## **Mental Health and Integration: Provision for Supporting People with Mental Illness**

### **Presentation Abstract**

Mental illness is the second largest contributor to years lost due to disability in the Asia-Pacific region. In 2016, The Economist Intelligence Unit developed a unique benchmarking study to examine how countries are doing to treat those living with mental illness outside of institutions and support their integration into the community. Trisha Suresh, research project manager, will present the main findings from this data-driven research programme.
