislation, administrative law remedies, control of law-making by delegates, the practical aspects of bringing an action for judicial review under Order 53 of the Rules of the High Court, non-curial means of control and scrutiny of administrative action (Ombudsman, Administrative appeals, public enquiries), the structure and operation of administrative tribunals in Hong Kong, the Bill of Rights and review of administrative decision-making in Hong Kong, and access to information.

LLAW3101. Cybercrime (6 credits)

'Cybercrime' refers to computer-mediated activities which are either criminal or regarded as illicit and which can be conducted through global electronic networks. It encompasses cybercrimes against the person (e.g. cyber-stalking, cyber-pornography), cybercrimes against property (e.g. hacking, viruses, causing damage to data, cyber-fraud), and cyber-terrorism. The computer-age has also provided organized crime with more sophisticated and potentially secure techniques for supporting and developing networks for a range of criminal activities, including drugs trafficking, money laundering, illegal arms trafficking, and smuggling.

Cybercrime poses new challenges for criminal justice, criminal law, and law enforcement. This course will examine the nature of and problems created by cybercrime, along with some of the legal and policy challenges arising in relation to the development of national and international law enforcement and regulatory responses to cybercrime.

FACULTY OF SCIENCE**Department of Biochemistry****BIOC1001 Basic biochemistry (6 credits)**

This course is designed to present an overview of biochemistry and to provide an understanding of the basic mechanisms underlying life processes. It is an independent course which can be taken by students from various disciplines. The course also prepares students for further studies in Biochemistry and Molecular Biology.

Prerequisite AS Biology or AS Chemistry

BIOC1003 Introduction to molecular genetics (6 credits)

The objectives of this course are to provide students with basic and up-to-date knowledge on the structures and functions of nucleic acids, to give students a general picture of the molecular process of gene expressions, and to introduce students to recombinant DNA technology.

Prerequisite AS Biology or AS Chemistry

BIOC2601 Metabolism (6 credits)

This course aims to provide the basic concepts of metabolism: the events and their importance in relation to the survival of living organisms. Taken together with BIOC1001 and BIOC2602, this will lay the foundation for the more advanced courses offered in the Biochemistry discipline.

Prerequisite BIOC1001

BIOC2602 Understanding metabolic diseases (6 credits)

To widen and deepen knowledge and understanding of metabolism. By using a problem-based learning (PBL) approach, students are trained in critical thinking and problem-solving skills. Students will be able to grasp the major effects on metabolic integration and control and they can use these concepts with greater confidence and success in approaching new problems and new areas of study.

Prerequisite BIOC1001

Co-requisite BIOC2601

BIOC2603 Principles of molecular genetics (6 credits)

To provide basic knowledge on molecular genetics, illustrating modern concepts with current experimental approaches and computer-assisted programmes. Together with BIOC3613 and BIOC3609 taken in the second year, a comprehensive background is provided for advanced study and/or research in molecular biology.

Prerequisite BIOC1001 or BIOC1003 or BIOL1102 or BIOL1122 or BIOL1125 or BIOL1106

BIOC2604 Essential techniques in biochemistry and molecular biology (6 credits)

To give students a general overview of different experimental approaches and model systems, and to provide students with hands-on experience in basic biochemical and molecular techniques.

Prerequisite BIOC1001 or BIOC1003 or BIOL1102 or BIOL1122 or BIOL1125 or BIOL1106

BIOC3608 Introduction to bioinformatics (6 credits)

This course will examine existing programs and services available on the World Wide Web for DNA and protein sequence analysis. Students will also learn how to use the sequence analysis GCG package installed locally. The underlying principles of these analysis programs and services will be presented. Students will learn how to retrieve, analyze, and compare protein and DNA sequence similarities. A basic introduction to protein modeling will also be presented.

Prerequisite BIOC2603 or BIOL2303 or BIOL3308

BIOC3609 Molecular medicine * (6 credits)

To provide up-to-date knowledge of the molecular and genetic basis of human diseases including cancer, thereby preparing the students for a career in medical molecular biology, biotechnological, pharmaceutical and genome research.

Prerequisite BIOC2603 or BIOL2303; basic knowledge of molecular genetics and molecular biology is assumed

* *This course is not available to students taking BIOL3308 Applied Molecular Biology and/or BIOL3213 Advanced Techniques and Instrumentation in Animal Biology.*

BIOC3610 Advanced biochemistry I (6 credits)

This is part of the advanced series designed to bring students to the understanding of current concepts, physicochemical bases and techniques in modern Biochemistry. The aim is to help students to develop critical thinking and analytical skills thus equipping them for beginning research projects or professional training in biomedical sciences.

Prerequisite 1) BIOC1001; and 2) BIOL2301; and 3) BIOC2601 or BIOL2115

BIOC3611 Advanced biochemistry II (6 credits)

This is part of the advanced series designed to bring students to the understanding of current concepts, physicochemical bases and techniques in modern biochemistry. Hence to equip them for beginning research projects or professional training in biomedical sciences.

Prerequisite BIOL3610

BIOC3613 Molecular biology of the gene (6 credits)

To provide an up-to-date knowledge of molecular biology, especially with respect to the regulation of eukaryotic gene expression, molecular embryology.

Prerequisite BIOC2603 or BIOL2303 or BIOL3308

BIOC3614 Biochemistry project (12 credits)

To enable students to acquire the basic skills in scientific research: literature search, critical reasoning, communication, teamwork and time management. The course is particularly useful for those students who intend to pursue a career in life science.

Prerequisite BIOC1001 and BIOC2604 and good overall performance in 2nd year courses

Co-requisite BIOC3610, BIOC3611, BIOC3612

BIOC3615 Advanced techniques in biochemistry and molecular biology (6 credits)

This is an advanced experimental-based course for students majoring in Biochemistry and related disciplines. The aim is to provide the necessary training for students to pursuit postgraduate research

education and potential employment in a scientific laboratory/industry environment.
Prerequisite 1) BIOC1001; and 2) BIOC0002 or BIOC1003; and 3) BIOC2604

Department of Botany and/or Zoology

BIOL0002 Introduction to food and nutritional science (3 credits)

The course enables students to gain an appreciation of the scope of Food Science as a discipline. This is an independent course which can be taken by students from various disciplines. It also prepares students for further studies in Food and Nutritional Science.

Prerequisite Nil

BIOL0118 Bioethics (6 credits)

The aim is to explore the ethical implications of the latest major advances in biology and medicine.

Prerequisite Nil

BIOL0120 The gene * (3 credits)

The objective of the course is to expose students to the impacts of gene to the modern society. With the completion of the human genome in the next three years not only promises a better quality of life, it also brings lots of technical and ethical issues that the general public need to deal with. The goal of the course is designed to open up students from all backgrounds to this basic unit of inheritance called gene and its impact on various other scientific and social disciplines. Outline includes but not limited to the chemical basis of gene, gene evolution, gene chips, animal cloning, gene and disease, human genome and computer science, gene and behavior, genetic implications to law and society.

Prerequisite Nil (not offered to students with AL Biology)

* *Students with a pass in AL / AS Biology or who are in the Biology, Biochemistry, Animal and Plant Biotechnology, Environmental Life Science, and Food and Nutritional Science programmes and who are taking or have taken YSCN0004 are not allowed to take this course.*

BIOL0126 Fundamentals of biology * (6 credits)

This course is designed to provide students a general concept of the various disciplines of experimental biology and prepare them for further intermediate and advanced courses in biology. It takes a systematic approach to look at the key principles that govern the survival of life forms. The course is opened to those who wish to take a minor in Biology or General Science but do not have A-level biology.

Prerequisite HKCEE Biology

* *Students who have passed HKAL Biology should take BIOL1122 Fundamental Biology. This course is not available to students who have taken BIOL1122 or any level 2 and level 3 biology courses.*

BIOL0127 Contemporary nutrition: insights and controversies * (3 credits)

What you eat greatly affects your well-being, and this is especially true in recent years when nutrition has become one of the hottest topics in town for men and women of all ages. What food is good for our health? How much do we need to eat? Which dietary plan is scientifically sound and effective? Everywhere we go, we are bombarded by different messages, from vitamins to functional food products, on how food components or treatments impact on body functions and health. How reliable is the information from the mass media? Are these facts or myths? This course aims to provide health conscious individuals with fundamental knowledge to decipher information related to nutrition and health. Such knowledge is vital to everyone not just in a trendy fashion or for a short term dietary plan,

it is essential to the building of good eating habits that could promote health for a lifetime.

Prerequisite Nil

* *Not for students in the Food and Nutritional Science programme, major or minor.*

BIOL0128 Biological techniques, instrumentation and data processing (6 credits)

This course is designed to provide students with a wide range of basic biological techniques, principles of instruments and data processing. Basic concepts in protein/DNA purification including precautions, detection and verification of purified products are included. The course is also opened to those who wish to take a major or a minor in Biology for General Science.

Prerequisite HKCEE Biology or equivalent

BIOL1106 Genetics (3 credits)

The objective of the course is to provide an introduction to the various aspects of genetics. At the end of the course students are expected to know the fundamentals of classical, population and molecular genetics.

Prerequisite AL Biology

BIOL1107 Introduction to developmental biology & reproduction (3 credits)

The course is designed to provide an introduction to developmental biology and reproduction animals through an integrated approach. Reproductive and developmental processes will be examined at the cellular and organismic levels.

Prerequisite AL Biology

BIOL1119 Introductory microbiology * (6 credits)

The course will provide an introduction to the microbial diversity of life on earth including bacteria, fungi, microalgae, viruses, and other microorganisms. Emphasis will be placed on organisms that are of importance in our everyday lives. The course will also include components of biotechnological, food and medical microbiology. The course will provide an essential foundation for all biology students, as an understanding of the role and uses of microorganisms is a basic requirement of most biological subjects. The course leads to various 2nd and 3rd level courses in microbiology.

Prerequisite AL Biology

* *The Department of Ecology & Biodiversity also contributes to the teaching of the course.*

BIOL1121 Animal form and functions (3 credits)

This is a fundamental course which intends to show the students the major animal life forms on earth and how they can survive in a given environment. The relationships between body forms, body architectures, environmental interactions, functional adaptations and evolution will be illustrated.

Prerequisite AL Biology

BIOL1122 Functional biology * (6 credits)

The course is designed to provide an introduction to modern developments in experimental biology through an integrated approach. Life processes will be examined at the molecular, cellular and organismic level.

Prerequisite AL Biology
 * *BIOL0126 and BIOL1122 are mutually exclusive.*

BIOL1123 Food chemistry (3 credits)

The course is designed to give students a basic understanding of chemistry of the major and minor components in food systems.

Prerequisite AL or AS Chemistry

BIOL1125 Introduction to biochemistry * (6 credits)

This course is designed to provide undergraduate (non-biochemistry major) an overview of fundamental concepts in biochemistry as well as hands-on experience in biochemical techniques.

Prerequisite AL or AS Biology

* *Students who passed BIOC1001 Basic Biochemistry are not allowed to take this course.*

BIOL1513 Food science laboratory (3 credits)

The course is designed to introduce students to some basic practical training related to food science and nutrition.

Prerequisite AL or AS Chemistry

BIOL1514 Nutrition and metabolism * (6 credits)

This is an independent course compulsory for students in the Food & Nutritional Science programme, but also opens to students in other life sciences disciplines. The fundamental concepts in nutrition will be introduced. An integrated approach will be used in discussing the interactions between diet and intermediary metabolism.

Prerequisite AL or AS Biology

* *BIOL1514 and BIOL2510 are mutually exclusive.*

BIOL2004 Bioexploitation of filamentous fungi * (3 credits)

This course provides an overview of the uses of filamentous fungi in biotechnology, the potential uses of fungal products and the methods by which scientists search for and develop these new products.

Prerequisite BIOL1119

BIOL2109 Economic botany * (6 credits)

To provide an understanding of the scientific principles, processes, and practices involved in the utilization of crops and other economic plants. At the end of the course students are expected to be scientifically knowledgeable on the plants and plant products they encounter everyday.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122

* *Not offered in 2006-2007.*

BIOL2111 Molecular microbiology (6 credits)

This course is intended for biology, biotechnology and biochemistry students who would like to understand the modern fundamentals of microbiology. At the end of the course the students are

expected to know the physiological, biochemical and molecular aspects of microbiology.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035

BIOL2112 Plant physiology (6 credits)

To give an understanding of plant processes such as plant growth and development and their regulatory mechanisms.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126

BIOL2114 Plant biochemistry and molecular biology (6 credits)

To present current developments in selected areas of plant biochemistry and plant molecular biology.

Prerequisite BIOL1102 or BIOL1122 or BIOL0126

BIOL2115 Cell biology & cell technology (6 credits)

To provide a coherent understanding of the structure and function of cells, and the principles and applications of cell culture and instrumentation in biology and biotechnology.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035 or BIOC1001 or BIOL1125

BIOL2116 Genetics I (6 credits)

This is the first of an integrated pair of courses, Genetics I and Genetics II, aiming to provide balanced coverage of many areas in genetics. The focus of Genetics I is on the basic principles of genetics. Genetics II will cover more advanced topics of modern genetics.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035

BIOL2117 Genetics II (6 credits)

This is the second of an integrated pair of courses, Genetics I and Genetics II, aiming to provide balanced coverage of many areas in genetics. The focus of Genetics I is on the basic principles of genetics. Genetics II covers more advanced topics of genetics.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035

BIOL2201 Neuroscience * (6 credits)

To provide a comprehensive picture of how the nervous system and neurones work in animals both as sensory input, integrator, motor output, and for learning, memory and behavioural patterns.

Prerequisite BIOL1101 or BIOL1121 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035

* *Not offered in 2006-2007.*

BIOL2203 Reproduction & Reproductive Biotechnology (6 credits)

To provide comprehensive overview on modern concepts and recent advancements in reproductive

biology & biotechnology.

Prerequisite AL / AS Biology (preferably with BIOL0126 or BIOL1107)

BIOL2205 Basic immunology * (6 credits)

To provide a broad understanding of animal immune systems. Topics will also include the application of a variety of immunological methods to research and disease diagnosis.

Prerequisite BIOC1001 or BIOL1125 or BIOL1101 or BIOL1121 or BIOL1102 or BIOL1122 or BIOL0126

* *BIOL2205 Basic Immunology is not available to students taking BIOC2606 Applied Human Biochemistry.*

BIOL2207 Endocrinology (6 credits)

To provide an advanced course on hormones and regulation of metabolism.

Prerequisite BIOC1001 or BIOL1125 or BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126

BIOL2208 Vertebrate comparative anatomy and palaeontology * (6 credits)

This course provides the anatomical background to comprehend the evolutionary and functional adaptations in vertebrate animals through to the evolution of man. The course will examine both the fossil evidence and the comparison of anatomical structures in existing forms. The course is open to Biological Science students, Geology and Earth Science students and welcome others from non-science curricular.

Prerequisite BIOL1101 or BIOL1121 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035

* *Not offered in 2006-2007.*

BIOL2209 Developmental biology (6 credits)

The course provides important insights into mechanisms regulating the early stages of animal life and is particularly relevant to the understanding of the functional aspects of body systems.

Prerequisite BIOL1102 or BIOL1122 or BIOL0126 or BIOL1107

BIOL2210 Evolution * (6 credits)

Since Darwin's discovery of evolution by natural selection, the science of evolutionary biology and genetics have developed together during the 20th century, leading to the Modern Synthesis or neo-Darwinism. This course attempts to provide a basic understanding of the modern theory of evolution and the mechanisms that underlie evolutionary changes.

Prerequisite BIOL1106

* *This course and ECOL0040 Ecology and Evolution are mutually exclusive.*

BIOL2215 Animal physiology (6 credits)

To provide a fundamental understanding on the processes that dictate the functions and activities of living matters with particular references to animals and humans. An integrated approach is emphasized to provide students the perspective on how homeostasis is achieved through the coordination of systems and functions.

Prerequisite BIOC1001 or BIOL1125 or BIOL1101 or BIOL1121 or BIOL1102 or BIOL1122 or BIOL0126

BIOL2217 General parasitology (3 credits)

The course is aimed to provide students with a broad basic knowledge on major aspects of general parasitology. Students will be exposed to the taxonomy of parasites: from protozoa to Platyhelminthes. The lectures will also focus on the growth cycles of parasites, their means of infection, reproductive strategies and the host-parasite interactions.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126 or BIOL1103 or ECOL1103 or ECOL0035

BIOL2301 Protein structure and function * (6 credits)

To provide students with a good understanding of protein structure, how structure subserves function, and the methods for study of both. This course provides a strong foundation for advanced courses in biochemistry and biotechnology.

Prerequisite BIOC1001 or BIOL1125 or BIOL1102 or BIOL1122 or BIOL0126

* *The Department of Biochemistry also contributes to the teaching of the course.*

BIOL2302 Fermentation technology (6 credits)

To introduce the key concepts and principles involved in fermentation technology, and discuss how fermentation technology is used in the food and biotechnology industries.

Prerequisite BIOL1102 or BIOL1122 or BIOL0126 or BIOL1105 or BIOL1123 or BIOL1119

BIOL2303 Introduction to molecular biology (6 credits)

To provide students with basic knowledge in molecular biology and gene cloning techniques with emphasis on manufacturing of cell products. This course will give Biology students a complete picture of the recent developments and applications in gene technology and prepare biotechnology students for further advanced course in genetic engineering.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1102 or BIOL1122 or BIOL0126

BIOL2313 Intermediate botany project (6 credits)

This course is designed for students who wish to gain research experience at an early stage of their degree. It provides an opportunity to do an individual experimental research project supervised by a member of the Department of Botany.

Prerequisite Relevant first year courses

BIOL2314 Intermediate zoology project (6 credits)

This course is to provide research experience in experimental biology to second year students with good academic performance.

Prerequisite Requires good performance in relevant first year courses

BIOL2501 Food processing and preservation (6 credits)

An introduction to the basic principles and methodology of food processing and preservation technology with emphasis on major methods including high and low temperature processing, concentration and dehydration, and food packaging.

Prerequisite BIOL0002 or BIOL1105 or BIOL1123

BIOL2502 Food technology * (6 credits)

This course is intended for students planning to enter the food industry. This course offers an introduction to physical and engineering principles relevant to the food industry, and an in-depth analysis of selected methods and problems in food processing and preservation.

Prerequisite BIOL0002 or BIOL1105 or BIOL1123

* *Not offered in 2006-2007.*

BIOL2503 Grain production & utilization (6 credits)

To provide a broad understanding of the utilization and significance of the major grains in the food industry and in human health and nutrition.

Prerequisite BIOL0002 or BIOL1102 or BIOL1122 or BIOL1105 or BIOL1123

BIOL2505 Food safety and quality management (6 credits)

To provide exposure to some key management concepts used to produce safe high-quality food products that will succeed in the marketplace. To introduce students to the use of the business case-study method in individual, team and class-based learning.

Prerequisite BIOL0002 or BIOL1105 or BIOL1123

BIOL2507 Meat and dairy science (6 credits)

To provide a broad understanding on modern practice and technology of meat and dairy production, processing and marketing.

Prerequisite BIOL1102 or BIOL1122 or BIOL0126 or BIOL1105 or BIOL1123

BIOL2515 Food microbiology * (6 credits)

This course provides the key concepts and principles of food microbiology with special emphasis on the interaction between microorganisms and food. Microbial food production, microbial food spoilage and foodborne diseases will be discussed in detail.

Prerequisite BIOL0002 or BIOL1105 or BIOL1123

* *The Department of Ecology & Biodiversity also contributes to the teaching of the course.*

BIOL2517 Food analysis (3 credits)

To introduce the key concepts in professional food analysis in an industry context. To discuss the choice of analytical methods and the interpretation of results. Major instrumental techniques used in food analysis will be covered.

Prerequisite BIOC1001 or BIOL1125 or BIOL1104 or BIOL0128 or BIOL1122 or BIOL0126 or BIOL1123

BIOL2518 Laboratory in nutritional science (3 credits)

To provide students a comprehensive training on laboratory techniques, experimental approaches and the use of different model systems in nutritional sciences. This course aims to equip students with the basic skills in conducting nutritional studies.

Prerequisite BIO1514

BIOL2519 Essential nutrients & functional foods * (6 credits)

The course has two interrelated parts. First, the functional roles of essential micronutrients in physiologic and metabolic processes will be presented. Second, the concept of functional foods and their role in disease risk reduction will be discussed. The course would appeal to students who have interest in the science, marketing and regulatory aspects of health foods and dietary supplements.

Prerequisite BIOL1514

* *Not for students who have taken BIOL3511.*

BIOL2520 Food toxicology (3 credits)

To provide an understanding of the basic concepts of toxicology and to discuss the major types of toxins and food contaminants found in food and food handling processes.

Prerequisite BIOL1105 or BIOL1123

BIOL2521 Food engineering (6 credits)

This course is intended for students planning to enter the food industry. This course offers an introduction to physical and engineering principles relevant to the food industry, and an in-depth analysis of selected methods and problems in food processing and preservation.

Prerequisite BIOL0002 or BIOL1105 or BIOL1123

BIOL3212 Applied immunology * (6 credits)

A follow-up course of BIOL2205. The aim is to provide the latest knowledge on the practical applications of Immunology in biological research, serodiagnosis and industries.

Prerequisite BIOL2205

* *BIOL3212 Applied Immunology is not available to students taking BIOC2606 Applied Human Biochemistry.*

BIOL3213 Advanced techniques and instrumentation in animal biology * (6 credits)

A follow-up course of BIOL1104/BIOL0128. The aim of this course is to introduce students with the latest techniques and instrumentation used in animal biological research.

Prerequisite 1) BIOL1104 or BIOL0128; and 2) BIOL2303

* *BIOL3213 Advanced Techniques and Instrumentation in Animal Biology is not available to students taking BIOC3609 Molecular Medicine. Not offered in 2006-2007.*

BIOL3214 General virology (6 credits)

This Course provides the fundamental principles of virology so that students can understand the pathogenesis of major viral diseases that affect animal health. The course will prepare students for profession or graduate work in virology, medicine and biotechnology.

Prerequisite BIOC2603 or BIOC1003 or BIOL2303 or BIOL2205

BIOL3307 The biotechnology industry (6 credits)

This course provides an overview of the various fields of biotechnologies, the development of a biotechnology product, and the operation of biotechnology companies.

Prerequisite BIO2603 or BIOL2303

BIOL3309 Botany project (12 credits)

To provide experience of biological research by planning and carrying out a small project under the supervision of a member of staff.

Prerequisite Good performance in level 2 courses

BIOL3310 Zoology project (12 credits)

To provide experience of biological research by planning and carrying out a small project under the supervision of a member of staff.

Prerequisite Requires good performance in relevant level 2 courses

BIOL3311 Botany dissertation (6 credits)

Students will undertake a dissertation on an agreed topic in plant sciences, microbiology or food science. The student will develop scientific writing and presentation skills, and will make extensive use of IT and library resources.

Prerequisite Requires completion of relevant level 2 courses

BIOL3312 Zoology dissertation (6 credits)

Students will undertake a dissertation on an agreed topic in *biological sciences*. The course will enhance the students' overall capability in producing a formal document through emphases on problem identification, content selection, efficient use of IT and library resources, scientific writing and oral presentation skills.

Prerequisite Requires completion of relevant level 2 courses

BIOL3315 Animal biotechnology (6 credits)

This course discusses the key concepts and principles involved in animal biotechnology, and their applications in animal industry and molecular medicine.

Prerequisite BIOL2303

BIOL3316 Plant biotechnology (6 credits)

This course covers the principles and applications of plant biotechnology. The significance of plant biotechnology in agriculture and its emerging role in molecular farming for production of biopharmaceuticals and other high-value proteins will be discussed.

Prerequisite BIOC2603 or BIOL2303

BIOL3317 Microbial biotechnology (6 credits)

This course is intended for students who would like to understand the application of modern microbiology in biotechnology. The microbial systems being used include different types of viruses, bacteria, fungi and algae. At the end of the course the students are expected to know the parameters and conditions that affect the yield of production and the systems available for the expression of various types of biotechnology products.

Prerequisite BIOL2303

BIOL3516 Nutrition and brain function (3 credits)

To highlight the impact of nutrient provision on brain function and to discuss various effects of nutrition and diet on mental function and behaviour.

Prerequisite BIOL2215 or BIOL2519

BIOL3522 Nutrigenomics (3 credits)

Recent advances in the understanding of human genes has resulted in the emergence of a new science called Nutrigenomics. This course aims to provide students a basic understanding on the relation between genetic variation and diet-related diseases. A genetically-based nutrition and dietary therapy intervention approach for maintenance of health will be explored.

Prerequisite BIOC1001 or BIOL1125 or BIOL1106 or BIOL2303

BIOL3523 Principles of Chinese medicated diet (3 credits)

To provide basic knowledge on Chinese medicated diet. Illustrating historical and modern concepts of Chinese Medicated diet and encourage research and development with current experimental approaches. This is a valuable course for students in the Food and Nutritional Science programme, but also opens to students in other programmes.

Prerequisite BIOL2519

BIOL3524 Diet and disease (3 credits)

The course deals with diseases associated with diet and basic dietetics.

Prerequisite BIOL1514 and BIOL2519

BIOL3525 Food product development (3 credits)

To introduce the key concepts and techniques used in food product development. Students will work in small groups to design, develop and produce a new food product. Appropriate for students in Food and Nutritional Science Programme or Major.

Prerequisite BIOL2501 or permission of the course coordinator

BIOL3526 Advanced laboratory in nutritional science (3 credits)

This course is a follow-up to BIOL2518. The emphasis will be on human nutrition related techniques. Taken together, the two courses will provide students the necessary knowledge to pursue postgraduate research education as well as potential employment as a nutritionist in public and private sectors.

Prerequisite BIOL1514 and BIOL2518

Department of Chemistry**CHEM0003 Chemistry and daily life * (3 credits)**

This general education course is designed as an elective for students in all disciplines and all years without strong chemistry background. It gives an overview of some important chemical aspects that we encounter in our daily life.

Prerequisite Nil (not offered to Chemistry major students)

* *Students who are taking or have taken CHEM1101, CHEM1206, CHEM1502, CHEM1506 or YSCN0011 are not allowed to take CHEM0003.*

CHEM1001 Chemical principles for earth and life sciences * (6 credits)

To provide basic chemical knowledge for the understanding of the involvement of chemistry in processes taking place on earth and in biological systems.

Prerequisite AL or AS Chemistry

* *Students who are taking or have taken any one of the courses CHEM1301, CHEM1401, CHEM1406, CHEM1502 and CHEM1506 cannot take CHEM1001.*

CHEM1206 General and analytical chemistry (6 credits)

To provide basic knowledge of general and analytical chemistry. This course is a pre-requisite for the advanced chemistry courses in the second and third years.

Prerequisite AL or AS Chemistry

CHEM1301 Basic inorganic chemistry * (6 credits)

To provide students with the basic principles and knowledge in inorganic chemistry and to introduce its relevance to biological processes and materials science.

Prerequisite AL Chemistry

* *Students who are taking or have taken any one of the courses CHEM1301, CHEM1406, CHEM1502 and CHEM1506 cannot take CHEM1001.*

CHEM1401 Fundamentals of organic chemistry * (6 credits)

To provide students entering biological, health related or environmental fields with basic knowledge in organic chemistry.

Prerequisite AL or AS Chemistry

* *CHEM1401 and CHEM1406 are mutually exclusive.*

Students who are planning to take CHEM2402 should take CHEM1406.

CHEM1406 Basic organic chemistry * (6 credits)

To educate the student in the terminology, methodology and problem solving skills appropriate to the study of carbon based molecules in both their academic and practical applications.

This course is a pre-requisite for CHEM2402, Intermediate Organic Chemistry.

Prerequisite AL or AS Chemistry

Co-requisite CHEM2507 are preferred

* *CHEM1401 and CHEM1406 are mutually exclusive.*

Students who are taking or have taken any one of the courses CHEM1301, CHEM1406, CHEM1502 and CHEM1506 cannot take CHEM1001.

CHEM1506 Basic physical chemistry * (6 credits)

The object of the course is to provide an understanding of the fundamental concepts in physical chemistry as a basis for study at the intermediate and advanced levels.

Prerequisite AL Chemistry

* *Students who are taking or have taken any one of the courses CHEM1301, CHEM1406, CHEM1502 and CHEM1506 cannot take CHEM1001.*

Students who are taking or have taken CHEM1101, CHEM1502 or CHEM1506 are not allowed to take CHEM0003.

CHEM2002 Instrumental chemical analysis * (6 credits)

To cover the basic principles and applications of chemical instrumentation for biological, geological, and environmental analysis. This course aims to provide a good working knowledge, in addition to the principles, of instruments that are commonly used in a chemical laboratory.

Prerequisite CHEM1001

* *CHEM2002 Instrumental Chemical Analysis is not available to students who are taking or have taken CHEM2202 Chemical Instrumentation.*

CHEM2102 Environmental chemistry (6 credits)

This course introduces students to Environmental Chemistry and enables them to understand the chemical principles involved in various environmental phenomena and processes.

Prerequisite CHEM1001 or CHEM1502 or CHEM1506

CHEM2103 Chemical process industries and analysis (6 credits)

To familiarize with typical chemical industries important in local and global economy. To understand the technology of chemicals manufacturing and chemical processes in general industry.

Prerequisite CHEM1502 or CHEM1506

CHEM2108 Intermediate chemistry project * (6 credits)

This course is designed for second year students who would like to take an early experience on research. It offers students an opportunity to carry out small scale chemical projects by themselves.

Prerequisite CHEM1206, CHEM1301, CHEM1406, CHEM1506 and CHEM2507

* *Exceptional academic strength of the students is required for taking this course.*

CHEM2109 Introduction to materials chemistry (6 credits)

This course provides an introduction to materials chemistry. Some basic material characterization techniques will also be introduced. This course is essential for students who wish to take advanced materials course.

Prerequisite CHEM1301 or CHEM1406

CHEM2202 Chemical instrumentation * (6 credits)

To cover the basic principles and applications of chemical instrumentation. This course aims to provide

a good working knowledge, in addition to the principles, of instruments that are commonly used in a chemical laboratory.

Prerequisite CHEM1001 or CHEM1201 or CHEM1206

* *CHEM2202 Chemical Instrumentation is not available to students who are taking or have taken CHEM2002 Instrumental Chemical Analysis.*

CHEM2207 Food and water analysis (6 credits)

To cover areas in the application of Analytical Chemistry and new analytical technique development with focus on food and water analysis.

Prerequisite CHEM1206, CHEM2002 or CHEM2202

Co-requisite CHEM2002 or CHEM2202

CHEM2302 Intermediate inorganic chemistry (9 credits)

This course aims to provide a more detailed treatment of general inorganic chemistry suited to the needs of those intending to extend their studies in chemistry.

Prerequisite CHEM1301

CHEM2402 Intermediate organic chemistry (9 credits)

This course is a continuation from Basic Organic Chemistry. Together they provide a solid foundation of organic chemistry.

Prerequisite CHEM1406

CHEM2503 Intermediate physical chemistry (9 credits)

This course presents a more detailed treatment of general physical chemistry topics in order to provide a solid foundation for those students intending to extend their studies in chemistry further. This course would stand on its own.

Prerequisite CHEM1502 or CHEM1506

CHEM2507 Principles and applications of spectroscopic techniques (6 credits)

To cover the principles and applications of modern practical spectroscopic techniques.

Prerequisite CHEM1001 or CHEM1206

CHEM2508 Synthetic chemistry (6 credits)

This course provides an introduction to chemical synthesis of organic, inorganic and polymeric materials. Some basic chemical principles for the preparation of small molecules and macromolecules will be introduced. This course is essential for students who wish to have a good understanding in modern synthetic techniques.

Prerequisite CHEM1001 or CHEM1206

CHEM2509 Principles of chemical biology (6 credits)

To understand how to use chemical approaches to emulate biological system to study natural molecules and generate new functional molecules. Useful as an introduction to research in areas of chemical

biology, medicinal chemistry and biotechnology.

Prerequisite CHEM1401 or CHEM1406 or BIOC1001

CHEM3105 Chemistry project * (12 credits)

To provide experience of research techniques by working on a short project under the direct supervision of a member of staff. This course would prepare students for graduate school work in chemistry.

Prerequisite 1) CHEM2202; and 2) CHEM2302; and 3) CHEM2402; and 4) CHEM2503

* *Second year students with exceptional academic achievement may also apply for this course.*

CHEM3106 Symmetry, group theory and applications (6 credits)

To introduce the concepts of symmetry and group theory and to apply them in solving chemical problems. This course also provides an introductory treatment of bonding theories, inorganic electronic and vibrational spectroscopy. This course is essential for students who wish to take advanced courses in inorganic chemistry and all types of spectroscopy.

Prerequisite CHEM2302

CHEM3107 Interfacial science and technology (6 credits)

To understand the science and technology of interfacial phenomena and processes often appeared in high value added products and modern technologies.

Prerequisite CHEM2503

CHEM3110 Advanced materials (6 credits)

This course is a continuation from Introduction to Materials Chemistry. It provides a more comprehensive overview on materials chemistry and application of materials in advanced technology. The most recent development in materials chemistry will also be introduced.

Prerequisite CHEM2109

CHEM3203 Analytical chemistry (9 credits)

To cover the principles and methodologies of Analytical Chemistry and its use in the analysis of gas, liquid and solid samples.

Prerequisite CHEM2202 or CHEM2002

CHEM3204 Modern chemical instrumentation and applications (6 credits)

The aim of the course is to provide an understanding of modern instrumentation, covering both fundamental principles and practical aspects of instrument design. The course will be of particular benefit to those pursuing a higher research degree or a career in technical sales/service.

Prerequisite CHEM2202

CHEM3303 Advanced inorganic chemistry (9 credits)

To give further, more detailed, treatment to topics mentioned in Intermediate Inorganic Chemistry and to develop new areas of interest. The course also aims to prepare students for graduate work in inorganic chemistry.

Prerequisite CHEM2302
Co-requisite CHEM3106

CHEM3304 Organometallic chemistry (6 credits)

To give further, more detailed, treatment to organometallic chemistry mentioned in Intermediate Inorganic Chemistry. The course also aims to introduce and familiarize students with advanced laboratory techniques, and to prepare students for graduate work in inorganic and organometallic chemistry.

Prerequisite CHEM2302

CHEM3403 Integrated Organic synthesis (9 credits)

This course covers aspects of modern synthetic methods, develops the concept of synthetic planning, with relevance and in the context of drug synthesis, medicinal chemistry, and bioorganic chemistry, so as to provide an integrated approach to this subject.

Prerequisite CHEM2402

CHEM3404 Advanced organic chemistry (6 credits)

To provide students with knowledge in organic chemistry reaction mechanisms and organic compound structure determination.

Prerequisite CHEM2402

CHEM3405 Organic chemistry of life (6 credits)

To understand molecules and reactions of life sciences. Useful as an introduction to research in areas of bioorganic chemistry, bioinorganic chemistry, medicinal chemistry, and biotechnology.

Prerequisite CHEM1401 or CHEM2402

CHEM3407 Medicinal chemistry (6 credits)

This course covers the chemical principles of drug design and drug action. Useful as an introduction to research in areas of bioorganic chemistry, bioinorganic chemistry, medicinal chemistry, pharmaceutical chemistry, and biotechnology.

Prerequisite CHEM1401 or CHEM2402

CHEM3504 Advanced physical chemistry (9 credits)

This course covers advanced topics in physical chemistry. It is offered for students majoring in physical chemistry and for students who are interested in postgraduate studies.

Prerequisite CHEM2503

CHEM3505 Molecular spectroscopy (6 credits)

This course provides a unifying treatment of the theories and applications of some important types of spectroscopy. Essential for graduate work in all branches of chemistry.

Prerequisite CHEM2503

Department of Earth Sciences**EASC0001 Earth's past and future * (6 credits)**

This course will provide students with knowledge of the nature and magnitude of change that has occurred in the Earth over a range of temporal and spatial scales. Specifically the course will contrast natural and anthropogenic processes of environmental change.

Prerequisite Nil

* *Not available to Earth Sciences major students.*

EASC0002 Peaceful use of nuclear technologies (3 credits)

To provide students with the basic knowledge on application of nuclear technologies in daily life and to invoke an awareness of current applications of nuclear sciences by case studies.

Prerequisite Nil

EASC0101 Maps, mapping and field geology (6 credits)

This field and class-based course introduces basic field and mapping techniques and the use of geological equipment, and presents an overview of the geology of Hong Kong and vicinity.

Prerequisite Nil

EASC0105 Earth through time (6 credits)

To introduce the concepts of geologic time and Uniformitarianism. To provide an understanding of the fossil record, and the integration of Earth Systems and Plate Tectonics. To gain an appreciation of our place in the Universe, an understanding of the evolution of Earth and life on Earth through time, and interaction between mankind and the geological environment.

Prerequisite Nil

EASC0116 Introduction to physical geology (6 credits)

The course, intended for students taking their first course in earth science, provides a basic overview of the earth's structure, material and internal and external processes.

Prerequisite Nil

EASC0117 Geological heritage of Hong Kong (3 credits)

To give an overview of the geology of Hong Kong, potential geological resources for tourism and the role of geology in the development of Hong Kong's infrastructure.

Prerequisite Nil

EASC1102 Mineralogy (6 credits)

To provide a coverage of mineralogical principles: as a basis for understanding the petrography of igneous, sedimentary and metamorphic rocks.

Prerequisite 1 AL science subject

EASC1103 Geochemistry (6 credits)

To provide an understanding of chemical principles as they are applied to processes occurring on Earth, as a basis for the study of mineralogy, petrology and environmental geology.

Prerequisite 1 AL science subject

EASC1106 Introduction to petrology (6 credits)

To provide an introduction to the principal rock types: igneous, metamorphic and sedimentary, and the relationships between them.

Prerequisite 1 AL science subject, EASC1102

EASC1107 Fluid/solid interactions in the earth (6 credits)

To provide an introduction to Earth processes and particularly to the nature of the properties and interactions of fluids and solids in the Earth system.

Prerequisite 1 AL science subject

EASC2108 Structural geology (6 credits)

The course covers the mechanical properties of rocks and how they are deformed, geological maps and their use in interpreting structure.

Prerequisite EASC0101

Co-requisite EASC0101

EASC2109 Igneous and metamorphic petrology (6 credits)

To provide a comprehensive coverage of the principles and techniques used in the study of igneous and metamorphic rocks and rock-forming processes.

Prerequisite EASC1106

EASC2110 Earth dynamics (6 credits)

To review the concepts and processes that shape the configuration of the Earth, from core to crust.

Prerequisite EASC1106

EASC2112 Earth systems (6 credits)

The presentation of a process-oriented, integrated global approach to the study of the whole earth system and Man's place within it, with particular attention to the linkages and interactions between its parts (the geospheres).

Prerequisite All level 1 Earth Sciences core course

EASC2113 Sedimentology (6 credits)

The course deals with sedimentary rocks and processes, and facies models pertaining to various depositional environments.

Prerequisite 1) EASC1106; and 2) EASC0105

EASC2201 Hydrogeology (6 credits)

To study the role of ground water in subsurface geological process and its environmental and geotechnical importance.

Prerequisite EASC0116 or EASC1107

EASC2301 Field camps (6 credits)

The aims of a geological field camp are to provide 1) essential training and experience in geological mapping techniques and 2) opportunities to study at first-hand areas of particular geological interest and importance, especially outside Hong Kong.

Prerequisite Students must have completed at least 42 credits of Earth Sciences courses at the time of taking the second year camp.

EASC2306 Intermediate earth sciences project (6 credits)

This course is designed for second year students who would have an early introduction to Earth Sciences research. It provides students with the opportunity to do a small Earth Sciences project by themselves, either field or laboratory based. These projects are of a research nature and usually without lectures.

Prerequisite Passes in all Earth Sciences first year subjects

Co-requisite GPA > 3

EASC3114 Earth resources and environments (6 credits)

To study the range of earth materials that are commercial and exploitable, and the processes that lead to their formation. To consider economic, political and environmental aspects of mineral exploitation.

Prerequisite EASC2109

Co-requisite EASC2109

EASC3115 Regional geology and tectonics (6 credits)

To cover the tectonic evolution of mainland East Asia and SE Asia, with a specific focus on the geology of Hong Kong.

Prerequisite EASC2110

EASC3202 Soil and rock mechanics (6 credits)

To provide a basic knowledge of soil and rock mechanics for those wishing to consider further studies on a career in engineering geology/geotechnics.

Prerequisite EASC2201

EASC3203 Engineering geology (6 credits)

Introduction to the applications of geological data, techniques and principles to the study of natural materials (rock, soil and subsurface fluids), and the features and processes affecting the planning of land-use, and the planning, design, construction, operation and maintenance of engineering structures.

Prerequisite EASC2201

Co-requisite EASC3202

EASC3302 Advanced topics in geosciences (6 credits)

To provide students with insights into current issues in geosciences, and options to specialize in particular subject areas.

Prerequisite Students must have completed at least 36 credits of advanced Earth Sciences courses.

EASC3304 Applied geosciences (6 credits)

To provide students with insights in the applied fields of geosciences and allow students to acquire technical skills and training in particular field and instrumental techniques in geology, geophysics, and geochemistry.

Prerequisite Students must have completed at least 36 credits of advanced Earth Sciences courses.

EASC3305 Geology project (6 credits)

The course is intended to provide individual students with experience of geological research by working on a project under the supervision of a member of staff.

Prerequisite Students must have a B average in at least 36 credits of advanced Earth Sciences courses.

Department of Ecology & Biodiversity**ECOL0020 Ecology of Hong Kong (3 credits)**

This course covers the ecology and biodiversity of terrestrial, marine and freshwater environments in Hong Kong

Prerequisite Nil

ECOL0036 Origins of life and astrobiology (3 credits)

To consider the origins of life on Earth, what makes a planet habitable and the influence of early life forms on Earth's biosphere. To critically review evidence for the existence of other habitable planets and the concept that life can be transported across inter-planetary distances. To examine the challenges that face mankind if he is to consider life in space or on other planets.

Prerequisite Nil

ECOL0040 Ecology and evolution (3 credits)

This course provides an introduction to how the ecology and behaviour of animals has been shaped by evolution, and demonstrates how we can understand and explain the significance of what we see in nature. The **course objectives** are as follows:

- To explain how the environment affects organisms in terms of their present-day ecology (determining where they live and how many can survive there) and, through natural selection acting over past generations, influences their form and adaptations.
- To introduce the basic principles of ecology and evolution, showing how they are linked to the environment by the phenomenon of adaptation.
- To describe the patterns of interactions among individuals (e.g. mating systems and reproduction, social behaviour, competition, and predation), and explain some of the simple principles that under their occurrence and evolution.

To introduce the concept of biodiversity, how it is generated by adaptive radiation, how it is estimated,

and its importance to humans.

Prerequisite Nil

ECOL0041 Evolutionary diversity (6 credits)

To provide students with an introduction to the diversity of plant and animal life. Recent research has resulted in fundamental changes in our understanding of evolutionary history (phylogeny). Current evolutionary trees will be used as the basis for a survey of different groups in phylogenetic sequence, and for understanding how structures, processes and behaviours have changed through time.

Prerequisite Nil

ECOL0042 Ecology field course (3 credits)

This 5-day residential field course, including lectures and briefing sessions, provides students with an opportunity to visit a variety of habitats in Hong Kong, and to observe directly the main environmental factors that prevail in each of them. Emphasis will be placed on guiding students to become familiar with common local plants and animals and their habitats.

Prerequisite Nil

ECOL0043 Tropical mycology * (3 credits)

The course will provide a “hands” on approach to studying tropical fungi. It will deal with many aspects of tropical fungi, but in particular their biodiversity and taxonomy.

Prerequisite Nil

* *Offered in summer.*

Students who have taken ECOL2015 Fungal Diversity are not allowed to take this course.

ECOL2004 Environmental microbiology (6 credits)

To familiarize students with the role of microorganisms in natural processes which affect our environment such as the recycling of chemical elements, and the ways in which they carry out biodegradation of environmentally important pollutants. Key concepts are illustrated with local case studies and practical classes.

Prerequisite BIOL1119

ECOL2005 Fish biology (6 credits)

To acquaint students with the principles governing interrelationships among fishes as well as with the biotic and abiotic aspects of their environment thereby to provide an understanding of the factors determining species population dynamics and multispecies interactions. Special emphasis will be placed on coral reef assemblages with an introduction to local reef fishes.

Prerequisite BIOL1121 or ECOL0040 or ECOL0041

ECOL2006 Biometrics (6 credits)

To introduce students to experimental design and statistical data analysis at an elementary to intermediate level, with an emphasis on practical applications of statistical methods to experimental and observational data in biology and ecology. A range of topics will be addressed, particularly those involving descriptions of populations and communities, biodiversity, ecophysiology and ecological impacts associated with pollution. To illustrate each statistical method, examples will be drawn from

real cases, with consideration of the biological or ecological background of the problem and appropriate experimental design, statistical analysis and interpretation. Use will be made of statistical software such as SPSS, SAS and PRIMER for statistical computing. SPSS is powerful and easy to use, and available on HKU networked computers. Computer laboratories will be organised to familiarise students with statistical computation using the software.

Prerequisite ECOL0040

ECOL2007 Molecular ecology (6 credits)

To familiarize students with the molecular aspects of evolution, populations and conservation. To review case studies where molecular data has solved ecological questions. To provide students with practical training in molecular techniques useful in ecology and environmental science.

Prerequisite BIOL1103 or ECOL1103 or ECOL0035 or BIOL1106 or ECOL0041

ECOL2011 Biological oceanography (6 credits)

This course provides an introduction to the physical, chemical, geological and biological processes that occur in oceans. The emphasis is on how the biological components interact with each other and with their environment by considering various marine ecosystems. Specific examples from South East Asia, the South China Sea and Hong Kong will be included.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1103 or ECOL1103 or ECOL0035 or EASC0105. The course may also be of interest to students studying CHEM2102.

ECOL2013 Systematics & phylogenetics (6 credits)

To give students an understanding of the principles of systematics and phylogenetics and an appreciation of current trends and controversies. Systematics forms an invaluable grounding for many fields of biology (including anatomy, ecology, population biology and evolutionary biology), and enables the integration of a wide range of techniques (including anatomy, biochemistry, chemistry, molecular biology, cytology, palaeontology and ethology).

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or ECOL0041

ECOL2014 Conservation biology (6 credits)

To introduce students to the theory and practice of biological conservation.

Prerequisite BIOL1101 or BIOL1121 or ECOL0038 or BIOL1103 or ECOL1103 or ECOL0035 or ECOL0041

ECOL2015 Fungal diversity * (3 credits)

To study the spectacular diversity of fungi and their roles in the environment. Fungi are extremely important in most of earth's processes and have developed interesting adaptations and forms. This course will examine the diversity and forms that fungi have taken and explore some of their unique roles in our environment.

Prerequisite BIOL1119

* *Students who have taken ECOL2039 Tropical Mycology are not allowed to take this course.*

ECOL2016 Environmental toxicology (6 credits)

To introduce students to the basic principles of environmental and ecological toxicology. Specific cases

from the current literature will be used and analyzed. Emphasis will be on aquatic ecosystems.

Prerequisite BIOL1103 or ECOL1103 or ECOL0035 or ECOL2004 or CHEM1001

ECOL2023 Freshwater ecology (6 credits)

Introduce, illustrate and explain the physical and biological processes that occur in drainage basins, their importance to human populations and biodiversity, and the impacts and management of freshwater resources subject to multiple uses. Examples from the Mekong River Basin and/or Hong Kong to human dependence on freshwater ecosystems and the important role that they play in sustaining livelihoods in Asia.

Prerequisite ECOL0020, ECOL0040 and ECOL0041 are preferred

ECOL2024 Plant structure and evolution (3 credits)

To survey the form and function of vascular plant body, with particular emphasis on the evolutionary significance of various structures. This forms a basis for understanding plant physiology, ecology, systematics and phylogeny.

Prerequisite BIOL1101 or ECOL0038 or ECOL0041

ECOL2028 Coastal ecology (6 credits)

To examine the communities of coastal systems: their distribution, composition and the factors which regulate them. This course will examine, using an experimental approach, patterns exhibited by a range of shores and the deterministic and stochastic processes that create and sustain them. Hong Kong shores will be used as examples but comparisons will be drawn from the coastlines of the world.

Prerequisite ECOL2006 or ECOL0040 or ECOL0041 are preferred

ECOL2029 How humans evolved (6 credits)

This course describes the origins of modern humans through evolution by natural selection. Major topics include tracing our evolution by means of the fossil record; our relationship to monkeys, apes and other primates; and, the main ecological and cultural transformations of our species over time. In short, this course answers the question: **where did we come from?** Emphasis is placed on ultimate causes: why have we evolved to become what we are today? And, what has driven human evolution?

Prerequisite ECOL0040 or ECOL0041

ECOL2032 Terrestrial ecology (6 credits)

To enable motivated students to acquire the knowledge and skills needed to solve real problems in terrestrial ecology.

Prerequisite ECOL0020, ECOL0040 and ECOL0042

ECOL2044 Extremophiles * (3 credits)

To consider advanced aspects of the following: a) The biodiversity and ecology of extant prokaryotes and eukaryotes in extreme habitats; b) Stress responses to extreme conditions at the cellular level; c) Prokaryotic extremophiles as analogues for early life; d) The application of extremophiles in astrobiology and biotechnology.

Prerequisite BIOC1001 or BIOL1119

* Offered from 2007-2008.

ECOL3018 Fisheries and mariculture (6 credits)

Theoretical and practical aspects of marine fisheries and mariculture will be covered to provide an understanding of the condition of global and local fishery resources as well as the importance of biological and ecological studies to their management. The role of mariculture in global fish supply will be examined and local fishery and mariculture examples provided.

Prerequisite ECOL2005

ECOL3019 Ecology & biodiversity project (12 credits)

Under the supervision of a member of staff, to plan, design and undertake a research project and then present and write up this project in a formal style.

Prerequisite Requires good performance in level 2 courses, and ECOL2006

ECOL3025 Ecology & biodiversity dissertation * (6 credits)

Students will undertake a dissertation on a topic related to the field of ecology and biodiversity. Conducting a dissertation is an independent learning experience and will enable students to develop skills including the use of library and Web-based resources; the logical development of scientific arguments; written presentation skills; and, personal time management.

Prerequisite Appropriate academic background

* *This course is also available to Year 2 students with an exceptional academic record in Year 1 courses. Students having taken this course in Year 2 can take ECOL3019 Ecology & Biodiversity Project as a follow-up course in their third year.*

ECOL3027 Environmental impact assessment (6 credits)

To familiarise students with the principles of Environmental Impact Assessment (EIA), and to examine current pollution problems and their management in Hong Kong. This course is designed to prepare students who are interested in future employment in the environmental sector. Management strategies for pollution monitoring and control will be discussed with special reference to Hong Kong case studies. This course will describe the EIA process in Hong Kong, which will be compared with approaches used in China, the United States and Europe.

Prerequisite ECOL0020, ECOL0040 and ECOL0042

ECOL3030 Environmental remediation (3 credits)

To introduce the standard parameters in environmental monitoring, the scientific meaning and the practical monitoring techniques used. The focus of the course will be both the field and laboratory analysis, and implement of the monitoring. Local example will be used to illustrate the power of environmental monitoring and identification of the source of pollution.

Prerequisite BIOL1103 or ECOL1103 or ECOL0035 or ECOL2004

ECOL3033 Biogeography * (3 credits)

Two distinct approaches to biogeography (the study of the geographical distributions of organisms) are generally recognized, based on differences in scale: *ecological biogeography* emphasizes the effect of ecological processes on geographical distributions over short periods of time; whereas *historical biogeography* relates to processes that occur over long periods of time (e.g., evolution, plate tectonics).

Historical biogeography is a rapidly developing field, with many fundamental theories having been proposed in the past 10–15 years. This course aims to explain the diverse approaches to the field, and how they can be applied in comparative biology.

Prerequisite ECOL2013

* *Not offered in 2006-2007.*

ECOL3034 Environmental monitoring and remediation techniques * (6 credits)

To introduce the standard parameters in environmental monitoring, and the scientific basis of practical monitoring techniques. The focus of the course will be on both the analysis and application of new environmental technology. Local examples will be used to illustrate the power of environmental monitoring and identification of pollution sources, as well as the success of implementation of treatment techniques.

Prerequisite ECOL2004 or ECOL2016

* *Not offered in 2006-2007.*

Department of Mathematics

MATH0011 Numbers and patterns in nature and life (3 credits)

To explore the underlying mathematical structure in various topics in life and environmental sciences. Students from all disciplines will gain appreciation of mathematics as a potent tool for investigating and understanding nature and life.

Prerequisite HKCEE Mathematics

MATH0801 Basic mathematics I (6 credits)

To provide students with a basic background of calculus that can be applied in various disciplines, aiming at students not having done much mathematics beyond HKCEE mathematics. It can be followed by MATH0802 / MATH1803 or MATH1811 / MATH1812.

Prerequisite HKCEE Mathematics (HKCEE Additional Mathematics or AS Mathematics and Statistics or Mathematics at higher level not allowed; Mathematics students (MATH, MAEF, CMOR & MAPH) are not allowed to take this course unless prior approval has been obtained from the Department for special reasons. Students who have taken any one of the following: MATH1101, MATH1102, MATH1201, MATH1202 and MATH1803 are not allowed to take this course.)

MATH0802 Basic mathematics II (6 credits)

To provide students with a more solid background of calculus of one and several variables and of matrices that can be applied in various disciplines, aiming at students having taken an elementary calculus course. It can be followed by MATH1803.

Prerequisite HKCEE Additional Mathematics or AS Mathematics and Statistics or MATH0801 or MATH0803 or MATH0805 (AL Mathematics not allowed; Mathematics students (MATH, MAEF, CMOR & MAPH) are not allowed to take this course unless prior approval has been obtained from the Department for special reasons. Students who have taken any one of the following: MATH1101, MATH1102, MATH1201, MATH1202 and MATH1803 are not allowed to take this course.)

MATH1001 Fundamental concepts of mathematics (6 credits)

To provide students with solid background on basic concepts of mathematics and methods of

mathematical proofs. Such basic concepts and methods are important for subsequent studies in all higher level courses in mathematics. This course can be followed by (or taken concurrently with) Calculus I/II, Linear algebra I/II and other more advanced courses.

Prerequisite HKCEE Additional Mathematics or AS Mathematics and Statistics or equivalent. Students with good grades in HKCEE Mathematics and have strong interests in mathematics may also apply.

MATH1101 Linear algebra I (6 credits)

The course is a foundation course for all Mathematics students. It can be followed by Linear Algebra II and other more advanced courses in mathematics.

Prerequisite AL Pure Mathematics

MATH1102 Linear algebra II (6 credits)

The course is a foundation course for all Mathematics students. It can be followed by other more advanced courses in mathematics.

Prerequisite AL Pure Mathematics and having taken MATH1101

MATH1201 Calculus I (6 credits)

This course is a foundation course for all Mathematics students. Students of the course will learn the theory of single-variable calculus in a rather rigorous manner, and learn how to apply the theory to solve practical problems. This course can be followed by Calculus II and other more advanced courses in mathematics.

Prerequisite AL Pure Mathematics

MATH1202 Calculus II (6 credits)

This is a foundation course for all Mathematics students. Students of the course will learn the theory of several-variable calculus in a rather rigorous manner, and learn how to apply the theory to solve practical problems. This course can be followed by other more advanced courses in mathematics.

Prerequisite AL Pure Mathematics and having taken MATH1201

MATH1803 Basic mathematics III (6 credits)

To provide students with a background of calculus of several variables and linear algebra that can be applied in various disciplines.

Prerequisite AL Pure Mathematics or MATH0802 or MATH0804 or MATH0806 or MATH0808 (Mathematics students (MATH, MAEF, CMOR & MAPH) and students who are taking or have taken MATH1813 are not allowed to take this course unless prior approval has been obtained from the Department for special reasons)

MATH1811 Mathematics I (6 credits)

To provide students with the essential knowledge of linear algebra and vector calculus for further studies in the physical sciences. It is intended that the course will be followed by MATH1812.

Prerequisite AS Mathematics and Statistics, or Mathematics at higher level (Mathematics students (MATH, MAEF, CMOR & MAPH) are not allowed to take this course unless prior approval has been obtained from the Department for special reasons)

MATH1812 Mathematics II (6 credits)

To provide students with the essential knowledge of linear algebra and vector calculus for further studies in the physical sciences.

Prerequisite AS Mathematics and Statistics, or Mathematics at higher level) and having taken MATH1811 or MATH1801 (Mathematics students (MATH, MAEF, CMOR & MAPH) are not allowed to take this course unless prior approval has been obtained from the Department for special reasons)

MATH1813 Mathematics methods for actuarial science (6 credits)

To provide students with a background of calculus of several variables and linear algebra that can be applied in actuarial science.

Prerequisite AL Pure Mathematics or equivalent. Mathematics students (MATH, MAEF, CMOR and MAPH) and students who are taking or have taken MATH1803 are not allowed to take this course unless prior approval has been obtained from the Department of Mathematics.

MATH2000 Intermediate mathematics project (6 credits)

This course is designed for student who would like to take an early experience on independent study. It provides the student with the opportunity to do a small mathematics project close to research in nature independently.

Prerequisite MATH1101, MATH1102, MATH1201, MATH1202

Co-requisite MATH2301 and MATH2401

MATH2001 Development of mathematical ideas * (6 credits)

- (1) To acquaint the students with the origin and growth of basic mathematical concepts.
- (2) To assist the students to gain a deeper insight and broader view of mathematics as a discipline and human endeavour.
- (3) To provide the students with an opportunity to write on and talk about mathematics, and to engage in independent study.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202

* *Not offered in 2006-2007.*

MATH2301 Algebra I (6 credits)

This course aims to present those fundamental topics and techniques of algebra that are finding wide applications in mathematics and the applied sciences. It is complete in itself, and may also be followed by Algebra II and Topics in Applied Discrete Mathematics.

Prerequisite 1) (Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1102); or 2) (MATH1811/MATH1812 or MATH1803); or 3) (MATH1801/MATH1802 or MATH1807)

MATH2303 Matrix theory and its applications (6 credits)

Matrix theory has a close connection with other mathematical subjects such as linear algebra, functional analysis, and combinatorics. It also plays an important role in the development of many subjects in

science, engineering, and social sciences. In this course, students will be taught the fundamentals of matrix analysis and its application to various kinds of practical problems. Mathematical software will be used in the course, so that students can learn how to use the computer to solve matrix problems.

Prerequisite 1) (MATH1101 and MATH1102); or 2) (MATH1811/MATH1812 or MATH1803); or 3) (MATH1801/MATH1802 or MATH1807)

MATH2304 Introduction to number theory (6 credits)

This course introduces students to the basic knowledge and techniques in number theory. It is hoped that it will stimulate interested students to delve into the rich literature associated with this historically important subject of mathematics.

Prerequisite MATH1101 and MATH1201

Co-requisite MATH2301

MATH2401 Analysis I (6 credits)

This course extends to more general situations some of the results covered in the first year Mathematics courses, and introduces some further basic concepts which are essential for more advanced studies in mathematical analysis.

Prerequisite 1) (MATH1201 and MATH1202); or 2) (MATH1811/MATH1812 or MATH1803); or 3) (MATH1801/MATH1802 or MATH1807)

MATH2402 Analysis II (6 credits)

This course gives a modern treatment of calculus in several variables which is essential for more advanced studies in analysis.

Prerequisite 1) (MATH1201 and MATH1202) and (MATH1101 or MATH1102); or 2) (MATH1811/MATH1812 or MATH1803); or 3) (MATH1801/MATH1802 or MATH1807)

MATH2403 Functions of a complex variable (6 credits)

This course is indispensable for studies in higher mathematical analysis and the more theoretical aspects of physics. In this course, the students are introduced to the fundamental concepts and properties of analytic functions and are shown how to look at analyticity from different points of view. At the same time, the techniques of solving problems without losing sight of the geometric picture are emphasized.

Prerequisite 1) (Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1201 or MATH1202); or 2) (MATH1811/MATH1812 or MATH1803); or 3) (MATH1801/MATH1802 or MATH1807)

MATH2405 Differential equations (6 credits)

The standard topics in the wide field of differential equations included in this course are of importance to students of mathematics and physical sciences as well. Our emphasis is on principles rather than routine calculations and our approach is a compromise between diversity and depth.

Prerequisite 1) (Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1201 or MATH1202); or 2) (MATH1811/MATH1812 or MATH1803); or 3) (MATH1801/MATH1802 or MATH1807)

MATH2601 Numerical analysis (6 credits)

This course covers both the theoretical and practical aspects of Numerical Analysis. Emphasis will be on basic principles and practical methods of solution, using high speed computers.

Prerequisite 1) (Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1201 or MATH1202) or (MATH1811/MATH1812 or MATH1803) or (MATH1801/MATH1802 or MATH1807); and 2) Knowledge of a programming language

MATH2603 Probability theory * (6 credits)

The emphasis of this course will be on probability models and their applications. The primary aim is to elucidate the fundamental principles of probability theory through examples and to develop the ability of the students to apply what they have learned from this course to widely divergent concrete problems.

Prerequisite 1) MATH1201 and MATH1202; or 2) MATH1811 and MATH1812; or 3) MATH1803; or 4) MATH0801 and MATH0802

* *Students taking or having taken STAT0103 or STAT2303 are not allowed to take this course.*

MATH2901 Operations research I (6 credits)

The objective is to provide a fundamental account of the basic results and techniques of Linear Programming and its related topics in Operations Research. There is an equal emphasis on all three aspects of understanding, algorithms and applications. The course serves, together with a course on network models, as essential concept and background for more advanced studies in Operations Research.

Prerequisite Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1101 or MATH1102

MATH2904 Introduction to optimization (6 credits)

This course introduces students to the theory and techniques of optimization, aiming at preparing them for further studies in Operations Research, Mathematical Economics and related subject areas.

Prerequisite (MATH1101 or MATH1102) and (MATH1201 or MATH1202)

MATH2905 Queueing theory and simulation (6 credits)

This course introduces students to the models and theory of queueing system, as well as the technique of simulation as a practical tool of analysis.

Prerequisite STAT1007 and (MATH1101 or MATH1102) and (MATH1201 or MATH1202)

Co-requisite MATH2603 or its equivalent

MATH2906 Financial calculus (6 credits)

This course gives an elementary treatment of the modeling of financial derivatives, asset pricing and market risks from an applied mathematician's viewpoint. Stochastic calculus and numerical methods will be introduced.

Prerequisite STAT1007 and (MATH1101 or MATH1102) and (MATH1201 or MATH1202)

Co-requisite MATH2603 or its equivalent

MATH2907 Numerical methods for financial calculus * (6 credits)

This course is aimed at providing effective numerical methods as well as their theoretical aspect for

solving problems arisen from financial derivatives and asset pricing.

Prerequisite (MATH1101 or MATH1102) and (MATH1201 or MATH1202)

Co-requisite MATH2603 and MATH2906 or their equivalent

* *Not offered in 2006-2007.*

MATH3000 Mathematics project (6 credits)

The object is to provide a student with an opportunity to formulate and investigate, in depth, a problem of practical interest and/or have a foretaste of mathematical research. The work, to be done on an individual basis, is considered a highly desirable part of the training of a mathematician.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202 and MATH2301 and MATH2401

MATH3302 Algebra II (6 credits)

This course is an extension of Algebra I and goes deeper into the various topics treated in that course. Together, the two courses are complete in themselves, and may be followed by Topics in Algebra and Topics in Applied Discrete Mathematics.

Prerequisite MATH2301

MATH3404 Functional analysis (6 credits)

This course introduces students to the basic knowledge of linear functional analysis, an important branch of modern analysis.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202 and MATH2401

MATH3406 Introduction to partial differential equations * (6 credits)

This course introduces students to the basic techniques for solving partial differential equations as well as the underlying theories.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202 and MATH2401

Co-requisite MATH2405

* *Not offered in 2006-2007.*

MATH3501 Geometry (6 credits)

As geometric forms often appear in nature, the study of geometry helps us to understand better the universe in which we live. Moreover, geometry has much intrinsic beauty and the study of it is an excellent training in intuitive thinking. In this course we study the differential geometry of curves and surfaces in 3-space. In the study of regular surfaces in 3-space we exhibit geometric notions that are definable in terms of metrical properties of these surfaces alone, leading to the intrinsic geometry of surfaces.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202 and MATH2401

MATH3502 Geometric topology (6 credits)

This course gives a geometric introduction to some of the methods of algebraic topology. The emphasis throughout will be on the geometric motivations and applications of the theory.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202 and MATH2301 and MATH2401

MATH3602 Scientific computing * (6 credits)

This course introduces mathematical theories and computational techniques for solving various kinds of matrix computation problems that are often encountered in scientific or industrial applications.

Prerequisite MATH1101 and MATH1102 and MATH1201 and MATH1202

Co-requisite MATH2601

* *Not offered in 2006-2007.*

MATH3610 Topics in applied discrete mathematics (6 credits)

To provide students with the opportunity to study some further topics in applied discrete mathematics.

Prerequisite MATH1800 and MATH2301

MATH3902 Operations research II * (6 credits)

The objective is to provide a fundamental account of the basic results and techniques of Integer Programming (IP), Dynamic Programming (DP) and Markov Decision Processes (MDP) in Operations Research. There is emphasis on aspects of algorithms as well as applications. The course serves, together with courses on linear programming and network models, to provide essential optimization concept and algorithms for more advanced studies in Operations Research.

Prerequisite Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1101 or MATH1102

Co-requisite MATH2901

* *Not offered in 2006-2007.*

MATH3903 Network models in operations research (6 credits)

The objective is to provide a fundamental account of the basic results and techniques of network models in Operations Research. There is an equal emphasis on all three aspects of understanding, algorithms and applications. The course serves, together with a course on linear programming, to provide essential concept and background for more advanced studies in Operations Research.

Prerequisite Two out of MATH1101, MATH1102, MATH1201, MATH1202, one of which should be MATH1101 or MATH1102

Co-requisite MATH2901

MATH3910 Topics in mathematical programming & optimization * (6 credits)

A study in greater depth of some special topics in mathematical programming or optimization. It is mainly intended for students in Operations Research or related subject areas.

Prerequisite MATH2901 and MATH2904

* *Not offered in 2006-2007.*

Department of Pharmacology**PHAR3001 Clinical pharmacology I (3 credits)**

This course presents the fundamental principles in pharmacology and relevant knowledge pertaining to drugs in common use. It will provide an understanding of pharmacokinetics and pharmacodynamics which is essential for administering and managing drug therapy. The therapeutic effects and

mechanisms of action of the drugs most frequently prescribed will be covered.

Prerequisite Preferably CHEM3405 and CHEM3407

Co-requisite Preferably CHEM3405 and CHEM3407

PHAR3002 Clinical pharmacology II (3 credits)

This course presents the fundamental principles in pharmacology and relevant knowledge pertaining to drugs in common use. It will provide an understanding of pharmacokinetics and pharmacodynamics which is essential for administering and managing drug therapy. The therapeutic effects and mechanisms of action of the drugs most frequently prescribed will be covered.

Prerequisite Preferably CHEM3405 and CHEM3407

Co-requisite Preferably CHEM3405 and CHEM3407

Department of Physics

PHYS0001 Nature of the universe I: introduction to observational astronomy and the solar system * (3 credits)

This general education course is designed as an elective for students in all disciplines and all years. No prior knowledge in astronomy, physics, and higher mathematics is required.

Prerequisite Nil

* *Not available to those who have taken YSCN0009 unless approved by course coordinator.*

PHYS0002 Nature of the universe II: stars, galaxies and cosmology for beginners (3 credits)

This general education course is designed as an elective for students in all disciplines and all years. It focuses on the theoretical aspect of astronomy. No prior knowledge in astronomy, physics, or higher mathematics is required.

Prerequisite Nil

PHYS0114 Fundamental physics I * (6 credits)

This course, together with *Fundamental Physics II*, aims at providing students who are interested in physics, or taking a minor option in physics, a first course in general physics. It covers the essential knowledge of physics on various topics. Students who have taken the course can have a smooth link-up with other courses offered in the Physics Department.

Prerequisite HKCEE Physics/Engineering Science (students with AL/AS Physics or AL Engineering Science should first obtain approval from the course selection advisor)

* *Not available to those who have taken or are concurrently taking PHYS1111, PHYS1112, PHYS1113, or PHYS1314 unless approved by course selection advisor.*

Not available to students who have taken HKU-SPACE course College Physics I.

PHYS0115 Fundamental physics II * (6 credits)

This course, together with *Fundamental Physics I*, aims at providing students who are interested in physics, or taking a minor option in physics, a first course in general physics. It covers the essential knowledge of physics various topics. Students who have taken the course can have a smooth link-up with other courses offered in the Physics Department.

Prerequisite HKCEE Physics/Engineering Science (students with AL/AS Physics or AL Engineering Science should obtain first approval from the course selection advisor)

* *Not available to those who have taken or are concurrently taking PHYS1111, PHYS1112, PHYS1113, or PHYS1314 unless approved by course selection advisor.*

Not available to students who have taken HKU-SPACE course College Physics II.

PHYS0601 God, the big bang and Stephen Hawking I (3 credits)

This course, named after a recently published book by David Wilkinson, is for both science and non-science students to recognize the absence of any real conflict between science and religion. This course (part I) deals with religion and its interactions with cosmology.

Prerequisite Nil

PHYS0602 Science or fiction? * (3 credits)

The course is designed as an exploration of the various way in which science, particularly physics, has been used in the creation of the literary genre known as science fiction. One of its main purposes is to provide students with experience in expressing their ideas and opinions in written and spoken form and in developing their analytical and creative powers.

Prerequisite Nil

* *Not offered in 2006-2007.*

PHYS0603 Art & physics * (3 credits)

The course is aimed at artistically inclined students who would like to know more about the New Physics, scientifically inclined students who would like to have a framework to appreciate Art, and anyone who is fascinated by both.

Prerequisite Nil

* *Not offered in 2006-2007.*

PHYS0605 Nuclear energy and the environment * (3 credits)

To introduce the use of nuclear power and its impact to our environment; and to arouse an awareness of the safety use of nuclear energy.

Prerequisite Nil

* *Not offered in 2006-2007.*

PHYS0607 Revealing the magic in everyday life * (3 credits)

The course is designed for students who are curious about science in daily life. Students taking this course should have basic training in physics in the certificate level. The course covers the working principles and mechanisms of the things and phenomena around us. Logical thinking and appreciation of science are emphasized with mathematics kept at a minimum. Students are trained to develop scientific intuition and to appreciate that many things in everyday life are not purely magical but can also be predictable.

Prerequisite HKCEE Physics

* *Not available to students who have taken YSCN0018 or the HKU-SPACE course "The Science of Everyday Life".*

PHYS0608 Kitchen science: kitchen mysteries revealed (3 credits)

The course aims to develop students' critical thinking skills and broaden their basic science knowledge by exploring the science behind the common daily life activity of cooking. Basic physical and chemical concepts necessary to understand food preparation, as illustrated by recipes from cuisines from different

regions, will be introduced.

Prerequisite Nil

PHYS0610 Weather Today (3 credits)

To introduce the phenomena and mechanisms of the atmosphere, including typhoons, tornadoes, El Nino and La Nina. This course is designed to be an elementary introduction of weather and climate. It is suitable for any students with interest in the subject.

Prerequisite Nil

PHYS0611 Magic of Flight (3 credits)

The course aims to provide introduction of the basic principles of flight and encourage integration of knowledge from different disciplines by comparing the biological and technological achievements of flight.

Prerequisite Nil

PHYS1111 Introduction to mechanics * (6 credits)

This course aims at providing students a solid foundation in Newtonian mechanics with the treatment of calculus. Students are expected to have basic knowledge of calculus and vectors.

Prerequisite 1) HKCEE Additional Mathematics or AS Mathematics & Statistics or AL Pure Mathematics; and 2) AL/AS Physics or Engineering Science

* *Not available to those who have passed PHYS0111 or PHYS1312 unless approved by course coordinator.*

PHYS1112 Electricity and magnetism * (6 credits)

This course aims at introducing the basic physics of electromagnetism.

Prerequisite 1) HKCEE Additional Mathematics or AS Mathematics & Statistics or AL Pure Mathematics; and 2) AL/AS Physics or Engineering Science

* *Not available to those who have passed PHYS0111 or PHYS1312 unless approved by course coordinator.*

PHYS1113 Heat, light and waves * (6 credits)

To appreciate the underlying physical principles of heat, thermodynamics, waves and related physics. This course is designed to prepare the students with basic knowledge for the more advanced courses in the department.

Prerequisite 1) HKCEE Additional Mathematics or AS Mathematics & Statistics or AL Pure Mathematics; and 2) AL/AS Physics or Engineering Science

* *Not available to those who have passed PHYS0111 or PHYS1312 unless approved by course coordinator.*

PHYS1303 Special relativity I (3 credits)

This course is designed as an elective for students in all disciplines and all years with science background.

Prerequisite 1) AL/AS Physics or Engineering Science; and 2) AL Pure Mathematics or AS Mathematics & Statistics or (MATH1811 and MATH1812)

PHYS1314 Modern physics (6 credits)

This course is designed to provide students with a comprehensive introduction to the concepts and ideas that form the basis of “modern physics” - a term used to describe the revolutionary developments that took place in physics during the 20th-century and are continuing today.

Prerequisite 1) HKCEE Additional Mathematics or AS Mathematics & Statistics or AL Pure Mathematics; and 2) AL/AS Physics or Engineering Science

PHYS1315 Methods in physics I * (6 credits)

This course provides students with experience in using mathematical tools and techniques to solve problems in physics. It is complete in itself, or may also be followed by Methods in Physics II.

Prerequisite AL Pure Mathematics or AS Mathematics & Statistics or HKCEE Additional Mathematics

* *Not available to students who have taken / are taking MATH1811 or MATH1812 unless approved by course coordinator.*

PHYS1316 Methods in physics II * (6 credits)

This course provides students with experience in using mathematical tools and techniques to solve problems in physics. It is complete in itself, or may also be taken after Methods in Physics I.

Prerequisite AL Pure Mathematics or AS Mathematics & Statistics or HKCEE Additional Mathematics

* *Not available to students who have taken / are taking MATH1811 or MATH1812 unless approved by course coordinator.*

PHYS1411 Introductory experimental physics * (6 credits)

An experimental course designed to provide students with experience in laboratory techniques and instrumentations.

Prerequisite AL/AS Physics or AL Engineering Science

* *Not available to those who have taken PHYS0411 unless approved by course coordinator.*

PHYS1412 Electronics (6 credits)

This course is designed to provide students with a broad knowledge of the theoretical background and experimental application of modern electronic devices and circuitry.

Prerequisite AL/AS Physics or AL Engineering Science

PHYS2021 The physical universe (6 credits)

To appreciate the underlying physical principles of astronomy. This course is designed as an elective for second or third year students with some basic science knowledge.

Prerequisite PHYS0001 or YSCN0009

PHYS2022 Observational astronomy (6 credits)

To introduce the students to the techniques and methods of contemporary astronomy, with emphasis on

the data reduction and analysis.

Prerequisite Any 1st year science or engineering course

PHYS2023 Stellar physics (6 credits)

This course introduces the basic theory of stellar structure and evolution. It follows a mathematical treatment that stress on the underlying physical processes. This course is calculus-based. A good background in first year level classical mechanics and electromagnetism is recommended.

Prerequisite PHYS1111 or PHYS1314

PHYS2024 Introduction to cosmology (6 credits)

The aim of the course is to offer an introduction to the key ideas in observational and theoretical cosmology, to familiarize students with the main observational results on which modern cosmology is based and to introduce, at an elementary level, the basic physical principles used to model the evolution and dynamics of the universe from the big bang to the present epoch.

Prerequisite PHYS1111 or PHYS1314

PHYS2221 Introductory solid state physics (6 credits)

To provides a broad introduction to modern theories of the behaviour and properties of the solid state of matter. It is designed as a self-contained course which at the same time will serve as a basis for more advanced courses and projects in solid state physics.

Prerequisite PHYS1314

PHYS2222 Waves and optics (6 credits)

To give a coherent introduction to the development of modern physical optics, with particular attention to the wave properties and quantum theories of light.

Prerequisite PHYS1112 and PHYS1113

PHYS2224 Computational modelling of physical systems * (6 credits)

The aim of this course is to introduce the students to handling data (obtained either from physics experiments or physical models) and computational methods for modelling physical systems.

Prerequisite 1) Any 1st year physics course; and 2) CSIS0911 or CSIS1117

* *Not offered in 2006-2007.*

PHYS2225 Solid state devices * (6 credits)

The aim of this course is to give an introduction to the physics and operating principles of commonly used solid state devices.

Prerequisite PHYS1314

* *Not offered in 2006-2007.*

PHYS2227 Laser & spectroscopy (6 credits)

The aim of this course is to provide a broad introduction to modern laser spectroscopic techniques and selected applications.

Prerequisite PHYS1314 and PHYS2222 and PHYS2323

PHYS2228 Introductory health physics * (6 credits)

This course aims at providing students with basic knowledge in the scientific and engineering aspects of health physics and to arouse students' interest in the area of peaceful application of ionizing and non-ionizing radiations.

Prerequisite PHYS0605 or PHYS1314

* *Not offered in 2006-2007.*

PHYS2229 Thin film physics (6 credits)

This course is intended for the advanced students, covering the basic theories and techniques of physical deposition processes and topics related to a very rapidly growing area - thin film application in material science.

Prerequisite PHYS1111

PHYS2234 Sensors and computer control for physical measurements * (6 credits)

The aim of this course is to introduce students to basic principles of measurement and control, and sensors for measurement of different physical quantities (temperature, pressure etc.), as well as provide students with practical skills for designing and operating computer controlled measurement systems.

Prerequisite Any 1st year science or engineering course

* *Not offered in 2006-2007.*

PHYS2235 Physics of nanomaterials (6 credits)

Physics of Nanomaterials is a course for advanced undergraduate and beginning postgraduate students at HKU. The course is designed to introduce important concepts such as quantum size effect and fundamental physics of nanomaterials.

Prerequisite PHYS1314

PHYS2304 Special relativity II (3 credits)

This is a follow up course to PHYS1313, with the aim of providing an introduction to the advanced aspects of the theory of special relativity and of its applications.

Prerequisite PHYS1303 or PHYS1314

PHYS2321 Introductory electromagnetism (6 credits)

Introduces the physical concepts required for an understanding of electricity and magnetism. A foundation course for students majoring in physics.

Prerequisite PHYS1111, PHYS1112 and PHYS1314

Co-requisite PHYS1113

PHYS2322 Statistical mechanics and thermodynamics (6 credits)

An introduction to Statistical Mechanics and elementary Thermodynamics with reference to related phenomena in Physics. This course is taught as a basic and essential subject for students majoring in

Physics.

Prerequisite PHYS1111, PHYS1112 and PHYS1314

Co-requisite PHYS1113

PHYS2323 Introductory quantum mechanics (6 credits)

This course aims at a rigorous introduction to the concepts and methods of non-relativistic quantum mechanics. It is a prerequisite for several advanced physics courses.

Prerequisite PHYS1314

PHYS2324 Classical mechanics (6 credits)

The aim of this course is to introduce general methods of studying the dynamics of particle systems, through which students can acquire experience in using mathematical techniques for solving practical problems.

Prerequisite PHYS1111, PHYS1112 and PHYS1314

Co-requisite PHYS1113

PHYS2325 Theoretical physics (6 credits)

The aim of this course is to provide students with the conceptual skills and analytical tools necessary for solving real problems in all major areas of physics.

Prerequisite 1) PHYS1111 or PHYS1112 or PHYS1113 or PHYS1314; and 2) (MATH1811 and MATH1812) or (PHYS1315 and PHYS1316)

PHYS2426 Intermediate experimental physics * (6 credits)

This laboratory based course aims to familiarize students with some basic methods in physics experimentation, and in particular to illustrate the methods by carrying experiments related to electromagnetism and modern physics.

Prerequisite PHYS1411 and PHYS1314

* *Not available to those who have taken PHYS2421 or PHYS2422 unless approved by course coordinator.*

PHYS2521 Intermediate physics project (6 credits)

This course is designed for second year students who would like to take an early experience on research. It provides students with the opportunity to do small physics projects by themselves, either theoretical or experimental. These projects are close to research in nature and, usually, without lectures..

Prerequisite Any 1st year Physics course

PHYS2624 Introductory atmospheric physics * (6 credits)

To discuss the physical principles and mechanisms of atmospheric motions, weather phenomena, and climate. This course is designed to be an intermediate level course on modern meteorology. It is suitable for students with some background in physics or science.

Prerequisite Any 1st year science or engineering course

* *Course materials will be delivered by expert guest lecturers from the Hong Kong Observatory.*

PHYS3031 Astrophysics (6 credits)

To introduce students to current theories in astrophysics. It may be taken as a self-contained course or as background to research work in astrophysics.

Prerequisite PHYS2321 and PHYS2322 and PHYS2323

PHYS3033 General relativity * (6 credits)

To introduce students to the field of general relativity and to provide conceptual skills and analytical tools necessary for astrophysical and cosmological applications of the theory

Prerequisite PHYS2321 and PHYS2322 and PHYS2323

Co-requisite PHYS1303

* *Not offered in 2006-2007.*

PHYS3034 Cosmology * (6 credits)

The aim of the course is to offer an advanced introduction to cosmology, to familiarize students with mathematical formulation used to model the evolution and dynamics of the universe, and to provide an up to date discussion of the big bang theory and structure and galaxy formation.

Prerequisite PHYS2321 and PHYS2322 and PHYS2323 and PHYS2024

* *Not offered in 2006-2007.*

PHYS3231 Computational physics (6 credits)

The aim of the course is to show how the power of computers enables a computational approach to solving physics problems to be adopted, which is distinct from, and complimentary to, traditional experimental and theoretical approaches. The material covered will be found useful in any project or problem solving work that contains a strong computational or data analysis element.

Prerequisite PHYS2321 and PHYS2322 and PHYS2323

PHYS3232 Solid state physics (6 credits)

To provide students with an understanding of more advanced topics in selected areas of solid state physics.

Prerequisite PHYS2221 and PHYS2321 and PHYS2322 and PHYS2323

PHYS3321 Nuclear and particle physics * (6 credits)

The aim of the course is to describe nuclear structure in an elementary way as a field of application of quantum mechanics and electromagnetism, and to study the fundamental interactions of subnuclear particles.

Prerequisite PHYS2323 and PHYS2321 and PHYS2322

* *Not available to those who have taken PHYS2326 unless approved by course coordinator.*

PHYS3331 Electromagnetic field theory (6 credits)

We study the electromagnetic properties of simple physical systems, and the relations between electromagnetism and special relativity.

Prerequisite PHYS2321 and PHYS2322 and PHYS2323 and PHYS2325

PHYS3332 Quantum mechanics (6 credits)

Introduces more advanced concepts of quantum mechanics. Together with PHYS2323, these will provide the basic knowledge of quantum mechanics to an undergraduate student.

Prerequisite PHYS2321 and PHYS2322 and PHYS2323 and PHYS2325

PHYS3333 Advanced statistical mechanics * (6 credits)

This course intends to introduce some topics in the field of equilibrium statistical physics.

Prerequisite PHYS2321 and PHYS2322 and PHYS2323

* *Not offered in 2006-2007.*

PHYS3334 Advanced electromagnetic field theory (6 credits)

This is a standard course in electromagnetic field theory which provides essential background for postgraduate and advanced undergraduate students intend to do research in physics.

Prerequisite PHYS2321 and PHYS3331

PHYS3335 Advanced quantum mechanics (6 credits)

This course introduces postgraduate and advanced undergraduate students to advanced techniques in quantum mechanics and their applications to selected topics in physics.

Prerequisite PHYS2323 and PHYS3332

PHYS3431 Advanced experimental physics * (6 credits)

This course aims to introduce the student to some of the more advanced techniques in modern physics, while at the same time illustrating some of the important experiments discussed in course text books.

Prerequisite 1) PHYS2421 or PHYS2422 or PHYS2426; and 2) PHYS2321 and PHYS2322 and PHYS2323

* *Not available to those who have taken PHYS2423 unless approved by course coordinator.*

PHYS3531 Physics project (12 credits)

This course is designed for students who are considering doing research in the future. It provides students with the opportunity to study special physics projects by themselves, either theoretical or experimental. These projects are close to research in nature and are designed for prospective research students.

Prerequisite 1) PHYS2321; and 2) PHYS2323

PHYS3532 Special topics in physics (12 credits)

To provide the chance for students to learn special topics in modern physics by themselves by reviewing literature (theoretical project) or practicing special experimental skills in carrying out a small project (experimental project) under the supervision of a member of staff.

Prerequisite 1) PHYS2321; and 2) PHYS2323

Department of Statistics & Actuarial Science

STAT0301 Elementary statistical methods * (6 credits)

Research findings are often fully or partly supported by data. Data, which are often concerned with situations involving variability and uncertainty, are collected from an experiment or a survey. They are used to estimate the true value of a certain quantity or to test the acceptability of a certain new hypothesis. Valid methods of analysing the data are thus essential to any successful investigation. The course presents the fundamentals of statistical methods widely used by researchers. There is no demand of sophisticated technical mathematics.

Prerequisite HKCEE Mathematics. Not available to students with a pass in A-level Pure Mathematics. (Students taking or having taken STAT1301 or STAT1306 or STAT0302 or STAT1000 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT1801 or STAT0601 or STAT0602 are not allowed to take this course.)

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT0302 Business statistics * (6 credits)

The discipline of statistics is concerned with situations involving uncertainty and variability. Variability greatly affects the interpretation of data. Thus statistics forms an important descriptive and analytical tool. This elementary course, which is taught without any technical mathematics, presents many standard situations of data interpretation with emphases on business examples. The statistical tests for these situations are presented. Microsoft Excel might be used to carry out some statistical analysis.

Prerequisite HKCEE Mathematics (Students taking or having taken STAT1301 or STAT1306 or STAT0301 or STAT1000 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT1801 or STAT0601 or STAT0602 are not allowed to take this course.)

* *Available only to Business School students.*

STAT1301 Probability & statistics I (6 credits)

The discipline of statistics is concerned with situations in which uncertainty and variability play an essential role and forms an important descriptive and analytical tool in many practical problems. Against a background of motivating problems this course develops relevant probability models for the description of such uncertainty and variability and provides an introduction to the concepts, principles and methodology of statistical analysis.

Prerequisite A-level Pure Mathematics or AS-level Mathematics & Statistics or equivalent. (Students taking or having taken STAT0301 or STAT0302 or STAT1306 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT1801 or STAT0601 or STAT0602 are not allowed to take this course.)

STAT1302 Probability & statistics II (6 credits)

This course builds on STAT1301, introducing further the concepts and methods of statistics. Emphasis is on the two major areas of statistical analysis: estimation and hypothesis testing. Through the disciplines of statistical modelling, inference and decision making, students will be equipped with both quantitative skills and qualitative perceptions essential for making rigorous statistical analysis of real-life data.

Prerequisite A-level Pure Mathematics or AS-level Mathematics & Statistics or equivalent AND taking or having taken STAT1301 or STAT1000 or STAT1007 or STAT0601

STAT1303 Data management * (6 credits)

This course is designed for students who want to learn a statistical software (SAS or SPSS) for data management and elementary data analysis. This course focuses on using SAS or SPSS to manage data set input and output, work with different data types, manipulate and transform data, perform random sampling and descriptive data analysis, and create summary reports.

Prerequisite HKCEE Mathematics or AS-level Mathematics & Statistics or A-level Pure Mathematics or equivalent AND taking or having taken STAT0301 or STAT0302 or STAT1301 or STAT1306 or ECON1003 or ECOL2006 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602 or STAT1801

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT1304 The analysis of sample surveys * (6 credits)

We often try to infer the characteristics of a population by taking a sample from that population. The validity and the efficiency of the findings depend on the quality of the sample. This course considers the basic theory and practical applications for the different sampling design and analysis. Examples on marketing surveys, social surveys and opinion polls will be considered.

Prerequisite HKCEE Mathematics or AS-level Mathematics & Statistics or A-level Pure Mathematics or equivalent AND taking or having taken STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or ECON1003 or ECOL2006 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT1305 Introduction to demography * (6 credits)

Demography studies the distribution of population by age, gender, marital status, education level, culture, ethnicity, and other social and physical characteristics. It also focuses on population changes---migration, fertility and mortality rates. Knowledge in demography is vital to economic studies, business and government policymaking and investment planning. The course introduces important statistical methods pertinent to the study of demography, with attention to problems of regional interest.

Prerequisite HKCEE Mathematics or AS-level Mathematics & Statistics or A-level Pure Mathematics or equivalent AND taking or having taken STAT0301 or STAT0302 or STAT1301 or STAT1306 or ECON1003 or ECOL2006 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602 or STAT1801

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT1306 Introductory statistics (6 credits)

The discipline of statistics is concerned with situations involving uncertainty and variability. The interpretation of data needs special techniques when variability plays a role, as it usually does. Thus statistics forms an important descriptive and analytical tool of many scientific disciplines. Candidates with a mathematical background will find this course suitable, because the language of mathematics allows the subject of statistics to be presented with economy and clarity.

Prerequisite A-level Pure Mathematics or AS-level Mathematics & Statistics or MATH0801 or MATH0802. Students without these qualifications, but with grade C or better in A-level Physics, are deemed to have sufficient mathematical training to enrol in this course. Students who intend to major in "Risk Management" or "Statistics" should take STAT1301 instead of this course. (Students taking or having taken STAT1301 or

STAT0301 or STAT0302 or STAT1801 are not allowed to take this course.)

STAT1801 Probability and statistics: foundations of actuarial science (6 credits)

This course provides the basic foundations in probability and statistics for students in B.Sc.(ActuarSc), though the course is also suitable for mathematically-able students from other quantitative curricula. Probability theory underpins the study of statistics. The course aims firstly to develop skills in probabilistic analysis for problems involving randomness. Random variables and probability distributions are studied in depth. The concepts of statistics are then introduced, guided by motivating examples.

Prerequisite A-Level Pure Mathematics or AS-level Mathematics & Statistics or equivalent. (Students taking or having taken STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT0601 or STAT0602 are not allowed to take this course.)

STAT1802 Financial mathematics (6 credits)

This course introduces the mathematics of finance which plays an important role in the development of basic actuarial techniques. Introduction to risk management and practical applications of the actuarial functions are also covered.

Prerequisite A-level Pure Mathematics or AS-level Mathematics & Statistics or equivalent AND taking or having taken STAT1801 or STAT1302

STAT2301 Linear statistical analysis * (6 credits)

The analysis of variability is mainly concerned with locating the sources of the variability. Many statistical techniques investigate these sources through the use of 'linear' models. This course presents the theory and practice of these models.

Prerequisite STAT1302 (Students taking or having taken STAT0801 or STAT2804 are not allowed to take this course.)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2302 Statistical inference * (6 credits)

This course covers the advanced theory of point estimation, interval estimation and hypothesis testing. Using a mathematically-oriented approach, the course provides a solid and rigorous treatment of inferential problems, statistical methodologies and the underlying concepts and theory. It is suitable in particular for students intending to further their studies or to develop a career in statistical research.

Prerequisite STAT1302 or STAT2802

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2303 Probability modelling * (6 credits)

This is an introductory course in probability modelling. A range of important topics in stochastic processes will be discussed.

Prerequisite STAT1301 or STAT1000 or STAT1007 or STAT0601 (Students taking or having taken STAT2803 or MATH2603 are not allowed to take this course.)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2304 Design and analysis of experiments * (6 credits)

In this course the basic theory of experimental design is introduced. Basic principles and guidelines for designing experiments will be introduced. Analysis for experiments with a single factor, Randomised block, Latin squares and related designs will be covered. The notions of crossed and nested factorial structure, balanced incomplete factorial experiments and fixed/random effects will be discussed.

Prerequisite STAT1302 or STAT2802 or STAT2311 or STAT0401 or STAT0603 or STAT0100 or STAT0604 or STAT0605

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2305 Quality control and management * (6 credits)

The successful control of quality in production is a matter of primary importance to a company's prosperity and good-will. This course provides an overview of quality compromise which involves both the producer and the consumer. It presents a variety of statistical solutions including control charts, acceptance sampling plans, sequential sampling procedures, analysis of measurement errors, reliability, and life-testing. Contemporary quality management systems such as total quality control, quality control circle, zero defects, and ISO-9000 will be introduced. The student is brought to the frontier of today's quality control and management ideas.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT1001 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or STAT0100 or STAT2802 or STAT0604 or STAT0605

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2306 Business logistics * (6 credits)

Originally, the word 'logistics' described the strategic aspects involved in moving and supplying armies and navies. Usage grew to include games of strategy, such as chess. Modern business corporations are increasingly using logistics as a management tool, for example, in capital budgeting problems, production planning, scheduling, transportation or in deciding a location for a new factory. This course addresses the business applications of logistics.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602 (Students taking or having taken MATH2901 are not allowed to take this course.)

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2307 Statistics in clinical medicine and bio-medical research * (6 credits)

In clinical medicine doctors observe features (such as blood pressure, hormone level, presence/absence of a symptom, degree of infection, etc.) which are subject to natural variation between individual patients and between groups of patients with different disease types. This variability motivates the application of statistical methodology to the clinical observational and decision-making process. Part of the course deals with these applications.

The other part deals with statistical problems which come from biological and medical research, for example the controlled clinical drug trial. No knowledge in biology or medicine is assumed; the course provides all of the necessary bio-medical background when the statistical problems are introduced.

Prerequisite STAT1302 or STAT2802 or STAT0100 or STAT0604 or STAT0605

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2308 Statistical genetics * (6 credits)

This course covers background on genetics, Mendelian Genetics; Hardy-Weinberg equilibrium; linkage equilibrium; exact test; likelihood ratio test; chi-square test; population structure; linkage analysis; non-parametric linkage analysis; association studies; forensic genetics; relatedness; kinship analysis; mixed samples.

Prerequisite STAT1302 or STAT2802 or STAT0100 or STAT0604 or STAT0605

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2309 The statistics of investment risk * (6 credits)

Most investments involve some risk. The decision to invest or not is usually made against a background of uncertainty. Whilst prediction of the future is difficult, there are statistical modelling techniques which provide a rational framework for investment decisions, particularly those relating to stock markets and the markets for interest rates, commodities and currencies. Building upon research, both in Hong Kong and abroad, this course presents the prevailing statistical theories for investment decisions in these vital markets. Particular issues include the concept of an efficient market, portfolio construction and analysis, asset pricing, portfolio performance and management, and behavioural finance.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2310 Risk management and insurance * (6 credits)

The course introduces the statistical, financial and legal principles underlying the techniques for managing the insurable risks faced by organizations and individuals. It is aimed at students who have minimal background in quantitative methods and is not available to students majoring in Actuarial Science. The course emphasizes basic risk management and financial planning, and students will be able to apply these concepts immediately to their own lives.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2311 Computer-aided data analysis * (6 credits)

A wide range of statistical analyses and methods are presented using data sets generated from social sciences research and scientific studies. These analyses deal with designed experiments in the laboratory or field-work setting together with data from less-rigorously planned observational studies. Measuring uncertainty, describing patterns of variability, and describing the inter-relationship between several variables are therefore essential aspects of social science and scientific investigations. These aspects require a good understanding of statistics. This computer-oriented but non-mathematical course develops the important concepts and methods of statistics. Although no knowledge of a programming language is required, the course makes extensive use of computers. This is made possible by high-quality, but user friendly statistical software like JMP or SPSS.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT0302 or STAT1306 or STAT1001 or STAT1003 or STAT1006 or STAT1008 or STAT2001 or STAT0602 or (CogSc students

having taken STAT1000 or STAT1301) (Students taking or having taken STAT0603 are not allowed to take this course)

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2312 Data mining * (6 credits)

With an explosion in information technology in the past decade, vast amounts of data appear in a variety of fields such as finance, marketing research, customer relations management, medicine and healthcare. The challenge of understanding these data with the aim of creating new knowledge and finding new relationships among data attributes has led to the innovative usage of statistical methodologies and development of new ones. In this process, a new area called data mining is spawned. This course provides a comprehensive and practical coverage of essential data mining concepts and statistical models for data mining.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2313 Marketing engineering* (6 credits)

This course is designed to provide an overview and practical application of trends, technology and methodology used in the marketing survey process including problem formulation, survey design, data collection and analysis, and report writing. Special emphasis will be put on statistical techniques particularly for analysing marketing data including market segmentation, market response models, consumer preference analysis and conjoint analysis. Students will analyse a variety of marketing case studies.

Prerequisite STAT0301 or STAT0302 or STAT1301 or STAT1306 or STAT1801 or ECON1003 or ECOL2006 or STAT1000 or STAT1001 or STAT1003 or STAT1006 or STAT1007 or STAT1008 or STAT2001 or STAT0601 or STAT0602

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2314 Business forecasting * (6 credits)

In daily business operations, forecasts are routinely required on different aspects of the economy, the market and individual companies. Numerous statistical techniques have been developed in the past decades to provide forecasts for the business decision-maker. This course considers a wide range of such techniques that have proven useful to practitioners. The course will involve the use of computer software, EXCEL, in the teaching process.

Prerequisite ECOL2006 or ECON1003 or STAT0301 or STAT0302 or STAT1306 or STAT1001 or STAT1003 or STAT1006 or STAT1008 or STAT2001 or STAT0602

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT2315 Practical mathematics for investment * (6 credits)

The main focus of this course will be on financial mathematics of compound interest and financial derivatives. Introduction to risk management and practical applications of the actuarial functions are also considered.

Prerequisite Any introductory-level or junior-level course (Students taking or having taken STAT1802 are not allowed to take this course.)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2801 Life contingencies * (6 credits)

The major objectives of this course are to integrate life contingencies into a full probabilistic framework and to demonstrate the wide variety of constructs which are then possible to build from basic models at the foundation of actuarial science. The time-until-death random variable will be the basic building block by which models for life insurances, designed to reduce the financial impact of the random event of untimely death, will be developed. Techniques for calculation benefit premiums and benefit reserves of various types of life annuity and insurance will be discussed.

Prerequisite (STAT1302 and STAT2315) or (STAT1802 and taking or having taken STAT2802) or (STAT1302 and STAT1802) or (STAT0100 and STAT0113)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2804 Linear models and forecasting * (6 credits)

This course deals with applied statistical methods of linear models and investigates various forecasting procedures through time series analysis.

Prerequisite STAT1302 or STAT2802 or STAT0100 or STAT0605 (Students taking or having taken STAT2301 or STAT3301 or STAT0102 or STAT0604 or STAT3101 are not allowed to take this course)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2805 Credibility theory and loss distributions * (6 credits)

Credibility is an example of a statistical estimate. The idea of credibility is very useful in premium calculation. Insurance loss varies according to the business nature, what distribution should be used to fit a particular loss is both of theoretical interest and practical importance. This course covers important actuarial and statistical methods.

Prerequisite STAT1302 or STAT2802 or STAT3810 or STAT0100 or STAT0604 or STAT0605 or STAT0802

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2806 Financial economics * (6 credits)

This course covers the skills necessary to construct and apply discrete stochastic models to value financial derivatives.

Prerequisite STAT1302 or STAT2802 or STAT0100 or STAT0604 or STAT0605

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT2807 Corporate finance for actuarial science (6 credits)

This course is designed for actuarial science students to receive VEE-Corporate Finance from Society of Actuaries. The objective of this course is to introduce students to the fundamental principles of corporate finance. The course will provide students with a systematic framework within which to evaluate investment and financing decisions for corporations.

Prerequisite (BUSI1002 and STAT1802) or (STAT2310 and STAT2315)

STAT3301 Time-series analysis * (6 credits)

A time series consists of a set of observations on a random variable taken over time. Time series arise naturally in climatology, economics, environment studies, finance and many other disciplines. The observations in a time series are usually correlated; the course establishes a framework to discuss this. This course distinguishes different type of time series, investigates various representations for the processes and studies the relative merits of different forecasting procedures. Students will analyse real time-series data on the computer.

Prerequisite STAT2301 or STAT0102 or STAT0604. (Students taking or having taken STAT0801 or STAT2804 are not allowed to take this course.)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT3302 Multivariate data analysis * (6 credits)

In many designed experiments or observational studies the researchers are dealing with multivariate data, where each observation is a set of measurements taken on the same individual. These measurements are often correlated. The correlation prevents the use of univariate statistics to draw inferences. This course develops the statistical methods for analysing multivariate data through examples in various fields of application and hands-on experience with the statistical software SAS.

Prerequisite STAT0102 or STAT0604 or STAT0801 or STAT2301 or STAT2804

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT3304 Computer-aided statistical modelling * (6 credits)

This is a computer-aided course of statistical modelling designed for the students who have taken STAT2301 Linear Statistical Analysis and like to see theory illustrated by practical computation. Numerous real data sets will be presented for modelling and analysis using statistical software, such as SAS, for gaining hands-on experience. The course also aims to develop skills of model selection and hypotheses formulation for testing, so that questions of interest can be properly formulated and answered. An important element deals with model review and improvement, when one's first attempt does not adequately fit the data. Modern computer software such as SAS makes this interactive approach easier.

Prerequisite STAT2301 or STAT2804 or STAT0102 or STAT0801 (Students taking or having taken STAT3601 are not allowed to take this course)

* For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.

STAT3305 Financial data analysis (6 credits)

This course focuses on understanding financial data and methods by which they are analyzed and interpreted. It aims at enhancing the students' analytical skills of developing statistical models for analysing financial data. Techniques are motivated by examples and developed in the context of applications. Students will learn how to process financial data for purposes of financial analysis, estimation and testing of financial models and to understand better crucial aspects of financial market movements.

Prerequisite ECON1001 or STAT2309 or STAT2806

STAT3306 Selected topics in statistics * (6 credits)

This course covers a range of topics necessary for work as a professional statistician. Statistical

problems can be of many types. Whilst the statistician will face many non-standard situations, he/she is aided by well-developed theories and methods which bring many problems into a standard framework. This course presents such theory and methods. The emphasis may vary slightly from year to year.

Prerequisite STAT0102 or STAT0801 or STAT0604 or STAT2301 or STAT2804

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT3307 Project in statistics * (6 credits)

Each year a few projects suitable for Statistics or Actuarial Science major students will be offered. These projects, under the supervision of individual staff members involve the application of statistics and/or probability in interesting situations. They provide students with practical experience in approaching a real problem, in report writing and in oral presentation.

Prerequisite STAT2301 or (STAT2802 and STAT2804) or STAT0102 or STAT0604 or (STAT2802 and STAT0801). Approval is subject to past academic performance. Availability of this course to Actuarial Science students is also subject to a quota.

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT3308 Financial engineering * (6 credits)

This course aims at demonstrating the practical use of financial derivative products to analyse various problems arisen in financial engineering. Emphases are on the various option pricing formulae, hedging techniques and interest rate models.

Prerequisite 1) STAT2309 or STAT2806 or STAT0109 or STAT0806 (for students admitted in 2004-05 or before); or 2) STAT2315 (for students admitted in 2005-06 or thereafter)

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT3810 Risk theory * (6 credits)

Risk theory studies the deviations of financial results from those expected and deals with methods of avoiding inconvenient consequences from such deviations. This course deals with ruin theory; the applications of statistical models and stochastic processes to short-term insurance such as fire insurance, private motor insurance, and short-term disability insurance.

Prerequisite (Taking or having taken STAT2803) or STAT2303 or MATH2603 or STAT0103

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT3811 Survival analysis * (6 credits)

This course is concerned with how models which predict the survival pattern of humans or other entities are established. This exercise is sometimes referred to as survival-model construction.

Prerequisite (Taking or having taken STAT2802) or STAT2301 or STAT2801 or STAT0102 or STAT0604 or STAT0801

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

STAT3812 Stochastic calculus with financial applications * (6 credits)

Stochastic calculus has become an essential tool in economics, insurance, finance and econometrics. This mathematical theory is the basis for pricing financial derivatives such as options and futures. This

course is designed for students to develop professional skills in stochastic calculus and its applications to actuarial science and finance. Pure mathematical components of the course will be kept at a reasonably low level. The course begins with an overview of the basic concepts from probability theory. Stochastic processes, especially Brownian motion and martingales will be discussed.

Prerequisite MATH2603 or STAT2303 or STAT2803 or STAT0103

* *For students admitted in or before the academic year 2002-03, the prerequisites of the course can be treated as prerequisites or co-requisites.*

Faculty-level courses

SCNC0004 Scientific thinking and interesting discoveries * (3 credits)

The objective of this course is to explore scientific thinking and also its relationship with the process of discovery. To provide an introduction of the logic of scientific thinking that leads eventually to interesting scientific discoveries. The course also emphasizes the appreciation of these discoveries and their implications.

Prerequisite Nil

* *Not offered in 2006-2007.*

SCNC1001 Science: concepts & notions * (6 credits)

To provide an introduction to scientific method, thought and concepts: to illustrate the different approaches taken within sub-disciplines to the investigation of major scientific problems and concepts.

Prerequisite 1 AL science subject

* *Not offered in 2006-2007.*

SCNC2002 Science and the new millennium * (6 credits)

To provide a coherent picture of modern Science by highlighting the course with topics of significant importance and with relevance to our daily life, in order for students to appreciate the importance of such significant scientific developments.

To generate a strong and intense interest in Science (life long learning) by widening the scope of the science horizon of each undergraduate in the Faculty.

To develop skills in communicating Science to laymen through posters and oral presentations.

Prerequisite SCNC1001

* *Not offered in 2006-2007.*

Language courses offered to BSc students

Chinese

CSCI0001 Practical Chinese language course for science students * (3 credits)

- (1) Practical Chinese Writing Skills
 - (a) Classical and modern Chinese
 - (b) The Chinese language: characteristics and usage
 - (c) Basic grammar of modern Chinese
- (2) Chinese Characters
 - (a) Traditional characters
 - (b) Simplified characters
 - (c) Variant forms
- (3) Letter-writing
 - (a) Business letter writing techniques

- (b) Official letter writing techniques
- (4) Office Documents
 - (a) Notices and announcements
 - (b) Proposals
 - (c) Minutes and reports of meetings
- (5) Chinese for Special Purposes
 - (a) An introduction to science and technology in ancient China
 - (b) Reader-based scientific/technical writings
 - (c) Styles and rhetoric of scientific/technical writings
- (6) Presentation and Communication Techniques
 - (a) Communication and presentation techniques
 - (b) Discussion and the art of persuasion

Prerequisite Nil

* *This course is compulsory for all BSc students.*

CSCI0002 Putonghua course for science students * (no credit)

The course is divided into three parts:

- (i) Pronunciation;
- (ii) The *pinyin* system;
- (iii) Texts: greetings, numbers, inquiry, time & appointments, asking for direction, shopping, making phone calls, at the bank, in the post office, food and science terminology.

Prerequisite Nil

* *This course is available for BSc I students only.*

Average class size is around 30.

CSCI2002 Advanced language studies in Chinese (3 credits)

- (1) To hone students' communicative skills in Chinese. This course aims to improve their reading, listening, writing and speaking abilities in Chinese.
- (2) To expose students to different aspects of the language. This course covers a wide range of both linguistic and extra-linguistic subject matters, the knowledge of which would enable the students to use the language in an efficacious way.
- (3) To give pre-service language training to students. This course equips the students with language proficiency to get and secure a job.
- (4) To promote deeper understanding of Chinese culture. This course identifies areas of Chinese culture that are essential for the students to understand their society better.

Prerequisite CSCI0001

English

ECEN1801 Academic English for science students * (3 credits)

To build confidence in the use of English for writing and speaking about science. The focus is on:

- (1) Writing an essay which meets the requirements of good academic writing, in particular making appropriate use of published sources and avoiding plagiarism.
- (2) Speaking in an organized and coherent manner.

Prerequisite Nil

* *This course is compulsory for all B.Sc. students.*

ECEN2802 Advanced English for science students * (3 credits)

To develop a sense of audience awareness in writing, to develop spontaneous speaking skills and to

individualise language learning. The focus is on:

- (1) Writing a short article for one of a range of web journals each with a different audience and topic focus (individual choice).
- (2) Spontaneous (i.e. unrehearsed) discussion through participation in workshops and one-to-one discussions.
- (3) Developing independent language learning skills to help students address their individual language problems and focus on their future language needs.

Prerequisite ECEN1801

* *This course is compulsory for all B.Sc. students.*

FACULTY OF SOCIAL SCIENCES**Language Studies Courses offered to BSocSc students**

CSSC1001. Practical Chinese language course for social sciences students (3 credits)

This course aims at enhancing students' knowledge and skills in practical Chinese writing in the social sciences. Students will be introduced to simplified Chinese characters, and will be trained to write letters, proposals, reports, press releases and announcements. They will also acquire the skills in making public speeches and presentations. The course involves extensive use of Chinese IT applications. Assessment: 50% coursework, 50% examination.

ECEN1901. Academic English for social sciences (3 credits)

This course introduces students to features of speaking and writing in English in an academic context. Through small group work related to language and disciplinary issues the course develops abilities to produce clear and coherent spoken and written discourse for university study in the social sciences. Assessment: 100% coursework.

ECEN2902. English for professional communication for social sciences (3 credits)

The course prepares students to communicate effectively and accurately and prepare themselves for workplace situations which entail the use of English. It requires students to investigate an issue relevant to their studies, improve their interview and presentation skills, and write various professional documents. Assessment: 100% coursework

Junior Level Courses

Faculty-level Courses (FOSS)**FOSS1002. Appreciating social research (6 credits)**

Social science researchers investigate social phenomena from different perspectives using different research methodologies. This course will provide a chance for students to take a close look at social science research, and attain a general understanding of the different research orientations taken by social sciences researchers. After taking the course, students will be more knowledgeable and equipped to understand general research findings in social sciences. Emphasis will be on nurturing critical thinking skills and aptitudes for appreciating research evidences encountered in future studies and daily experiences. Assessment: 100% coursework.

FOSS1003. Masters in social thought (6 credits)

Over time, outstanding master thinkers in different social scientific disciplines have produced landmark studies and ingenious conceptual frameworks to illuminate the world we live in. This course introduces students to the works and ideas of selected 'masters' in social sciences, in particular how they continue to enlighten us, by applying their insights to examine the pressing social issues that surround us in the intricately globalized world of today. The basis for our enquiries will be from the works of writers as diverse as Sigmund Freud, Erich Fromm, J.S. Mill, Emile Durkheim, and Karl Marx amongst others. After taking the course, students will learn the ways of thinking and major insights of selected masters of social sciences. Students will also be able to make use of their insights to reflect on some of the major issues they face in life. Assessment: 100% coursework.

Department of Politics and Public Administration

Students who wish to major/double major/minor in Politics and Public Administration must successfully complete POLI1003 in semester I or II.

Unless otherwise specified, the final grading for each course will be determined by performance in the examination and assessment of coursework in a ratio to be announced by individual course instructors at the beginning of each semester. The weighting of examination ranges from 40-60% of total course assessment.

POLI1002. Fundamentals of public administration (6 credits)

This is an introductory course to the study of Public Administration. It seeks to introduce students to fundamental concepts and theories in the discipline. Main themes that will be examined include the traditions, core functions and processes, as well as the politics and accountability of public administration.

POLI1003. Making sense of politics (6 credits)

It is an introductory course offered to students with no previous background in political science. It covers the basic concepts, institutions and processes that one would encounter in the study of politics. Emphasis will be placed on the application of concepts to current issues, including (but not restricted to) that of Hong Kong.

Department of Psychology

For candidates admitted in or after the academic year 2006-2007

Student who intends to major in Psychology must have taken either PSYC1001 and PSYC1004; or PSYC1002, PSYC1003 and PSYC1004. Students who have taken PSYC1001 are not allowed to take PSYC1002 or PSYC1003 and vice versa.

The final grading for each course will be determined by performance in the examination and an assessment of coursework in a ratio of 40% coursework, 60% examination, unless otherwise specified.

For candidates admitted in or before the academic year 2005-2006

Student who intends to major in Psychology must have taken PSYC1001, or PSYC1002 and PSYC1003. Students who have taken PSYC1001 are not allowed to take PSYC1002 or PSYC1003 and vice versa.

The final grading for each course will be determined by performance in the examination and an assessment of coursework in a ratio of 40% coursework, 60% examination, unless otherwise specified.

PSYC1001. Introduction to psychology (6 credits)

Discussion of basic concepts in psychology and a preliminary survey of representative work carried out in various areas of psychological investigation, together with an investigation at some length of one such area.

Eligibility: Students taking or having taken PSYC1002 or PSYC1003 are not allowed to take this course.

PSYC1002. How the mind works: explorations in basic thinking processes (6 credits)

We are all fascinated by the achievements of the human mind or brain. But we may also often ask ourselves how we can do things better, for example, remember more efficiently. This course will help us to understand more about the ways in which we solve problems, how we develop our abilities to communicate through language, and how we think creatively. It will help us to answer questions about why we forget things, how we manage to see things in the world around us, why we sleep and what our

dreams mean. We will look at the ways in which the human brain operates, and how it manages to do such amazing things, through reference to research findings, theories and our own practical work. Lectures will include class demonstrations and activities, as well as videos, presented in a way to enhance your interest in, and memory of, what is already a fascinating area. Assessment: 50% coursework, 50% examination.

Eligibility: Students taking or having taken PSYC1001 are not allowed to take this course.

PSYC1003. Psychology and life: personality and social influence (6 credits)

Through lectures and a series of stimulating class activities, students in this course will learn the latest research discoveries in motivation and emotion, human development, intelligence, personality, psychological testing, stress and health, abnormal psychological functioning, psychotherapy, social attraction, social influence and social competence. The course is intended to enhance the development of self-understanding and social competence.

Eligibility: Students taking or having taken PSYC1001 are not allowed to take this course.

PSYC1004. Introduction to quantitative methods in psychology (6 credits)

This course adopts a practical approach to teaching the analytical aspects of research techniques in psychology. It is designed to provide students with the necessary background in research design and data analysis for their own independent research into areas of psychological interest. The logic of statistical inference and scientific explanation, their relations to human values, the merits and limitations of quantitative approaches to the study of psychological phenomena will all be discussed.

Permission of Department Head is required for enrollment. Priority will be given to students planning to major in psychology. Assessment: 70% coursework, 30% examination.

Department of Social Work and Social Administration

Students who intend to major or minor in Social Work and Social Administration must successfully complete either SOWK1001 or SOWK1003. The final grading will be determined by performance in the examination and an assessment of coursework in the ratio of 60:40. Teachers concerned will announce at the beginning of each semester the assessment ratio for courses not assessed in the 60:40 examination/coursework ratio.

SOWK1001. Introduction to social administration (6 credits)

This is a basic course in the understanding of social policy in the areas of human resources planning and education, land use and housing, ageing and social security, family and support services, etc.

SOWK1002. Introduction to social work (6 credits)

The course introduces the basic principles and concepts of social work. Students will obtain an understanding of the philosophy, knowledge and values which form the base for social work practice, social work as a profession, and the role of the social worker in modern society.

SOWK1003. Introduction to social welfare (6 credits)

This course introduces the basic concepts and function of social welfare. Analysis will be undertaken of the range and variety of social services in Hong Kong including family services, youth centres, outreaching services, school social work, community development, rehabilitation, elderly services, probation and correctional services.

Department of Sociology

The final grading for each course will be determined by performance in the examination and an assessment of coursework in a ratio of 40% coursework, 60% examination, unless otherwise specified. Students may select at most two courses from the following:

SOCI1001. Introduction to sociology (6 credits)

This course introduces students to the nature of sociological enquiry and the basic concepts used in sociological analysis. After some reference to the influence of inheritance and environment on human social behaviour, the course will focus on key concepts used in the analysis of cultures, social structures, social processes and social change. The relationship between research, concepts and contemporary theory will be explored at an introductory level.

SOCI1002. Discovering society (6 credits)

This course introduces students to the sociological way of thinking through reference mainly to Chinese societies such as Hong Kong, Mainland China, and overseas Chinese communities. Assessment: 50% coursework, 50% examination.

SOCI1003. Introduction to anthropology (6 credits)

This course will explore, through cross-cultural comparison, key social and cultural issues, such as marriage and the family, caste and class, ethnicity and identity, language and culture, state formation, economic values, gender and religion. The course will draw on studies of the peoples and cultures of Asia.

Cognitive Science Programme

COGN1001. Introduction to cognitive science (6 credits)

This course allows students to gain an understanding of the workings of the mind in the context of the technological advances that are increasingly shaping our lives and our society. The course introduces students to the domain, goals and methods of Cognitive Science, showing how different disciplines converge in their enquiry into how the brain works. With integration as the overall objective, there will be a series of lectures given by specialists within each of the major disciplines (Computer Science, Linguistics, Philosophy, Physiology and Psychology) that contribute to Cognitive Science. Each series of lectures will present case studies highlighting research findings which show how similar questions about the functioning of the human mind are answered from the perspective of each contributing discipline.

Senior Level Courses

Faculty-level Courses (FOSS)

FOSS0001. Media, culture and communication in contemporary China (6 credits)

China has been undergoing dramatic and rapid social change as it becomes embedded in the global economy, and as such, has been the focus of a great deal of media attention. This course investigates the multi-faceted ways in which China's social, economic, political, and legal cultures are portrayed in different forms of contemporary media. Assessment: 100% coursework.

FOSS0003. Human Security in the global context (6 credits)

What is Human Security? How does the security and well-being of the individual relate to the security of the state? When we look around the world today, are our national security apparatuses providing us with the security that we need? Human Security refers to an emerging paradigm for understanding global politics whose proponents believe that the world requires a more comprehensive notion of security, one that marries the traditionally separate fields of development and defense studies and links the traditionally opposing principles of human rights and state sovereignty. Human Security proponents argue that today's security threats go beyond our traditional understanding of defense threats, (e.g. attack from another state) to include poverty, economic inequality, diseases, human rights abuses, environmental pollution, and natural disasters. This course will review the emergence of and major themes behind the Human Security paradigm and will ask if and how Human Security can be meaningfully applied in a policy context. The use of real-world case studies and simulation exercises throughout the course will help students understand and apply the material covered. Students are encouraged to make their own critical judgments about the value of the Human Security agenda towards the end of the course. Assessment: 40% examination and 60% coursework.

FOSS0004. Gender and the global economy (6 credits)

The systematic study of the role gender plays in development has spanned at least three decades. Gender analysis, or applying the gender lens to look at the world, has proven indispensable to the formulation, implementation and evaluation of human-centered development strategies. This course begins with an overview of the concept of 'development' and theories of gender and development, including an in-depth exploration of the macro *processes* that shape the Third World state and society today: colonialism, national liberation and problems of nation-building, and the ever strengthening force of global capital and global institutions. The course will then explore how these processes, combined with local culture and social structure, have differential impacts on men and women and will more specifically focus on various forms of women's incorporation into the global economy, and their implications for the household, the community, and the state. Finally, the course will explore to what extent solutions and alternatives could be found in development NGOs, the global and local women's movements, and creative initiatives from civil society.

The course is necessarily informed by multiple disciplines, and would be of interest to students of cultural studies, economics, sociology, anthropology, politics and international relations. Where appropriate, videos will be used as teaching aid. Last but not least, the study of gender and development, or gender and the global economy, cannot be done in an ivory tower. A number of "field" activities have been deliberately designed to increase students' exposure. Assessment: 40% examination and 60% coursework.

Eligibility: Students taking or having taken POLI0016 are not allowed to take this course.

FOSS0005. Globalization and crime (6 credits)

This course introduces students to the study of the relationship between globalization and crime. It is divided into three main sections. The first part of the course introduces students to the major perspectives of globalization and how crime fits into these discussions. The second part of the course examines recent efforts to understand the dialectical process of crime and globalization using examples like the global drug economy, corruption and human trafficking. The third section will contend with the obstacles and strategies for addressing crime in the global context.

This course provides students with a better understanding of the ways in which crime and globalization interact. It is also designed to facilitate students' critical thinking about how crime operates in the local and transnational context and the difficulties in dealing with crime at these two levels.

Assessment: 50% examination and 50% coursework (30% an individual portfolio and 20% a group project).

FOSS0006. Drug control in comparative perspective (6 credits)

This course introduces students to the historical and contemporary trends in illicit drug use around the world and public policy efforts to control it. The course is divided into three main sections. The first part of the course introduces students to the rise of opiate use in China and elsewhere, the Opium Wars, and the resulting international efforts to control opiate consumption and production. The second part of the course examines contemporary international and local efforts to deal with current drug use including heroin, cocaine and amphetamine type stimulants. The third section will be devoted to examining efforts to shift from a crime oriented perspective of illicit drug use to that of a public health approach focusing on ways to educate and reduce the harms associated with illicit drug use. Examples are drawn from a number of countries including Hong Kong, China, Thailand, the U.S., the United Kingdom, Australia and the Netherlands.

This course provides students with a better understanding of the construction of social control policies in relation to the consumption of “pleasurable substances.” It is designed to facilitate students’ critical thinking about such questions as: Who is making these policies? Why are these policies being made? Who are these policies directed at? What impact have these policies had?

Assessment: 50% examination and 50% coursework (30% an individual portfolio and 20% a group project).

FOSS0007. Policy/practice research project (9 credits)

This course is under the Social Exposure Programme of the Faculty which aims at assisting students to develop social awareness, critical thinking, analytic ability, improve their interpersonal and communication skills, and enhance their integration of classroom knowledge into real life practice. Students will be assigned to work for a policy/practice research project from a list provided themes, for not less than 160 hours during term time or summer time. The tasks involved can be literature review, data collection, data analysis, report writing, or a combination of the above. Assessment: 100% coursework.

FOSS0008. Social science internship (9 credits)

This course is under the Social Exposure Programme of the Faculty which aims at developing students good understanding of social issues through first-hand practical experience and applying knowledge and skills learned to real life situations. Students are expected to become more socially aware, develop critical thinking and analytic ability, and improve their effective interpersonal and communication skills. Students will be placed in a local, regional or international NGO, a public or private international or local organisation or a research centre affiliated to the Faculty for a period of not less than 160 hours during term time or summer time. Students will work for the organization under the supervision of its relevant staff. Assessment: 100% coursework.

FOSS0009. Social justice summer internship (9 credits)

This Internship, under the Social Exposure Programme, is similar to the Social Science Internship except that the partnering organisation and the tasks assigned involve the cross-cutting of law and social sciences with a social science student pairing up with a law student. Students will work full time in the internship organization during summer for a period of not less than 160 hours under the supervision of its relevant staff. They may help with preparation of reports, carrying out research work or other relevant activities. Assessment: 100% coursework.

FOSS0010. East Asian politics and societies (6 credits)

This course provides a multidisciplinary survey of contemporary political, economic, socio-cultural

issues in three countries (areas) in East Asia in the era of globalization: Taiwan, South Korea and Japan. Three broad themes of topics will be examined: political system, political economy and social-cultural issues.

We will ask following major questions: What are the basic features of political systems in these countries? What are the salient political issues in these countries? Why and to what extent do these countries succeeded in achieving industrialization? How are these countries coping with the increasing challenges of globalization? What are the impact of globalization on the societies and cultures of these countries? It attempts to posit these issues and questions within the broader contexts of theoretical perspectives of political science and sociology. Assessment: 50% examination and 50% coursework. Eligibility: Students taking or having taken POLI0012 are not allowed to take this course.

FOSS0011. Researching media and culture (6 credits)

This course provides students with both analytical and practical tools to conduct research on culture and media. It examines the logic and procedures involved in qualitative and quantitative research, focusing on the formulation of the research problem to research design, data collection, data analysis, and finally presenting research results. Through workshops and tutorials, students will acquire practical skills in doing research in media and culture, particularly content analysis, textual analysis, industry studies and reception studies. Assessment: 100% coursework.

FOSS0013. Understanding global issues (6 credits)

This is an introductory course on world politics. The purpose of this course is to help students to understand major global issues and familiarize them with basic concepts, approaches, and controversies in international relations studies. As we are living in a 'shrinking' world characterized by unprecedented levels of global interdependence, the course will also focus on the processes and impacts of globalization on international relations. Some of the issues studied in the course will include humanitarian intervention, global economic governance, poverty and inequality, international security threats, and transnational environmental problems. The course also covers issues such as the role of U.S. in world politics, or post-war international system shaped by the U.S. Assessment: 40% examination and 60% coursework

Eligibility: Students taking or having taken POLI0021 are not allowed to take this course.

FOSS0014. Cultural studies and modern societies (6 credits)

Cultural studies has been one of the frontier subjects in social sciences and the humanities in the past two decades. This course introduces students to the major theories and methods involved. It does this by examining a range of substantive cultural phenomena accompanying the rise and transformation of modern societies. These include the rise of mass entertainment industries and their influence on social outlook and behaviour; the role of consumption in maintaining social identities and status hierarchy; street culture and youth behaviour; the search for fantasies in the shopping mall; new regimes of body management and their impact on gender relations; the survival of the most traditional ritual practices in a high-tech society; the impact of the globalization of production and consumption on notions of pleasure, space and time; and the triumph of image over substance in the media-saturated post-modern world. The learning approach adopted, befitting the complex nature of the issues, will be multi-disciplinary and multi-layered, consisting of theoretical engagements as well as practical project work. Students interested in modern media, journalism, popular culture and globalization will find the knowledge offered in this course indispensable. Assessment: 40% coursework, 60% examination.

FOSS0015. Sexing culture and identity (6 credits)

What is gender? What is sex? How does our culture portray a "normal" female and male? How do popular culture, the law, medicine and science shape our sense of being women and men? How are we

to perform these gendered expectations? Do we have two sexes only? What are transgender and transexuality?

Ideas and ideals about women's and men's roles in contemporary society are a contentious and multifaceted topic. This course, co-taught by lecturers of different academic trainings, is designed to introduce students to a number of concepts and theoretical approaches to the study of gender and sexuality. It aims to help students to have better understanding of cultural constructions of gender and sexuality and the many debates and controversies surrounding these areas. To unravel cultural assumptions about gender and sexuality, it will use a variety of texts including films, documentaries, fictions, popular psychology, and scholarly journal articles to interrogate how different societies create certain ideals of femininity, masculinity, and sexuality to make us who we are. Assessment: 100% coursework

FOSS3003. Research project in global studies (6 credits)

This is a year-long independent studies project for final year candidates who major in the Global Studies programme. Over the course of this year-long project, students will design, conduct, and write-up their own research paper. They will also be obligated to find an additional research advisor who will have agreed to provide significant guidance and expert advice to the student throughout the course of this project. The choice of research project is subject to the final approval of the Programme Coordinator. Assessment: 100% coursework

Prerequisite: FOSS1002 Appreciating social research or a similar research methodology course, subject to the discretion of Programme Coordinator

Eligibility: Students taking or having taken FOSS3005 "Internship in global studies" are not allowed to take this course.

FOSS3005. Internship in global studies (6 credits)

This is a year-long internship for final year candidates who major in the Global Studies programme. Students will be placed in an organization, which has a regional or global agenda, for not less than 160 hours. Students are expected to integrate their classroom learning with their placement experience in order to develop a better understanding of the impact of global integration. To do this, they will have to (1) successfully fulfill the internship requirements of the community partner; (2) fully participate in the internship orientation and evaluation program; (3) thoughtfully write 2 reflective journals (500 words each); and (4) develop and complete a 2000-word final report on a topic that links the student's internship experience with his or her global studies coursework. The choice of internship is subject to the final approval of the Programme Coordinator.

Assessment: 100% coursework

Prerequisite: FOSS1002 Appreciating social research or a similar research methodology course which is subject to the discretion of Programme Coordinator

Eligibility: Students taking or having taken FOSS3003 "Research project in global studies" are not allowed to take this course.

FOSS3004. Research project in media and cultural studies (6 credits)

This is a year-long independent research project for final year candidates who major in the Media and Cultural Studies programme. There will be regular research meetings which are designed to allow students to formulate and carry out a project on a topic of their own choosing related to the Media and Cultural Studies programme, under the guidance from a supervisor and an adviser. At the end of the course, students have to submit a final research paper and give a multi-media presentation. For those who intend to take this course, FOSS0011 is highly recommended. The choice of research project is subject to the final approval of the Programme Coordinator.

Assessment: 100% coursework

Prerequisite: FOSS1002 Appreciating social research or a similar research methodology course, subject to the discretion of Programme Coordinator

Eligibility: Students taking or having taken FOSS3006 “Internship in media and cultural studies” are not allowed to take this course.

FOSS3006. Internship in media and cultural studies (6 credits)

This is a year-long internship for final year candidates who major in the Media and Cultural Studies programme. Students will be placed in a cultural or media agency for not less than 160 hours. They are expected to integrate their classroom learning into their placement experience and develop better understanding of media and cultural issues in a real life situation. The choice of internship is subject to the final approval of the Programme Coordinator.

Assessment: 100% coursework

Prerequisite: FOSS1002 Appreciating social research or a similar research methodology course, subject to the discretion of Programme Coordinator.

Eligibility: Students taking or having taken FOSS3004 “Research project in media and cultural studies” are not allowed to take this course.

Department of Politics and Public Administration

Unless otherwise specified, the final grading for each course will be determined by performance in the examination and assessment of coursework in a ratio to be announced by individual course instructors at the beginning of each semester. The weighting of examination ranges from 40-60% of total course assessment.

POLI0001. A special topic in political science (6 credits)

This course is offered from time to time. Students should consult the Department on the content of the unit on offer.

POLI0002. A special topic in political theory (6 credits)

Each year (if possible) a political theory course will be offered under this heading. The topic chosen will depend upon the interests of staff and students. Students should consult the Department on the content of the course on offer.

POLI0003. Approaches to foreign policy analysis (6 credits)

The process by which states arrive at foreign policy positions is the central focus of this course. Examples will be drawn largely from the U.S.A., China and the United Kingdom. Major crises and events will be studied in some detail to underline the action - reaction nature of foreign policy. The course is intended for those who have studied International Politics in a previous semester.

POLI0004. Bureaucracy and the public (6 credits)

This course examines the political, legal and social dimensions of interaction between bureaucracies and the public. Consideration will be given to the effectiveness of complaint-handling institutions, such as the ombudsman, Freedom of Information Acts, secrecy provisions and the roles played by street-level bureaucrats.

POLI0005. Capitalism and social justice (6 credits)

This course discusses the morality of capitalism with reference to such issues as exploitation, social

justice and equality. Topics include the philosophical defence of free-market capitalism, egalitarian theories of social justice, Marxist critique of capitalism, the concept of exploitation, and welfare rights.

POLI0006. China and Hong Kong: the politics of transition (6 credits)

The development of relations between China and Hong Kong since 1982 is critical to our understanding of Hong Kong's current political problems. This course focuses on the Basic Law, autonomy, democratization, and Hong Kong's political, economic and legal interaction with China.

POLI0009. Comparative politics (6 credits)

This course introduces students to the methods and issues of comparative politics. It will examine the logic and method of comparative politics and some key issues in the comparative study of political behaviour, institutions and processes, such as political culture, political participation, political parties, intergovernmental relations, state-society relations and political development.

POLI0010. Democracy and its critics (6 credits)

This course discusses basic and practical issues concerning the nature, justification, and limits of democracy. Topics include the concept and foundations of democracy, participatory democracy, the elitist challenge to democracy, Marxist critique of capitalist democracy, rational choice approaches to democracy, and others.

POLI0012. East Asian political economy (6 credits)

This course aims to examine the political processes that underlie the rapid economic transformation of East Asian countries. We will mainly cover Japan and the newly industrializing economies, namely Singapore, Hong Kong, Taiwan, and South Korea, but comparisons with China and other emerging economies such as Malaysia and Thailand will also be made. We will first introduce the salient features of the East Asian model of development and we will then analyze the pattern of political development, the relations between the state and other political actors, the development of administrative system, as well as the impact of international relations and strategic factors on the domestic political and economic processes of these cases.

Eligibility: Students taking or having taken FOSS0010 are not allowed to take this course.

POLI0013. Elections and representative democracy (6 credits)

This course examines the relationship between various aspects of elections and representative democracy. Electoral systems, various aspects of the electoral process, the role of representatives, among other topics, will be studied in relation to democratic principles and theories of representation. Examples will be drawn from both Hong Kong and other political systems.

POLI0015. Ethics and public affairs (6 credits)

This course examines major public issues in contemporary societies from the perspectives of ethics and political theory. It aims to enhance students' abilities to critically analyze controversial ethical issues in public affairs. Topics include the nature and methods of moral arguments, major approaches in ethics and political theory, and selected studies of current public issues in the fields of global ethics, market ethics, and political and administrative ethics.

POLI0016. Gender and development (6 credits)

This course introduces the gender dimension to the study of development, especially in an era of globalization. It begins with an overview of the articulation of gender concerns in western development theory and practice in the last three decades, and explores in greater depth the gendered impact of certain key processes at work today. They include war and nation building, the debt crisis, global economic restructuring and labour migration, global governance and the international women's movement.

Eligibility: Students taking or having taken FOSS0004 are not allowed to take this course.

POLI0017. Government and business (6 credits)

This course explores the interplay between government and business within major East Asian countries and how regional economic dynamism is shaping regional international relations in East Asia. The theoretical focus is on how government policy affects the market and how economic forces shape government political decisions. At the international level, it seeks to examine the political basis of regional economic integration and the economic foundation of international political cooperation in East Asia. Issue areas for this course include: the economic dynamism in East Asia, sub-regional economic growth circles, patterns of trade and investment, APEC, and security challenges and economic regionalism.

POLI0018. The Japanese way of politics (6 credits)

The main questions to be addressed in this course include: What are the main characteristics of the Japanese democracy? How does it differ from other liberal democracies? Why had the LDP maintained its long-lasting rule between 1955 and 1993? What is the role of the bureaucracy in Japanese politics? How does the business community exert its political influence? What are the main characteristics of the Japanese political culture? How do ordinary Japanese and social groups exercise their political power? What are the main sources of political change in the 1990s? What contributed to the end of the LDP's dominance in national politics? What are the main changes in the electoral system? How do the Japanese political culture and domestic politics affect Japanese foreign relations?

POLI0019. Hong Kong and the world (6 credits)

Hong Kong's international character has been vital to its prosperity and vitality. While Hong Kong's 'foreign affairs portfolio' is controlled by China, Hong Kong retains considerable autonomy in shaping its international destiny. What global course should Hong Kong leaders chart? This class will examine the Special Administrative Region's unique international status, its complex identity as a Chinese world city, and its track record in facing the challenges and opportunities associated with today's highly interdependent global system.

POLI0020. Hong Kong politics (6 credits)

This course focuses on the legal, political and institutional structure of the Hong Kong government. The political culture and attitudes of the Hong Kong people are discussed. Other topics include the Chief Executive, legislative politics, constitutional politics, public opinion, pressure groups, political parties, mass media, and Beijing's policy toward Hong Kong.

POLI0021. Understanding global issues (6 credits)

This is an introductory course on world politics. The purpose of this course is to help students to understand major global issues and familiarize them with basic concepts, approaches, and controversies in international relations studies. As we are living in a 'shrinking' world characterized by unprecedented

levels of global interdependence, the course will also focus on the processes and impacts of globalization on international relations. Some of the issues studied in the course will include humanitarian intervention, global economic governance, poverty and inequality, international security threats, and transnational environmental problems. The course also covers issues such as the role of the U.S in world politics, or post-war international system shaped by the US.

Eligibility: Students taking or having taken FOSS0013 are not allowed to take this course.

POLI0022. Governing China (6 credits)

This course is an introduction to contemporary Chinese politics. The main objective is to understand the ideology, institutions and processes of the contemporary Chinese political system and explore the socio-economic consequences, achievements, and problems of Chinese socialism.

POLI0023. Issues in contemporary Chinese politics (6 credits)

An overview of some recent policy changes in China which are studied in the light of two main themes: the different ways in which political power is manifested, and the changing perceptions of ways in which governance of the state can best be effected: and to what ends.

POLI0024. Issues in public administration (6 credits)

This course offers an opportunity for students to examine current issues in public administration, particularly those facing the Hong Kong government.

POLI0025. Managerial skills in public organizations (6 credits)

This course focuses on the activities and functions of managers in public organizations. Emphasis is put on the environment and context within which public managers operate, and the various managerial skills and tools that are essential to effective public managers. Students are expected to acquire skills to manage conflicts, lead, manage resources, communicate, and make decisions in the context of public organizations. Reference is made to the experiences in various public or non-profit organizations in Hong Kong.

POLI0027. Public policy-making: theories and application (6 credits)

This course is designed to introduce students to major theoretical frameworks that have been devised to understand and explain public policy-making. The main questions asked are: why are certain policies made instead of others? What are the major factors that affect public policy-making? Empirical studies from both Hong Kong and elsewhere are included to illustrate the application of the theories. [Students wishing to take this course will normally have taken first year introductory courses in our department. Students are free to take the course from their third semester onward, but as the course involves some level of difficulty, it *may* be advisable to take the course after the 4th semester.]

POLI0031. Politics of economic reform in China (6 credits)

This course examines the politics of economic reform in contemporary China. Issues covered include the connections between politics and economics, the political debates over economic reforms, the rationale and themes of the economic reform programme and the social and political consequences resulting from the implementation of these reforms. Reform policies to be studied include rural reform, enterprise reform, central-local relations as well as foreign economic policy.

POLI0033. Problems of the Third World (6 credits)

This course explores the concept and dynamics of "development" through considering a range of concrete problems that have assumed primacy in the Third World today. Issues discussed will include ethnic conflict and displacement; poverty and inequality; foreign aid and neoliberal globalization; urbanization and environmental destruction; and civil society and democratization.

POLI0034. Public administration in China (6 credits)

This course aims to provide a critical introduction to public administration in contemporary China. Key topics that will be covered include the organization of the political system, policy-making and implementation, management and reform of the civil service, local government, public finance, and the relationship between government and business. The political and administrative implications of China's integration into the world economy will also be examined.

POLI0035. Public administration in Hong Kong (6 credits)

Public administration in Hong Kong has been going through a series of reform over the last decade or so. This course introduces students to the major issues confronting the bureaucracy, in particular its relationships to other actors in the political system and questions of accountability.

POLI0037. Managing people in public organizations (6 credits)

The course examines the environment, institutions, processes and issues involved in the management of people in public organizations, particularly the Hong Kong government. Comparisons are made to the experience of managing people in public organizations overseas.

POLI0038. Public policy and democracy (6 credits)

This course examines arguments for a more fundamental rethinking about the proper roles of government, community organizations, and citizens in public policy-making and new forms of service delivery. Potential consequences of public sector reforms for program effectiveness as well as for political and social citizenship will be considered.

POLI0039. Public policy analysis (6 credits)

This is an introductory course in the production of advice for public decisions and actions. This course emphasizes both the art and craft of policy analysis. The "art" dimension focuses on the skills in defining problems for analysis. The "craft" dimension, on the other hand, is concerned with theories, skills, and techniques that can be used to analyze, design, and assess policy options. Illustration is made with reference to policy problems in Hong Kong.

POLI0040. Public sector management (6 credits)

This course examines the structural design and operation of the public sector as well as public organizations. Issues such as the use of various forms of organization in public service delivery, the adoption of corporatization and privatization, and public sector reform will be addressed. Reference is made to the experience in Hong Kong.

POLI0041. Research methods for politics and public administration (6 credits)

Relevant, valid and reliable information is essential in making sound political and administrative decisions. This course examines issues on research design, measurement and scaling, sampling, and data collection and analysis, with emphasis on methods commonly used by politicians and public administrators such as mailed questionnaires, telephone interviews and focus groups. The course also examines the use of opinion polls, interpretation of poll results, and their effects on elections.

POLI0044. American democracy (6 credits)

The political system of the United States is often touted as the quintessential democracy in the world. While the democratic ideals embodied in the system have inspired many, the system also contains some important flaws. This course is to put the political system to the test. What are the philosophical foundations of the political system? What role does American political culture play? How are the powers divided among different branches of federal and state governments? How do individuals and interest groups exercise political power? How does the system work? To answer these questions and others, we will examine the philosophical foundations, working mechanisms, and major controversies associated with the American political system.

POLI0045. The political economy of the European Union (6 credits)

This course examines the political and economic dimension of the European Union. It will include a consideration of its political history, structure, policies and the effects of the market on national politics and economics.

POLI0046. Thesis in politics or public administration (12 credits)

The thesis will consist of an investigation into a relevant aspect of politics or public administration which must be chosen in consultation with the supervisor before July 1 in the year preceding the final examination. The thesis must be submitted before April 1 of the following year. Assessment: 100% coursework.

POLI0047. United States foreign policy (6 credits)

How does one make sense of the seeming "arrogance" of U.S. foreign policy? By enhancing student understanding of the causes and consequences of American international political choices, this course seeks to groom well-informed and objective critics of U.S. foreign policy. The course will examine the intellectual foundations associated with and the domestic political actors involved in U.S. international policy formulation and implementation. Students will then have the opportunity to apply this knowledge in a critical evaluation of some of the major international policy decisions made by the U.S. since WWII. The course will conclude with a discussion of the future of U.S. foreign policy, paying particular attention to the impact of the 9-11 attacks on the American world view.

POLI0050. Women and politics (6 credits)

This course asks why gender matters in politics and how women's integration into political life is important to the fulfillment of democratic citizenship. It will examine shortfalls in reality and seek to understand the processes whereby most women "vanish" from public decision making. Drawing from progressive experiences in different parts of the world, the course explores ways in which politics could be made more women-friendly, and how women's participation could help transform the nature and content of politics.

POLI0051. Issues in Chinese political philosophy (6 credits)

A comparative study of Chinese and Western political philosophy, with special emphasis on Confucianism and liberalism. Topics include the nature of classical Confucian political thought, the developments of the Confucian traditions in response to local political changes and to the challenges presented by western liberalism, the contemporary discourse on Confucianism and human rights, freedom, and democracy, and other related issues. Reference will be made to Chinese materials.

POLI0052. International relations of East Asia (6 credits)

This course helps students to have a better understanding of major trends and issues in international relations of East Asia. Instead of providing a comprehensive survey of the history, culture, and national policies of countries in the region, it mainly addresses four issues in the course: What are major trends in regional IR? What is the source of conflict in the region? What are the common interests that unite peoples and states of East Asia? How does the region organize itself? It explains dynamics and patterns of regional international relations in a broad geopolitical and geoeconomic context. Topics in discussion include major powers' role in the region, the Korean Peninsula, the Taiwan Strait, ASEAN, Southeastern Asia and regional institution-building.

POLI0058. Managing the global economy (6 credits)

This course examines the interaction of politics and economics in international relations with reference to the world economy's most dynamic region – the Asia-Pacific. It identifies the political considerations in global economic relations and analyzes the impact of economic factors on international relations. The course addresses four major areas. First, different theoretical perspectives on the free market global economy such as free trade versus environmental protection and competing priorities in different countries. Second, the key institutions in the global economic system – the World Bank, the International Monetary Fund, and the World Trade Organization (WTO). Third, critical issues in East Asia such as the role of the state in economic management, security and political factors in international economic relations and the prospects of regional economic co-operation. Finally, the major political challenges arising from economic conflicts in individual countries in the Asia-Pacific region.

POLI0059. China and the world (6 credits)

China's place in the world has changed dramatically since the establishment of the People's Republic of China in 1949. How do we account for the transformation of the country's position from being a Soviet ally challenging the West, to an independent radical revolutionary state, and then reform-minded country eager to join the international community? As communism collapsed elsewhere after the end of the Cold War China is becoming an emerging global power practising "socialism with Chinese characteristics". How do we understand and analyze China's relations with the rest of the world? This course examines China's interaction with the rest of the world since 1949, with reference on competing perspectives including power-political, economic inter-dependence and historical-cultural analysis. The course concludes with a critical assessment of China's position in a globalizing world.

POLI0060. Public financial management (6 credits)

The purpose of this course is to provide an overview of financial management in the public sector from a theoretical and practical perspective. The focus is primarily on the conceptual, methodological and institutional aspects of public expenditure and revenue management. The subject is approached largely from an economic standpoint, but there is also some exposure to accounting principles. However, no previous knowledge of either economics or accounting is assumed.

POLI0061. Hong Kong and South China: the political economy of regional development and cooperation (6 credits)

The growing integration between Hong Kong and south China has profound implications not only for this region, but also for China and Asia as a whole. This course aims to analyze such an important development and its many implications. It is divided into three parts. Part I offers an overview of the development of the south China region. Theoretical approaches in the study of regionalism, intergovernmental relations and globalization and their relevance for understanding south China will also be examined. Part II analyses the social, economic and political links between Hong Kong and Greater China and the development experience of south China since the late 1970s. Part III will focus on several key issues in regional development and cooperation in the south China region, including intergovernmental cooperation mechanisms, economic and technological development, demographic flows, boundary control, transportation and infra-structural development, as well as environmental management.

POLI0062. Political analysis (6 credits)

This senior division course is designed for politics and public administration majors for whom it is compulsory. Based on classical texts in political science and public administration that illustrate the methods of our discipline, the course teaches the skills of political analysis. Students will examine topics such as political culture, bureaucracy, revolution, democracy, social capital, political system, public choice, war and peace, and so forth. Assessment: 40% examination, 60% coursework.

POLI0063. Performance and accountability in the public sector (6 credits)

This course examines the ideas and practices of 'contractualism' in the Public Sector, between and within bureaus, with external providers of public services and with the general public as users of those services. Its focus is on the role of 'performance' (standards, measurement and evaluation) as a key management tool in the contract environment. The course explores the potential value of these developments for public sector accountability.

POLI0064. Governance and law (6 credits)

This course seeks to understand why the state regulates certain activities and behaviour in society, what different forms of regulation exist, when and what kind of legal regulation is deemed necessary, how legal regulation is enforced, and checks and balances against abuse in enforcement. This course is jointly taught by staff from the Department of Politics and Public Administration and the Department of Law. The main objective of the course is to explore the interface between the study of Politics and Law in understanding governance. Relevant case studies will be included for illustration and discussion. To take this course, students must have successfully completed POLI1002 Fundamentals of public administration and LLAW2002/LLAW3093 Administrative Law. BSocSc(Government and Laws) students are allowed to take either POLI0064 or LLAW3080 to fulfill the respective programme requirements for the Department of Politics and Public Administration or the Department of Law.

POLI0065. Public organization and management (6 credits)

This course will examine the fundamental theories of (i) organizational behaviours; (ii) organizational structures; (iii) decision making processes; and (iv) organizational management with particular emphasis on public organizations. To substantiate the validity of the theories, emphasis is placed on the application of theory to various organizational settings including public and nonprofit organizations, and the local, state and federal levels of bureaucracies. At the end of the course, students will have obtained the ability to develop critical perspectives on the modus operandi of organizations and to

formulate problem-solving mechanisms under complex decision-making situations.

POLI0066. Public administration and the public (6 credits)

"Government is an instrument of the public for acting **collectively**." What distinguishes public administration from business administration is the notion of "the public". In the age of New Public Management, however, the distinctiveness and the identity of "the public" seem to have been largely lost.

This course seeks to (1) rediscover the "public" in public administration by analyzing various plausible conceptions of the public in relation to public administration, for example, as constituents, clients, customers, and citizens; and (2) evaluate the respective forms and potential for public participation in the processes of administration in these conceptions.

POLI0067. Liberalism and its limits (6 credits)

This course explores a set of fundamental issues in liberalism. Liberalism, which is arguably the most influential tradition of political theory today, is about the proper scope of individual freedom and state power. Some of the issues to be discussed in this course are: What is freedom and what is its ground? Under what conditions should the state interfere with individual freedom? Should the state ban or discourage unethical or worthless ways of life? Should the state coerce people for their own good? Should we have the freedom to exclude people whom we don't like? What is so valuable about personal autonomy? The course aims to assess the strengths and limits of liberalism by examining the arguments for and against the liberal views on these issues.

POLI0069 Public policy, politics and social change (6 credits)

It is a common belief that public policies aim to control socially harmful behavior and to advance desirable, collective societal ends. Contrary to this belief, some policies have only served as tools to strengthen political and economic power of certain groups (or countries) at the expense of others. This course examines this dark side of public policies by addressing critical questions that include: whose interests are reflected in the policies? what are the institutional sources of policies/decisions? how does the powerful manipulate public opinion? who benefits and who pays for the costs of these policies in what ways? etc. By exploring answers to these questions, students are expected to identify sources of widespread injustice in contemporary societies. To conceptualize the core ideas, the course engages in the analysis of propaganda techniques, U.S. foreign policy, and the distribution of hazardous wastes, etc. The course will consist of a combination of lectures and group discussions. Active class participation is required.

Department of Psychology

In addition to class sessions, each course may include a practical element on which candidates may expect to spend about two hours per week.

The final grading for each course will be determined by performance in the examination and by assessment of coursework in a ratio of 40% coursework, 60% examination, unless otherwise specified.

PSYC0001. Research methods in psychology (6 credits)

(For candidates admitted in or before the academic year 2005-2006)

This course adopts a practical approach to teaching the analytical aspects of research techniques in psychology. It is designed to provide students with the necessary background in research design and data analysis for their own independent research into areas of psychological interest. The logic of statistical inference and scientific explanation, their relations to human values, the merits and

limitations of quantitative approaches to the study of psychological phenomena will all be discussed.

Assessment: 70% coursework, 30% examination.

Prerequisite: PSYC1001 or PSYC1002 or PSYC1003.

PSYC0002. Psychological testing and measurement (6 credits)

This course surveys the major concepts and techniques in the field of psychometrics, and provides students with some hands-on experience with commonly used tests. Topics covered include: the context of testing and measurement; the testing process; test standardization; reliability and validity; intelligence and its appraisal; personality assessment; special domain testing; occupational applications; large-scale measurements; ethics and prospects. Assessment: 70% coursework, 30% examination.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0005. Introduction to counselling and therapeutic psychology (6 credits)

Provides a theoretical foundation for students who wish to learn the fundamentals of counselling or to explore their potential for professional training in mental health. Some experiential learning will be used. Major approaches; skills and practice; ethics and limitations of counselling. Working with various clinical and non-clinical populations. Cultural values and socio-political contexts. Outcome and process research. Students with personality and abnormal psychology knowledge preferred. Assessment: 100% coursework.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0007. Cognitive psychology (6 credits)

This course covers how humans learn to deal with information from the environment. Topics include various aspects of perception, memory, concept structure and learning, and thinking. Students will be involved in conducting experiments on cognitive functioning as part of the coursework. Assessment: 100% coursework.

Prerequisite: PSYC1001 or PSYC1002.

PSYC0008. Advanced cognitive psychology (6 credits)

This course covers some recent approaches in the field of cognitive psychology. Topics may include the cognitive unconscious in perception and memory, conditioning versus cognitive learning in humans, neural networks and information processing, as well as other topics reflecting the interests of the teacher. Students will each do an independent empirical research project. Assessment: 100% coursework.

Prerequisites: PSYC1004 and PSYC0007. (BCogSc students exempt from PSYC1004)

PSYC0009. Life-span developmental psychology (6 credits)

This course provides an introduction to developmental psychology from a life-span perspective. The topics include: basic concepts and theories of human development; research methodology and issues in the study of developmental change; biological, environmental and social influences on development; processes of physical development over the life-span; attachment and emotional development; development of perception, language, cognition and morality; development of personality and social relationships. Assessment: 70% coursework, 30% examination.

Prerequisites: either PSYC1001 or both PSYC1002 and PSYC1003

PSYC0010. History and issues in psychology (6 credits)

An examination of some of the major issues and controversies in the history of psychology which are important for the current debate and its continuation. Assessment: 50% coursework, 50% examination.
Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0016. The psychology of stress and health (6 credits)

This course adopts a biopsychosocial approach in exploring current issues and research on stress and health. Special emphasis is placed on the Hong Kong situation. Topics covered include: concepts of stress; the roles of cognition, personality and physiology in the stress response; social stressors; coping, stress management and health promotion; concepts of health and wellness; cultural implications. Students in this course shall undertake independent research projects. Assessment: 100% coursework.

PSYC0017. Motivation and achievement (6 credits)

This course is an introduction to theories and research on achievement motivation. The course will cover a variety of topics including: motivation as a personal trait; situational causes of motivation; cognition and motivation; sociocultural influences on motivation and achievement; the role of meaning in motivation; sex differences in achievement and work investment; age and achievement motivation; enhancing motivation in learning.

Prerequisites: either PSYC1001 or both PSYC1002 and PSYC1003; and either PSYC0019 or PSYC0020 or PSYC0035.

PSYC0019. Psychology of personality (6 credits)

This course will critically examine and attempt a synthesis of a number of theories of personality as exemplified in the lives of some of the significant figures in the field. The relationship of specific theories to practical applications, personality assessment and psychotherapeutic techniques may be included. The major aims of the course are to provide a survey of the breadth and complexity of this field and to provide a perspective from which to examine assumptions about human nature and the evaluation of behaviour. Assessment: 50% coursework, 50% examination.

Prerequisites: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0020. Fundamentals of social psychology (6 credits)

The course gives an overview of the field which studies the behaviour of individuals in social contexts. It covers social perception, social cognition, social motivation, attitudes and attitude change, attitude and behaviour, aggression, helping, interpersonal attraction, social influence on individual behaviour and group dynamics. The effects of Chinese culture on various social behaviours will form part of the discussion. Assessment: 70% coursework, 30% examination.

Prerequisite: PSYC1001 or PSYC1002 or PSYC1003.

PSYC0022. Biological psychology (6 credits)

This course provides an introduction to biological aspects of behaviour. The topics include: biological bases of behaviour, development, learning, memory, and abnormal psychology; the nervous system; processes of brain maturation; psychophysiology. Assessment: 70% coursework, 30% examination.

Prerequisite: PSYC1001 or PSYC1002.

PSYC0023. Psychology of human communication (6 credits)

This course is a laboratory course in applied social psychology. It examines the cognitive and

interpersonal bases of human communication. Topics include: the cognitive and interpersonal processes involved in message formulation and comprehension; the communicative functions of nonverbal behaviour such as filled pauses and hand gestures; the cognitive and social consequences of language use; and social cognitive models of persuasive communication. Assessment: 70% coursework, 30% examination.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0029. Cognitive development (6 credits)

This course will explore the development of our cognitive abilities and capacities through early childhood, when the most complex and interesting changes occur. Cognition, in the form of problem-solving, memory, attention, categorization, language and so on, is at the core of what makes us human. Changes in these abilities are closely related to developments in our physical, motor, and perceptual capacities, as well as to social and emotional growth. Our understanding of the development of a person's ability to think, reason and conceptualize has advanced significantly in the past few decades. We will examine both the findings and experimental methods of recent research on these topics.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0032. Engineering psychology (6 credits)

This course examines how knowledge in experimental/cognitive psychology is applied to the design of man-machine interface, tools, games, consumer products, etc. Students will appreciate how better designs lead to positive outcomes such as higher user satisfaction, lower accident rate, and lower job stress. Topics include human skills, motor theory, human-computer interaction, safety and health, work design, attention, and performance. Most recent psychological studies on advanced technologies such as virtual reality and three-dimensional displays will be introduced. Students will also learn from site visits how such designs are implemented in real settings. Assessment: 80% assessment, 20% examination.

Prerequisites: PSYC1001 or PSYC1002.

PSYC0033. Industrial psychology (6 credits)

This course surveys the application of psychological principles and methods to the analysis of the complex relationships that exist between people and their work. Topics include job analysis, personnel selection, personnel training, vocational guidance, work evaluation, occupational stress, and errors. Assessment: 100% coursework.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0035. Introduction to educational psychology (6 credits)

This course focuses on how psychological theories are applied to learning, teaching, and facilitation of human growth. The topics include major developmental theories and their application to learning and instruction, learning theories from both behavioral and cognitive traditions, effective teaching methods and practices, learners' individual and group differences, achievement motivation, and assessment. Students will be involved in learning activities that require self-reflection and integration of daily life experience. Assessment: 100% coursework.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0036. Special topics in psychology (6 credits)

This course provides an opportunity to study in some depth an area of psychology of interest to students

and a staff member alike. Individual topics may have special requirements for eligibility. Students taking this course may select one topic from the list of topics to be announced in the semester immediately prior to that in which they are taken. Assessment: 100% coursework.

Prerequisite: PSYC1001 or PSYC1002 or PSYC1003.

PSYC0038. Psychology of language and bilingualism (6 credits)

A study of the processes involved in language comprehension and production, including the acquisition of a native as well as second language. The cognitive bases of language learning and use, the psychology of reading and reading disabilities, the comparison of psychological aspects of the Chinese language and other languages. Cognitive functions of the bilingual, the bilingual brain, psychological factors in second language learning.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0040. Cross-cultural psychology (6 credits)

The rationale, scope, and history of cross-cultural psychology. Conceptual issues and research methods. Cultural relativism and the search for universals. The emic-etic distinction. Comparability of test scores across cultures. Non-Western approaches and contributions. Cross-cultural studies in personality, cognition, social behaviour, and psychopathology. Current status, applications, and ethical issues.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0041. Consumer psychology (6 credits)

This course examines the psychological processes underlying consumer buying behaviour and the cultural and social factors mediating these processes. Consumer behaviour will be studied from four psychological perspectives: motivational, information processing, attitude and attitude change, and decision-making. Students will learn to apply these perspectives to Hong Kong cases through exercises and mini project(s). The course offers both theoretical and practical orientations to marketing and market analysis. Assessment: 70% coursework, 30% examination.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0044. Organizational psychology (6 credits)

This course surveys the application of psychological principles and methods to the analysis of the complex relationships that exist between people and the social/cultural environment in their work organization. Topics include work motivation, job satisfaction, leadership, group relations, conflicts, organization design, and cross-cultural issues. Assessment: 100% coursework.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

PSYC0050. Knowing and acting in everyday life (6 credits)

This course investigates knowing and acting as an integral process by which we construct our experiences and interact with the world to maintain our well-being. Pragmatic approaches to knowledge ranging from Western empiricism to postmodern constructionism. Taoism and Buddhism are introduced. Students are encouraged to practice what they have learned by becoming more aware of their own acts of knowing and their consequences in everyday life. Projects and tutorial discussions are designed to aid this practice.

PSYC0051. Perception (6 credits)

An introduction to sensation and perception, with an emphasis on the psychology of seeing. Specific topics include the following: examination of the functional properties of sensory systems (e.g., auditory system, color vision, vestibular system, touch and kinaesthesia); phenomenology of sensation and perception; psychophysical limits of perceptual systems; goals of sensory coding; structure and evolution of sensory systems; theories of perception. Perceptual experiments will be conducted by students in laboratory classes.

Assessment: 100% coursework.

Prerequisite: PSYC1001 or PSYC1002

PSYC0052. Advanced social psychology (6 credits)

This course provides an in-depth examination of two classic questions in personality and social psychology: What is social about social psychology? and Where is the person in personality psychology? By integrating research findings from experimental psychology, individual differences psychology and social psychology, this course seeks an integrative understanding of how an individual behaves in a social context. Topics include: person-situation interactions; interpersonal perception; stereotyping; intergroup dynamics; achievement motivation; psychology of the self; language use and interpersonal processes; cultural influences on cognition and behaviour. Students will each do an independent empirical research project. Assessment: 100% coursework.

Prerequisites: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC1004; and PSYC0020.

PSYC0053. Advanced research in industrial/organizational psychology (6 credits)

This research-based course focuses on specific topics in industrial/organizational psychology that are pertinent to the latest economic development in Hong Kong and in the Greater China Region. Psychometric assessment of various job attitudes, aptitudes, and work-related personality will be one such topic. Students will develop their knowledge and hands-on skills in selected areas covered in the introductory courses of Industrial Psychology and Organizational Psychology. Students will each do an independent empirical research project. Assessment: 100% coursework.

Prerequisite: PSYC1004; and either PSYC0033 or PSYC0044.

PSYC0054. Human neuropsychology (6 credits)

This course introduces to you the basic principles of *Neuropsychology*. The objectives of the course are: (1) to introduce basic concepts of neurophysiology and functional neuroanatomy, (2) to review models describing different cognitive functions discussed in this course, and (3) to introduce the concept of brain-behavior connection via reviewing the neuro-anatomical and neuropsychological mechanisms underlying some common brain disorders. Students will each do an independent empirical research project. Assessment: 100% coursework.

Prerequisites: PSYC1004 and PSYC0022.

PSYC0055. Research internship in psychology I (3 credits)

Students will have an opportunity to learn to do research as an intern in ongoing empirical research projects under a teacher's supervision in the Department of Psychology. The internship includes participating in lab meetings or meeting individually with the supervisor, reading relevant theoretical and empirical articles, assisting in ongoing empirical research projects, and writing an internship report. Information about research projects offering internship placements and application procedure will be available in the Psychology Department webpage. Internship I and II can be done with the same supervisor or two different supervisors. Assessment: 100% coursework.

PSYC0056 Research internship in psychology II (3 credits)

Please refer to Research internship in psychology I for the course description. Internship I and II can be done with the same supervisor or two different supervisors. Assessment: 100% coursework.

PSYC0057. Internship in applied child development (6 credits)

The internship will provide first-hand experience working with young children as teachers' aides and opportunities for observing children. In addition, you are to enroll concurrently in a seminar programme focusing on your ongoing field experiences, Educational/Social/Legal Policy, and Advocacy. Assessment: 100% coursework.

Prerequisite: PSYC0009 and EDUC8001 and EDUC8002

PSYC0058. Cultural psychology (6 credits)

The course will survey research topics concerning how psychological processes influence culture and vice versa. Classes will be conducted in a seminar format in which students will actively participate in discussions of the topic of the week. One day before each class, each student will turn in no more than three discussion questions pertaining to the assigned readings and the class will be organized around the questions and issues raised by the students. Questions will be graded for thoughtfulness and insightfulness. To encourage independent thinking, students will write a review paper, which will then form the basis for a research proposal. For students to fully benefit from the course, some prior knowledge is needed. Assessment: 100% coursework.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC0020

PSYC0059. Current issues in applied developmental psychology (6 credits)

This course will explore application of developmental psychology to issues pertaining to improving the well-being of children and their families. Topics include: The quality of child care, patterns and ranges of normal child behaviors, child-rearing practices, developmentally challenged children, legal, and public-policy issues. Assessment: 100% coursework

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003.

(For candidates admitted in or after the academic year 2006-2007)

PSYC0060. Research and quantitative methods in psychology (6 credits)

This course is designed to prepare students to conduct independent empirical research. It will build on PSYC1004 "Introduction to Quantitative Methods in Psychology" to cover more advanced quantitative methods commonly used in Psychology (e.g., multivariate analysis, effect size and power analysis) and major topics in research design (including research ethics) and write-up. The use of computerized statistical tool will be introduced in tutorials. Assessment: 100% coursework.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC1004.

PSYC0061. Advanced issues in perception (6 credits)

An advanced course that explores findings from both recent and classical research on human perceptual systems. Specific attention will be given to - though not limited to - computational models, psychophysical findings, neurobiological findings. Students will each do an independent empirical research project.

Assessment: 100% coursework.

Prerequisites: PSYC1004 and PSYC0051; or with permission of the instructor. (BCogSc students exempt from PSYC1004).

PSYC0062. Introduction to Psychopathology (6 credits) (formerly PSYC0034)

This course will provide a broad exposure to both theory and practice in clinical psychology. It is a foundation course in mental health, counselling and other psychological services. Also it will provide the information and understanding required to make informed decisions about how to cope with the many social problems connected with mental disorders. A wide array of types of mental disorders will be examined. Important themes will be emphasized such as the continuum in behaviour from mental health to mental illness, the diathesis-stress and nature-nurture models and epidemiology. Assessment: 70% coursework, 30% examination.

Prerequisites: PSYC1001 or PSYC1002 or PSYC1003.

PSYC3001. Thesis in psychology (6 credits)***(For candidates admitted in or before the academic year 2004-2005)***

(For psychology major) An empirical investigation of a psychological problem. The study should be complete in itself; for example it may consist of the replication of a study done elsewhere in order to throw further light on the discussion by bringing in material which is available because of the particular situation in Hong Kong; or a basic investigation of a social or experimental phenomenon which has attracted the attention of the investigator. Weekly lectures will cover theoretical and practical issues in planning, conducting, reporting, and evaluating research in psychology. Thesis research will be supervised individually by teaching members of the Department. Eligible students will be invited by the Department to apply for admissions into this course. Approval by Departmental Head is required for admissions into this course.

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC0001.

(For candidates admitted in or after the academic year 2005-2006)

(For psychology major) An empirical investigation of a psychological problem. The study should be complete in itself; for example it may consist of the replication of a study done elsewhere in order to throw further light on the discussion by bringing in material which is available because of the particular situation in Hong Kong; or a basic investigation of a social or experimental phenomenon which has attracted the attention of the investigator. Approval by Departmental Head is required for admissions into this course.

(For candidates admitted in the academic year 2005-2006)

Prerequisite: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC0001; and

Co-requisite: PSYC0008 or PSYC0061 or PSYC0052 or PSYC0053 or PSYC0054.

(For candidates admitted in or after the academic year 2006-2007)

Prerequisite: either (PSYC1001 and PSYC1004) or (PSYC1002 and PSYC1003 and PSYC1004); and PSYC0060; and

Co-requisite: PSYC0008 or PSYC0061 or PSYC0052 or PSYC0053 or PSYC0054.

PSYC3002. Advanced research methods in psychology (6 credits)***(For candidates admitted in or before the academic year 2004-2005)***

Weekly lectures will cover theoretical and practical issues in planning, conducting, reporting, and evaluating research in psychology. Students will each do an independent empirical research project; weekly tutorial attendance for research supervision is required. Approval by Departmental Head is required for admissions into this course.

Assessment: 100% coursework.

Prerequisites: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC0001

(For candidates admitted in the academic year 2005-2006)

Students will each do an independent empirical research project; weekly tutorial attendance for research supervision is required. Approval by Departmental Head is required for admissions into this course.

Assessment: 100% coursework.

Prerequisites: either PSYC1001 or both PSYC1002 and PSYC1003; and PSYC0001.

(For candidates admitted in or after the academic year 2006-2007)**PSYC3006. Independent study in psychology (6 credits)**

Students will each do an independent empirical research project; weekly tutorial attendance for research supervision is required. Approval by Departmental Head is required for admissions into this course.

Assessment: 100% coursework.

Prerequisite: either (PSYC1001 and PSYC1004) or (PSYC1002 and PSYC1003 and PSYC1004); and PSYC0060.

Department of Social Work and Social Administration

Unless otherwise specified, the examination for each 6-credit course consists of a two-hour written examination paper. The final grading will be determined by performance in the examination and an assessment of coursework in the ratio of 60:40. Teachers concerned will announce at the beginning of each semester the assessment ratio for courses not assessed in the 60:40 examination/coursework ratio.

Semesters III to VI**SOWK0002. Working with children and families (6 credits)**

This course adopts a developmental perspective in understanding children. Common behaviour problems in children (such as emotional manifestation, oppositional behaviour, conduct disorder, school problems) will be addressed. The principles and procedures of particular intervention theories relevant to the Hong Kong situation will be examined.

SOWK0007. Working with families (6 credits)

This course will examine the concept of a 'family perspective' and assist students in gaining an understanding of the major approaches to working with families. Theories on family, methods of assessment, and a range of strategies and techniques for effective intervention with the family as well as their applicability to the local context will be considered.

SOWK0009. Issues and interventions in mental health settings (6 credits)

This course aims to enhance the students' basic understanding of mental illness by focusing on alternative definitions of mental illness, cross-cultural considerations, etiology, and interventive strategies. The diversity of roles of the professionals in team work with the mentally ill within the Hong Kong context will also be examined.

SOWK0011. Issues in health care and rehabilitation settings (6 credits)

This course gives students a basic understanding of the relationship between health, handicap and rehabilitation, public acceptance and social stigma, so as to enable the students to work more effectively in health care and rehabilitation settings.

SOWK0012. Social welfare in China (6 credits)

The course explores the philosophies, organization, techniques and development of social welfare provision in China. The work of the service organizations such as Civil Affairs Bureau, Street Offices, Unions, Federation of Women, and Communist Youth League would be studied. Issues of social security, youth policy, women status, child care, the care of the elderly people, the physically and mentally handicapped and professional training would be discussed.

SOWK0013. Social work practice with selected target groups or in specific settings (6 credits)

This course will focus on the practice of social work with selected target groups such as children, youth and delinquents, alcoholics and drug addicts, or in specific settings such as school, hospital, youth centres and correctional facilities. For each group or setting, attention will be focused on gaining a comprehensive understanding of the nature of the problems encountered and the role of social work in solving such problems.

SOWK0014. Health administration (6 credits)

The theme of this course will be the importance of taking into account the cultural, economic, social and physical environments when examining matters to do with the provision of health care. The aim will be to introduce students to the issues of planning and priorities, financing and resource allocation, management principles, arguments concerning quality versus quantity, community health and public education as they relate to health administration.

SOWK0020. Oncology, palliative and hospice care (6 credits)

Professionals in the field of medical and health settings are expected to be competent in oncology care, palliative and hospice care. The students will learn about the medical, psychological, social, spiritual and policy aspects of care for cancer patients and persons with terminal illness. Cultural, sociological and traditional approaches to death and dying as well as bereavement will be explored through student projects.

SOWK0023. Social policy issues in Hong Kong (6 credits)

The course will examine the issues of social policy in Hong Kong including privatization of welfare services, the impact of ideology of welfare on welfare development in Hong Kong, the issue of equity and equality in welfare provision, community care and service needs of the new arrivals from the mainland. Different theories of welfare will be discussed in relation to local welfare issues.

SOWK0028. Selected topics in social work practice (6 credits)

The course aims at developing knowledge and skills relevant to the understanding and helping of focused target populations, the selection of which will be based on the special nature of specific client groups, problem areas or service settings.

SOWK0029. Comparative social administration (6 credits)

The course is designed to introduce the comparative study of social policy in selected countries in the world, and to examine the provision of social development programmes and social services for analysis and evaluation in cross-country case studies.

SOWK0030. Law and social administration (6 credits)

The course covers two areas: (a) 'Professional Law': human service workers and lawyers, different approaches to the same problem, probation officers, social workers and the courts, children and the law, care and supervision, compulsory measures, adoption law and procedure; the mentally ill and the handicapped; and (b) General Legal Studies: an outline of the legal system and the administration of law in Hong Kong; Family Law; marriage, divorce, maintenance, rights in the matrimonial home; Housing: homelessness and the law, landlord and tenant (private sector and public sector), housing and public health law and practice; legal aid and legal advice schemes in Hong Kong.

SOWK0033. Working with youth at risk and juvenile offenders (6 credits)

This course will focus on the various approaches in working with delinquents and young people experiencing emotional or behavioural problems. To facilitate skills development, emphasis will be placed on experiential learning through the use of simulated exercises, games and role-play. Throughout the course, case and group examples will be drawn from a variety of local practice settings-probation, residential facilities for juvenile offenders, correctional services, outreach and school social work.

SOWK0034. Youth crime and juvenile justice issues (6 credits)

This course will begin with a critical review of the current state of theory and research on youth problems and delinquency. It will then go on to evaluate existing policies and services directed at youth at risk and juvenile offenders in Hong Kong. Finally it will explore current issues in the field of youth policy and juvenile justice, particularly the overseas development of new programme initiatives. Special emphasis will be given to the relevance of these issues and programmes within the Hong Kong context.

SOWK0037. Human sexuality (6 credits)

This course tells you everything you always want to know about sex but are too afraid to ask: Whom you want to have sex with and why? What would you do in sex and where and when would you do it? Who's on your mind when you think about sex, Leon Lai or Shu Kei? Which is more pleasurable, heterosexual sex or homosexual sex? What is the best sex that you've ever had? Why are having sex with yourself and masturbation acts of revolution? What is pornography – a stimulant to or substitute for sex? Who has a better claim to authority on sex, your family doctor, your lecturer, the host of a radio phone-in program on sex or a sex worker in the street?

SOWK0044. Medical knowledge for social sciences students (3 credits)

Chronic illness, pain, accidents, and terminal illness are a major source of stress in contemporary society. It is important for students to be knowledgeable about the human body and its common illnesses. The objectives of this course include: to familiarize students with the disease patterns in Hong Kong, to study common diseases which present major health hazards, and to acquire a basic understanding of the medical language. No prior knowledge in medicine is required. A basic understanding of human biology will be an advantage. Assessment: 100% coursework.

SOWK0046. Socio-cultural context of aging (6 credits)

The aging experience and age-related changes in physical, mental, and social functioning vary across

different cultures and societies. This course examines the psychological, environmental, and societal factors accompanying and shaping the process of aging with a special emphasis on examining the Chinese and Western cultures. Specifically, the course focuses on how unique aspects of a particular culture or society determine physical, mental and social well-being in old people. Normal and pathological changes in physical, mental, and social functioning associated with aging will be examined, and the implications of such factors as ageism, economic deprivation, exits from social roles, and being widow, and for the well-being of older adults will be addressed. The roles of family caregivers and human service providers, in the enhancement of the well-being of the elderly will also be explored.

SOWK0050. Government and politics of social services in Hong Kong (6 credits)

This course explores the evolution of social policy in Hong Kong. Alternative approaches to understanding the political, economic, and social dynamics that influence social policy and the implications of these dynamics for social reform will be considered. The formation of political responses to human problems and the impact of such responses on social policy will be discussed with reference to the constitution, the legislature, the Chief Executive and the Executive Council, political parties, pressure groups and the electoral system.

SOWK0051. Information and communication technology in human services (6 credits)

This course is designed to introduce students to the utilization of information and communication technology in human service settings. The major areas are (a) a review of the trends in the human service agencies' use of information and communication technology; (b) an exploration of software frequently used in the human services; and (c) the ethics of IT usage in the human services.

SOWK0053. Evaluation of social services (6 credits)

This course will introduce students to a variety of approaches used to evaluate social services. Students will learn how evaluation techniques can help social service personnel respond to the growing demand for accountability, given that appropriate measures have been taken to collect and analyze data in order to inform decision making. These techniques include: evaluability assessment, designing goals and objectives, choosing an evaluation approach and developing process and outcome measures. Through the course materials, students come to understand the necessity of grounding evaluation approaches within an organization context and the practical issues that arise while implementing an evaluation and using evaluation results. Assessment: 100% coursework

SOWK0054. Gender and society – a policy perspective (6 credits)

Men and women's experience of the social world is significantly different but gender as a social construct is frequently overlooked both in academic discourse and in policy planning arenas. Gender effects are clear in health, education, employment, housing, social security provision, political activity and family (both in terms of private relations and family policy). This course will examine the different theories of gender discrimination, the consequent effects on social, economic and political life and attempt to answer the question 'what is to be done about it?'

SOWK0055. Management in human service organizations (6 credits)

The aim of this course is to enable students to understand the recent business-oriented reforms in human service organizations. Human service organizations provide welfare, education and medical services to their users. The dynamics of quality improvements, strategic planning, monitoring and control, management information system, performance appraisal, supervision, stress management, teamwork,

financial management and change are included.

SOWK0057. Aging and society (6 credits)

This course is to study the ways in which social and cultural factors enter into the aging process. The practical and immediate effects of aging on society are examined. The course provides a comprehensive description of the dimensions of aging. The goal is to provide a holistic view of aging and to point to the ways in which the personal, social and structural levels of the process interact to shape the daily life of the elderly. With these understandings, the ways to deliver appropriate services to the elderly are discussed.

SOWK0058. Managing people in human services (6 credits)

This course introduces concepts for the understanding of organization behaviour and emphasizes on the application of these concepts and the skills in managing people in non-profit making organizations. This course is particularly suitable for students who have not taken any management courses before but will be soon required to take up people management responsibility as a team leader or supervisor in the course of their own professional career development. The topics will include basic concepts on management functions, purposes of a managerial position and the roles of a manager; and skills in managing subordinates including motivation, morale, leadership, coaching, performance management and disciplinary actions.

SOWK0060. Career skills training (6 credits)

Success in one's career is one of the most important life tasks for most people. Besides teaching students the necessary knowledge and practice of core career skills, this course also trains students to design and conduct career skills programmes. Through participation in this course, students will be able to master the theories and skills of career planning, understand the relationship between labour market dynamics and job searching, analyse the effect of social, economic and political changes on the job market. Through understanding the social psychology of career aspects, students will become more sensitive to human dynamics in the work setting. Assessment: 100% coursework.

SOWK0061. Financial development and management for social service organizations (6 credits)

This course introduces and examines concepts and practices critical to good financial management of social service organizations. The focus is on preparing students to understand the financial activities and reports essential to management and to analyze and use financial information in planning, budgeting and measuring results to promote the organization's mission and goals. Fund-raising will also be discussed.

SOWK0062. Special topics in policy study (6 credits)

Any special topics in policy study that reflect current topical and changing needs in the community.

SOWK0063. Special topics in administrative study (6 credits)

Any special topics in administrative study that reflect current topical and changing needs in the community.

SOWK0064. Special topics in research study (6 credits)

Any special topics in research study that reflect current topical and changing needs in the community.

SOWK0065. Understanding and working with young people (6 credits)

This course examines the developmental characteristics and needs of young people and their actualization in the local context. Special focus is put on understanding the contemporary local youth culture and how it reveals the needs of the young people. Major models and concepts in youth work are introduced. Working skills with young people implied from these models and concepts are also introduced. This course is especially suitable for students who intend to join the fields that work with young people, e.g. social work, teaching, church, entertainment, etc.

SOWK0066. Care management (6 credits)

Care management is a major practice strategy to promote effective service delivery to diverse target populations. It is based on the notion that human service practitioners often work with people who have multiple needs. The major outcomes of care management are better integration of services provided by a cluster of organizations and community of care. This course covers the role of care management in the human services; the method and functions of care management in both direct and indirect services; and the monitoring and evaluation functions of care management practice.

SOWK0068. Social skills training for human service personnel (6 credits)

This course will consider the theoretical foundation of social skills training. The relevance of social skills training to different areas of human service practice including teamwork and staff training will be discussed. Skills in working with individuals and groups in human service settings will be practiced. The course will be run in form of lectures, demonstrations, class discussion and exercises. Assessment: 100% coursework.

SOWK0069. Counselling in health care settings (6 credits)

Counselling approaches used in health care such as crisis intervention, grief work, cognitive behavioral intervention, support groups, art therapy, psycho-education skills, bereavement counselling, pastoral care and peer counselling will be examined. Students will be provided with experiential training on skills/ techniques in working with patients in hospitals and in the community.

SOWK0071. Religions and superstitions in everyday life (6 credits)

Using a social psychological framework, the course examines practices commonly observed in Hong Kong and elsewhere, such as church going, the worshipping of gods at home, in the street and in temples, visits to shamans and ceremonies concerned with the dead. These practices are then placed in the wider framework of beliefs and knowledge about the world and about ourselves. The growth and development of belief and knowledge in the individual and in society is explored, in an attempt to understand why people do what they do. All of it leads inevitably to a discussion of science and religion in its historical and current perspectives

SOWK0074. Teachers as counsellors (6 credits)

As many students might join the teaching profession when they graduate, a purpose of this course is to help course participants understand the developmental characteristics, needs and struggles of students

(children and adolescents). To understand the counselling process and acquire necessary skills in offering counselling to students are also main focuses of this course. It is expected that through the course, participants can be more equipped to be effective helpers in working with students to cope with their school life.

SOWK0075. Violence in intimate relationships (6 credits)

The issue of violence in intimate relationships (e.g. domestic violence & violence in dating) is examined through multi-lenses. The course introduces the nature of the different kinds of violence in intimate relationships. The knowledge and skills necessary to understand the dynamics of different kinds of violence are taught. How to assess the violent issues, how to identify appropriate intervention strategies and how to apply the related skills in the working situation are introduced. Particular emphasis is given to the relationship between violence and gender issues. Assessment: 30% readings and participation, 70% term paper.

SOWK0076. New age health care in community (6 credits)

An innovative course aims at promoting holistic health care concepts and intervention models in local context. Topics include: cultural concepts on health and illness, Chinese help-seeking behaviors; concepts on psychosocial needs and intervention, total patient care, team work in health care setting; gender perspectives and health care: working with powerless women and couples; working with sick children and families; community rehabilitation, self-help movement and patient's rights; geriatric health care, care-giver supports; grief and bereavement, death and hospice care; working with individuals / casework approach; expressive art and group approach; use of emotional healing skills, alternative medicine approaches; research agenda and methods in health care setting.

SOWK0077. International perspective in human services (6 credits)

This course is a joint venture with universities from other parts of the world. The objective of the course is to promote cultural exchanges and appreciation of diversity. The course is designed to provide a forum for discussion and interaction among students from different races and cultural backgrounds. Students will be visiting other participating universities or vice versa. It is expected that through the joint projects which will be developed during the course, students will gain better awareness of how each culture is constrained or aided by their values, beliefs, norms, and attitudes.

SOWK0084. Theoretical foundations in social policy and planning (6 credits)

This course is designed to examine various models for the analysis of social policy, as well as basic concepts of social planning, programme design and implementation. Selected social policy issues in Hong Kong will be critically analyzed to further the understanding of the factors contributing to the development of social service provision systems to deal with these issues.

SOWK0085. Social service research I: methodology (6 credits)

This course is designed to provide a basic grounding in research methodology and to illustrate the major concepts, methods and goals of social service research.

SOWK0086. Social service research II: analysis and utilization (6 credits)

The objective of this course is to enable students to apply and interpret various methods in data analysis, as well as to enable them to critically analyze research reports and make intelligent use of research

findings in social policy planning and administration.

Prerequisite: SOWK0085.

SOWK0087. Social service research project (6 credits)

In this course, students are going to conduct a selected group research project of their interest. Under the guidance of the teacher, students can learn and experience the whole research process including: defining research objectives, identifying research questions, designing research methodology and instrumentation, collecting data, analysing data, writing up research report and disseminating the research results. Assessment: 100% coursework.

SOWK0088. Body politics (6 credits)

Are you forever on diet or frantically toning up your muscles? Are you attracted to tattoo, piercing, breast transplant or other forms of body manipulation? Do you dye your hair, keep it long or shave it clean? Do you desire a body like yours or of the other sex? How private is your body? Did your parents ever beat you up to quiet you down? Do you detest torture while admiring extreme sporters? If you believe in body language, do you know when your body is silenced? Does a handicapped, deformed or ageing body disturb you? And a corpse? Who has control over your body: your family, your lover, your doctor, or the Government? This course provides students with insights in the meaning of body as an object of inquiry. If a body is a playground providing us with sensational pleasures, it is also a battlefield where forces of domination are constantly at war. The complex ways in which our bodies are manipulated, abused and used as source of power will be explored. Guided by a diversity of classical and contemporary perspectives, this course helps you search your soul by getting inside your body.

SOWK0089. Family and society – a policy perspective (6 credits)

This course will study the changing functions of the family system as the most fundamental caring unit in society. Policies affecting the family system, its relation with other social institutions, and measures necessary to strengthen its roles will be discussed.

SOWK0091. Current welfare issues in Hong Kong (6 credits)

The format of this course is problem-based. Students and Course Instructor together identify the current welfare issues (CWIs) at the beginning of the term. For each CWI, the Course Instructor assists the students to identify the learning objectives, locate the relevant learning material, develop understanding in the areas identified, and construct the learning experience. Areas of learning may extend beyond the subject of social welfare to cover economics, politics, public finance, public administration, social psychology, sociology, management. In the first term, the Policy Address of the Chief Executive of the SAR Government may be chosen as one of the CWIs. In the second term, the Budget of the SAR Government for 2000-2001 may be chosen. Assessment: 100% coursework.

SOWK0092. Adventure-Based Counselling: theory and practice (6 credits)

Adventure-Based Counselling (ABC) is a popular contemporary approach employed to work with people in order to assist their building and/or promoting of a positive self-concept, improve their interpersonal relationship and enhance their problem-solving abilities. Although it is especially popular among working with young people, it can also be used in working with different age groups, families and couples. This course aims to introduce the basic theories and practices of ABC and to provide training in some micro skills in conducting ABC sessions. The quality of an ABC facilitator and the ethical considerations in employing ABC to work with people will be discussed in the course. The format of the course includes lectures, seminars and ABC workshops for students to participate and

experience the process.

SOWK0093. Generation Y: youth (sub) cultures (6 credits)

This course explores various youth (sub)cultures, and will be organized around the following topics: (1) body and beauty; (2) club cultures and drugs; (3) sex and the cyber-space; (4) popular and indie music. This course focuses on the insiders' perspective, i.e. the ways in which young people actually experience and make sense of their own activities, while sensitizing students to the historical specificity of the construction of youth as a social category and the politics of representation.

SOWK0094. Human service development, promotion, and evaluation (6 credits)

As the society increasingly emphasizes accountability of human services, the organizations providing such services have to develop, improve and deliver these services in a more cost-effective and cost-efficient way to satisfy the changing needs of the citizens. This course examines the roles of social marketing and market research in the human services through application of the principles and practices learned. This course provides students with some essentials, values, knowledge and skills in human service development, promotion, distribution and evaluation. The students will have the opportunity to develop and apply decision-making and analytical skills relevant to the functions of social marketing and market research within the human service.

SOWK0096. Policy provisions for income protection (6 credits)

This course will discuss the concept of social security, its historical development, and functions in society. Students will be introduced to the planning, financing and administration of the social security systems as they are operated in Hong Kong and elsewhere.

SOWK0097. Information technology and society (6 credits)

This course examines the various issues related to the impact of the development of information and communication technology on modern society. Such issues range from family and interpersonal relationship, organizational changes, social organization, digital divide and politics. Relevant theories, researches, social interventions and social policy will be covered in this semester course.

SOWK2008. Human behaviour and the social environment (II) (6 credits)

This course studies a spectrum of disturbed behaviours, from concepts of normality, abnormality, classification and assessment, to the clinical syndromes: neuroses, psychoses, personality disorders, psycho-physiologic disorders, organic brain syndromes, and mental retardation; sociopathy, sexual deviations and drug abuses; and behavioural disorders of childhood and adolescence.

Prerequisites: SOWK1004. Human behaviour and the social environment (I) or a equivalent course in the area of developmental psychology

SOWK3005. Field practicum/project report (12 credits)

Students may choose to write a project report on a topic of their own choice. The project report should be between 6,000 and 7,000 words in length and should demonstrate the application of some of the knowledge and skills in social administration. Assessment: 100% coursework.

Prerequisites: SOWK0084, SOWK0085 and SOWK0086.

Department of Sociology

Prerequisites requirements may be specified in some courses. In exceptional cases these may be waived by the Head of the Department.

The senior level courses are listed below. Not all the courses listed will necessarily be offered every year.

The final grading for each course will be determined by performance in the examination and an assessment of coursework in a ratio of 40% coursework, 60% examination, unless otherwise specified.

Semesters III to VI

SOCI0001. A history of social theory (6 credits)

This course introduces students to the development of sociological thought in the nineteenth and twentieth centuries.

SOCI0002. Class, wealth and poverty: inequality and injustice in Hong Kong (6 credits)

This course deals with the phenomenon of social inequality. It will cover topics such as theoretical explanations of this phenomenon; the methodological problems involved; different types of social stratification including caste, class, gender and ethnicity; the consequences of stratification on life chances and life styles; and social mobility. A comparative approach will be adopted.

SOCI0003. Contemporary Chinese society (6 credits)

This course attempts to analyse the social system in the People's Republic of China. Sociological explanations of the Chinese Communist Revolution, the process of social reintegration through ideology and organization, the socialist path to modernization, and continuities and discontinuities with social patterns in the past will be discussed.

Prerequisite: None, but SOCI0052 recommended.

SOCI0005. Criminal behaviour (6 credits)

This course focuses on the psychology of criminal conduct and social psychological explanations of individual and group offending. Topics include: psycho-social theories of criminal behaviour; mental disorder and crime; sexual and dangerous offenders; therapeutic communities; forensic psychology; serial offenders; and issues in ethics, treatment and intervention. Assessment: 50% coursework, 50% examination.

Prerequisite: None, but SOCI0071 recommended.

SOCI0006. Critical issues in media studies (6 credits)

This course addresses the issues related to the construction of reality by the media. In recent years, the media have been subject to various criticisms, including negative reporting, tabloid journalism, and ideological biases. These criticisms will be reviewed with particular focus on the extent to which the media can provide an objective and fair representation of reality.

SOCI0007. Cultural studies: themes and perspectives (6 credits)

This course introduces students to theories, methods and studies of contemporary culture. Topics include: the problem of cultural creation under capitalism; the impact of the mass media on children; popular stars

and their fans; women's magazines and the issue of sexism; the consumption behaviour of young people; modernism and post-modernism.

Prerequisite: None, but SOCI0019 and SOCI0015 recommended.

SOCI0008. Culture and society (6 credits)

This course will introduce some of the central concerns of cultural and social anthropology (culture and human nature; the components of culture; the diversity of human cultures and societies; culture and social behaviour; social change) through a study of the theoretical concerns and empirical fieldwork of selected social and cultural anthropologists of the twentieth century.

SOCI0009. Economic development and social change (6 credits)

This course will be concerned with the dynamics and consequences of economic transformation in the developing world, with a particular focus on industrialization in East Asia. We will begin with a brief survey of some of the general theoretical frameworks that have been used to explain development in East Asia, as elsewhere, before moving on to examine particular societies and thematic issues in the light of these general frameworks. The societies to which most attention will be paid will be Japan, South Korea, Taiwan, Hong Kong, Singapore and Malaysia. The thematic issues to be addressed will include the transformative significance of historical conjunctures, free markets, foreign investment, economic cultures and state policy.

SOCI0010. Education and teaching (6 credits)

Formal educational institutions in society will be examined, using the major concepts and theories of sociology. Emphasis is placed on the relationship between education and other important social institutions such as the family, the polity, and the economy. The questions of equality of educational opportunity and the potential role of education in fostering social change will also be analysed. Assessment: 50% coursework, 50% examination.

SOCI0011. Gender and crime (6 credits)

Women who engage in illegal activities typically acquire a 'double deviant status'; they are perceived to be violating legal codes as well as gender proscriptions. Women offenders are not simply the shoplifter or the cocaine addict, but the 'fallen woman', the 'wicked temptress', and the 'immoral mother'. Such views about women offenders have been the basis for their differential treatment under the law and in punishment systems. The purpose of this course is to critically assess these assumptions and the gendered ways of social control policies.

The course is organized into three main sections. The first part of the course will examine the 'facts' on female offenders and theoretical explanations for female delinquency and crime. The next section focuses on women as crime victims, particularly in sexual assaults and domestic violence. The last section of the course traces and compares the development of social control policies (as expressed in the law, the criminal justice system, and corrections) aimed specifically at women offenders in several countries. Assessment: 60% coursework, 40% examination.

Prerequisite: None, but SOCI0071 recommended.

SOCI0012. Gender and society (6 credits)

This course will focus on the social construction of gender and the patterns of inequality that result from this process. Themes to be examined are: biology and destiny; social definitions of masculinity and femininity; sex role socialization; consequences of gender differentiation; theoretical perspectives. In addition, the contribution that social theory has to make to the question of the origins of sex inequalities

will also be examined. Assessment: 50% coursework, 50% examination.

SOCI0013. Gender in Chinese societies (6 credits)

This course focuses on gender issues in Chinese societies: how women and men live out their lives in history and at present in China, Taiwan, Hong Kong and other overseas Chinese communities. It also compares gender issues in Chinese and Western societies, as well as in different Chinese communities.

Prerequisite: None, but SOCI0012, SOCI0011, SOCI0052 and SOCI0003 recommended.

SOCI0014. Globalization, work and industry (6 credits)

This course provides a historical perspective on the transformations in the nature of work during the twentieth century through a focus on changes in corporate organization, technology and production systems, and managerial ideology and practices. It also deals with the impact on the nature and meaning of work of such contemporary developments as new production concepts, the flexible firm, the shift from industrial relations to human resource management and the globalization of production.

Assessment: 25% coursework, 75% examination.

SOCI0015. Hong Kong popular culture (6 credits)

This course examines the major research landmarks in the study of popular culture in modern societies. The theoretical and methodological issues raised will serve as a guide for a series of workshops and field projects which investigate the history, nature and social significance of popular culture in Hong Kong.

Prerequisite: None, but SOCI0043 recommended.

SOCI0016. Hong Kong society (6 credits)

An appraisal of the sociological research that has been done and the further research that needs to be done on Hong Kong society, covering such topics as: demographic structures and processes; kinship, marriage and family; the sociology of economic life; the polity; social stratification; systems of knowledge and belief; the mass media.

SOCI0017. Japanese economic institutions (6 credits)

This course will focus on Japanese economic organizations and the ways they are influenced by Japanese culture and political and social structures. The topics covered include: development of the large corporation, management structures and styles, education and the employment system, the organization of work on the shop-floor, trade unions and industrial conflict, characteristics of small firms, inter-enterprise cooperation and competition, the role of industry associations, business and the state, Japanese enterprises abroad. Assessment: 25% coursework, 75% examination.

Prerequisite: None, but SOCI0018 recommended.

SOCI0018. Japanese society (6 credits)

This course focuses on some salient features of Japanese culture and society. The topics covered in the course are: the nature of Japanese society, culture and national character, family and kinship, social stratification, rural and urban communities, and social problems. Emphasis is also given to comparing Japan with other countries, especially China. Assessment: 25% coursework, 75% examination.

SOCI0019. Life styles and modern culture (6 credits)

This course explores the dynamics of modern society by looking at the manifold styles and life in modern culture. It examines questions on what underlies styles, how choices in life are made, and how cultural spaces are closed and created.

Prerequisite: None, but SOCI0007 and SOCI0015 recommended.

SOCI0021. Marriage and the family (6 credits)

Marriage and the family are viewed comparatively, using historical and cross-cultural data. Included are the impact of industrialization and urbanization on family life, different forms of family organization and the societal conditions under which they occur, theories of mate selection, recent changes in dating and premarital sexual involvement, parenthood, and marital adjustment. Assessment: 50% coursework, 50% examination.

SOCI0024. Modern social theory (6 credits)

This course will be a critical exposition of many of the major trends in modern social theory, linking contemporary movements with older philosophical traditions in an attempt to trace continuities and ruptures in social thought. The course will be concerned with the contributions of behaviourists and social exchange theorists, the efforts of contemporary interactionists and French structuralists, and the post-structuralist enterprise. Assessment: 25% coursework, 75% examination.

Prerequisite: None, but SOCI0001 recommended.

SOCI0027. Politics and society (6 credits)

This course offers a sociological discussion of political power, political institutions, political processes, and political behaviour. Assessment 25% coursework, 75% examination.

SOCI0028. Population and society (6 credits)

The quantity and quality of population have profound effects on a society. The number of people who are born, who die and who migrate within or out of a society are results of decisions and actions taken by individuals or families which are in turn affected by local and international events and policies. Changes in the number and in the characteristics of a population also have far-reaching social, economic and political consequences. On the macro-level, this course will examine the inter-relationship between social, economic and political processes, and the demographic processes of fertility, mortality and migration. On the micro-level, it will investigate the mutual effects between actions of individuals and families, and the larger social and demographic processes. Assessment: 25% coursework, 75% examination.

SOCI0030. Quantitative sociological analysis (6 credits)

This course introduces students to basic concepts and techniques in formulating and testing sociological hypotheses. Real data sets, with special reference to Hong Kong, will be analysed. Assessment: 25% coursework, 75% examination.

SOCI0033. Research project (6 credits)

Students taking 48 or more credits on senior level courses in Sociology may undertake a small research project under supervision by a lecturer. Their proposed project must obtain the approval of a potential

supervisor prior to enrolment. The project report must be submitted prior to May of the academic year of study. Assessment: 100% research report.

SOCI0035. Selected topics in social and cultural anthropology (6 credits)

This course will examine the development of theory and empirical research in one or more selected topics in social and cultural anthropology. The topics to be covered will vary from year to year and will be announced before the beginning of the academic year.

Prerequisite: None, but SOCI0008 recommended.

SOCI0036. Social anthropology of Hong Kong and Guangdong (6 credits)

This course examines the transformation of culture in Hong Kong and compares it with developments in neighbouring Guangdong. It looks at changes in family organization, ritual and popular culture and problems of urban anthropology in Hong Kong.

SOCI0038. Social control (6 credits)

A discussion of the problems of social order and control; basic techniques of social control; control in interpersonal relationship and small groups; the role of ideology and mass media in social control; the uses of conflict in establishing order. Assessment: 25% coursework, 75% examination.

Prerequisite: None, but SOCI0027 recommended.

SOCI0041. Social problems (6 credits)

This course is designed to introduce students to a number of contemporary social problems, social issues, and social concerns. Special emphasis is given to the nature of social problems in Hong Kong.

SOCI0042. Social research methods (6 credits)

The aims of this course are to introduce the basic principles and procedures which form the foundation of social research, to review the main types of research designs and methods of data collection used in social research, and to provide a set of criteria for analysing and evaluating the products of social research. The types of research covered will include participant observation, experimental design, survey methods and documentary analysis. Ethical and political issues in social research will also be discussed. Assessment: 60% coursework, 40% examination.

SOCI0043. Sociology of contemporary culture (6 credits)

This course aims to survey a number of theoretical and methodological approaches to the study of contemporary cultural life. Topics covered will include the production and consumption of mass communication products (TV, films, advertisements, fiction, pop music), spectator sports, leisure patterns and subcultural lifestyles. Assessment: 25% coursework, 75% examination.

SOCI0044. Sociology of economic life (6 credits)

This course deals with the relations between the economic and non-economic aspects of social life. Economic attitudes such as achievement motivations and work ethics, economic processes such as innovation and the establishment of business trust, economic roles such as entrepreneurs and managers, and economic organizations such as family firms and corporations will be examined in their

sociocultural contexts. Assessment: 25% coursework, 75% examination.

SOCI0046. Sociology of law (6 credits)

This course examines the interplay between law and society. It has a strong cross-cultural input, combining sociological, anthropological and historical materials. Students will be introduced to sociological theories of law, and to the theory and practice of law in socialist and liberal societies as well as pre-industrial and developing societies. The course therefore covers the customary, common law and codified legal systems and will examine the connection between legal institutions and social values. Assessment: 60% coursework, 40% examination.

SOCI0047. Sociology of punishment (6 credits)

This course deals with sociological and criminological theories of punishment. It will examine the historical and social context of punishment and look at the changing form of punishment in society. Students will be introduced to current debates on penal policy and corrections within the criminal justice system. Assessment: 25% coursework, 75% examination.

Prerequisite: None but SOCI0071 recommended.

SOCI0048. Sociology of sexuality (6 credits)

This course examines how different cultures and sub-cultures construct their own categories of sexual desire, sexual identity, eroticism and sexualities. It covers theories of sexuality, issues in the cultural construction of sexuality, practices of sexual diversity and media representations of sex. Assessment: 50% coursework, 50% examination.

SOCI0049. The body and society (6 credits)

This course examines the ways in which the human body embodies the key ideas and cultural assumptions in society. It also looks at how major political, social and personal problems are expressed through the body.

SOCI0052. Traditional Chinese society (6 credits)

This course deals with the sociological significance and methodology of the study of the Chinese society. The theme is social integration - how social order was attained in the late imperial period, and how that order disintegrated after the Western impact. Important institutions such as family and kinship, social stratification and mobility, rural and urban organizations, central and local government, religion and other belief systems will be discussed.

SOCI0053. Youth and youth culture (6 credits)

This course explores issues such as the discovery of childhood and adolescence, the development and expressions of youth culture in different societies including the United States, Britain, Japan, Canada, as well as youth cultures in Hong Kong.

SOCI0054. Triads and organized crime (6 credits)

In Hong Kong, Triads are known to have been long involved in the illegal businesses of drugs, gambling, prostitution, loan sharking, debt collecting and smuggling. Triads are also notorious for organized

extortion from legitimate businesses, such as the entertainment industry, street hawking, wholesale markets and minibus services, interior decoration business, the trading of properties, and the film industry. Since Hong Kong Triads are believed to be increasingly active in drug trafficking, human smuggling, and economic organized crime such as credit card fraud, counterfeiting, and money laundering, Western police foresee that Hong Kong Triads are replacing the Italian Mafia as the most powerful criminal organization in the world in the next century. Are these contentions correct? In order to understand what Triads exactly do in different kinds of organized crime, this course is specifically designed to analyse the role of Hong Kong Triads in legal, illegal, and international markets. Assessment: 50% coursework, 50% examination.

SOCI0055. A cultural study of tourisms and tourists (6 credits)

The phenomenal growth of tourism in contemporary societies is of major social and cultural significance. This course introduces students to a cultural study of tourism viewed as a complex social phenomenon connected with social and cultural dynamics. Special attention will be given to Asian and Chinese experiences, not only as guest societies, but also host societies. Assessment: 100% coursework.

SOCI0056. Criminal justice: policy and practice (6 credits)

This course primarily aims to familiarize students with the idea that criminal justice can be viewed as a system consisting of interaction between three main components: police, courts, and corrections. Criminal investigation, arrest, prosecution, trial, conviction, sentence, incarceration, and community supervision will be examined. Attention will also be given to the formation and implementation of criminal justice policy. Students will be afforded the opportunity to explore a number of criminal justice systems found in other parts of the world but special attention will be devoted to the Hong Kong criminal justice system. Assessment: 50% coursework, 50% examination.

Prerequisite: None, but SOCI0071 recommended.

SOCI0060. Fraud, corruption and computer crime (6 credits)

This course introduces students to the nature of crimes committed by white-collar people such as businessmen, government officials, politicians, technicians and professionals. It examines in depth three major types of white-collar crimes: fraud, corruption and computer crime. Assessment: 50% coursework, 50% examination.

SOCI0061. Life styles and religious practices (6 credits)

In response to the highly stressful modern urban environment, there has been a movement towards alternative life style practices that are closely connected to various forms of religious practices. This course explores the reasons for the attractions of these religious practices, how they influence urban life styles, and why individuals and groups are attracted to the movements.

SOCI0062. Media development and cultural change in contemporary China (6 credits)

Economic reform and the rapid improvement of living standards have transformed the social and cultural landscape of contemporary China dramatically. This course introduces students to change in these areas since 1979. It focuses in particular on the rapid development of mass media and the emergence of a consumer culture.

SOCI0063. Multicultural societies and modern identities (6 credits)

This course explores how individuals and groups, through the use of traditional and modern cultural idioms, attempt to negotiate, adapt and create their own identities in modern multicultural societies. Topics to be covered may include multiculturalism and the modern nation state; local, ethnic and global identities; religion and violence; popular culture and modern values; food and identity and intercultural romance, marriage and family. Videos and films will be used as teaching materials.

SOCI0064. Globalization and the information society: myths, facts and emerging patterns (6 credits)

This course will draw upon the most recent social research and undertake a critical examination of the ideas of globalization and information society. Three main areas will be covered: the nature of the knowledge-based informational economy, the ideas of risk, trust, and other economic-sociological aspects of e-business, and the transformations of work and non-work relationships as well as our experiences of time and space in the information age. Assessment: 100% coursework.

SOCI0065. Understanding media studies (6 credits)

This course provides an analysis of the nature, development and impact of communication media in society. It introduces students to the approaches for understanding the role of mass media in society. It also examines a number of substantive issues concerning the actual functioning of modern communication media. Topics covered will include: changing technologies of communication, the ideology, ownership and control of modern media, ideals and practices of journalism, the uniqueness of different media forms like television, cinema, print and the internet, the political impact of media, the social impact of new communication technologies, the regulation of and access to broadcasting, and the globalization of communication media.

SOCI0066. The Asian economic miracles and beyond (6 credits)

This course will examine the Asian economic miracles from the economic, social, and political angles. First, it will analyze the making of the economic miracles by exploring the roles of government policies, family and related social institutions, as well as the global political-economic forces. The relationships between these factors and the 1997 financial crisis will also be examined. Second, the course will look at the impacts of economic development on alleviating income and other forms of social-cultural inequality. Finally, it will address the complex interactions between economic development and political democratization. The course will focus on Hong Kong, Singapore, South Korea, and Taiwan, but it will bring in the experiences of the Mainland China, Japan and other Southeast Asian countries where appropriate.

SOCI0067 Crime and the media (6 credits)

The media plays an extremely influential role in the public's conceptions of crime and order. This course is designed to look at the different ways in which the media shapes our ideas and responses to crime. The course is divided into two main sections. The first half of the course examines representations of crime in different media forms and theoretical explanations for why crime is portrayed in particular ways. The second half of the course focuses on the representation of crime in popular culture, particularly in films and novels. Assessment: 60% coursework, 40% examination.

SOCI0068 Religious movements: peace, nationalism and terrorism (6 credits)

This course examines the emergence of various religious movements in the world today and the psychology of the people involved in these religious movements. It will examine why some religious movements expound on world peace while others advocate religious nationalism and religious

terrorism. It will answer the question: “why are the religious fanatics willing to sacrifice themselves and others in the name of religion”, “are we living in a religiously dangerous world today?”
Assessment: 50% coursework, 50% examination.

SOCI0069. Perspectives on crime and deviance (6 credits)

Building on the introductory course, the course aims to increase both the applied and theoretical aspects of understanding the causes of particular crimes and the remedies deployed to minimize their impact on individuals and society. Topics covered include violent and sex crimes, property crimes, illegal drug use, organized and elite crime, corruption and new crime (e.g. environmental, consumer and computer crime). The second half of the course examines topics in the administration of justice by focusing on the adjudicative process and the role of punishment including: the general rules of evidence; the principles and law of sentencing; and the efficacy and ethics of offender treatment and punishment. Related topics may include issues such as: police and judicial discretion; the sociology of prisons; community and intermediate punishments. Assessment: 60% coursework, 40% examination.

Prerequisite: SOCI0071.

SOCI0070. Chinese identities and global networks (6 credits)

This course will explore the changing experiences and identities of Chinese in a globalizing world. It will examine the formation of Chinese communities and varieties of Chinese identities and representations in various parts of the world. Topics to be discussed include the use of social capital and guanxi networks in their social, economic and political pursuits, their desire to plant new cultural roots in their adopted countries, their sentiments towards their native home villages and ancestral villages in Mainland China, transnational socio-economic linkages and transnational businesses.

This course aims to enhance students’ understanding of the formation of Chinese identities and representations in a globalizing world as well the significance of transnational linkages across socio-political boundary. Assessment: 100% coursework.

SOCI0071. Criminology (6 credits)

The course introduces students to criminology as both an applied and academic discipline. The subject matter of criminology is diverse involving research drawn from many disciplines including medicine, law and sociology. The course begins by focusing on the state of crime in Hong Kong and introduces students to the operations, functions and nature of the various criminal justice agencies involved in the control of crime. The course also provides a general review of the major theoretical approaches and issues in understanding and measuring crime.

The course also provides an applied component which emphasizes the principles and practice of investigative interviewing - a core skill in the criminal justice system. Related topics covered to enhance the context of investigative interviewing include victimology, the investigative process and the role of forensic sciences (corroboration), and the legal rights of the suspect. Students will be required to visit courts, prisoner treatment programmes and participate in interviewing exercises and practicums. Assessment: 50% coursework, 50% examination.

SOCI0072. Policy, governance and training in cultural tourism (6 credits)

This course attempts to provide students with an overview of policy and governance in tourism. It will also provide them with hands-on experience in policy formulation - regarding the creation and interpretation of the issues that are connected to the understanding of cultural tourism. Issues such as ethnicity, the environment, culture and heritage will be studied. Students will be taught to interpret and analyse how tourist gazes are constructed for different types of tourism using the project-based method. Students will also be exposed to social and economic as well as ethical considerations of these creations. Assessment: 50% coursework, 50% examination.

Special Topic in Sociology

This course provides an opportunity for students to study in depth an area of sociology of interest to staff and students. Students should consult the Department for information on the content and prerequisites, if any, of the unit on offer. Assessment: to be announced.

CENTRE OF BUDDHIST STUDIES

BSTC0001. Making sense of Ch'an (Zen) (6 credits)

To many people, Ch'an (禪) has an aura of unspeakable romanticism. This course will examine the position of Ch'an within the more comprehensible framework of orthodox Buddhist Teachings, its development in Chinese history, the patriarchs (祖師) and the influences of Ch'an on Chinese thought and culture. The beauty and function of Ko'an (公案) and Ch'an poetry (禪詩) will also be studied so that students will get a feeling of the unspeakable romanticism. In addition, the practical usage of Ch'an in daily life will be explored: Ch'an and mind development, Ch'an and self-awareness and how to make Ch'an more accessible to modern society. Assessment: 100% coursework.

BSTC0002. Life and Buddhism (6 credits)

Our goal in life, whether it is for personal excellence, financial success or national glory, is in essence a search for happiness, for ourselves and for others. Misguided notions of happiness lead to dire consequences, resulting in suffering and unhappiness for the individual and the community. This course examines how the ancient wisdom of Buddhism teaches us the art of happiness in daily life from the following three aspects: (1) Personal cultivation (topics including the cause for suffering life and happy life, the Buddhist way of living well and dying well, the reality of life, moral causation, Threefold training, and morality in both Mahayana and Theravada traditions), (2) Improvement of human relationship (topics including the four immeasurables, social implication of the five precepts and six perfections) and (3) Improvement of social environment (topics including Buddhist perspective of wealth, Buddhist attitude towards war and peace and Buddhist ideal society). Assessment: 100% coursework.

BSTC0003. Buddhism and contemporary moral problems (6 credits)

BSTC0003. Buddhism and contemporary moral problems (6 credits)

This course is designed to introduce students to the foundations of Buddhist values and ethics, and to apply Buddhist ethics to examine a broad range of contemporary moral problems, for instance suicide, abortion, and euthanasia; money and work; sexuality and marriage; sexual equality; animals and environment; war and peace. Students will be guided to develop critical thinking in understanding and resolving moral dilemmas, and making responsible decisions. Assessment: 100% coursework.

BSTC0004. The art of living (6 credits)

Psychologists have proposed a set of developmental tasks for young adults in western societies which are also applicable for university undergraduate students. They include the following: (a) developing autonomy or independence from parents; (b) sex-role identity; internalized morality; (c) emotional independence and maturity; (d) peer relationships; and (e) career choice and uncertainty in our technological era. This course will examine and discuss how to apply Buddhist wisdom and knowledge of social psychology to enlighten and empower students in four aspects: (a) promoting self-understanding and self-affirmation/exploring the impact of significant people on ones life; (b) establishing and maintaining positive interpersonal relationships with peers and seniors; (c) developing emotional intelligence and well-being to deal with life problems and adversities; (d) exploring the meaning of life; and (e) making responsible moral choices in our pluralistic society. Assessment: 100% coursework.

JOURNALISM AND MEDIA STUDIES CENTRE

Language Studies Courses offered to BJ students

CSSC1001. Practical Chinese language course for social sciences students (3 credits)

This course aims at enhancing students' knowledge and skills in practical Chinese writing in the social sciences. Students will be introduced to simplified Chinese characters, and will be trained to write letters, proposals, reports, press releases and announcements. They will also acquire the skills in making public speeches and presentations. The course involves extensive use of Chinese IT applications. Assessment: 50% coursework, 50% examination.

ECEN1901. Academic English for social sciences (3 credits)

This course introduces students to features of speaking and writing in English in an academic context. Through small group work related to language and disciplinary issues the course develops abilities to produce clear and coherent spoken and written discourse for university study in the social sciences. Assessment: 100% coursework.

ECEN1910. Professional writing for the media (3 credits)

This course emphasizes skills and techniques that contribute to quality writing in English for the general audiences of the media. Through group work and individual exercises, students develop abilities in clear and concise media writing; providing context and attribution for information; using accurate grammar, punctuation and quotation. Assessment: 100% coursework.

JUNIOR LEVEL COURSES

JMSC0101. Principles of journalism and the news media (6 credits)

This course offers an overview of issues in the practice of journalism and in the news media. Through lectures and seminars, students explore how journalists collect, process and deliver information, what makes news, and the inner-workings of media organizations. Assessment: 100% coursework.

JMSC0102. News reporting and writing workshop (6 credits) (This course is not offered to non-BJ students)

This course offers training in basic reporting and writing skills through lectures and intensive in-class and out-of-class assignments that stimulate the experience of working for the news media. Over a range of subjects, students will learn to write clearly, concisely and accurately for the news media under deadline pressure. Assessment: 100% coursework.

SENIOR LEVEL COURSES

Semester III to VI

JMSC0002. News reporting and writing workshop (6 credits)

This course offers training in basic reporting and writing skills through lectures and intensive in-class

and out-of-class assignments that stimulate the experience of working for the news media. Over a range of subjects, students will learn to write clearly, concisely and accurately for the news media under deadline pressure. Assessment: 100% coursework.

Prerequisite: JMSC0101.

JMSC0007. New media workshop (6 credits)

The class provides an overview of the impact of digital media on journalism and related ethical and social issues. The practical element includes hands-on training for the techniques for designing and creating web-based content, including web logs and digital photography. Assessment: 100% coursework.

Prerequisite: JMSC0101.

JMSC0008. Multimedia production (6 credits)

The class teaches the core elements of multimedia storytelling using the latest digital tools developed by professionals. Students learn to merge photography, video, sound, and graphics to produce interactive websites. Assessment: 100% coursework.

Prerequisite: JMSC0101.

JMSC0017. Feature writing (6 credits)

This course offers advanced training in writing feature stories for the media. It aims to enable students to recognize and evaluate quality work and to acquire the skills to do such work themselves. It examines different types of feature stories and shows how good reporting and good writing are essential to producing stories that engage, inform, entertain and perhaps even inspire readers. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0018. Chinese news writing (6 credits)

Students will learn to developing Chinese news writing skills through lectures, reading appreciation and intensive in-class and out-of-class assignments. Course exercises include write breaking news and feature stories for Chinese language news media under deadline pressure. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0019. Media law and ethics (6 credits)

This course presents an overview of problems and concerns relating to media laws, media ethics and ethical issues that affect journalists and journalism profession. While the lectures and coursework focus on Hong Kong, they also examine key global developments. Assessment: 100% coursework.

Prerequisite: JMSC0101.

JMSC0025. Journalism traditions (6 credits)

This course offers a comparative study of the traditions and history of journalism as a profession and a practice. It also examines the evolution of modern mass media, including newspapers, magazines, radio, and television, with a special focus on Greater China and Asia. Assessment: 100% coursework.

JMSC0026. Independent study (6 credits)

This course provides for individual projects in journalism conducted under the supervision of an instructor. Students engage directly in either news media production, reporting and writing, or a project closely associated with the contemporary practice of the news media. Assessment: 100% coursework. Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0027. The press, politics and government (6 credits)

This course analyses the role of mass media and other channels of communication in local and international political processes. The course examines the way in which governments communicate through the media, and the role the media play as either independent watchdogs or as tools of the political system. Assessment: 100% coursework. Prerequisite: JMSC0101.

JMSC0033. Literary journalism (6 credits)

This course demonstrates how journalism can rise to the level of quality non-fiction literature. Students will read works of recognized quality produced in English in Asia and abroad, and analyze why they succeed on a literary level. The class will identify the tools and techniques writers employ to construct evocative and enduring true stories. Over this journey, students will become better readers and better writers. Assessment: 100% coursework. Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0034. Covering China (6 credits)

The course introduces students to the social, political and economic issues of contemporary China from the perspectives of working journalists. What are the stories and how do reporters overcome the obstacles of doing these stories? The course will also give an overview of the state of the media in China. Assessment: 100% coursework. Prerequisites: JMSC0101.

JMSC0037. Advanced Chinese news writing (6 credits)

This course is designed for students interested in pursuing an in-depth understanding of the writing craft in Chinese. Students will be introduced to enterprise reporting and writing; essays and commentaries writing. Assessment: 100% coursework. Prerequisites: JMSC0101, JMSC0102 or JMSC0002 and JMSC0018.

JMSC0038. Visual journalism (6 credits)

This class provides a theoretical and practical examination of visual communication processes related to desktop publishing, photography, layout, design, and Web information products. It also provides a hands-on-element, covering the use of digital tools to create logical graphical elements and presentation pages for disseminating news in print and online media. Assessment: 100% coursework. Prerequisite: JMSC0101.

JMSC0042. International news (6 credits)

This course will introduce students to some of the major global issues dominating international news. The course will also have a practical element and involve writing assignments. Assessment: 100%

coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0043. Reporting public health issues (6 credits)

This course will provide students with the basic knowledge they require to report on medicine and health in an intelligent, informed way. Participants will learn about the medical profession and how it functions and come to grips with some of the ethical issues and dilemmas health reporters face. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0044. Special topics in journalism I (6 credits)

This course provides for in depth studies on journalism and media issues. Students may be required to participate in seminars, conduct reporting and original research, and write one or more papers. The aim of the course is to develop a significant level of understanding and insight into issues that have an impact on the contemporary practice of journalism and the media. Assessment: 100% coursework.

Prerequisite: JMSC0101.

JMSC0045. Special topics in journalism II (6 credits)

This course provides for in depth studies on journalism and media issues. Students may be required to participate in seminars, conduct reporting and original research, and write one or more papers. The aim of the course is to develop a significant level of understanding and insight into issues that have an impact on the contemporary practice of journalism and the media. Assessment: 100% coursework.

Prerequisite: JMSC0101.

JMSC0046. Introduction to television (6 credits)

This course surveys the television industry in Asia, America and Europe with an emphasis on analyzing the nature of television news and its impact. Students examine the history of the industry, develop research projects on its rapid development in the region, and study, 24x7 News, television and news agendas. Assessment: 100% coursework.

JMSC0051. Television news writing (6 credits)

This course provides intensive training in news writing techniques for television. Hard news, features, current affairs, and documentary writing styles will be examined. Students study issues of story development, language, and the marriage of words and pictures. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0046

JMSC0052. Television news production (6 credits)

This course provides an intensive introduction in techniques of video shooting and editing. During the course, students produce short news stories. The emphasis is on the mechanics of shooting and editing for TV news. The course is taught in an environment of multi-tasking. Limited class size. Assessment: 100% coursework.

Prerequisites: JMSC0101, JMSC0046 and JMSC0051.

JMSC0053. Radio news production (6 credits)

This course focuses on the radio medium. Students learn about radio programming, news production, reporting and writing. Stories are cut on digital audio workstations and radio programmes are produced during the semester. A survey of the influence of radio, locally and internationally is also included. Assessment: 100% coursework.

Prerequisite: JMSC0101

JMSC0054. Public affairs reporting (6 credits)

This course offers advanced training in reporting and writing about government and public policy. Focusing particularly on the government of the Hong Kong Special Administrative Region but on other governments as well, students will explore the issues that arise as the judicial, legislative and executive branches of governments provide services and enforce laws and policies. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0055. Specialised reporting (6 credits)

This course offers advanced training in reporting and writing stories in subject areas or “beats” often covered by reporters with specialty knowledge. Students will learn how to cover such standard geographical beats as the local police department and the courthouse as well as how to develop stories in important subject beats such as law, medicine, the environment and social welfare. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0056. Business and financial reporting (6 credits)

This course covers the basic knowledge and writing skills needed to succeed in the fast-growing field of business and financial journalism. Lectures focus on core skills such as reading financial documents, understanding macroeconomic and microeconomic issues, working with statistics, reporting on companies and covering competition in a global economy.

Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0057. Magazine writing (6 credits)

This course introduces students to reporting and writing for magazines with an emphasis on writing styles, subject matter, organization and voice. It also includes an overview of the magazine industry and the role of magazines in society. Assessment: 100% coursework.

Prerequisites: JMSC0101 and JMSC0102 or JMSC0002.

JMSC0058. Impact of New Media on Society (6 credits)

This course examines the social, economic and legal implications of emerging interactive digital technologies on culture and public life. Topics include online collaboration and relationships; free speech, copyright, file sharing and remix culture; role of virtual communities as a social space; and the impact of wireless technology. Studies will be global in scope, with a particular focus on the adoption of new

media in Asia. Assessment: 100% coursework.

Prerequisites: JMSC0101.

JMSC0059. Covering the environment (6 credits)

The course introduces students to environmental issues that are becoming a major source of public concern such as climate change, air pollution, wildlife and natural resource preservation, and the impact of global trade on the environment. Students will learn to locate sources, understand scientific journals, and produce reports and stories that make environmental issues accessible to ordinary readers.

Prerequisites: JMSC0101.

JMSC0201. Journalism summer internship (3 credits) (This course is not offered to non-BJ students)

This course commits students to minimum eight-weeks internship in a media company during the summer vacation of the first or second year of study. Students must file a report to the programme director within two weeks of the last day of work.

This course will be assessed on a pass/fail basis and will not be counted in the calculation of the CGPA/WGPA or honours classification. However, it will be recorded on the official transcript.

CENTRE OF URBAN PLANNING AND ENVIRONMENTAL MANAGEMENT

URBP0001. Cities and globalization (6 credits)

Cities have played a major role in the development of the global economy. As centres of production, commerce and trade, innovation, and intellectual and cultural exchange, cities have profoundly influenced the world in which we live. As cities occupy such a crucial position in the contemporary world, it is important to understand how they have developed and how they shape our daily lives, especially as the world becomes increasingly globalized. London and New York have occupied a prominent position in the emerging global economy for many decades. These 'world cities', and others like Hong Kong which also aspire to this special status, are key players in the global economy.

This course focuses on the various roles that cities play in the global economy. We will examine the inter-relationships between urban development and globalization processes. Particular attention will be given to the role of 'world cities' and to the debates surrounding their development. We shall look at the experiences of London and New York, as well as other major cities such as Shanghai, Tokyo, Sydney and Paris. We shall also review the current debate concerning the development of Hong Kong as Asia's 'world city': what this might mean and how it might be achieved. Assessment: 100% coursework. One individual term paper of 2,500-3000 words and one group project on an assignment set by the teachers. Teaching mode: 2 hours of formal classes per week, lectures and discussion sessions supplemented by 1 hour of small group tutorials

URBP0002. Creating the sustainable city (6 credits)

Since the publication of the report of the World Commission on Environment and Development in 1987, the principles of sustainable development have been widely adopted within the international community. Agenda 21, which has provided the framework for global action on sustainability, was adopted at the 1992 Earth Summit. Many cities and regions have developed new approaches to planning and managing economic and social development and environmental change using the Agenda 21 model. The World Summit on Sustainable Development in Johannesburg in 2002 placed a new emphasis on action to promote sustainability through partnerships between government, business and civil society. This course will review how the ideas surrounding sustainable cities and regions have developed over the past 20 years. The course will review experiences from different parts of the world to demonstrate how sustainability issues are now incorporated in the development process. We will also focus on the issue of sustainable development in China and Hong Kong, including the work of the Commission for Sustainable Development. We will explore how Hong Kong can plan its future in a more sustainable way to improve the quality of life of its people and to conserve its natural environment and biodiversity. Assessment: 100% Coursework. One individual term paper of 2,500-3000 words and one group project on an assignment set by the teachers

Teaching mode: 2 hours of formal classes per week, lectures and discussion sessions supplemented by 1 hour of small group tutorials

THE INSTITUTE OF HUMAN PERFORMANCE

Introductory/Junior Level

PBSL1111 Kinetic anatomy (6 credits)

This course provides an introduction to the gross anatomy of the human body, with an underlying emphasis on anatomy for human movement. Areas covered usually include the tissue types, the anatomical referencing system, the axial and appendicular skeleton, important nerves, blood vessels and skeletal muscles, and an overview of the heart, lungs and viscera.

PBSL1114 Physiology for human movement (6 credits)

The course is designed to provide students with an understanding of the underlying physiological processes enabling human movement. Topics normally covered include nutrition and energy, skeletal muscle function, neural control of movement, cardiovascular function, respiratory function and endocrine function.

PBSL1120 Foundations of exercise science (6 credits)

This course provides an introduction to exercise science as a field of study by providing an overview of (1) the sub-disciplines that provide the knowledge base for the discipline of exercise science and (2) the professions that depend on exercise science for their practice. Key biological themes related to adaptation and maturation will be used to exemplify the contributions that studies of the anatomical, mechanical, physiological, neural, and psychological and socio-cultural studies of human physical activity can make to human health and performance.

PBSL1121 Physical activity and health (6 credits)

This course investigates the role of physical activity in the maintenance of good physical health and avoidance of disease. The epidemiological evidence for physical inactivity as a causative factor in various lifestyle related disorders is introduced, and the use of physical activity and exercise as effective means of health management is investigated.

Advanced/Senior Level

PBSL2229 Exercise physiology (6 credits)

This course provides an introduction to energy metabolism and the changes that occur in response to physical exercise. Emphasis is placed on the respiratory, cardiovascular and muscular systems, and the principles of exercise testing and prescription. Introductory level knowledge of physiology and biochemistry are highly recommended.

Note: It is highly recommended that students take BIOL1001 “Basic Biochemistry” or BIOL1125 “Introduction to Biochemistry” prior to PBSL2229.

PBSL2233 Biomechanics (6 credits)

Students will be provided with an in-depth understanding of the mechanical principles governing human movement and be introduced to the mathematical modelling of sports movement. The use of various measurement techniques for the biomechanical analysis of sport will be covered so that students should be able to collect data using video analysis and calculate kinematic and kinetic descriptors of human movement.

PBSL2234 Fundamentals of motor control and learning (6 credits)

The human brain has evolved to perform one major function, movement. Species that do not move do not have brains; species with larger brains have more intricate movement repertoires. Thus, the study of movement is an important aspect of understanding how the human brain works and what it means to be human. This course offers a broad overview of human movement control, learning, and development. Theoretical considerations are married with practical experience to promote a thorough understanding of human movement. Emphasis is placed on basic principals and their practical application to sport.

PBSL2235 Measurement and promotion of physical activity (6 credits)

The course aims to develop a critical understanding of how physical activity is assessed. Students will investigate the determinants of physical activity and begin to develop an understanding of how effective interventions can be designed and evaluated.

PBSL2236 Sport and exercise psychology (6 credits)

The course will introduce students to both theoretical and applied aspects of psychological phenomena in sport and exercise. Students will consider a broad range of topics that are key in the field, including unidimensional and multidimensional theories of stress and anxiety in performance, motivation and goal setting, team cohesion, cognitive control strategies and aggression, coaching practice and expert/novice differences. An introductory knowledge of psychology is highly recommended.

Note: It is highly recommended that students take PSYC1001 "Introduction to Psychology" prior to "PBSL2236" "Sport and exercise psychology".

PBSL2200 Summer internship (non-credit bearing)

The summer internship is designed to give students first-hand experience in the working-environment relevant to sport, recreation, health and physical activity. Each student will be placed in an approved institution (minimally 100 hours in total) in summer and will evaluate the appropriate skills and techniques utilized in specific settings.

PBSL3334 Advanced exercise physiology (6 credits)

This course provides a more advanced understanding of the respiratory and cardiovascular adaptations to physical exercise; plus areas of applied work physiology (e.g. diving, altitude, thermoregulation, water balance and ergogenics).

Note: Normally students will have completed PBSL2229 "Exercise physiology" or 12 credits of biological sciences prior to taking this course.

PBSL3335 Advances in skill learning (6 credits)

The course will introduce students to an in depth examination of both theoretical and applied aspects of skill learning. Students will trace the development of the field, from the early work in psychology and sport science through to contemporary developments in movement rehabilitation. A significant component of the course will be dedicated to experimental work, with students expected to develop and test empirically their own hypotheses.

Note: It is recommended that students complete PBSL2236 "Sports and exercise psychology" or 6 credits in psychology before taking this course.

PBSL3336 Exercise prescription and training (6 credits)

The course provides students with hands-on skills for fitness (wellness) coaching for a wide spectrum of athletes/ clientele. Students will explore the primary role exercise plays in the prevention of diseases. The course will provide students with the hand-on skills to plan, design, instruct and monitor a proper training program (exercise prescription) for the client. Basic knowledge of human anatomy and exercise physiology are highly recommended.

PBSL3337 Physical activity and disability (6 credits)

This course provides an overview of the relationship between physical/psycho-social health and physical activity in persons with disabilities. It also explores the current concepts and trends in adapted physical activity.

PBSL3338 Physical activity and diseases of inactivity (6 credits)

Obesity is emerging as one of the greatest threats to world public health. Obesity and several other serious diseases (coronary heart disease, diabetes, osteoporosis and some cancers) all have one thing in common – they are associated with physical inactivity. This course will examine the physiological bases upon which physical inactivity leads to disease and evaluate the role physical activity plays in the prevention and treatment of lifestyle diseases. An introductory knowledge of physiology is highly recommended.

PBSL3339 Public health promotion of physical activity (6 credits)

This course introduces the concepts and methods of using physical activity as a public health tool. The distribution of physical inactivity in the population will be discussed in context with the health of the population, and the evidence base for effective interventions will be reviewed. The course will also review how the evidence base informs national and international policy aimed at promoting physical activity.

PBSL3340 Special topics in exercise sciences (6 credits)

This course introduces the students into a current topic that is of special interest to the field of Exercise Sciences. The course focuses on one target article written by a leading expert in the field of exercise sciences. Instead of learning the facts, student will learn to form an educated opinion on the topic, both orally and in writing. To this end, students will conduct short literature searches to enhance their understanding of the key concepts that underlie the topic.

PBSL3998 Dissertation (12 credits)

The dissertation is an opportunity for students to undertake a significant independent piece of research work; to build and demonstrate knowledge and research skills in a particular sub-area of physical activity and exercise science, and to show ability in writing in the normal academic style of a journal article. Students taking the dissertation should have already completed a statistics course.
